l. *Description of Project:* The proposed project would consist of the following facilities: (1) An existing concrete overflow spillway dam 22 feet high and 221 feet long; (2) an existing reservoir having a normal maximum surface elevation of 205.2 feet mean sea level, a surface area of 64.5 acres, and a storage capacity of 323 acre-feet; (3) two existing penstocks 20 feet long and 12 feet in diameter; (4) an existing powerhouse containing two existing generating units with a total installed capacity of 3,200 kW; (5) an existing 11.5-kV transmission line 0.1 miles long; and (6) appurtenant facilities. The existing dam is owned by the Western Massachusetts Electric Company. The applicant estimates that the average annual generation is 15,397 MWh. The applicant estimates that the cost of the studies under permit would be $115,500.

m. *This notice also consists of the following standard paragraphs:* A8, A10, B, C, and D2.

16 a. *Type of Application:* Preliminary Permit.

b. *Project No.:* 10745–000.

c. *Date Filed:* March 13, 1989.

d. *Applicant:* Robert Hoe.

e. *Name of Project:* Braendly Project.

f. *Location:* On the Fishkill Creek in Dutchess County, New York.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Mr. Robert Hoe, 737 Cornelia Place, Philadelphia, PA 19118, (215) 735–1772.

i. *FERC Contact:* Steven H. Rossi, (202) 376–9814.

j. *Comment Date:* June 6, 1989.

k. *Description of Project:* The proposed project would consist of: (1) An existing dam, approximately 130 feet long and 18 feet high, constructed of cut stone with a concrete cap and having a spillway section and two-foot-high flashboards to an elevation of 121.5 feet m.s.l.; (2) a reservior having minimal pondage; (3) a new intake structure, at the right river bank, with gates and trashracks; (4) a new steel penstock, 8 feet in diameter and approximately 400 feet long; (5) an existing powerhouse containing a new turbine-generator unit with a rated capacity of 925 kW; (8) a tailrace returning flow to Fishkill Creek approximately 350 feet downstream of the dam; (7) a 13.8-kV transmission line, approximately 50 feet long, connecting to existing lines; and (8) appurtenant facilities.

The applicant estimates the average annual generation would be 3,300,000 kWh. The applicant estimates that the cost of studies under permit would be $10,000.

1. *Purpose of Project:* Project power would be sold to Central Hudson Gas and Electric Company.

m. *This notice also consists of the following standard paragraphs:* A5, A7, A9, A10, B, C, and D2

Standard Paragraphs

A3. *Development Application*—Any qualified devclopment applicant desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, a competing development application, or a notice of intent to file such an application. Submission of a timely notice of intent allows an interested person to file the competing development application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permits will not be accepted in response to this notice.

A5. *Preliminary Permit*—Anyone desiring to file a competing application for preliminary permit for a proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application. A competing preliminary permit application must conform with 18 CFR 4.30(b)(1) and (9) and 4.36.

A7. *Preliminary Permit*—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before the specified comment date for the particular application, either a competing development application or a notice of intent to file such application. Submission of a timely notice of intent to file a development application allows an interested person to file a competing application no later than 120 days after the specified comment date for the particular application. A competing license application must confirm with 18 CFR 4.30(b)(1) and (9) and 4.36.

A8. *Preliminary Permit*—Public notice of the filing of the initial preliminary permit application, which has already been given, established the due date for filing competing preliminary permit and development applications or notices of intent. Any competing preliminary permit or development application or notice of intent to file a competing preliminary permit or development application must be filed in response to and in compliance with the public notice of the initial preliminary permit application. No competing applications or notices of intent to file competing applications may be filed in response to this notice. A competing license application must conform with 18 CFR 4.30(b)(1) and (9) and 4.36.

A9. *Notice Intent*—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, include an unequivocal statement of intent to submit, if such an applicant may be filed, either (1) a preliminary permit application or (2) a development application (specify which type of application), and be served on the applicant(s) named in this public notice.

A10. *Proposed Scope of Studies Under Permit*—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit would be 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on the results of these studies, the Applicant would decide whether to proceed with the preparation of a development application to construct and operate the project.

B. *Comments, Protests or Motions to Intervene*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, 385.211, 385.214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. *Filing and Service of Responsive Documents*—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. An additional copy must be sent to Dean Shumway, Director, Division of Project Review, Federal Energy Regulatory Commission, Room 203–RB, at the above-mentioned address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D1. *Agency Comments*—States, agencies established pursuant to federal law that have the authority to prepare a comprehensive plan for improving, developing, and conserving a waterway affected by the project, federal and state agencies exercising administration over fish and wildlife, flood control, navigation, irrigation, recreation, cultural or other relevant resources of the state in which the project is located, and affected Indian tribes are requested to provide comments and recommendations for terms and conditions pursuant to the Federal Power Act as amended by the Electric Consumers Protection Act of 1986, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88–29, and other applicable statutes. Recommended terms and conditions must be based on supporting technical data filed with the Commission along with the recommendations, in order to comply with the requirement in section 313(b) of the Federal Power Act, 16 U.S.C. 8251(b), that Commission findings as to facts must be supported by substantial evidence.

All other Federal, state, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the statutes listed above. No other formal requests will be made. Responses should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the applicant. If an agency does not respond to the Commission within the time set for filing, it will be presumed to have no comments. One copy of an agency's response must also be sent to the Applicant's representatives.

D2. *Agency Comments*—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Dated: April 19, 1989, Washington, DC.

Lois D. Cashell,

Secretary.

[Docket No. CI89–348–000, et al.]

Natgas U.S. Inc., et al.; Applications for Blanket Certificates With Pregranted Abandonment

April 19, 1988.

Take [1] notice that each Applicant listed herein has filed an application pursuant to section 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for a blanket certificate with pregranted abandonment authorization for an unlimited term, all as more fully set forth in the applications which are on file with the Commission and open for public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before May 9, 1989, filed with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

VOL 54 ISS 78 AP 25 1989 UMI

385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Lois D. Cashell,

Secretary.

Docket No.	Date filed	Applicant
CI89-348-000	3-24-89	NATGAS U.S. Inc., 500, 707 Eighth Avenue SW., Calgary, Alberta, Canada, T2P 3V3.

BILLING CODE 6717-01-M

[Docket No. TQ89-4-29-001]

Transcontinental Gas Pipe Line Corp.; Filing

April 19, 1989.

Take notice that on April 10, 1989, Transcontinental Gas Pipe Line Corporation (Transco) filed a letter to supplement its March 31, 1989 filing in Docket No. TQ89-4-29-000, and to request that the Commission order the suspension of the recovery of the remaining uncollected balance of certain "transition gas costs" effective May 1, 1989, pending the outcome of the ongoing litigation in Docket Nos. TA85-3-29-000, *et al.*, because a Stipulation and Agreement in Docket Nos. RP88-68-000, *et al.*, filed by Transco on April 3, 1989, (Agreement) provides for, among other things, suspension of the recovery of Transco's currently effective transition gas cost surcharge of 15.3 cents per dt, and commits the parties to enter into negotiations no later than May 1, 1989 in an attempt to achieve a settlement of the transition gas cost proceeding.

Transco states that on March 31, 1987, it filed its regularly scheduled, semi-annual PGA in Docket No. TA87-4-29-000 to be effective May 1, 1987. Transco states that in that filing it proposed to recover its then-remaining "transition cost" balance over a three-year period commencing May 1, 1987.

Transco states that the Commission accepted its proposal for a three-year amortization for recovery of the transition cost balance, granted any necessary waivers, and permitted it to take effect as of May 1, 1987. Transco points out that the Commission stated that such recovery is to be subject to refund and to the outcome of the proceedings in Docket Nos. TA85-3-29-000, *et al.*

Transco states that by May 1, 1989, it will have completed the first two years of the three-year collection period for its transition gas costs. For the annual period commencing May 1, 1989 (which includes the instant PGA period), Transco anticipates making very few CD sales. Transco points out that this is a result of the Agreement which accords Transco's firm sales customers 100 percent conversion rights to firm transportation service for a minimum one year period. Transco states that all but two of its major customers are signatories and those two also may eventually decide to joint the Agreement. Transco states there could be few, if any, CD customers remaining on its system during the term of the Agreement. Transco points out that it would be unfair to the remaining CD customers, or unfair to Transco if there are no remaining CD customers, to provide for the third year of collection of Transco's transition cost balance at this time.

In view of the foregoing, Transco requests that the Commission order:

(i) The suspension effective May 1, 1989, of Transco's collection of its transition gas costs balance;

(ii) That such suspension preserves Transco's right to reinstitute, after notice to the Commission and the parties, the third year of such collection subject to the outcome of the litigation in Docket Nos. TA85-3-29-000, *et al.*; and

(iii) That Transco be entitled to accrue interest effective May 1, 1989 on 50 percent of the transition cost balance of March 31, 1989.

Transco requests that the Commission grant any waiver of its regulations which may be necessary in order that the requested suspension be made effective May 1, 1989 without prejudice to Transco's right subsequently to reinstitute collection of its transition gas costs balance in the manner described above.

Transco states that it is serving this letter to all its customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure [18 CFR 385.214, 385.211 (1988)]. All such motions or protests should be filed on or before April 26, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

FEDERAL COMMUNICATIONS COMMISSION

[DA89-361; CC Docket 87-339]

Pleading Cycle Established for Comments on Joint Board's Recommendation To Change Frequency and Timing of Monitoring Reports and Bypass Reports

Released: April 10, 1989.

On March 24, 1989, the Federal-State Joint Board in CC Docket No. 80-286 released its *Second Study and Report* (FCC 89J-3) reviewing the impact of its non-traffic sensitive (NTS) cost recovery program.[1] The Joint Board has recommended that (1) the frequency of future Monitoring Reports be reduced from four times a year to twice a year. (2) future Monitoring Reports be released in January and July of each year through 1992, and (3) that the frequency of bypass reports from the regional Bell companies and GTE be reduced from twice a year to once a year, to be filed by the end of April of each year through 1992.[2]

[1] MTS and WATS Market Structure, Amendment of Part 36 of the Commission's Rules and Establishment of a Joint Board, Establishment of a Program to Monitor the Impact of Joint Board Decisions, CC Docket Nos. 78-72, 80-286, and 87-339, FCC 89J-3, Second Study and Report, released March 24, 1989.

[2] *Id.* at para. 52 and 66.

The Joint Board provided the following reasons in support of these changes: Unnecessary paperwork should be eliminated from the monitoring process. The NTS recovery program has not produced any harmful result to date. No urgent matters requiring frequent reports are pending. There are no further changes in the NTS recovery program that are designed to provide additional deterrence to bypass. At present, the only data received more often than semi-annually are penetration data (received three time a year and reported separately in subscribership reports), price index data (available monthly from the Bureau of Labor Statistics), and aggregate usage and pool data (received monthly from the National Exchange Carrier Association).

Before acting on these recommendations, this Commission seeks comments on them. Interested parties should file comments on the Joint Board's recommendations by May 1, 1989, and reply comments by May 22, 1989, with the Secretary, FCC, 1919 M Street NW., Washington, DC 20554. Copies should also be sent to the members and staff of the Joint Board and to the Commission's contractor for public service records duplication: International Transcription Services, Inc., 2100 M Street NW., Suite 140, Washington, DC 20037.

For further information contact Alexander Belinfante, Industry Analysis Division of the Common Carrier Bureau, at (202) 632-0745.

Federal Communications Commission.

BILLING CODE 6712-01-M

Technical Subgroup of Radio Advisory Committee to Hold Meeting Wednesday, May 10, 1989

April 19, 1989.

The Technical Subgroup of the Advisory Committee on Radio Broadcasting will hold a meeting on Wednesday, May 10, 1989, at 10:00 a.m. in the Vincent Wasilewski Room of the National Association of Broadcasters, 1771 N Street, NW., Washington, DC.

The Subgroup will consider the following matters:

—adjacent channel interference standards for AM stations;

—engineering standards for FM broadcasting; and,

—other business relating to radio broadcasting.

The Subgroup's meetings are continuing ones, and may be resumed after the May 10, 1989, session at such time and place as may be decided at that session. All meetings of the Technical Subgroup are open to the public. All interested persons are invited to participate in these meetings.

For further information, please call the Subgroup Chairman, Wallace E. Johnson at (703) 824-5660.

Federal Communications Commission.

BILLING CODE 6712-01-M

FEDERAL MEDIATION AND CONCILIATION SERVICE

Agency Forms Under Review by the Office of Management and Budget

AGENCY: Federal Mediation and Conciliation Service.

ACTION: Notice of FMCS Forms R-19, R-22, R-43 and F-53 submitted for review to the Office of Management and Budget.

Pursuant to the Paperwork Reduction Act (44 U.S.C. Chapter 35), the Federal Mediation and Conciliation Service (FMCS) has submitted to the Office of Management and Budget (OMB) requests for review of four FMCS Forms, as follows:

FMCS Form R-19, Arbitrator's Report and Fee Statement

This Form advises FMCS of the date of the arbitration award, the types of issues involved and the costs of the arbitration process. The request to OMB seeks approval for minor technical changes and to extend expiration of the Form to February 29, 1992. Information pertaining to the Form is as follows:

Form Number: FMCS R-19, OMB 3076-0003.

Frequency: Once—after each arbitration case.

Respondents: Arbitrators.

Obligation: Mandatory.

Burden: Approximately 14,000 responses per year; approximately 2,333 reporting hours per year; approximately 10 minutes per response.

Need and Use: Form R-19 is needed so that FMCS can monitor the arbitrations conducted by arbitrators who are appointed from its roster. The information furnished is used to inform FMCS of the time elapsed between appointment of the arbitrator and conclusion of the arbitration, the types of issues involved and costs of arbitration to the parties.

FMCS Form R-22, Arbitrator's Personal Data Questionnaire.

This Form advises FMCS of the background, education and experience of the arbitrator. The request to OMB seeks approval for minor technical changes and to extend expiration of the Form to February 29, 1992. Information pertaining to the Form is as follows:

Form Number: FMCS R-22, OMB 3076-0001.

Frequency: On occasion.

Respondents: Arbitrators.

Obligation: Mandatory.

Burden: Approximately 250 responses per year; approximately 375 reporting hours per year; approximately one hour and thirty minutes per response.

Need and Use: Form R-22 provides FMCS with the background, education and experience of the arbitrator. This information is needed so that a determination of suitability for the FMCS roster can be made. It is used for purposes of admission to the roster and to assist parties electing an arbitrator, by advising them as to qualifications.

FMCS Form R-43, Request for Arbitration Services.

This Form advises FMCS that parties wish to obtain a panel of arbitrators. The request to OMB seeks approval only to extend the expiration of the Form to January 31, 1990. Information pertaining to the Form is as follows:

Form Number: FMCS R-43, OMB 3076-0002.

Frequency: On occasion.

Respondents: Parties desiring to select an arbitrator.

Obligation: Required to obtain a benefit.

Burden: Approximately 27,000 responses per year; approximately 4,500 reporting hours per year; approximately ten minutes per response.

Need and Use: This Form advises FMCS that parties wish to obtain the services of an arbitrator. The information is needed so that FMCS may furnish lists of arbitrators from its roster to these parties. It is used to send the lists to the parties, by proper name and address, so they may make their selections.

FMCS Form F-53, Notice to Federal Mediation and Conciliation Services.

This Form is used to notify FMCS of a dispute in the Federal sector; that is between a Federal agency and the union

BEST COPY AVAILABLE

VOL 54 ISS 78 APR 25 1989 UMI

representing that agency's employees. The request to OMB seeks approval for a substantial change to the Form and for authorization to publish a Notice of Proposed Rulemaking relating to a change in the Form and in FMCS regulations pertaining to the Form. Extension of the current Form F–53 is sought to September 31, 1989. Information pertaining to Form F–53 is as follows:

Form Number: FMCS F–53, OMB 3076–0005.

Frequency: On occasion.

Respondent: Parties to a Federal sector dispute.

Obligation: Voluntary.

Burden: Approximately 600 responses per year; approximately 100 reporting hours per year; approximately 10 minutes per response.

Need and Use: The information is needed to advise FMCS of Federal sector disputes. It is used in order to make assignments of cases to FMCS mediators.

The OMB Desk Officer for all of the above FMCS Forms is Scott Jacobs, 399–6880. Copies of the request for review for Forms R–19, R–22 and R–43 may be obtained from Jewell L. Myers, Director, Arbitration Services, Federal Mediation and Conciliation Service, 2100 K Street, NW., Washington, DC 20427, (202) 653–5820. Copies of the request for review for Form F–53 may be obtained from Eileen B. Hoffman, Federal Sector Coordinator, Federal Mediation and Conciliation Service, 2100 K Street, NW., Washington, DC 20427, (202) 653–5390.

DATE: Comments pertaining to these requests for review should be submitted within 30 days of the date of this notice as follows: for Forms R–19, R–22 and R–43 to Jewell L. Myers, Director, Arbitration Services, Federal Mediation and Conciliation Services, 2100 K Street, NW, Washington, DC 20427, (202) 653–5280; for Form R–53 to Eileen B. Hoffman, Federal Sector Coordinator, Federal Mediation and Conciliation Service, 2100 K Street, NW., Washington, DC 20427, (202) 653–5390. Copies of all comments must also be provided to Scott Jacobs, OMB Desk Officer, Room 3100, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

Dated: April 18, 1989.

Robert P. Baker,

Acting Director.

BILLING CODE 6372–01–M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–200240

Title: Global Terminal & Container Services, Inc. Terminal Agreement

Parties: Global Terminal & Container Services, Inc. Atlantic Coast Stevedores, Inc.

Synopsis: The Agreement provides for the sharing by the parties of certain staff personnel used in connection with stevedoring and terminal services for car-carrying vessels calling at Jersey City/Bayonne marine terminal.

By Order of the Federal Maritime Commission.

Dated: April 19, 1989.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

People's Savings Financial Corp., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than May 12, 1989.

A. Federal Reserve Bank of Boston (Robert M. Brady, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *People's Savings Financial Corp.*, New Britain, Connecticut; to become a bank holding company by acquiring 100 percent of the voting shares of The People's Savings Bank of New Britain, New Britain, Connecticut, which engages in the sale of Connecticut Savings Bank Life Insurance.

B. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *North Georgia National Bancshares, Inc.*, Woodstock, Georgia; to become a bank holding company by acquiring 100 percent of the voting shares of North Georgia National Bank, Woodstock, Georgia, a *de novo* bank.

C. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *First Busey Corporation*, Urbana, Illinois; to acquire 100 percent of the voting shares of St. Joseph Bancorp, Inc., St. Joseph, Illinois, and thereby indirectly acquire The State Bank of St. Joseph, St., Joseph, Illinois.

2. *Illinois Financial Services, Inc.*, Chicago, Illinois; to acquire 100 percent of the voting shares of PDB Investment Corporation, Norridge, Illinois, and thereby indirectly acquire Plaza Bank, Norridge, Illinois, Norridge, Illinois.

3. *Michigan National Corporation*, Farmington Hills, Michigan; to acquire 82.15 percent of the voting shares of First State Bank and Trust, Port Lavaca, Texas.

D. Federal Reserve Bank of St. Louis *Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:*

1. *Independent Southern Bancshares, Inc.*, Brownsville, Tennessee; to acquire at least 80 percent of the voting shares of MidSouth Bancshares, Inc., Millington, Tennessee. In connection with this application, MidSouth Bancshares, Inc., Millington, Tennessee, has applied to become a bank holding company by acquiring at least 85 percent of Tennessee Bank and Trust, Millington, Tennessee, which engages in the sale, as agent, of credit related insurance sold in connection with extensions of credit made by the bank.

E. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Commercial Security Bancshares, Inc.*, Stockton, Missouri; to become a bank holding company by acquiring 34.67 percent of the voting shares of Sac River Valley Bank, Stockton, Missouri.

2. *Mountain West Bancshares, Inc.*, Denver, Colorado; to become a bank holding company by acquiring 100 percent of the voting shares of the successor by merger of its wholly-owned subsidiary, Mountain West Transitory Company, Denver, Colorado, and International Bancorp, Denver, Colorado, and thereby indirectly acquire International Bank, Denver, Colorado; International Bank-Englewood, Englewood, Colorado; International Bank-North, Federal Heights, Colorado; and International Bank of Wheat Ridge, Wheat Ridge, Colorado, which engage in the sale of credit-related life insurance.

Board of Governors of the Federal Reserve System, April 18, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210–01–M

Change in Bank Control Notice; Acquisition of Shares in Banks or Bank Holding Companies

The notificant listed below has applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on notices are set forth in paragraph 7 of the Act (12 U.S.C. 817(j)(7)).

The notices area available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than May 8, 1989.

A. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Roger L. Siegert*, Plymouth, Wisconsin; to increase his share of voting shares of Eastern Wisconsin Bancshares, Inc., Howards Grove, Wisconsin, to 15.79 percent as the result of a stock redemption and thereby indirectly acquire State Bank of Howards Grove, Howards Grove, Wisconsin.

Board of Governors of the Federal Reserve System, April 18, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

Fair Housing Advertising and Poster Requirements; Correction

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Order; correction.

SUMMARY: The Board is correcting a technical error in its order of fair housing advertising and fair housing poster requirements, which appeared in the **Federal Register** on March 21, 1989 (54 FR 11567). The fair housing logo was inadvertently omitted from the part of the order containing the text of the fair housing lender poster.

FOR FURTHER INFORMATION CONTACT: Adrienne D. Hurt, Senior Attorney, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, Washington, DC 20551, at (202) 452–2412.

SUPPLEMENTARY INFORMATION:

Corrections

The following corrections are made in FR Doc. 89–6516, Fair Housing Advertising and Poster Requirements:

1. On page 11567, second column, first full paragraph, line 6, "22.444" should read "22,444."

2. On page 11567, third column, under *"Nondiscriminiatory Advertising"* parargraph (b), line 5, "exculusion" should read "exclusion."

3. On page 11568, first column, the following logo should be inserted after the third line in paragraph (b):

4. On page 11568, first column, under "Equal Housing Lender," line 5, "sex handicap" should read "sex, handicap."

By order of the Board of Governors of the Federal Reserve System, dated April 19, 1989.

William W. Wiles,

Secretary of the Board.

Northside Bancshares, Inc., et al.; Application to Engage de Nova in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweight possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 12, 1989.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *Northside Bancshares, Inc.*, doing business as Southern Bank Group, Inc., Roswell, Georgia; to engage *de novo*

VOL 54 ISS 78 AP 25 1989 UMI

through its subsidiary, Southern Mortgage Group, Inc., Roswell, Georgia, in mortgage lending activities pursuant to section 225.25(b)(1)(iii) of the Board's Regulation Y.

B. **Federal Reserve Bank of Chicago** (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Irwin Union Corporation,* Columbus, Indiana; to engage *de novo* through its subsidiary, Objective Financial Solutions, Inc., Columbus, Indiana, in consumer financial counseling pursuant to § 225.25(b)(20) of the Board's Regulation Y. Comments on this application must be received by May 5, 1989.

C. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *The Tokai Bank, Limited,* Nagoya, Japan; to engage *de novo* through its subsidiary, Tokai Securities, Inc., New York, New York, in securities brokerage service and underwriting and dealing in government obligations and money market instruments, obligations of the United States, general obligations of the states and their political subdivisions and money market instruments such as bankers' acceptances and certificates of deposit to the same extent as is authorized to Federal Reserve member banks pursuant to §§ 225.25 (b)(15) and (b)(16) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, April 18, 1989.

BILLING CODE 4160-01-M

Office of Human Development Services

[Program Announcement No. 13672-893]

Minority Children Placements, Post Legal Adoption Services, and Placement of Foster Care Children

AGENCY: Administration for Children, Youth and Families (ACYF), Office of Human Development Services (OHDS).

ACTION: Announcement of the availability of funds and request for applications for projects to support adoption of children.

SUMMARY: The Office of Human Development Services announces the availability of funds for three programs for grants to public or private nonprofit child welfare and adoption agencies, organizations and adoptive parent groups to assist in providing programs directed to: (A) Increasing the placements in adoptive families of minority children who are in foster care and have the goal of adoption with a special emphasis on recruitment of minority families; (B) post-legal adoption services for families who have adopted special needs children; and (C) increasing the rate of placement of children in foster care legally free for adoption.

Funding for these grants is authorized under Title II of the Child Abuse Prevention and Treatment and Adoption Reform Act of 1978 (Pub. L. 95-266 as amended).

DATE: The closing date for receipt of applications is June 26, 1989.

ADDRESSES: Applications should be sent to: Office of Human Development Services, Grants and Contracts, Management Division, HDS/OMS, 200 Independence Avenue SW., Room 345-F, Hubert H. Humphrey Building, Washington, DC 20201, Attention: Mary White.

FOR FURTHER INFORMATION CONTACT: Delmar Weathers, (202) 245-0624.

SUPPLEMENTARY INFORMATION:

Part I: General Information

Background

Title II of the Child Abuse Prevention and Treatment and Adoption Reform Act of 1978 (The Act) (Pub. L. 95-266) was amended on April 25, 1988 by Pub. L. 100-294. The Adoption Opportunities program was established to facilitate the elimination of barriers to adoption and to provide permanent and loving home environments for children who would benefit by adoption, particularly children with special needs. The new amendments (Pub. L. 100-294) authorize additional funds for demonstration priorities in three specific program areas: (A) Minority children placements; (B) post-legal adoption services; and (C) placement of foster care children legally free for adoption.

A. Minority Children Placements

The purpose of section 202(a) of Pub. L. 100-294 is to provide (directly or by grant or contract with States, local government entities, public or private nonprofit licensed child welfare or adoption agencies or adoptive family groups and community-based organizations with experience in working with minority populations) programs aimed at increasing adoptive placements for the minority children, who are in foster care and have the goal of adoption with a special emphasis on the recruitment of minority families.

Minority children continue to be disproportionately represented among children receiving child welfare services and awaiting adoption. It is estimated that roughly half of the 31,000 children free for adoption and awaiting placement are minority children. Some of these children are older and handicapped and may wait even longer for families.

There is an insufficient pool of minority applicants available to adopt waiting children. The new law (Pub. L. 100-294) directs the Secretary to develop programs to increase the number of minority children adopted with a special emphasis on the recruitment of minority individuals. This announcement solicits applications in this area.

The study on *Adoption Sources for Waiting Minority and Non-Minority Children,* conducted by WESTAT in 1986, found that "when an agency had both an active recruitment program and foster family resources 79 percent of the minority children were in placement as

compared to 75 percent of the non-minority children."

A study conducted by the Department's Office of the Inspector General on minority adoptions cited a number of obstacles to minority placements. Some of the obstacles cited included the changing of fees by agencies, in addition to the usual legal fees, which Black families associate with buying and selling babies; agencies' preference for couples over single applicants, a practice which single applicants view as discriminatory; feelings by minority applicants that they were scrutinized more closely than white applicants by workers; and the insensitivity of some workers toward minority clients, who consider the workers to be rigid, denigrating and condescending in behavior. In a number of agencies, the persons providing the adoption services do not reflect the racial composition of the clients served. Cultural sensitivity training is continually needed to help staff recruit and prepare minority families for the placement of minority children.

We have previously funded numerous projects in these areas. Applicants may replicate the established models described below or develop new models. Activities may include:

- Outreach, public education, or media campaigns to inform the public of the needs and numbers of such children;
- Recruitment of prospective adoptive families for such children;
- Expediting, where appropriate, the legal process to free children for adoption;
- Expediting, where appropriate, the agency assessment of prospective adoptive families identified for such children;
- The formation of prospective adoptive family support groups;
- Training in adoption recruitment and cultural sensitivity for personnel of public agencies, private nonprofit child welfare, and adoption agencies that are licensed by the State;
- The establishment of working relationships with adoptive parents organizations and community-based organizations with experience in working with minority populations; and,
- The use of volunteers and adoptive parent groups.

The Children's Bureau has funded a number of highly successful minority focused projects in recent years. The projects include:

- The "Homes for Black Children" project in Detroit, Michigan, which trained agency leaders and workers in selected sites to place minority children;
- The New York City Chapter of the Association of Black Social Workers which trained professional Black social workers who volunteered to recruit and screen adoptive applicants for referral to voluntary child placement agencies;
- The National Black Child Development Institute which developed a user manual for States on the adoption of Black children and convened a national conference on Black Adoptions to improve the effectiveness of child welfare services provided to Black children and their families;
- The New York Council on Adoptable Children project which recruited Hispanic families and trained 300 child welfare professionals working with Hispanic families on cultural issues including maintaining the child's cultural identity in placement planning;
- The One Church-One Child program, a collaborative effort between Father George Clements and the Illinois Department of Children and Family Services which recruited Black adoptive families and was replicated in 22 States;
- The Friends of Black Children program, a project of the North Carolina Department of Human Resources, which used community councils to recruit Black adoptive families and this project was replicated in Tennessee;
- The Spaulding Southwest project, located in Texas, which recruited adoptive parents for Mexican American children; and
- The One Company-One Kid program of Cornell University, in which 20 child welfare agencies and 70 businesses in the New York City metropolitan area collaborated to recruit adoptive families for the placement of minority children.

Information on these projects can be obtained from the National Resource Center for Special Needs Children, 366 Waltrous Road, P.O. Box 337, Chelsea, Michigan 48118, Telephone: (313) 475-8693.

B. Post-Legal Adoption Services

Recognition of special issues in adoption in the past decade has led adoption professionals to reconsider the concept that agency services to adoptive families ends with the legal consummation of the adoption. Historically, once the adoption was consummated the newly formed family was likely to be considered the same as any other family. There is now a growing ackowledgment that adoption is a life-long process and that service providers need to understand the unique interpersonal dynamics of adoption in order to provide effective post-legal adoption services (those provided after legalization of the adoption) to families who seek help.

The purpose of section 202 of Pub. L. 100-294 is to provide (directly or by grant to or contract with States, local government entities, public or private nonprofit licensed child welfare or adoption agencies or adoptive family groups) for the provision of post-legal adoption services for families who have adopted special needs children. Services provided under grants made under this subsection shall supplement, not supplant, services from any other funds available for the same general purposes. Services may include individual, group, and/or family counseling; case management; training public agency adoption personnel and personnel of private, nonprofit child welfare and adoption agencies licensed by the State to provide adption services, as well as mental health services professionals and other support personnel to provide services under this subsection; assistance to adoptive parent organizations; and assistance to support groups for adoptive parents, adopted children, and siblings of adopted children.

Through the Coordinated Discretionary Funds Program (CDP), OHDS has actively promoted the development and implementation of post-legal adoption services. A number of projects have been funded. The first, Children's Aid Society of Mercer County, Pennsylvania, was funded in FY 1984 to develop and provide training for mental health professionals on the issues of foster care and adoption.

The following year four grants were awarded to provide training to mental health professionals, child welfare workers and, in some instances, adoptive families to heighten their sensitivity to the need for post-legal adoption services and to learn how to provide such services. Reference and Resource Guides were developed and disseminated as the result of all the projects. These projects were:

- The Georgetown University Child Development Center, "Special Needs Adoption: A Collaborative Model;"
- The Connecticut Council on Adoption, "Training for Professionals to Support the Adoptive Families of Special Needs Children;"
- The Connecticut Department of Children and Youth Services, Division of Children and Protective Services, "Training of Agencies Related to Developmental Disabilities and Special Needs Adoption to Support Adoptive Families in Connecticut;" and,
- The Children's Aid Society of Mercer County, Pennsylvania, "Training

VOL
54
ISS
78
AP
25
1989
UMI

Mental Health Professionals to Enhance Community Resources to Adoptive Children and Their Families."

In FY 1988, OHDS funded five projects which focused specifically on post adoption/post leval services to adopted children with severe emotional problems, particularly children who were adopted as adolescents. These projects addressed the provision of mental health services for children with special needs and their adoptive families. These projects, listed below, produced some excellent models which were disseminated nationally.

- The Medina Children's Service, Seattle, Washington, "Homebuilders/ Adoption Service Continuum;"
- The Illinois Department of Children and Family Services, "Illinois Special Needs Post Placement/Post Legal Adoption Services Project;"
- The University of Southern Maine, Center for Research and Advanced Study, "Expanding Mental Health and Other Post-Placement Services to Special Needs Adopted Children and Their Families;"
- The Family Service of Burlington County, Mt. Holly, New Jersey, "Adoption Support for Special Needs Children and Their Families;" and,
- The Kentucky Department for Mental Health-Mental Retardation Services, Children and Youth Branch, "Mental Health, Educational and Support Services for Adoptive Parents with Special Needs Children".

In the FY 1988 Coordinated Discretionary Program announcement, OHDS requested proposals on post-adoption services to develop new models or to refine or replicate existing models for the purpose of establishing ongoing programs. Nine projects were funded under this announcement to the following agencies:

- Montana Department of Family Services;
- Three Rivers Adoption Service, Pennsylvania;
- Plan Loving Adoptions Now, Inc, McMinnville, Oregon;
- Ohio Bureau of Enrichment;
- Illinois Department of Children and Family Services;
- Oregon Children's Services Division;
- North American Council on Adoptable Children;
- Lutheran Social Services, Michigan; and,
- DePelchin Children's Services, Texas.

It is expected that these new projects, as well as a number of earlier ones, will result in on-going programs in their locales.

Information on these projects can be obtained from the National Resource Center for Special Needs Children, 366 Waltrous Road, P.O. Box 337, Chelsea, Michigan 48118, Telephone: (313) 475–8693.

C. Placement of Foster Care Children

Children in foster care who are free for adoption do not always move smoothly through the child welfare system into placement with a permanent familiy. OHDS has sponsored two State Adoption Specialists National Meetings and funded a variety of projects to assist the States to improve and increase adoption of children in foster care programs. States have received grants to make systemic changes in their adoption programs; to provide computer hardward, software and fees for membership in the National Adoption Network; and to develop a consortium to share knowledge to improve and enhance the special needs adoption programs and to increase placement of children residing in the nine consortium States.

More than half of the States have received grants to improve adoption services; however, only a small number have been able to sustain the efforts. Increasingly, children entering foster care have more complex problems which require more intensive services. Permanent families must be continuously recruited and prepared to parent the growing population of children who cannot return to their birth families. Supportive services must be added or improved upon so that the children in foster care who are legally free for adoption can move into adoption in a more timely manner. Further, agencies must commit resources for the ongoing support of adoptive families not only at placement, but also after legalization of the adoption. Past projects demonstrate that systemic changes allow for greater improvements in placing these children through eliminating barriers to placement such as the lack of sufficient, trained and experienced staff; lack of administrative commitment to adoption; limited resources; and lack of coordinated community based effort.

The purpose of this grant program is to improve State efforts to increase the placement of foster care children legally free for adoption according to a pre-established plan and goals for improvement. Grants funded under section 202(c) of Public Law 100–294 must include a strong evaluation component which outlines the innovations used to improve the placement of special needs children who are legally free for adoption and the successes and failures of the initiative. Only States, the District of Columbia, the Virgin Islands and Puerto Rico may apply for grants under this priority area, Part I. C.: Placement of Foster Care Children.

Part II: Priorities for Projects

The applicant must provide all information requested under the evaluation criteria (Part IV, below), the information requested by the Standard Form 424, and must include specific information and assurances as follows:

A. Minority Children Placement Grants

OHDS will accept applications which are aimed at increasing the number of minority children placed in adoptive families with a special emphasis on the recruitment of minority individuals. Applicants may: (1) Replicate the established models cited above or develop new models to include outreach/public education or media campaigns to inform the public about waiting minority children; (2) recruit and prepare families (including single applicants) to adopt these children; (3) expedite, as appropriate, the legal availability of these children for adoption; and (4) provide cultural sensitivity training to all relevant staff to effectively serve minority children and families. Services under these grants shall supplement, but not supplant, services from any other funds available for the same general purposes.

Applicants must:

(1) Describe existing minority child placement and recruitment programs, if any; the number of minority children in foster care with the goal of adoption; the number freed for adoption; and the need to expand or develop a new program;

(2) Describe how they propose to move the newly recruited families through the process resulting in adoptive placement;

(3) Establish a specific number of children to be adopted as a result of this effort, if applicable;

(4) Document how the program developed will be continued as part of the agency's on-going program and describe the specific steps which will be taken to accomplish this;

(5) Address the need for the training of workers to provide culturally sensitive and appropriate services which meet the needs of minority children and families;

(6) Provide for at least one person from the project to attend the annual Adoption Opportunities Grantees Meeting in Washington, DC; and,

(7) Document that the project will be staffed and implemented within 90 days of the notification of the grant award.

B. Post-Legal Adoption Services

OHDS will accept applications to develop, implement and maintain as part of the agency or organization's on-going program a system to provide ongoing post-legal adoption services. These services may include individual, group and family counseling; case management; training for the adoption personnel of public and nonprofit child welfare and adoption agencies licensed by the State to provide adoption services, mental health professionals and other support personnel; and assistance to adoptive parent organizations and support groups for adoptive parents, adopted children, and siblings of adoptive children. Services under these grants must supplement, but not supplant, the services from any other funds available for the same general purposes.

Applicants must:

(1) Describe existing post legal adoption services, if any, and the need for expanded or new services;

(2) Describe plans for the development, implementation, and institutionalization of enhanced and new services;

(3) Provide specific written commitments from collaborating or cooperating agencies, if any;

(4) Document and describe how the project will be an on-going part of the agency or organization's program, and the steps the applicant will take to accomplish this;

(5) Provide for at least one person from the project to attend the annual Adoption Opportunities Grantees meeting in Washington, DC; and,

(6) Document that the project will be staffed and implemented within 90 days of the notification of the grant award.

C. Placement of Foster Care Children

OHDS will accept applications from State agencies which will provide a plan to increase the rate of placement of foster care children free for adoption into permanent families. The applicant must: (1) Describe the pre-established plan and goals for improvement in the State system, and (2) include an evaluation component which outlines the innovations used to improve the placement of special needs children who are legally free for adoption and which addresses the successes and failures of the initiative.

Each State applicant must:

(1) Identify and verify the number of foster care children legally free for adoption currently waiting for adoptive placement;

(2) Verify the rate of placement of foster care children placed in adoption in the year preceding the application (the rate of placement is the number of children placed divided by the number of children waiting for adoption);

(3) Describe the plan to increase the rate of placement of foster care children into adoption and the goals for improvement to be achieved in the 12 months of the grant;

(4) Describe an evaluation component for the project which outlines the innovations used to improve the placement of special needs children in foster care who are legally free for adoption and which addresses the successes and failures of the project. The evaluation shall include the collection and analysis of data to determine placement rates and the types of clients served (e.g., waiting children, prospective adoptive families). Statistics shall also be collected to determine the availability of adoptive families during the program period. The evaluation shall also include descriptive information on the process and procedures for implementing the program. This information shall be used to explain placement rates and success or failure of the innovative program methodologies used.

(5) Describe how the proposed improvement, if successful, will continue in the absence of Federal funds;

(6) Agree that at least one person from the project will attend the annual Adoption Opportunities Grantees Meeting in Washington, DC; and,

(7) Certify that all grant funds will be obligated by the State in the 12-month project period. The project cannot be extended beyond 12 months.

Part III: Eligibility and Funding Information

A. Eligible Applicants

Eligibility for *Minority Children Placements Grants* is limited to States, local governmental entities, public or private nonprofit licensed child welfare or adoption agencies or incorporated adoptive family groups and community-based organizations with experience in working with minority populations.

Eligibility for *Post-Legal Adoption Service Grants* is limited to States, local governmental entities, public or private nonprofit licensed child welfare or adoption agencies or incorporated adoptive family groups.

Eligibility for *Placement of Foster Care Children Grants* is limited to State social service agencies.

B. Available Funds

Total funding appropriated for fiscal year 1989 for Minority Children Placement Grants, the Post-Legal Adoption Service Grants, and Placement of Foster Care Children grants is $2,000,000.

Minority Children Placements

OHDS proposes to award grants of no more than $75,000 per grant for programs not to exceed 17 months aimed at increasing the number of minority children placed in adoptive families with a special emphasis on the recruitment of minority families. These grants may be renewed if the programs developed are successful in demonstrating that appropriate and sufficient placements of such children have occurred during the grant period, and if funds are available. The minimum cost sharing or match, if the Federal share of $75,000 is requested is $25,000.

Post-Legal Adoption Services

OHDS proposes to award grants of no more than $100,000 per year, per project, for a period not to exceed 24 months, to develop, implement and institutionalize a system to provide ongoing post-legal adoption services. The minimum cost sharing or match, if the Federal share of $100,000 is requested, is $33,333 for each year. A second year award of funds will depend on satisfactory performance by the grantee and on the availability of appropriated funds.

Placement of Foster Care Children

OHDS proposes to award grants to State social service agencies up to $100,000 per year, per project, for a period not to exceed 12 months to increase the rate of placement of foster care children legally free for adoption into permanent families. The minimum cost sharing or match, if the Federal share of $100,000 is requested, is $33,333 for each year.

C. Grantee Share of the Project

Under this grant program, OHDS will not make awards for the entire project cost. Successful applicants must contribute at least $1, secured from non-Federal sources, for every $3 received in Fedcral funding. This grantee share amounts to 25 percent of the total project cost. For example, if the total project cost is $100,000, the maximum Federal share is $75,000 and the non-Federal share is $25,000. To compute the required cost sharing, divide the requested Federal share by three.

The non-Federal share of total project costs may be in the form of third party in-kind contributions or cash. The

VOL 54 ISS 78 AP 25 1989 UMI

amount of the non-Federal share required will be the amount specified in the approved grant. If the required non-Federal share is not met by a grantee, OHDS will disallow any unmatched Federal dollars. Applicants will be required to include in their budget justification and explanation of any funds proposed as the non-Federal share.

Part IV: Application Process

A. Application Requirements

(1) Preparation of copies: In order to be considered applications for grant support under Minority Children Placements, Post-Legal Adoption Services, and Placement of Foster Care Children must be submitted on Standard Forms (SF) 424, 424A and 424B, and must include all the information and assurances set forth in this announcement. Each SF 424 and 424B must be signed by the Chief Executive Officer of the applicant organization or the individual authorized to assume responsiblity for the obligations imposed by the terms and conditions of the grant award.

(2) Application Submission: One signed original and two copies of the grant application, including all attachments, are required. The original SF 424 and SF 424B should be signed in blue ink. A copy of SFs 424, 424A and 424B may be found at the end of this announcement. Completed applications must be sent to: Office of Human Development Services, Grants and Contracts, Management Division, HDS/OMS, 200 Independence Avenue, SW., Room 345–F Hubert H. Humphrey Building, Washington, DC 20201, Attention: Mary White.

Hand delivered applications will be accepted at the above address during the normal working hours of 8:30 a.m. to 5:00 p.m. Monday through Friday.

(3) Length: The narrative portion of the application must meet minimum and maximum length requirements. It must be at least six double-spaced pages (or three single-spaced pages) but must not exceed twenty-five double-spaced pages (or twelve single-spaced pages) typewritten on one side of the paper. Appendices/attachments cannot exceed 10 pages and may include resumes, letters of commitment, or position descriptions.

(4) Summary Description/Abstract: The summary description of the project should be typed on a separate sheet of 8½ X 11 plain paper, clearly marked with the applicant's name as shown in item 5 of the SF 424, and should not exceed 1,200 characters, including spaces and punctuation. The summary description should accurately and concisely reflect the proposal, should describe the objectives of the project, the approach(es) to be used and the outcome(s) expected and include a list of major products that will result from the proposed project. This information, in conjunction with the information on the SF 424, becomes the project's "abstract", and will be the major source of information about the proposed project; it is the first information that the reviewers read in evaluating the application.

B. Application Consideration

Applications conforming to the requirements of this program announcement will be grouped by category (Minority Children Placements and Post-Legal Adoption Services and Placement of Foster Care Children) and reviewed and scored competitively against the evaluation criteria specified in Part V of this announcement by non-Federal experts in the field of adoption and/or child welfare services. The results of this review will be a primary factor considered in making funding decisions about an application. Applications which do not meet the screening requirements listed in C below will not be reviewed and will receive no further consideration for funding.

In reviewing applications under the category placement of foster care children, we will give priority to grantees who propose improvements designed to continue in the absence of Federal funds.

C. Screening Requirements

Applications that do not meet the following requirements will be screened out, will not be reviewed, and the applicants will be so informed. These Requirements Will Be Rigorously Enforced.

1. *Deadline.* Applications shall be considered as meeting an announced deadline if they are either:

a. Received on or before the deadline date at a place specified in the program announcement, or

b. Sent on or before the deadline date and received by the granting agency in time for the independent review. (Applicants must be cautioned to request a legibly dated U.S. Postal Service postmark or to obtain a legibly dated receipt from a commercial carrier or U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing.)

2. *Late applications.* Applications which do not meet the criteria in paragraph 1. of this section are considered late applications. The granting agency shall notify each late applicant that its application will not be considered in the current competition.

3. *Extension of deadlines.* The Administration for Children, Youth and Families may extend the deadline for all applicants because of acts of God such as flood, hurricanes, etc., or when there is a widespread disruption of the mails. However, if the granting agency does not extend the deadline for all applicants, it may not waive or extend the deadline for any applicants.

4. *Eligibility requirements.* Applicants must meet any eligibility requirements specific to the priority areas under which they are applying (e.g., eligible organization, funding limit and match, duration of project).

Applications which do not meet these screening requirments will not be referred to reviewers.

D. Assurances

These programs are not covered under Executive Order 12372. All assurances relevant to non-discrimination under Title VI of the Civil Rights Act of 1964, section 504 of the Rehabilitation Act of 1973, and assurance of compliance with 45 CFR Part 74 and OMB circulars, Certification Regarding Drug-Free Workplace Requirements and such other assurances that are required by Standard Form 424B are applicable.

Part V: Criteria for Review and Evaluation of Applications

In considering how the grantee will carry out the responsibilities under Part IV of this announcement, competing applications will be reviewed and evaluated against the following criteria:

A. Objectives and Need for Assistance (20 points)

The application describes the problem requiring a solution; demonstrates the need for the assistance; and states the principal and subordinate objectives of the project. Supporting documentation or other testimonies from concerned interests other than the applicant may be used. Relevant data based on planning studies should be included or footnoted.

In addition, information provided in response to Part II, in the relevant program areas (A. Minority Children Placement, B. Post-Legal Adoption Services, and C. Placement of Foster Care Children) of this Announcement will be used to review and evaluate applicants on the above criteria.

B. Results or Benefits Expected (25 points)

Identify results and benefits to be derived. The application describes how

the proposed project will result in a measurable increase in the placement of minority children; in the provision of post-legal adoption services to sustain adoptive families; or an increase in the rate of adoptive placement of foster care children legally free for adoption.

The anticipated contribution to practice should be indicated. In addition, information provided in response to Part II, in the relevant program areas (A. Minority Children Placement; B. Post-Legal Adoption Services and C. Placement of Foster Care Children) of this Announcement will be used to review and evaluate applicants on the above criteria.

C. Approoch (30 points)

Outline a plan of action pertaining to the scope of the project and detail how the proposed work will be accomplished. Cite factors which might accelerate or decelerate the work and the reasons for taking this approach as opposed to others. Describe any unusual features of the project, such as design or technological innovations, reductions in cost or time, or extraordinary social and community involvements. Provide quantitative projections of the accomplishments to be achieved, if possible. When accomplishments cannot be quantified, list the activities in chronological order to show the schedule of accomplishments and their target dates. Identify the kinds of data to be collected and maintained. Discuss the criteria to be used to evaluate the results and success of the project. Explain the methodology that will be used to determine if the needs identified and discussed are being met and if the results and benefits identified are being achieved. List each organization, cooperator, consultant, or other key individuals who will work on the project along with a short description of the nature of their effort or contribution.

In addition, information provided in response to Part II, in the relevant program areas (A. Minority Children Placement, B. Post-Legal Adoption Services, and C. Placement of Foster Care Children) of this Announcement will be used to review and evaluate applicants on the above criteria.

D. Staff Background and Experience (25 points)

Include the resumes of the program director and key project staff (including names, addresses, social security numbers, training, background and other qualifying experience) and the organization's experience that will demonstrate the ability to effectively and efficiently administer a project of this size, complexity and scope. Reflect the staff and organization's ability to use and coordinate activities with other agencies. Describe the relationship between this project and other work planned, anticipated or underway under Federal assistance, if applicable.

In addition, information provided in response to Part II, in the relevant program areas (A. Minority Children Placement;

B. Post-Legal Adoption Services and C. Placement of Foster Care children of this Announcement will be used to review and evaluate applicants on the above criteria.

E. Paperwork Reduction Act of 1980

Under the Paperwork Reduction Act of 1980, Pub. L. 96–511, the Department is required to submit to the Office of Management and Budget (OMB) for review and approval any reporting and recordkeeping requirements in regulations including program announcements. This program announcement does not contain information collection requirements beyond those approved for grant applications by OMB.

F. Notification Under Executive Order 12372

Applicants for this announcement are exempt from Executive Order 12372 (Form 424, Item 16).

Part VI: Instructions for Completing Applications

A. The Components of an Application

A complete application consists of the following in this order:

1. Application Cover Sheet, SF 424, (Rev. 4–88);

2. Budget Information, SF 424A (4–88); Section A (Budget Summary), Section B (Budget Categories), and Section E (Budget Estimates of Federal Funds Needed for Balance of the Project);

3. Budget justification not to exceed three pages;

4. Project summary description;

5. Program Narrative, (Part II of this announcement) organized with sections addressing the following four areas:

a. Objectives and need for assistance,

b. Results or benefits expected,

c. Approach, and

d. Staff background and experience;

6. Assurances, SF 424B (4–88);

7. Appendices/attachments not to exceed 10 pages.

B. Preparing the Application

1. The SF 424, SF 424A and SF 424B have been reprinted for your convenience in preparing the application. Single-sided copies of all required forms must be used for submitting your application. You must reproduce single-sided copies from the reprinted form and type your application on the copies. Please do not forms directly from the Federal Register announcement as they are printed on both sides of the page.

2. When specific information is not required under this program, N/A (not applicable) has been preprinted on the form. These items are not to be completed.

C. The SF 424, SF 424A and 424B, and the instructions for their completion are in Appendix 1 of this announcement.

Dated: March 24, 1989.

Dodie Truman Borup,

Commissioner, Administration for Children, Youth and Families.

Approved: March 30, 1989.

Sydney Olson,

Assistant Secretary for Human Development Services.

Meeting of the Acquired Immunodeficiency Syndrome Program Advisory Committee

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Acquired Immunodeficiency Syndrome (AIDS) Program Advisory Committee on June 19–20, 1989, at the National Institutes of Health, Bethesda, Maryland. The meeting will take place from 9:00 a.m. to 4:30 p.m. on June 19, and from 9:00 a.m. to 12:30 p.m. on June 20, in Building 31, C Wing, Conference room 10. The meeting will be open to the public.

The purpose of the meeting is to discuss special considerations in the treatment of HIV infection, particularly children and minorities.

Anthony S. Fauci, M.D., Associate Director for AIDS Research, National Institutes of Health, Shannon Building, Room 201, Bethesda, Maryland 20892, (301) 496–0357, will furnish the meeting agenda, rosters of Committee members and consultants, and substantive program information upon request.

Date: April 19, 1989.

Betty J. Beveridge,

Committee Management Officer, NIH.

Meeting of the Extramural Researchers' Financial Conflicts of Interest

Notice is hereby given that the National Institutes of Health (NIH) and the Alcohol, Drug Abuse, and Mental Health Administration (ADAMHA) are in the process of developing appropriate further guidance concerning financial conflicts of interest for investigators receiving Government funds. An open meeting will be held on June 27 and 28, 1989 in Masur Auditorium of the Warren G. Magnuson Clinical Center at NIH to provide opportunity for comments from all parties. All interested parties are encouraged to attend this meeting or to submit written comments. You may submit these comments to: Dr. Katherine L. Bick, Deputy Director for Extramural Research, National Institutes of Health, Shannon Building, Room 144, Bethesda, Maryland 20892.

There are growing expressions of concerns about circumstances that might affect investigators' objectivity, or where researchers might unduly influence, or might be perceived to influence, NIH/ADAMHA-funded R&D projects in directions favorable to personal financial interests of themselves, their spouses, children, close professional associates, or organizations where they have appointments or other relationships.

A variety of topics on real, or perceived, conflicts of interests, will be discussed at the June 27–28 meeting, such as whether investigators and consultants participating in NIH/ADAMHA-funded studies should hold finacial interests in organizations or entities that produce drugs, devices, or other interventions that are evaluated under those awards. Following this meeting, NIH/ADAMHA intend to develop appropriate guidance for such relationships. Guidelines would seek to clarify pertinent types of research situations and personal financial interests, in accord with the PHS Grants Policy Statement, January 1, 1987, revision, concerning Standards of Conduct for Employees for awardee organizations, and to define appropriate distributions of governance between NIH/ADAMHA and awardee organizations. Points to consider in such guidance include requirements for disclosure, approval, and/or restrictions in certain situations as well as possible exceptions to restrictions to permit investigators with unusual skills and expertise to conduct studies which might otherwise be proscribed. (These guidelines should be concern financial benefits resulting from logical steps in product research/development/testing under NIH awards, e.g., Small Business Innovation Research.) The proposed meeting is designed to elicit comment from concerned and interested individuals and institutions prior to development of general guidelines; we invite broad attendance.

Further information concerning this meeting, including planned discussion topics, will be published in the GUIDE TO GRANTS AND CONTRACTS in May or may be obtained from: Mark S. Brown, Social and Scientific Systems, Inc., 7101 Wisconsin Avenue, Suite 610, Bethesda, Maryland 20814–4805, (301) 986–4870.

Date: April 18, 1989.

James B. Wyngaarden,

Director, NIH.

BILLING CODE 4140–01–M

National Heart, Lung, and Blood Institute; Meeting of the Clinical Applications and Prevention Advisory Committee

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Clinical Applications and Prevention Advisory Committee, Division of Epidemiology and Clinical Application, National Heart, Lung, and Blood Institute, National Institutes of Health, on June 1–2, 1989.

The meeting will be held in the Federal Building, Conference Room B119, 7550 Wisconsin Avenue, Bethesda, Maryland on June 1 and will be open to the public from 9:00 a.m. to recess. On June 2 the meeting will be held in Building 31, Conference Room 9, 9000 Rockville Pike, Bethesda, Maryland and will be open to the public from 8:30 a.m. to adjournment to discuss new initiatives, program policies, and issues. Attendance by the public will be limited to space available.

Terry Bellicha, Chief, Communications and Public Information Branch, National Heart, Lung, and Blood Institute, Building 31, Room 4A21, National Institutes of Health, Bethesda, Maryland 20892, (301) 496–4236, will provide a summary of the meeting and a roster of committee members upon request.

Dr. William R. Harlan, Director, Division of Epidemiology and Clinical Applications, Federal Building, Room 212, Bethesda, Maryland 20892, (301) 496–2533, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.837, Heart and Vascular Diseases Research, National Institutes of Health.)

Dated: April 19, 1989.

BILLING CODE 4140–01–M

Public Health Service

Advisory Committees; Meetings

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following National Advisory bodies scheduled to meet during the months of May and June 1989:

Name: Health Services Developmental Grants Review Subcommittee.

Date and Time: May 23–24, 1989, 8:30 a.m.

Place: Days Inn—Congressional Park, Room To Be Announced, 1775 Rockville Pike, Rockville, Maryland. Open May 23, 8:30 a.m. to 9:00 a.m. Closed for remainder of meeting.

Purpose: The Subcommittee is charged with the initial review of grant applications proposing to do analysis of data derived from experiments and demonstrations designed to test the cost-effectiveness or efficiency of particular methods of health services delivery and financing, for the research grants program administered by the National Center for Health Services Research and Health Care Technology Assessment.

Agenda: The open session of the meeting of May 23 from 8:30 a.m. to 9:00 a.m. will be devoted to a business meeting covering administrative matters and reports. There will also be a presentation by the Director, NCHSR. During the closed sessions, the Subcommittee will be reviewing research grant applications relating to the delivery, organization, and financing of health services. In accordance with the Federal Advisory Committee Act, Title 5, U.S. Code, Appendix 2 and Title 5, U.S. Code 552b(c)(6), the Director, National Center for Health Services Research and Health Care Technology Assessment has made a formal determination that these latter sessions will be closed because the discussions are likely to reveal personal information concerning individuals associated with the applications. This information is exempt from mandatory disclosure.

Anyone wishing to obtain a Roster of Members, Minutes of Meeting, or other relevant information should contact Dr. Gerald E. Calderone, National Center for Health Services Research and Health Care Technology Assessment, Room 18A20, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443–3091.

Name: Health Services Research Review Subcommittee.

Date and Time: June 7–9, 1989, 8:00 a.m.

Place: Holiday Inn—Crowne Plaza, Woodmont Room, 1750 Rockville Pike, Rockville, Maryland. Open June 7, 8:00 a.m. to 8:30 a.m. Closed for remainder of meeting.

Purpose: The Subcommittee is charged with the initial review of grant applications proposing analytical and theoretical research on costs, quality, access, and efficiency of the delivery of health services for the research grant program administered by the National Center for Health Services Research and Health Care Technology Assessment.

Agenda: The open session of the meeting on June 7 from 8:00 a.m. to 8:30 a.m. will be devoted to a business meeting covering administrative matters and reports. There will also be a presentation by the Director, NCHSR. During the closed session, the Subcommittee will be reviewing research grant applications relating to the delivery, organization, and financing of health services. In accordance with the Federal Advisory Committee Act, Title 5, U.S. Code, Appendix 2 and Title 5, U.S. Code 552b(c)(6), the Director, National Center for Health Services Research and Health Care Technology Assessment has made a formal determination that these latter sessions will be closed because the discussions are likely to reveal personal information concerning individuals associated with the applications. The information is exempt from mandatory disclosure.

Anyone wishing to obtain a Roster of Members, Minutes of Meeting, or other relevant information should contact Mr. B. William Lohr, National Center for Health Services Research and Health Care Technology Assessment, Room 18A20, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443–3091.

Nome: Health Care Technology Study Section.

Dote ond Time: June 12–14, 1989, 8:30 a.m.

Place: Parklawn Building, Maryland Room, 5600 Fishers Lane, Rockville, Maryland. Open June 12, 3:30 p.m. to 4:00 p.m. Closed for remainder of meeting.

Purpose: The Study section is charged with conducting the initial review of health services research grant applications addressing the effects of health care technologies and procedures, including those in the area of information sciences, as well as those addressing the process of diffusion and adoption of new technologies and procedures.

Agenda: The open session on June 12 from 3:00 p.m. to 4:00 p.m. will be devoted to a business meeting covering administrative matters and reports. There will also be a presentation by the Director, NCHSR. The closed sessions of the meeting will be devoted to a review of health services research grant applications relating to the delivery, organization, and financing of health services. In accordance with the Federal Advisory Committee Act, Title 5, U.S. Code, Appendix 2 and Title 5, U.S. Code 552b(c)(6), the Director, National Center for Health Services Research and Health Care Technology Assessment has made a formal determination that these latter sessions will be closed because the discussions are likely to reveal personal information concerning individuals associated with the applications. The information is exempt from mandatory disclosure.

Anyone wishing to obtain a Roster of Members, Minutes of Meeting, or other relevant information should contact Dr. Alan E. Mayers, National Center for Health Services Research and Health Care Technology Assessment, Room 18A20, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443–3091.

Agenda items are subject to change as priorities dictate.

Date: April 18, 1989.

J. Michael Fitzmaurice,

Director, National Center for Health Services Research and Health Care Technology Assessment.

[FR Doc. 89–9868 Filed 4–24–89; 8:45 am]

BILLING CODE 4160–17–M

National Vaccine Advisory Committee; Public Meeting

AGENCY: Office of the Assistant Secretary for Health.

ACTION: Notice.

SUMMARY: The Department of Health and Human Services (DHHS) and the Office of the Assistant Secretary for Health are announcing the forthcoming meeting of the National Vaccine Advisory Committee.

DATE: Date, Time and Place: June 15, 1989, at 9:00 a.m.; June 16, 1989, at 8:30 a.m.; Hubert Humphrey Building, Room 703A, 200 Independence Avenue, SW., Washington, DC 20201. The entire meeting is open to the public.

FOR FURTHER INFORMATION CONTACT: Written requests to participate should be sent to Yuth Nimit, Ph.D., Executive Secretary, National Vaccine Advisory Committee, National Vaccine Program, 5600 Fishers Lane, Park Building, Room 1–24, Rockville, Maryland 20857, (301) 443–0715.

Agenda—Open Public Hearing: Interested persons may formally present data; information, or views orally or in writing on issues pending before the Advisory Committee or on any of the duties and responsibilities of the Advisory Committee as described below. Those desiring to make such presentations should notify the contact person before May 15, 1989 and submit a brief statement of the information they wish to present to the Advisory Committee. Those requests should include the names and addresses of proposed participants and an indication of the approximate time required to make their comments. A maximum of 15 minutes will be allowed for a given presentation. Any person attending the meeting who does not request an opportunity to speak in advance of the meeting will be allowed to make an oral presentation at the conclusion of the meeting, if time permits, at the chairperson's discretion.

Open Advisory Committee Discussion: Discussion at this meeting will be directed to an update of the National Vaccine Program; report on the Advisory Commission on Childhood Vaccines meeting; Medicaid-Medicare, Catastrophic Health Care Reimbursement; plenary discussion on resources and financing; plenary discussion on vaccine supply; plenary discussion on vaccine utilization; the Fiscal Year 1990 Budget; and the National Vaccine Plan development. Meetings of the Advisory Committee shall be conducted, insofar as is practical, in accordance with the agenda published in the **Federal Register** notices. Changes in the agenda will be announced at the beginning of the meeting.

Persons interested in specific agenda items may ascertain from the contact person the approximate time of discussion. A list of Advisory Committee members and the charter of the Advisory Committee will be available at the meeting. Those unable to attend the meeting may request this information from the contact person. Summary minutes of the meeting will be made available upon request from the contact person.

Dated: April 14, 1989.

Yuth Nimit,

Executive Secretary, NVAC.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing-Federal Housing Commissioner

[Docket No. N-89-1917; FR-2906]

Unutilized and Underutilized Federal Buildings and Real Property Determined To Be Suitable for Use for Facilities to Assist the Homeless

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized and underutilized Federal property determined by HUD to be suitable for possible use for facilities to assist the homeless.

DATE: April 25, 1989.

ADDRESS: For further information, contact Morris Bourne, Department of Housing and Urban Development, Room 9140, 451 Seventh Street SW., Washington, DC 20410; telephone (202) 755-9075; TDD number for the hearing- and speech-impaired (202) 426-0015. (These telephone numbers are not toll-free.)

SUPPLEMENTARY INFORMATION: In accordance with the December 12, 1988 court order in *National Coalition for the Homeless v. Veterans Administration*, D.C.D.C. No. 88-2503-OG, HUD publishes a Notice, on a weekly basis, identifying unutilized and underutilized Federal buildings and real property determined by HUD to be suitable for use for facilities to assist the homeless. Today's Notice is for the purpose of announcing that no additional properties have been determined suitable this week.

Date: April 19, 1989.

James E. Schoenberger,

General Deputy Assistant Secretary for Housing-Federal Housing Commissioner.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Modification of Realty Action; Colorado

AGENCY: Bureau of Land Management, Interior.

ACTION: Modification of notice, C-47721.

SUMMARY: The legal description for the public lands identified for direct sale to Golden Cycle Corporation in the notice published on December 15, 1988 (53 FR 50464) has been changed following preparation of a final survey plat as follows.

T.14 S., R.70 W., 6th P.M., Colorado
Sec. 25, Lot 31 (formerly MS 14357)
T. 15 S., R. 70 W., 6th P.M., Colorado
Sec. 3, Lots 72, 73, 76, 77, 78, 79, 80, 83, 85, 86, 87, 93, 95, 96, 97, 100, 101, 102, 105, 111, 112, and 116
Containing 46.63 acres.

Golden Cycle Corp. must file application for federally owned mineral interests on these lands. Transfer of mineral rights will occur simultaneously with the surface upon payment of appropriate fees. The lands are hereby segregated from all appropriations, including mineral entry, except for sale under the Federal Land Policy and Management Act, until issuance of patent or for two years following publication of this notice.

Donnie R. Sparks,

District Manager.

BILLING CODE 4310-40-M

Bureau of Reclamation

[INT-DES-89-06]

AB Lateral Hydropower Facility, Uncompahgre Valley Hydropower Project, Colorado

AGENCY: Bureau of Reclamation (USBR), Interior.

ACTION: Notice of availability of draft environmental impact statement (DEIS).

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, as amended, the Bureau of Reclamation (Reclamation) has prepared a DEIS on a proposed hydropower project that would be constructed and operated by private parties using facilities of the existing Uncompahgre Valley Reclamation Project in Montrose and Delta Counties in western Colorado. Water for the hydropower plant would be diverted from the Gunnison River. Reclamation is considering signing a lease of power privilege on the project.

DATES: A 60-day public review of the DEIS commences with the publication of this notice. Comments should be submitted to the regional director at the address below within the 60-day review period.

ADDRESSES: Single copies of the DEIS can be obtained by contacting the Regional Director or Projects Manager at the address below:

Regional Director, Bureau of Reclamation, Upper Colorado Region, 125 South State Street, P.O. Box 11568, Salt Lake City, Utah 84147; Telephone (801) 524-5580; or
Projects Manager, Bureau of Reclamation, Grand Junction Projects Office, 2597 B 3/4 Road, P.O. Box 1869, Grand Junction, Colorado 81502, Telephone (303) 248-6100.

Copies of the DEIS are available for inspection in libraries in the project vicinity and are also available for public inspection at the following locations:

Bureau of Reclamation, Environment and Planning Branch, U.S. Department of the Interior, 18th and C Streets, NW., Room 7455, Washington, DC 20240; Telephone: (202) 343-4662.

Bureau of Reclamation, Denver Office Library, Denver Federal Center, 6th and Kipling, Building 67, Room 167, Denver, Colorado 80225; Telephone (303) 236-6963.

FOR FURTHER INFORMATION CONTACT: Mr. Harold Sersland (Regional Environmental Officer, Upper Colorado Region, Salt Lake City, UT), (801) 524-5580; or Mr. Steve McCall (Environmental Specialist, Grand Junction Projects Office, Grand Junction, Colorado), (303) 248-6105.

SUPPLEMENTARY INFORMATION: The hydropower facility would be funded, built, and operated by Montrose Partners and the Uncompahgre Valley Water Users Association. These organizations plan to construct the facility using, in part, existing features of the Uncompahgre Valley Project, a Reclamation irrigation project. They are seeking a lease of power privilege with Reclamation, which would permit use of Uncompahgre Project features for the purpose of generating hydroelectric power. The facility would be located in west-central Colorado in Montrose County. Reclamation serves as the lead Federal agency responsible for NEPA compliance on the project.

The project would use the existing Gunnison Diversion Dam and Tunnel to divert water from the Gunnison River year round. Alternative penstock and powerplant locations are addressed, as well as alternative operational plans. A non-action alternative is also presented.

Dated: April 20, 1989.

J. Austin Burke,

Acting Deputy Commissioner.

Construction of a Marina on Lake Michigan in and by the City of Gary, Indiana; Availability of a Draft Environmental Impact Statement (DEIS)

This notice announces the availability of a DEIS for the proposed construction of a marina on Lake Michigan by the City of Gary, Indiana. This notice also announces a public meeting for the purpose of receiving public comments on the DEIS.

The City of Gary's and the NPS's preferred alternative for marina location is identified in the DEIS as Site 1, which is behind an existing breakwater on land currently owned by the Gary Works of USX Corporation. The City of Gary's preferred alternative for marina access is Option D, the extension of Lake Street, as an intial short-term access road; and Option B, the extension of Clay Street from the east, as a long-term access road to be developed at a later date. The NPS preferred alternative for marina access of Option A, construction of an access road along the abandoned Indiana Harbor Belt Railroad bed from the west.

Comments on the DEIS should be received no later than June 20, 1989. A public meeting regarding the document will be held at the City/Council Chamber, Gary City Hall, 401 Broadway, Gary, Indiana 46402, on Monday May 15, 1989, at 7:00 p.m. The 60-day public comment period will end June 20, 1989. The DEIS also serves as the instrument of compliance with Executive Order 11990, Protection of Wetlands.

Comments on the DEIS should be submitted to: Mr. Dale Engquist, Superintendent, Indiana Dunes National Lakeshore, 1100 N. Mineral Springs Road, Porter, Indiana 46304, (219-926-7561).

Public reading copies of the DEIS will be available for review at the following locations:

Office of Public Affairs, National Park Service, Room 3426, Department of the Interior, 18th and C Streets NW., Washington, DC 20240, (202-343-6843).
Headquarters; and Visitors Center (corner of Hwy 12 and Kemil Road), Indiana Dunes National Lakeshore, 1100 N. Mineral Springs Road, Porter, Indiana 46304, (219-926-7561)
City Hall, City of Gary, 401 Broadway, Gary, Indiana 46402, (219-881-1332)
Gary Public Library, City of Gary, 220 West 5th Avenue, Gary, Indiana 46402, (219-886-2484)

A limited number of copies of the DEIS are available on request from the Office of the Mayor of Gary, Indiana (refer to City Hall address above).

Date: March 24, 1989.

Don H. Castleberry,

Regional Director, Midwest Region, National Park Service.

Office of Surface Mining Reclamation and Enforcement

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed collection of information may be obtained by contacting the Bureau's clearance office at the phone number listed below. Comments and suggestions on the requirements should be made directly to the bureau clearance officer and to the Office of Management and Budget, Paperwork Reduction Project (1029–0063), Washington, DC 20253, telephone (202) 395–7313.

Title: Coal Production and Reclamation Fee Report, Form OSM–1

OMB Number: 1029–0063.

Abstract: In order to ensure compliance with 30 CFR Part 870, a quarterly record is required of coal produced for sale, transfer or use nationwide. Individual reclamation fee payment liability is based on this information.

Bureau Form Number: OSM–1.

Frequency: Quarterly.

Description of Respondents: Coal Operators.

Annual Responses: 22,000.

Annual Burden Hours: 5,867.

Estimated Completion Time: 16 minutes.

Bureau Clearance Officer: Nancy Ann Baka (202) 343–5864.

Date: March 14, 1989.

Judith Saunders,

Acting Chief, Division of Regulatory Development.

BILLING CODE 4310-05-M

INTERSTATE COMMERCE COMMISSION

[Docket No. AB–1 (Sub-No. 225X)]

Chicago and North Western Transportation Co.; Abandonment Exemption of Railroad Line in Sheboygan County, WI

Applicant has filed a notice of exemption under 49 CFR Part 1152 Subpart F—*Exempt Abandonments* to abandon its 7-mile line of railroad between milepost 8.0 near Sheboygan Falls and milepost 15.0 near Plymouth, in Sheboygan County, WI.

Applicant has certified that: (1) No local traffic has moved over the line for at least 2 years and that overhead traffic has been rerouted; and (2) no formal complaint filed by a user of rail service on the line (or a State or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or with any U.S. District Court or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

As a condition to use of this exemption, any employee affected by the abandonment shall be protected under *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10505(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on May 25, 1989 (unless stayed pending reconsideration). Petitions to stay that do not involve environmental issues,[1] formal expressions of intent to file an offer of financial assistance under 49 CFR 1152.27(c)(2),[2] and trail use/rail banking statements under 49 CFR 1152.29 must be filed by May 5, 1989.[3] Petitions for reconsideration and requests for public use conditions under 49 CFR 1152.28 must be filed by May 15, 1989 with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative: Christopher A. Mills, Senior Commerce Counsel, Chicago and North Western Transportation Company, One North Western Center, Chicago, Illinois 60606.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio*.

Applicant has filed an environmental report which addresses environmental or energy impacts, if any, from this abandonment.

The Section of Energy and Environment (SEE) will prepare an environmental assessment (EA). SEE will issue the EA by April 28, 1989. Interested persons may obtain a copy of the EA from SEE by writing to it (Room 3115, Interstate Commerce Commission, Washington, DC 20423) or by calling Carl Bausch, Chief, SEE at (202) 275–7316. Comments on environmental and energy concerns must be filed within 15 days after the EA becomes available to the public.

Environmental, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Decided: April 19, 1989

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

[FR Doc. 89–9898 Filed 4–24–89; 8:45 am]

BILLING CODE 7035-01-M

[1] A stay will be routinely issued by the Commission in those proceedings where an informed decision on environmental issues (whether raised by a party or by the Section of Energy and Environment in its independent investigation) cannot be made prior to the effective date of the notice of exemption. *See Exemption of Out-of-Service Rail Lines*, 4 I.C.C. 2d 400 (1988). Any entity seeking a stay involving environmental concerns is encouraged to file its request as soon as possible in order to permit this Commission to review and act on the request before the effective date of this exemption.

[2] *See Exempt. of Rail Abandonment—Offers of Finan. Assist.*, 4 I.C.C. 2d 164 (1987), and final rules published in the **Federal Register** on December 22, 1987 (52 FR 48440–48446).

[3] The Commission will accept a late-filed trail use statement so long as it retains jurisdiction to do so.

DEPARTMENT OF JUSTICE

Information Collections Under Review

April 19, 1989.

The Office of Management and Budget (OMB) has been sent the following proposals for the collection of information for review under the provisions of the Paperwork Reduction Act (44 USC Chapter 35) and the Paperwork Reduction Reauthorization Act since the last list was published. Entries are grouped into submission categories. Each entry contains the following information: (1) The title of the form or collection; (2) the agency form number, if any, and the applicable component of the Department sponsoring the collection; (3) how often the form must be filled out or the information is collected; (4) who will be asked or required to respond, as well as a brief abstract; (5) an estimate of the total number of respondents and the amount of time estimated for an average respondent to respond; (6) an estimate of the total public burden (in hours) associated with the collection; and, (7) an indication as to whether Section 3504(h) of Pub. L. 96–511 applies. Comments and/or suggestions regarding the item(s) contained in this notice, especially those regarding the estimated response time, should be directed to the OMB reviewer, Mr. Edward H. Clarke, on (202) 395–7340 and to the Department of Justice's Clearance Officer, Mr. Larry E. Miesse, on (202) 633–4312. If you anticipate commenting on a form/collection, but find that time to prepare such comments will prevent you from prompt submission, you should so notify the OMB reviewer and the DOJ Clearance Officer of your intent as soon as possible. Written comments regarding the burden estimate or any other aspect of the collection may be submitted to Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, and to Mr. Larry E. Miesse, DOJ Clearance Officer, SPS/JMD/5031 CAB, Department of Justice, Washington, DC 20530.

New Collection

(1) Request for the return of original document.
(2) G–884. Immigration and Naturalization Service.
(3) On occasion.
(4) Individuals or households. This form standardizes existing INS procedures for requesting the return of original documents contained in the Alien Files. Requires the requester to provide two forms of identification or proof of relationship with subject file in order to obtain the documents.
(5) 2,500 respondents at .25 hours per response.
(6) 625 estimated annual burden hours.
(7) Not applicable under 3504(h).

Extension of the Expiration Date of a Currently Approved Collection Without Any Change in the Substance or in the Method of Collection

(1) Application for procurement quota for controlled substances.
(2) DEA 250. Drug Enforcement Administration.
(3) Annually.

VOL 54 ISS 78 AP 25 1989 UMI

(4) Businesses or other for-profit. Section 1303.12 requires registered dosage from manufacturers who wish to purchase controlled substances in Schedule II to apply on DEA–250 for procurement quotas which limits purchase quantities.
(5) 132 respondents, averaging 2.58 responses at 1 hour per response.
(6) 341 estimated annual public burden hours.
(7) Not applicable under 3504(h).

(1) Petition for prospective immigrant employee.
(2) I–140. Immigration and Naturalization Service.
(3) On occasion.
(4) Individuals or households. The Immigration and Nationality Act provides for persons who meet the provisions in sections 203(A)(3) and (6) to be eligible for admission into the United States. This data is required to determine that eligibility.
(5) 50,000 respondents at 1 hour each.
(6) 50,000 estimated annual public burden hours.
(7) Not applicable under 3504(h).

(1) Application for employment by a (G–4) spouse or unmarried son or daughter of an official or an international organization.
(2) I–566. Immigration and Naturalization Service.
(3) On occasion.
(4) Individuals or households. This form provides a formal procedure under which these persons may apply for permission to be employed in the United States; data is used to determine eligibility.
(5) 2,000 annual respondents at .25 hours each.
(6) 500 estimated annual burden hours.
(7) Not applicable under 3504(h).

(1) Petition for alien relative.
(2) I–130. Immigration and Naturalization Service.
(3) On occasion.
(4) Individuals or households. This data will be used by the INS to determine eligibility for the benefits sought.
(5) 825,000 respondents at .5 hours per response.
(6) 412,500 estimated annual burden hours.
(7) Not applicable under 3504(h).

(1) Certificate of Eligibility for nonimmigrant student (F–1) status—for academic and language students.
(2) I–20A&B/ID. Immigration and Naturalization Service.
(3) On occasion.
(4) Businesses or other for-profit, non-profit institutions. In accordance with section 101(A)(15)(F)(1) of the Immigration and Nationality Act, Consular and immigration officials use the form to determine if an alien student is eligible for an F–1 student visa.
(5) 210,000 respondents at .5 hours each.
(6) 105,000 estimated annual burden hours.
(7) Not applicable under 3504(h).

(1) Alien address report card.
(2) I–104. Immigration and Naturalization Service.
(3) On occasion.
(4) Individuals or households. To be used by aliens to report current addresses, when required under section 265 of the I&N Act. Form is currently not used, but remains on inventory with 10 day notice of activism.
(5) No respondents (carried as 1 for inventory purposes only) at no burden hours each (carried as 1 hour for inventory purposes).
(6) No estimated annual responses (carried as 1 hour for inventory purposes).
(7) Not applicable under 3504(h).

(1) Petition for alien fiance(E).
(2) I–129F. Immigration and Naturalization Service.
(3) On occasion.
(4) Individuals or households. By filing this form, a citizen of the United States may facilitate the entry of his/her fiance(e) into the United States so that a marriage between the U.S. citizen and the alien fiance(e) may be concluded.
(5) 16,440 estimated respondents at .5 hours each.
(6) 8,220 estimated annual burden hours.
(7) Not applicable under 3504(h).

(1) Application for stay of deportation.
(2) I–246. Immigration and Naturalization Service.
(3) On occasion.
(4) Individuals or households. Necessary so that the INS District Director that has jurisdiction over the place where the alien is at the time of filing, may, in his discretion, grant a stay of deportation for such time and under such conditions as he may deem appropriate.
(5) 2,500 annual respondents at .25 hours per response.
(6) 625 estimated annual burden hours.
(7) Not applicable under 3504(h).

(1) Application for waiver of grounds of excludability.
(2) I–690. Immigration and Naturalization Service.
(3) On occasion.
(4) Individuals or households. IRCA applicants excludable under section 212(a) of the I&NS can nevertheless be found admissible if the grounds of exclusion are waived. This is the form to be used for such a request. Permanent residents can file up to June 1992.
(5) 100,000 estimated annual respondents at .25 hours each.
(6) 25,000 estimated annual burden hours.
(7) Not applicable under 3504(h).

(1) Petition for approval of school for attendance by nonimmigrant students.
(2) I–17. Immigration and Naturalization Service.
(3) On occasion.
(4) Individuals or households. Information is used by learning institutions to determine acceptance of nonimmigrant students, as well as the INS to establish a listing of schools or campuses within school systems or districts with multiple locations, as to which schools are bonafide institutions.
(5) 1,700 annual responses at 1 hour each.
(6) 1,799 estimated annual burden hours.
(7) Not applicable under 3504(h).

(1) Baggage and personal effects of detained aliens.
(2) I–43. Immigration and Naturalization Service.
(3) On occasion.
(4) Individuals or households. Form is used to protect the Government from claims that detained aliens were not given an opportunity to obtain their personal effects before deportation.
(5) 600,000 annual responses at .017 hours each.
(6) 10,200 estimated annual burden hours.
(7) Not applicable under 3504(h).

Larry E. Miesse,
Department Clearance Officer, Department of Justice.

Notice Pursuant to the National Cooperative Research Act of 1984; OSI/Network Management Forum

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 et seq. ("the Act"), the OSI/Network Management Forum, (the "Forum") has filed an additional written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing additions to its membership. The additional written notification was filed for the purpose of extending the protections of section 4 of the Act, limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

On October 21, 1988, the Forum filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on December 8, 1988, 53 FR 49615. On December 23, 1988, the Forum filed an additional written notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) on January 26, 1989, 54 FR 3870.

The identities of the additional parties to the venture are given below:

DEPARTMENT OF LABOR

Bureau of Labor Statistics

Labor Research Advisory Council; Meetings and agenda

The Spring meetings of committees of the Labor Research Advisory Council will be held on May 9, 10, and 11 in the Frances Perkins Department of Labor Building, 200 Constitution Avenue, NW., Washington, DC.

The Labor Research Advisory Council and its committees advise the Bureau of Labor Statistics with respect to technical matters associated with the Bureau's programs. Membership consists of union research directors and staff members. The schedule and agenda of the meetings are as follows:

Tuesday, May 9, Room N-3437 A and B

1:30 p.m.—Committee on Wages and Industrial Relations

1. Review of work in progress
2. Update on the survey of white-collar pay and benefits
3. Linking the Employment Cost Index and the Employee Benefit Survey
4. Discussion of an experimental model on health care claims
5. Other business

Wednesday, May 10, Room S-2217

9:30 a.m.—Employment and unemployment Statistics

1. Discussion of program budget
2. Status reports on:

a. Current Population Survey redesign

b. New Local Area Unemployment Statistics methodology

c. Business Establishment List initiative

3. Discussion of Plant Closing and Mass Layoff reporting: LRAC suggestions
4. Continuing issues in measurement of labor shortages
5. Comparability of establishment and household survey data

11:30 a.m.—Council Meeting

Informal meeting with the Commissioner

2:00 p.m.—Committee on Occupational Safety and Health Statistics

1. Program Redesign

a. Status of current pilot surveys

b. Guidelines

c. Fatalities

d. Illnesses

2. Annual Survey Bulletin
3. Supplementary Data Systems status
4. Work Injury Report status
5. Other business

Thursday, May 11, Room S-2217

9:30 a.m.—Price and Living Conditions

1. Medical care

a. Consumer Price Index

b. Producer Price Index

2. Computer pricing—status report
3. International prices—monthly pricing
4. Overview of field operations

1:30 p.m.—Productivity, Technology and Economic Growth and Foreign Labor and Trade

1. Results of Hours at Work Survey and future plans
2. Update on 2-digit multifactor productivity work
3. International Productivity Service
4. Status report—revised 2000 Projections
5. Department-to-ministry program (work with Israel, China, and Russia)
6. ILO convention on labor statistics

The meetings are open. It is suggested that persons planning to attend as observers contact Henry Lowenstern, Executive Secretary, Labor Research Advisory Council on (Area Code 202) 523-1327.

Signed at Washington, DC, this 18th day of April 1989.

Janet L. Norwood,

Commissioner of Labor Statistics.

Employment and Training Administration

[TA-W-21,350 et al]

Grace Drilling Co., Inc. and BOMAC/Grace Drilling Co. Inc.; Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In the matter of Grace Drilling Company, Incorporated operating at various locations in the following states:

TA-W-21, 350	Odessa, Texas.
TA-W-21, 350A	Shreveport, Louisiana.
TA-W-21, 350B	Lafayette, Louisiana.
TA-W-21, 350C	Ft. Smith, Arkansas.
TA-W-21, 350D	Houston, Texas.
TA-W-21, 350E	Oklahoma City, Oklahoma.
TA-W-21, 350F	Golden, Colorado.
TA-W-21, 350G	Dallas, Texas, Corporate Headquarters.
TA-W-21, 350H	Casper, Wyoming.
TA-W-21, 350I	Montana.
TA-W-21, 350J	Utah.
TA-W-21, 350K	Alaska.
TA-W-21, 350L	California.
TA-W-21, 350K	South Dakota.

And BOMAC/Grace Drilling Company, Incorporated

TA-W-21, 399	Williston, North Dakota.

Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on December 20, 1988 applicable to all workers of Grace Drilling Company, operating in the various States.

The certification notice was amended to include the corporate headquarters in Dallas, Texas on February 7, 1989. The Department is amending the certification again, on its own motion to include the States of Wyoming, Montana, Utah, and South Dakota where layoffs from Grace Drilling have occurred since October 1985 and in Alaska and California where layoffs have occurred since 1986.

The intent of the certification is to cover all workers of the Grace Drilling Company in all of its locations. The amended notice applicable to TA-W-21, 350 and TA-W-21, 399 is hereby issued as follows.

All workers of Grace Drilling Company, Inc., operating at the various locations in the States listed below who became totally or partially separated from employment on or after October 1, 1985 and before January 1, 1987 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

TA-W-21, 350	Odessa, Texas.
TA-W-21, 350A	Shreveport, Louisiana.
TA-W-21, 350B	Lafayette, Louisiana.
TA-W-21, 350C	Ft. Smith, Arkansas.
TA-W-21, 350D	Houston, Texas.
TA-W-21, 350E	Oklahoma City, Oklahoma.
TA-W-21, 350F	Golden, Colorado.
TA-W-21, 350G	Dallas, Texas, Corporate Headquarters.
TA-W-21, 350H	Casper, Wyoming.
TA-W-21, 350I	Montana.
TA-W-21, 350J	Utah.
TA-W-21, 350K	Alaska.
TA-W-21, 350L	California.
TA-W-21, 350K	South Dakota.
TA-W-21, 399	Williston, North Dakota.

Signed at Washington, DC, this 17th Day of April 1989.

Stephen A. Wandner,

Deputy Director, Office of Legislation and Actuarial Services, UIS.

BILLING CODE 4510-30-M

Determinations Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period of March 1989.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proporation of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-22,283; Herbick & Held Printing Co., Pittsburg, PA

TA-W-22,312; Casco Belton, Inc., Lewiston, ME

TA-W-22,518; Brighton Metal Products, Inc., Caseville, MI

TA-W-22,449; George Koch Sons, Inc., Evansville, IN

TA-W-22,259; Stowell Products, Inc., Bryant Pond, ME

TA-W-22,375; White Swan Lumber Co., White Swan, WA

TA-W-21,765D; Tesoro Refining, Marketing & Supply Co.

TA-W-21,765E; Land & Marine Rental Co.

TA-W-22,412; Shortway Products, Clearfield, PA

TA-W-22,220; Energx Corp., Lecenter, MN

TA-W-22,421; Whirlpool Corp., Findlay Div., Findlay, OH

TA-W-22,455; Marine Electronic, Lisbon, MA

TA-W-22,271; Fabric Leather Corp., Division of Borden Chemical, Glen Cove, NY

TA-W-22,349; Farmland Refinery, Coffeyville, KS

TA-W-22,215; Continental Can Corp, Milwaukee, WI

TA-W-22,282; General Textile Printing Co., Branford, CT

TA-W-22,457; NCS Development, Solon, OH

TA-W-22,456; Magnetek, Inc., Louis Allis Div., Milwaukee, WI

TA-W-22,361; Model Expo, Inc., Wharton, NJ

TA-W-21,716; Energy Fuels, Nuclear, Inc., Fredonia, AZ

TA-W-22,453; Lorbrook Corp., Hudson, NY

TA-W-22,362; National Tool & Manufacturing Co., Kenilworth, NJ

TA-W-22,209; Brook's Woolen Co., Inc., Sanford, ME

TA-W-22,454; Machlett Laboratories, Stamford, CT

TA-W-22,344; Certified Metals, Clifton, NJ

TA-W-22,445; Control Data Corp., Government Systems Manufacturing Div., Eden Prairie, MN

TA-W-21,860A; Hadson Corp., Oklahoma City, OK;

TA-W-21,860B; Hadson Gas Systems, Oklahoma City, OK

TA-W-21,860C; Hadson New Mexico, Hobbs, NM

TA-W-21,860D; Hadson Energy Risk Management, New York, NY

TA-W-22,443; Columbus Rope Co., Guntown, MS

TA-W-22,094; Wurlitzer, Inc., (Currently Known as Wurltech, Inc, Corinth, MS

TA-W-22,272; Becton Dickinson, East Rutherford, NJ

TA-W-22,413; Simmonds, Precision Co., Operative Industries, Chester, NJ

TA-W-22,414; Stanton Foundry, Inc., Paramus, NJ

In the following cases, the investigation revealed that criterion (3) has not been met for the reasons specified.

TA-W-22,372; Sundown Well Service, Brownfield, TX

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,323; Jimco Electric & Construction, Inc., Big Spring, TX

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,278; Consolidated NDE, Inc., Woodbridge, NJ

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,279; Edwards Pipeline Testing, Inc., Tulsa, OK

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,115; Cenex Refinery Petroleum Transportation Dept., Laurel, MT

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA-W-22,417; Teledyne Columbia-Summerville, Pittsburgh, PA

The investigation revealed that criterion (1) has not been met.

VOL 54 ISS 78 AP 25 1989 UMI

Employment did not decline during the relevant period as required for certification.

TA-W-22,321; General Motors Corp., CPC Lakewood, Atlanta, GA

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-22,464; Terra Resources, Inc., Irving, TX

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-22,511; Venerable Managing General Agency, Inc., Midland, TX

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,273; Charms Candy Corporate Headquarters, Colts Neck, NJ

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,547; Saber Construction & Operating Co., Albion, IL

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,395; Edde Motors, Falls City, NE

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,391; Data General Corp., Fountain, CO

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,409; Rogers Structural Steel, Corry, PA

U.S. imports of fabricated structural steel declined absolutely and relative to domestic production in 1987 compared to 1986 and absolutely in the first three months of 1988 compared to the same period in 1987.

TA-W-21,425; Associated Electric Cooperative, Inc., Mining Div., Nemo Coal, Inc., Mine #1, Moberly, MO

U.S. imports of coal are negligible.

TA-W-22,295; North American Inspection, Inc., Laurys Station, PA

The investigation revealed that criterion (1) and (2) has not been met. Employment did not decline during the relevant period as required for certification. Sales or production did not decline during the relevant period as required for certification.

TA-W-22,309; Wisconsin Industrial Testing, Brookfield, WI

The investigation revealed that criterion (1) and (2) has not been met. Employment did not decline during the relevant period as required for certification. Sales or production did not decline during the relevant period as required for certification.

TA-W-22,307; Testmaster Inspection, Perrysburg, OH

The investigation revealed that criterion (1) and (2) has not been met. Employment did not decline during the relevant period as required for certification. Sales or production did not decline during the relevant period as required for certification.

TA-W-22,288; Jan X Ray Service, Parma, MI

The investigation revealed that criterion (1) and (2) has not been met. Employment did not decline during the relevant period as required for certification. Sales or production did not decline during the relevant period as required for certification.

TA-W-22,327; Manhattan Industries, Glen Rock, NJ

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,448; Gage Fina Truck Stop, Sweetwater, TX

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,329; Professional Geophysics, Inc., New Orleans, LA

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,516; Bethenergy Mines, Inc., Mine #84 Complex, Cokeburg, PA

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-22,340; Basin Well Service of Odessa, Inc., Odessa, TX

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA-W-22,613; W & C Contracting Co., Inc., Farmington, NM

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,222; General Oil Field Supply Co., Evansville, IN

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,226; Gregory & Cook, Inc., Houston, TX

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,387; Weyerhauser Co., North Bend, OR

U.S. imports of softwood lumber declined absolutely and relative to domestic product in the first three quarters of 1988 compared to the same period in 1987. U.S. imports of logs are negligible.

TA-W-22,381; AT & T Network Systems, Microlectronics Group, Lee's Summit, MO

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-22,512; Village Shoe & Boot Repair, Fort Collins, CO

The worker's firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,450; H.R. Johnson, Keyport, NJ

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,478; Fina Oil & Chemical Co., Windsor, NJ

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-22,392; Dirigo Lumber Co., Greenville Junction, ME

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-22,926; Phillips Petroleum Co., Tioga Gas Processing Plant Tioga, ND

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-22,446; Cooper Industries, Flow Control Div., Missouri City, TX

U.S. imports of oilfield machinery are negligible.

TA-W-22,401; Koypro Corp. Headquartered in Solano Beach, CA Operating in the State of Texas

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,411; Sherwood Medical Co., Sherburn NY

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-22,354; Goebel United States, Pennington, NJ

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,372; Sundown Well Service, Brownfield, TX

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,368; Rosanna Optical Case, Inc., Patterson, NJ

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-22,317; Explosives Technologies International, Inc., Morris, IL

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-22,274; Cleveland Xray Inspection, Cleveland, OK

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,333; Sunbelt Mining Co., Inc., Farmington, NM

U.S. imports of bituminous steam coal are negligible.

TA-W-22,319; Florsheim Shoe Co., Herman, MO

The investigation revealed that criterion (1) has not been met. Employment did not decline during the relevant period as required for certification.

TA-W-22,133; Envirogas, Inc., Mayville, NY

Section 1421 of the Omnibus Trade and Competitiveness Act of 1988 does not apply to workers engaged in production of crude oil or refined petroleum products if such workers were eligible for certification under the Trade Act prior to passage of the Omnibus Trade and Competitiveness Act of 1988.

TA-W-22,415; Stewart Well Service, Mt. Yernon, IL

The workers' firm does not produce an article as required or certification under section 222 of the Trade Act of 1974.

TA-W-22,593; Weatherford Oilfield Services, Laurel, MS

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,343; Box Pipe & Supply, Inc., Odessa, TX

The workers' firm does not produce an article as required or certification under section 222 of the Trade Act of 1974.

TA-W-22,366; Portage Mills Co., Portage, WI

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-22,302; Quest International Flavors, U.S.A. Inc., East Hanover, NJ

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-22,376; Abex Corp., Engineered Products Div., Medina, NY

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-22,353; Geer Tonk Trucks, Inc., Jackson, TX

The workers' firm does not produce an article as required or certification under section 222 of the Trade Act of 1974.

TA-W-22,383; Newton Exploration Co., Sidney, MT

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,397; Gesell Pump Sales & Service, Inc., Benton, IL

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,322; Iselin Preparation Co., Indiana, PA

U.S. imports of bituminous steam coal, lignite and anthracite were negligible.

TA-W-22,385; Tractech, Warren, MI

The investigation revealed that criterion (2) has not been met. Sales of production did not decline during the relevant period as required for certification.

TA-W-22,447; Eaton Corp., Electric Drives Div., Kenosha, WI

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA-W-22,400; Irvin Industries, Inc., Plant #2, Aerospace Div., Richmond, VA

The investigation revealed that criterion (2) has not been met Sales or production did not decline during the relevant period as required for certification.

TA-W-22,280; Fina Oil and Chemical Co., Corpus Christi, TX

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA-W-22,451; Harnischfeger Corp. Construction Equipment Div., Cedar Rapids, IA

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-22,586; Mabee Petroleum Corp., Midland TX

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-22,365; Petrofina Delaware, Inc., Houston, TX

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,406; Muskogee Inspection Co., Muskogee, OK

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,546; S.A.I.M.A. America, Inc., New York, NY

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,641; Northwestern Supply Co., Inc., Plainville, KS

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-22,481; General Motors Corp., General Motors Service Parts Operation, St. Louis, MO

BILLING CODE 4510-30-M

[TA-W-22,089]

Victory Energy Development Co., Indiana, PA; Negative Determination Regarding Application for Reconsideration

By an application of March 6, 1989 counsel for the workers requested administrative reconsideration of the subject petition for trade adjustment assistance. The denial notice was signed on January 31, 1989 and published in the **Federal Register** on March 27, 1989 (54 FR 12502).

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) If, in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

Counsel claims that Victory Energy meets the definition of a producer by virtue of the fact that it manages and oversees the actual drilling of the oil and gas leases, procures the pipelines and transports the gas to market.

The Department's considered Victory Energy as a producer in its initial negative determination since a substantial portion of its revenues were derived from the production and sale of its own natural gas. The findings also show that Victory Energy receives revenues from operating its partnerships' wells, contracting out drilling for its partnerships and marketing its partnerships' gas.

As a producer Victory Energy would not fall under the retroactive provisions contained in the Omnibus Trade and Competitiveness Act (OTCA) of 1988. The retroactive provisions contained in section 1421(a)(1)(B) of OTCA pertain only to workers in independent firms engaged in exploration and drilling for oil or natural gas with unaffiliated firms in the oil and gas industry.

Investigation findings show that the worker petition for Victory Energy did not meet the "contributed importantly" test of the Group Eligibility Requirements of the Trade Act of 1974. The "contributed importantly" test is generally demonstrated by means of a customer survey. The major customers of the subject firm were surveyed and none of the respondents imported natural gas in the period applicable to the petition. Other findings show that the average number of production workers at Victory Energy did not decline in the period applicable to the petition.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the laws of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, DC, this 17th day of April 1989.

Stephen A. Wandner,

Deputy Director, Office of Legislation and Actuarial Services, UIS.

BILLING CODE 4510-30-M

Job Training Partnership Act; Migrant and Seasonal Farmworker Programs; Proposed Planning Estimates

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice of proposed State planning estimates and allocation formula; request for comments.

SUMMARY: The Employment and Training Administration is publishing the proposed State planning estimates for Program Year 1989 (July 1, 1989–June 30, 1990) for the Job Training Partnership Act section 402 migrant and seasonal farmworker programs, the allocation formula, and the rationale used in arriving at the planning estimates.

DATE: Written comments on this notice are invited and must be received on or before May 25, 1989.

ADDRESS: Written comments shall be submitted to Mr. Paul A. Mayrand, Director, Office of Special Targeted Programs, Employment and Training Administration, U.S. Department of Labor, Room N-4641, 200 Constitution Avenue NW., Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT: Mr. Charles C. Kane, Chief, Division of Seasonal Farmworker Programs. Telephone: (202) 535-0500 (this is not a toll free number).

SUPPLEMENTARY INFORMATION: As required by section 162 of the Job Training Partnership Act (JTPA), the Employment and Training Administration publishes for comment the proposed State planning estimates for migrant and seasonal farmworker programs in Program Year (PY) 1989. Section 402 grantees will be competitively selected for a two-year period on July 1, 1989. The closing date for the submission of proposals was October 17, 1988. Since PY 1989 will be the first year of a two-year designation period, grantees will be funded for PY 1990, unless the actions called for at 20 CFR 633.315 of the JTPA regulations (replacement, corrective action, termination) are appropriate. Applications, therefore, will not be accepted from other organizations for that second year.

Allocation Formula

The planning estimates reflect: (1) No hold-harmless provision; and (2) that States which would receive less than $60,000 by application of the formula (Alaska, Rhode Island, and the District of Columbia) will receive no allotment, since the amount they would receive is deemed insufficient to effectively operate a program.

Although the Department of Labor (Department) reserves the right not to allocate any funds for use in a State whose allocation is less than $120,000 in accordance with 20 CFR 633.105(b)(2), jurisdictions which would receive more than $60,000 but less than $120,000 (Delaware and New Hampshire) will be given an allocation of at least $125,000. The total State allocations also include a PY 1989 supplemental allocation of $8,866,033. This represents the amount available after setting aside funds for the section 402 national account and maintaining State base allocations at PY 1988 levels. Half of these additional funds was distributed using the current section 402 formula while the other 50 percent of the increase was distributed based on the most recent Special Agricultural Worker data provided by the Immigration and Naturalization Service. The Department views these allocation methods as a fair and reasonable approach to serving the currently eligible and the newly eligible legalized migrant and seasonal farmworkers resulting from the Immigration Reform and Control Act of 1986. Also, this method is consistent with that used for the PY 1988 increase.

Allotments

The allotments set forth in the appendix to this notice reflect the allocation methods described above. These allocation methods are applied to a total amount to be distributed of $66,188,033. This figure represents the appropriated Fiscal Year 1989 (Pub. L. 100-436) level of $68,540,000 reduced by $2,351,967 which is being held in the JTPA section 402 national account. The migrant housing program and the Migrant Farm Labor Center in Hope, Arkansas, will be funded from that account.

Signed at Washington, DC, this 14th day of April 1989.

Roberts T. Jones,

Assistant Secretary of Labor.

Job Training Partnership Act (JTPA) Advisory Committee Meetings

The Job Training Partnership Act Advisory Committee was established by Notice dated June 16, 1988, and published June 28, 1988, 53 FR 24379 to advise the Department of Labor on a comprehensive review of the JTPA program. A review of experience to date of the JTPA program and request for comments on the issues to be addressed in the review were provided by Notice published August 12, 1988, 53 FR 30483. The Committee to date has met six times.

Notice is hereby given of the next two meetings of the Advisory Committee:

Date: May 16–18, 1989. The meeting will be held at the Fort Magruder Inn, Rte. 60 East, Williamsburg, Virginia 23187. The meeting will begin at 9:00 a.m. May 16 and adjourn at noon on May 18.

Date: June 27, 1989. The meeting will be held at the Vista Hotel, 1400 M Street, NW., Washington, DC 20005. The meeting will begin at 9:30 a.m. and adjourn at 4:00 p.m.

The meetings are open to the public.

For further information, contact Hugh Davies, Office of Job Training Programs, U.S. Department of Labor, Employment and Training Administration, 200 Constitution Avenue,. NW., Room N–4709, Washington, DC 20210. Telephone 202–535–0580.

Signed at Washington, DC, this 14th day of April, 1989.

Roberts T. Jones,

Assistant Secretary of Labor.

BILLING CODE 4510–30–M

Mine Safety and Health Administration

[Docket No. M–89–44–C]

Consolidation Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Consolidation Coal Company, Consol Plaza, Pittsburgh, Pennsylvania 15241 has filed a petition to modify the application of 30 CFR 75.1403–8(b) (track haulage roads) to its Blacksville No. 1 Mine (I.D. No. 46–01867) located in Monongalia County, West Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that track haulage roads have a continuous clearance on one side of at least 24 inches from the farthest projection of normal traffic.

2. In order to comply with the 24-inch clearance requirement the track in numbers 10 and 11 headings will have to be realigned and arches used for roof support will have to be removed thereby exposing miners to hazardous conditions.

3. As an alternate method, petitioner proposes the following procedures:

(a) Luminous signs designating "Close Clearance" would be posted at the track entrances to the affected areas;

(b) No person would be allowed to enter the area on foot without permission from the dispatcher and dumper;

(c) Telephones would be provided at the entrances to the affected areas;

(d) The dispatcher would notify all locomotive operators or other haulage vehicle operators of the location of work crews in the affected areas; and

(e) The dispatcher and dumper would be notified when the persons leave the affected areas.

4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before May 25, 1989. Copies of the petition are available for inspection at that address.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

Date: April 19, 1989.

[FR Doc. 89–9856 Filed 4–24–89; 8:45 am]

BILLING CODE 4510–43–M

[Docket No. M–89–48–C)

Eastside Coal Co., Inc.; Petition for Modification of Application of Mandatory Safety Standards

Eastside Coal Company, Inc., P.O. Box 161, Silt, Colorado 81652 has filed a petition to modify the application of 30 CFR 75.1100–2(b) (belt conveyors) to its Eastside Mine (I.D. No. 05–02421) located in Garfield County, Colorado. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follow:

1. The petition concerns the requirement that waterlines be installed parallel to the entire length of belt conveyors and equipped with firehose outlets with valves at 300-foot intervals along each belt conveyor and at tailpieces.

2. Due to freezing problems with subsequent loss of firefighting capability, the waterline along the belt line cannot be charged during the winter months.

3. As an alternate method, petitioner proposes not to charge the waterline parallel to the conveyor belt line for the first 800 feet plus approximately 200 feet of the charging line from October through March.

4. In support of this request, petitioner states that the waterline could be fully charged within five minutes or less. Signs would be posted at strategic valve locations. All personnel would be instructed in the location of the valves and also instructed in the method to charge the line in the event of an emergency. They would be instructed again every 90 days thereafter in conjunction with fire drills.

5. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before May 25, 1989. Copies of the petition are available for inspection at that address.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

Date: April 19, 1989.

[FR Doc. 89–9857 Filed 4–24–89; 8:45 am]

BILLING CODE 4510–43–M

[Docket No. M–89–33–C]

Island Creek Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Island Creek Coal Company, P.O. Box 11430, Lexington, Kentucky 40575 has filed a petition to modify the application of 30 CFR 75.326 (aircourses and belt haulage entries) to its Providence No. 1 Mine (I.D. No. 15–02156) located in Hopkins County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that intake and return aircourses be separated from belt haulage entries and that belt haulage entries not be used to ventilate active working places.

2. As an alternate method, petitioner proposes to use belt air to ventilate the working faces and to remove restrictions on the velocity of air in the belt entries.

3. In support of this request, petitioner proposes to install an early warning fire detection system utilizing a low-level carbon monoxide (CO) detection system in all belt entries used as intake aircourses and at each belt drive and tailpiece located in intake aircourses. The monitoring devices would be capable of giving warning of a fire for four hours should the power fail; a visual alert signal would be activated when the CO level is 10 parts per million (ppm) above ambient air and an audible signal would sound at 15 ppm above ambient air. All persons would be withdrawn to a safe area at 10 ppm and evacuated at 15 ppm. The fire alarm signal would be activated at an attended surface location where there is two-way communication. The CO system would be capable of identifying any activated sensor, monitoring electrical continuity and detecting electrical malfunctions.

4. The CO system would be visually examined at least once each coal-producing shift and tested weekly to ensure the monitoring system is functioning properly. The monitoring system would be calibrated with known concentrations of CO and air mixtures at least monthly.

5. If the CO monitoring system is deenergized for routine maintenance or for failure of a sensor unit, the belt conveyor would continue to operate and qualified persons would patrol and monitor the belt conveyor using hand-held CO detecting devices.

6. The details for the fire detection system, and the permanent stoppings separating the conveyor belt entries from the intake escapeway would be included as part of the ventilation system, methane and dust control plan.

7. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before May 25, 1989. Copies of the petition are available for inspection at that address.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

Date: April 18, 1989.

BILLING CODE 4510–43–M

[Docket No. M–89–38–C]

R&B Mining; Petition for Modification of Application of Mandatory Safety Standard

R&B Mining, R.D. 4, Box 393–A, Pine Grove, Pennsylvania 17936 has filed a petition to modify the application of 30 CFR 75.301 (air quality, quantity and velocity) to its No. 2 Slope (I.D. No. 36–07877) located in Schuylkill County, Pennsylvania. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that the minimum quantity of air reaching the last open crosscut in any pair or set of developing entries and the last open crosscut in any pair or set of rooms be 9,000 cubic feet a minute, and the minimum quantity of air reaching the intake end of a pillar line be 9,000 cubic feet a minute. The minimum quantity is required to be 3,000 cubic feet a minute.

2. Air sample analysis history reveals that harmful quantities of methane are nonexistent in the mine. Ignition, explosion, and mine fire history are nonexistent for the mine. There is no history of harmful quantities of carbon monoxide and other noxious or poisonous gases.

3. Mine dust sampling programs have revealed extremely low concentrations of respirable dust.

4. Extremely high velocities in small cross-sectional areas of airways and manways required in friable anthracite veins for control purposes, particularly in steeply pitching mines, present a very dangerous flying object hazard to the miners and cause extremely uncomfortable damp and cold conditions in the mine.

5. As an alternate method, petitioner proposes that:

(a) The minimum quantity of air reaching each working face be 1,500 cubic feet per minute;

(b) The minimum quantity of air reaching the last open crosscut in any pair or set of developing entries be 5,000 cubic feet per minute; and

(c) The minimum quantity of air reaching the intake end of a pillar line be 5,000 cubic feet per minute, or whatever additional quantity of air that may be required in any of these areas to maintain a safe and healthful mine atmosphere.

6. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Council on the Arts; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the National Council on the Arts/National Assembly of State Arts Agencies/National Assembly of Local Arts Agencies Sub-Committee to the National Council on the Arts will be held on May 11, 1989, from 3:00 p.m.–5:00 p.m. in Room M–07 at the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506

This meeting will be open to the public on a space available basis. The topics for discussion will be policy issues.

If you need special accommodations due to a disability, please contact the Office of Special Constituencies, National Endowment of the Arts, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, 202/682–5532, TTY 202/682–5496, at least seven (7) days prior to the meeting.

Further information with reference to this meeting can be obtained from Ms. Yvonne M. Sabine, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682–5433.

Design Arts Advisory Panel; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Design Arts Advisory Panel (Design Advancement/Individuals Section) to the National Council on the Arts will be held on May 17-18, 1989, from 9:00 a.m.-5:30 p.m. and May 19, 1989, from 9:00 a.m.-5:00 p.m. in Room 730 at the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

A portion of this meeting will be open to the public on May 19, 1989 from 2:30 p.m.-5:00 p.m. The topics for discussion will be policy issues.

The remaining portion of this meeting on May 17-18, 1989 from 9:00 a.m.-5:30 p.m. and May 19, 1989, from 9:00 a.m.-2:30 p.m. is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsection (c) (4), (6) and (9)(B) of section 552b of Title 5, United States Code.

If you need special accommodations due to a disability, please contact the Office for Special Constituencies, National Endowment for the Arts, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, 202/682-5532, TTY 202/682-5496 at least seven (7) days prior to the meeting.

BILLING CODE 7533-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Meeting Agenda

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b), the Advisory Committee on Reactor Safeguards will hold a meeting on May 3-6, in Room P-110, 7920 Norfolk Avenue, Bethesda, MD and One White Flint North, Rockville, Maryland. Notice of this meeting was published in the **Federal Register** on March 21, 1989.

Wednesday, May 3, 1989, Room P-110, 7920 Norfolk Avenue, Bethesda, MD

12:00 Noon-1:30 p.m.: Preparation for Meeting with NRC Commissioners (Open)—The Committee will discuss

ACRS reports to NRC regarding Generic Issue 99, Improved Reliability of Residual Heat Removal Capability in PWRs (reports dated September 14, 1988 and February 16, 1989); Unresolved Safety Issue A-45, Shutdown Decay Heat Removal Requirements (report dated September 14, 1988); and Further ACRS Comments on Implementation of the Safety Goal Policy (report dated February 16, 1989).

Commissioners Conference Room (Lobby), One White Flint North, Rockville, Maryland

2:00 p.m.-3:30 p.m.: Meeting with NRC Commissioners (Open)—The Committee will meet with the NRC Commissioners to discuss the reports noted above.

Thursday, May 4, 1989, Room P-110, 7920 Norfolk Avenue, Bethesda, MD

8:30 a.m.-8:45 a.m.: Comments by ACRS Chairman (Open)—The ACRS Chairman will report on items of current interest.

8:45 a.m.-10:30 a.m.: Limerick Nuclear Station, Unit 2 (Open/Closed)—The Committee will review and comment regarding proposed operation of this nuclear power plant.

Portions of this session will be closed as necessary to discuss safeguards and security information regarding this facility.

10:45 a.m.-12:00 Noon: Evaluation of Operating Experience at Nuclear Plants (Open)—The Committee will be briefed by representatives of the NRC staff regarding reports evaluating reactor operating experience, including loss of decay heat removal capability, inadequate NPSH in high pressure safety systems, and deficiencies in control room ventilation systems in nuclear power plants.

1:00 p.m.-3:00 p.m.: Reactor Risk Reference Document (Open)—The Committee will review and comment on the proposed uses and content of NUREG-1150, "Severe Accident Risks: An Assessment for Five U.S. Nuclear Power Plants," Second Draft.

3:15 p.m.-4:45 p.m.: Radiobiological Exposure Criteria (Open)—The Committee will review and comment on the proposed NRC generic letter on evaluation of radiation exposure/dose from "hot particles."

4:45 p.m.-6:15 p.m.: Performance Indicator Program (Open)—The Committee will be briefed regarding development and use of performance indicators for evaluation of operations at nuclear power plants.

Friday, May 5, 1989, Room P-110, 7920 Norfolk Avenue, Bethesda, MD

8:30 a.m.-10:30 a.m.: Valve Surveillance and Testing (Open)—The Committee will meet with the NRC Staff and also hold a discussion of proposed ACRS comments regarding proposed NRC testing and surveillance requirements for motor-operated valves in nuclear power plants.

10:45 a.m.-12:00 Noon and 1:00 p.m.-2:30 p.m.: Human Factors (Open)—The Committee will review and comment on the proposed NRC research program plan on human factors and related NRC initiatives.

2:45 p.m.-3:15 p.m.: Future ACRS Activities (Open)—The Committee will discuss anticipated ACRS subcommittee activities and matters proposed for consideration by the full committee.

3:15 p.m.-5:45 p.m.: Emergency Planning (Open)—A briefing will be given by representatives of the NRC Staff and industry regarding the status of emergency planning and preparedness for nuclear power plants.

Saturday, May 6, 1989, Room P-110, 7920 Norfolk Avenue, Bethesda, MD

8:30 a.m.-12:00 Noon and 1:00 p.m.-2:00 p.m.: Preparation of ACRS Reports (Open)—The Committee will discuss proposed reports to NRC regarding items considered during this meeting.

2:00 p.m.-3:00 p.m.: ACRS Subcommittee Activities (Open)—The Committee will hear and discuss reports of the status of ACRS subcommittee activities regarding designated areas including the status of implementation of ATWS and scope of ACRS activities.

3:00 p.m.-3:15 p.m.: Appointment of ACRS Members (Open/Closed)—The Committee will hear a status report regarding appointment of ACRS members.

Portions of this session will be closed as necessary to discuss information the release of which would represent a clearly unwarranted invasion of personal privacy.

Procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on October 27, 1988 (53 FR 43487). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Use of still, motion picture and television cameras during this meeting may be limited to selected portions of the meeting as determined by the Chairman. Information regarding the time to be set aside for this purpose may be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley, prior to the meeting. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such rescheduling would result in major inconvenience.

I have determined in accordance with subsection 10(d) Pub. L. 92-463 that it is necessary to close portions of this meeting as noted above to discuss information the release of which would represent a clearly unwarranted invasion of personal privacy (5 U.S.C. 552b(c)(6)) and to discuss safeguards information (5 U.S.C. 552b(c)(3)).

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 301/492-8049), between 8:15 a.m. and 5:00 p.m.

Date: April 18, 1989.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 89-9787 Filed 4-24-89; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 55-20449; ASLBP No. 89-588-01-SP]

Rodger W. Ellingwood, Senior Operator License for Catawba Nuclear Station; Designation of Presiding Officer

Pursuant to delegation by the Commission dated December 29, 1972, published in the **Federal Register**, 37 FR 28710 (1972) and §§ 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717 and 2.721 of the Commission's Regulations, all as amended, a presiding officer is designated in the following proceeding:

Rodger W. Ellingwood, Senior Operator License for Catawba Nuclear Station

By letter dated December 7, 1988, Rodger W. Ellingwood, an applicant for a senior operator license for the Catawba Nuclear Station, was informed

VOL 54 ISS 78 AP 25 1989 UMI

by NRC's Region II office that he did not pass the written examination taken on September 26, 1988, and that it is proposed that his application be denied. On December 20, 1988, Mr. Ellingwood requested reconsideration of the proposed denial of his license application. However, the Office of Nuclear Reactor Regulation sustained the license denial on March 1, 1989. In accordance with directions in the letter of denial, Mr. Ellingwood on March 16, 1989 requested a hearing pursuant to 10 CFR 2.103(b)(2).

The presiding officer in this proceeding is Administrative Judge John H. Frye III.

Following consultation with the Panel Chairman, pursuant to the provisions of 10 CFR 2.722, the Presiding Officer has appointed Administrative Judge Frederick J. Shon to assist the Presiding Officer in taking evidence and in preparing a suitable record for review.

All correspondence, documents and other materials shall be filed with Judge Frye and Judge Shon in accordance with 10 CFR 2.701. Their addresses are:

Administrative Judge John H. Frye III, Presiding Officer, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Administrative Judge Frederick J. Shon, Special Assistant, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Issued at Bethesda, Maryland, this 17th day of April 1989.

B. Paul Cotter, Jr.,

Chief Administrative Judge, Atomic Safety and Licensing Board Panel.

[FR Doc. 89-9788 Filed 4-24-89; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-331]

Iowa Electric Light and Power Co., et al.; Withdrawal of Application for Amendment to Facility Operating License

The United States Nuclear Regulatory Commission (the Commission) has granted the request of Iowa Electric Light and Power Company, Central Iowa Power Cooperative, and Corn Belt Power Cooperative (the licensee) to withdraw a portion of its October 14, 1986 application for an amendment to Facility Operating License No. DPR-49 for the Duane Arnold Energy Center located in Linn County, Iowa.

The proposed amendment would have revised the Technical Specifications to allow qualified personnel to screen proposed procedure changes on behalf of the plant Operations Committee.

The Commission has previously issued a Notice of Consideration of Issuance of Amendment published in the Federal Register on February 26, 1987 (52 FR 5857). However, by letter dated March 25, 1987, the licensee withdrew a portion of the proposed change.

For further details with respect to this action, see the application for amendment dated October 14, 1986 and the licensee's letter dated March 25, 1987 which withdrew a portion of the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC, and the Cedar Rapids Public Library, 500 First Street, SE., Cedra Rapids, Iowa 52401.

Dated at Rockville, Maryland this 18th day of April 1989.

For the Nuclear Regulatory Commission.

John N. Hannon,

Director, Project Directorate III-3, Division of Reactor Projects-III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 89-9680 Filed 4-24-89; 8:45 am]

BILLING CODE 7590-01-M

Philadelphia Electric Co.; Establishment of Atomic Safety and Licensing Board

[Docket Nos. 50-352-OL and 50-353-OL; ASLBP No. 89-587-03-OL-R]

Pursuant to delegation by the Commission dated December 29, 1972, published in the Federal Register, 37 FR 28710 (1972), and sections 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717, and 2.721 of the Commission's Regulations, all as amended, an Atomic Safety and Licensing Board is being established to preside over the following proceeding.

Philadelphia Electric Company, Limerick Generating Station, Units 1 and 2, Facility Operating License No. NPF-39, Facility Construction Permit No. CPPR-107.

This Atomic Safety and Licensing Board is being designated pursuant to the provisions of an Order issued by the Commission on April 14, 1989 with respect to an opinion issued February 28, 1989 by the United States Court of Appeals for the Third Circuit granting a petition for review filed by intervenor Thomas Martin, who represents a group of inmates at the State Correctional Institution in Graterford, Pennsylvania. *Martin* v. *NRC*, No. 87-3190, slip op. at 77. In granting that petition, the Court ordered the Commission to give additional consideration to an inmate contention questioning whether the radiological emergency plan relating to the Graterford Institution complies with the standard of 10 CFR 50.47(b)(15) that radiological response emergency training is provided to civilian personnel (*e.g.*, bus and ambulance drivers) who may be called upon to assist in the event of an emergency that would require evacuation of the Graterford prison. *Id.* at 69-71.

The Board is comprised of the following administrative judges:

Morton B. Margulies, Chairman, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Jerry Harbour, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Jerry R. Kline, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

B. Paul Cotter, Jr.,

Chief Administrative Judge, Atomic Safety and Licensing Board Panel.

Issued at Bethesda, Maryland, this 14th day of April, 1989.

[FR Doc. 89-9789 Filed 4-24-89; 8:45 a.m.]

BILLING CODE 7590-01-M

[Docket Nos. 50-352-OL, 50-353-OL; ASLBP No. 89-587-03-OL-R]

Philadelphia Electric Co. (Limerick Generating Station, Units 1 and 2); Prehearing Conference

April 18, 1989.

Before Administrative Judges Morton B. Margulies, Chairman, Jerry Harbour, Jerry R. Kline.

Please take notice that in the captioned proceeding a prehearing conference will be held on May 12, 1989, at 9:30 a.m. in the U.S. Customs House, Courtroom 300, Second and Chestnuts Streets, Philadelphia, Pennsylvania.

The conference is called pursuant to the Order of the Commission of April 14, 1989, calling for a Licensing Board to conduct proceedings to consider the contention of an inmate questioning whether the radiological emergency response plan relating to the Graterford Institution complies with the standard of 10 CFR 50.47(b)(15) that radiological response emergency training is provided to civilian personnel (e.g., bus and ambulance drivers) who may be called upon to assist in the event of an emergency that would require evacuation of the Graterford prison. The Commission action was taken in furtherance of an opinion issued February 28, 1989, by the United States Court of Appeals for the Third Circuit granting a petition for review filed by Intervenor Thomas Martin. *Martin* v. *NRC*, No. 87-3190, slip op. at 69-71, 77.

The following matters will be considered:

(1) Simplication, clarification, and specification of the issue;

(2) The obtaining of stipulations and admissions of fact and of the contents and authenticity of documents to avoid unnecessary proof;

(3) Identification of witnesses and the limitation of the number of expert witnesses, and other steps to expedite the presentation of evidence;

(4) The setting of a hearing schedule; and

(5) Such other matters as may aid in the orderly disposition of the proceeding.

The parties or their counsel are directed to appear.

For the Atomic Safety and Licensing Board.

Morton B. Margulies,

Chairman, Administrative Law Judge.

Dated at Bethesda, Maryland, this 18th day of April, 1989.

[FR Doc. 89-9790 Filed 4-24-89; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-305]

Wisconsin Public Service Corp., et al.; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards; Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulation Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-43, issued to Wisconsin Public Service Corporation, Wisconsin Power and Light Company, and Madison Gas and Electric Company (the licensee), for operation of the Kewaunee Nuclear Power Plant, located in Kewaunee County, Wisconsin.

The amendment would change the expiration date for the Kewaunee Plant Operating License from August 6, 2008, to December 21, 2013. The Technical Specifications for the plant would not be affected.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination is provided below.

The current term of the KNPP Operating License is 40 years commencing with the issuance of the construction permit (August 6, 1968). Accounting for the time required for plant construction, this represents an effective operating license term of only 35 years. Current NRC practice is to issue an operating license with a term of 40 years from the date of issuance. This amendment proposes to extend the operating license in accordance with current practices.

The licensee's request for extension of the Operating License is based primarily on the fact that the facility is designed for 40 years of operation at a load factor of 0.85. Although this does not mean that some components will not wear out during the plant lifetime, design features were incorporated to maximize the inspectability of structures, systems and equipment. Surveillance and maintenance practices which have been implemented in accordance with the ASME code and the facility Technical Specifications provide assurance that any unexpected degradation in plant equipment will be identified and corrected.

The design of the reactor vessel and its internals considered the effects of 40 years of operation at a load factor of 0.85 and a comprehensive vessel material surveillance program is maintained in accordance with 10 CFR Part 50, Appendix H. Analyses showing compliance with the NRC pressurized thermal shock screening criteria have demonstrated that expected cumulative neutron fluences will not be a limiting consideration. In addition to these calculations, surveillance capsules placed inside the reactor vessel provide a means of monitoring the cumulative effects of power operation.

Aging analyses have been performed for all safety-related electrical equipment in accordance with 10 CFR 50.49, "Environmental qualifications of electrical equipment important to safety for nuclear power plants," identifying qualified lifetimes for this equipment. These lifetimes have been incorporated into a plant preventative maintenance program and replacement practices will ensure that all safety-related electrical equipment remains qualified and available to perform its safety function regardless of the overall age of the plant.

The environmental impacts associated with a 40-year operating period were considered in the licensing of the Kewaunee Plant. The population estimates, as provided in the 1970 census data and used for licensing projections, were only carried out for 2010, three years less than the 40-year period. However, overall population has declined in the area and within the limits of projecting future populations, the 2013 plant area forecast population will be smaller than the originally forecast 2010 plant area population. Modifications to the plant and its surroundings, since the Operating License was issued in 1973, have resulted in improving the reliability of plant safety and reducing the environmental impact of plant operations.

The NRC staff concludes that extension of the operating license for the Kewaunee Nuclear Power Plant to allow a 40-year service life is consistent with the safety analysis in that all issues associated with plant aging have already been addressed. Since the proposed amendment involves no changes in the Technical Specifications or safety analyses, the staff concludes that the proposed amendment would not: (1) Involve any significant increase in the probability or consequences of an accident previously evaluated; or (ii) create the possibility of a new or different kind of accident from any accident previously evaluated; or (iii) involve any reduction in the margin of safety.

Accordingly, the Commission proposes to determine that the proposed amendment involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration and Resources Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of the Federal Register notice. Written comments may also be delivered to Room P-216, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m. Copies of written comments

received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By May 25, 1989, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1 (800) 325-6000 (in Missouri 1 (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to John N. Hannon: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to David Baker, Esq., Foley and Lardner, P.O. Box 2193, Orlando, Florida 31082, attorney for the licensee.

Nontimely filings of peititons for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer, or the Atomic Safety and Licensing Board that the petition and/or request, should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated May 23, 1986, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the University of Wisconsin Library Learning Center, 2420 Nicolet Drive, Green Bay, Wisconsin 54301.

Dated at Rockville, Maryland, this 16th day of April 1989.

For the Nuclear Regulatory Commission.

John N. Hannon,

Director, Project Directorate III–3, Division of Reactor Projects—III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

OFFICE OF PERSONNEL MANAGEMENT

Excepted Service

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: This gives notice of positions placed or revoked under Schedules A, B, and C in the excepted service, as required by civil service rule VI, Exceptions from the Competitive Service.

FOR FURTHER INFORMATION CONTACT: Leesa Martin, (202) 632–0728.

SUPPLEMENTARY INFORMATION: The Office of Personnel Management published its last monthly notice updating appointing authorities established or revoked under the Excepted Service provisions of 5 CFR Part 213 on March 27, 1989 (54 FR 12512). Individual authorities established or revoked under Secedule A, B, or C between March 1, 1989, and March 31, 1989, appear in a listing below. Future notices will be published on the fourth Tuesday of each month, or as soon as possible thereafter. A consolidated listing of all authorities will be published as of June 30 of each year.

Schedule A

No Schedule A authorities were established or revoked during March.

Schedule B

No Schedule B authorities were established or revoked during March.

Schedule C

Department of Agriculture

Two Confidential Assistants to the Administrator. Effective March 9, 1989.

One Staff Assistant to the Administrator. Effective March 9, 1989.

One Private Secretary to the Secretary of Agriculture. Effective March 20, 1989.

Department of Commerce

One Confidential Assistant to the Director of the Office of Commercial Space Programs. Effective December 30, 1988. Note: This position should have appeared in the listing dated Wednesday, January 25, 1989; FR 54 3702.

One Confidential Assistant to the Secretary. Effective March 24, 1989.

One Director, Office of Business Liaison, to the Secretary of Commerce. Effective March 8, 1989.

One Director, Office of Private Sector Initiatives, to the Director, Office of Business Liaison. Effective March 20, 1989.

One Confidential Assistant to the Director General, U.S. and Foreign Commercial Service. Effective March 22, 1989.

One Confidential Assistant to the Secretary of Commerce. Effective March 22, 1989.

Department of Energy

One Staff Assistant to the Chief of Staff. Effective March 13, 1989.

One Director, Intergovernmental Affairs Division, to the Director, Office of External Affairs. Effective March 27, 1989.

One Staff Assistant to the Chief of Staff. Effective March 24, 1989.

One Staff Assistant to the Deputy Secretary. Effective March 29, 1989.

Department of Education

One Special Assistant to the Secretary. Effective March 10, 1989.

Department of Housing and Urban Development.

One Special Assistant to the Secretary. Effective March 22, 1989.

Two Special Assistants to the Secretary. Effective March 23, 1989.

One Special Assistant to the Secretary. Effective March 29, 1989.

Department of Labor

One Special Assistant to the Secretary of Labor. Effective March 1, 1989.

Two Special Assistants to the Assistant Secretary for Public and Intergovernmental Affairs. Effective March 3, 1989.

One Special Assistant to the Secretary for Policy. Effective March 3, 1989.

One Special Assistant to the Assistant Secretary for Congressional Affairs. Effective March 27, 1989.

One Senior Legislative Officer to the Assistant Secretary for Congressional Affairs. Effective March 30, 1989.

Department of State

One Special Assistant to the Under Secretary for Management. Effective March 3, 1989.

One Protocol Officer to the Chief of Protocol. Effective March 8, 1989.

One Staff Assistant to the Counselor. Effective March 13, 1989.

One Staff Assistant to the Director, Policy Planning Staff. Effective March 24, 1989.

Department of Treasury

One Special Assistant to the Director of Scheduling. Effective March 1, 1989.

One Legislative Assistant to the Assistant Secretary for Legislative Affairs. Effective March 3, 1989.

One Special Assistant to the Deputy Assistant Secretary for Departmental Finance and Management. Effective March 8, 1989.

One Special Assistant to the Assistant Secretary for Policy Development. Effective March 13, 1989.

One Confidential Assistant to the Secretary. Effective March 15, 1989.

One Director, Office of Intergovernmental Affairs to the Deputy Assistant Secretary. Effective March 29, 1989.

Action

One Assistant Director for Vista/Student Community Service Programs to the Associate Director. Effective March 10, 1989.

Office of Management and Budget

One Special Assistant to the Associate Director for Congressional Affairs. Effective March 10, 1989.

One Deputy Director of External Affairs to the Director of External Affairs. Effective March 14, 1989.

One Confidential Assistant to the Associate Director for Congressional Affairs. Effective March 15, 1989.

One Confidential Assistant to the Director, Office of Management and Budget. Effective March 24, 1989.

United States Tax Court

One Confidential Assistant to a Judge. Effective March 9, 1989.

Authority: 5 U.S.C. 3301, 3302; E.O. 10555, 3 CFR 1954–1958 Comp., P. 218.

Constance Horner,

Director, U.S. Office of Personnel Management.

BILLING CODE 6325–01–M

POSTAL SERVICE

Implementation of Final Express Mail International Service Revised Rates

AGENCY: Postal Service.

ACTION: Notice of change in express mail international service rates.

SUMMARY: Pursuant to its authority under 39 U.S.C. 407, effective April 25, 1989, the Postal Service will implement a lower half-pound rate for On-Demand Express Mail International Service. A special introductory rate will precede the regular rate, which will take effect July 1, 1989. The Postal Service is reducing these rates in order to provide persons and companies in international trade with readily available, fast, economical delivery of important documents, which the half-pound pieces are most likely to contain.

EFFECTIVE DATE: 12:01 am. April 25, 1989 and 12:01 a.m. July 1, 1989.

FOR FURTHER INFORMATION CONTACT: Eugene Columbo, (202) 268–2286.

By mail: Eugene Columbo, General Manager, Market Development Division, Room 5437, U.S. Postal Service, Washington, DC 20260–6339.

SUPPLEMENTARY INFORMATION: This document provides notice that the Postal

VOL 54 ISS 78 AP 25 1989 UMI

Service is implementing a lower half-pound rate for On-Demand Express Mail International Service shipments. The lower rate will be $10.75 for pieces weighing eight ounces or less. In addition, the Postal Service is implementing a special introductory rate of $8.75 for pieces weighing eight ounces or less that will be in effect from 12:01 a.m. April 25, 1989 until 12:01 a.m. July 1, 1989. The $10.75 rate will take effect at 12:01 a.m. July 1, 1989.

Express Mail International Service is the Postal Service's premium international service. It is available to almost 100 countries and can deliver international documents and parcels in three days or less, depending on the destination and availability of transportation.

International trade is increasingly important to the United States. Persons and companies engaged in international trade need readily available, fast, economical delivery of important documents. In response to this need, the Postal Service is reducing its rate for On-Demand Express Mail International Service pieces most likely to contain documents, pieces weighing eight ounces or less. This action has been facilitated by foreign postal administrations in agreements which significantly lower the imbalance charges associated with this category of mail. The Postal Service expects this rate not only to make expedited international delivery service more affordable for those who already use it, but also to make expedited international delivery service available to new users who until now have considered expedited delivery service too expensive. In particular, lower rates are expected to benefit smaller businesses. Although it is not possible to quantify, the provision of less expensive expedited document service is expected to stimulate growth in international trade generally and in expedited parcel shipments via the Postal Service as well as via other carriers.

In view of the above considerations, the Postal Service hereby adopts a special introductory half-pound rate of $8.75 for On-Demand Express Mail International pieces that will be in effect from 12:01 a.m. April 25, 1989 until 12:01 a.m. July 1, 1989, when the rate for such pieces will be $10.75.

Fred Eggleston,

Assistant General Counsel, Legislative Division.

BILLING CODE 7710-12-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

[Docket No. 301-55]

Unfair Trade Practices; Icicle Seafoods; Determination and Hearing

AGENCY: Office of the United States Trade Representative.

ACTION: Notice of rebuttal date and correction or room number where public hearing will be held.

On March 31, 1989, a notice was published in the **Federal Register** (54 FR 13264) announcing that a public hearing in this matter would be held on April 28, 1989, in Court Room A, Room 100 of the U.S. International Trade Commission, 500 E Street SW., Washington, DC. The purpose of this notice is to change the original Court Room number as published in 54 FR 13264 and to give the deadline for filing rebuttal briefs. The new room number is Court Room B, Room 100 of the U.S. International Trade Commission, 500 E Street, SW., Washington, DC.

In order to assure each party an opportunity to contest the information provided by other parties, the Section 301 Committee will entertain rebuttal briefs filed by any party, in accordance with 15 CFR 2006.8(c), by noon on May 5, 1989. Rebuttal briefs may be addressed to Ms. Dorothy Balaban, Staff Assistant to the section 301 Committee, Office of the U.S. Trade Representative, Room 222, 600 17th Street, NW., Washington, DC 20506.

A. Jane Bradley,

Chairwoman, Section 301 Committee.

BILLING CODE 3190-01-M

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket S-849]

Seabulk Transmarine I, Inc., et al., Application for Permission Under Section 805(a) of the Merchant Marine Act, 1936, as Amended

By letter dated April 20, 1989, Seabulk Transmarine I, Inc., Seabulk Transmarine II, Inc., and Seabulk Transmarine III, Inc. (the Seabulk companies) requested all determinations and permissions required pursuant to section 805(a) of the Merchant Marine Act, 1936, as amended (Act).

Each of the Seabulk companies is a wholly-owned subsidiary of Hvide Marine International, Inc., which is in turn a wholly-owned subsidiary of Hvide Shipping, Incorporated (Hvide) and are operators under Operating-Differential Subsidy Agreements (ODSA), Contracts MA/MSB-440, MA-MSB-441, and MA/MSB-442.

In 1981 the Maritime Subsidy Board (Board) granted permission, pursuant to section 805(a) of the Act, with respect to Hvide's domestic operation of the harbor tugs FORT LAUDERDALE, CAPTAIN NELSON, EVERGLADES, CAPTAIN BRINN, and BREVARD (ex-HOLLYWOOD) in the harbors of Port Everglades and Port Canaveral, Florida. In granting that permission the Board observed that the applicants had made "no representation and [did] not concede that the employment of said harbor tugs constitutes engagement in the intercoastal or coastwise service." Minutes of the Maritime Subsidy Board, March 17, 1981 (at p. 12,808).

Since 1981 Hvide has added to its Port Everglades and Port Canaveral operations the harbor tugs BROWARD and CAPE CANAVERAL, which tugs are utilized exclusively in the assisting of vessels docking, undocking and shifting within the harbors. Because the Seabulk companies have been of the view that harbor tugs utilized in such "ship assist" activities are not engaged "in the domestic intercoastal or coastwise service," they did not seek permission under section 805(a) to be affiliated with the owner of such tugs. They understand, however, that Crowley Maritime Corporation, an intervenor in the pending proceedings in Docket No. S-844, contends that such tugs are engaged in such "service" within the meaning of section 805(a) and is pressing the Maritime Administration to discontinue subsidy payments to the Seabulk companies until permission covering the BROWARD and CAPE CANAVERAL has been granted.

In an effort to resolve this controversy, and without prejudice to their position that no such permission is required, the Seabulk companies request permission under section 805(a) to be affiliated with the owner and operator of the harbor tugs BROWARD and CAPE CANAVERAL.

Any person, firm, or corporation having any interest in the application for section 805(a) permission and desiring to submit comments concerning the application must file written comments in triplicate, to the Secretary, Maritime Administration, Room 7300, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590, by the close of business 5:00 p.m. on May 2, 1989. If such comments deal with section 805(a) issues, they should be accompanied by a petition for leave to intervene. The petition should state clearly and concisely the grounds of interest and the alleged facts relied on for relief.

If no petitions for leave to intervene on section 805(a) issues are received within the specified time, or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing will be held, the purpose of which will to be receive evidence under section 805(a) relative to whether the proposed operations (a) could result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or international service, or (b) would be prejudicial to the objects and policy of the Act relative to domestic operations.

(Catalog of Federal Domestic Assistance Programs Nos. 20.804 Operating-Differential Subsidies (ODS)).

By Order of the Maritime Administrator.

Date: April 20, 1989.

James E. Saari,

Secretary.

BILLING CODE 4910-81-M

DEPARTMENT OF VETERANS AFFAIRS

Information Collection Under OMB Review

AGENCY: Department of Veterans Affairs.[1]

ACTION: Notice.

The Department of Veterans Affairs has submitted to OMB the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). This document lists the following information: (1) The agency responsible for sponsoring the information collection; (2) the title of the information collection; (3) the Department form number(s), if applicable; (4) a description of the need and its use; (5) frequency of the information collection, if applicable; (6) who will be required or asked to respond; (7) an estimate of the number of responses; (8) an estimate of the total number of hours needed to complete the information collection; and (9) an indication of whether section 3504(h) of Public Law 96-511 applies.

ADDRESSES: Copies of the proposed information collection and supporting documents may be obtained from John Turner, Veterans Benefits Administration, (203C), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 233-2744.

[1] On March 15, 1989, the Veterans Administration became the Department of Veterans Affairs (see 54 FR 10478).

Comments and questions about the items on the list should be directed to VA's OMB Desk Officer, Joseph Lackey, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503, (202) 395-7316.

DATES: Comments on the information collection should be directed to the OMB Desk Office, within 30 days of this notice.

Dated: April 11, 1989.

By direction of the Secretary.

Frank E. Lalley,

Director, Office of Information Management and Statistics.

Extension

1. Veterans Benefits Administration.
2. Offer to Purchase and Contract of Sale & Credit Statement of Prospective Purchaser.
3. VA Forms 26-6705 and 26-6705b.
4. VA Form 26-6705 serves as an offer to purchase and contract of sale for submitted purchase offers to VA on properties acquired through operation of the guaranteed and direct loan programs. VA Form 26-6705b is used to collect credit and income information necessary to determine whether an applicant qualifies to purchase a VA-owned property.
5. On occasion.
6. Individuals or households.
7. 165,212 responses.
8. .2347 hour.
9. Not applicable.

Sunshine Act Meetings

Federal Register
Vol. 54, No. 78
Tuesday, April 25, 1989

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:18 p.m. on Tuesday, April 18, 1989, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider (1) matters relating to the possible closing of certain insured banks; and (2) a memorandum regarding the Corporation's liquidation activities.

In calling the meeting, the Board determined, on motion of Director C. C. Hope, Jr. (Appointive), seconded, by Director Robert L. Clarke (Comptroller of the Currency), concurred in by Chairman L. William Seidman, that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

The meeting was held in the Board Room of the FDIC Building located at 550 17th Street NW., Washington, DC

Dated: April 20, 1989.

Federal Deposit Insurance Corporation.

M. Jane Williamson,

Assistant Executive Secretary.

BILLING CODE 6714-01-M

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

Change in Previously Scheduled Meetings

April 20, 1989.

TIME AND DATE: The meeting previously scheduled for April 26, 1989 at 10:00 a.m. has been cancelled.

The meeting scheduled for Thursday, April 27, 1989 at 10:00 a.m. will be as follows:

PLACE: Room 600, 1730 K Street NW., Washington, DC.

STATUS: Open.

MATTERS TO BE CONSIDERED: The Commission will hear oral argument on the following:

1. *Otis Elevator Company,* Docket Nos. PENN 87-25-R, etc. and PENN 86-262. (Issues include whether Otis Elevator is an independent contractor under the Mine Act and thus liable for violations and several mandatory safety standards.)

Any person attending this meeting who needs special accessibility features and/or auxiliary aids, such as sign language interpreters, must inform the Commission in advance of those needs. Subject to 29 CFR 2706.150(a)(3) and 2706.160(e).

TIME AND DATE: Immediately following oral argument.

STATUS: Closed (Pursuant to 5 U.S.C. 552b(c)(10)).

MATTERS TO BE CONSIDERED: The Commission will consider and act upon the following:

1. *Otis Elevator Company,* Docket No. PENN 87-25-R, etc. (see oral argument listing).

2. *Pennsylvania Electric Company,* Docket No. PENN 88-227. (Issues include consideration of procedural motions.)

3. *Sec. of Labor on behalf of Jerry Dale Aleshire et al. v. Westmoreland Coal Co.,* Docket No. WEVA 84-344-D. (Issues include whether the judge erred in finding that the operator did not discriminate against the complainant miners under section 105(c) of the Mine Act. 30 U.S.C. 815(c)(1).)

It was determined by a unanimous vote of Commissioners that these items be considered in closed session.

CONTACT PERSON FOR MORE INFO: Jean Ellen (202) 653-5629/(202) 566-2673 for TDD Relay.

Jean H. Ellen,

Agenda Clerk.

NUCLEAR REGULATORY COMMISSION

DATE: Weeks of April 24, May 1, 8, and 15, 1989.

PLACE: Commissioners' Conference Room, 11555 Rockville Pike, Rockville, Maryland.

STATUS: Open and Closed.

MATTERS TO BE CONSIDERED:

Week of April 24

Tuesday, April 25

10:00 a.m.—Briefing on the Status of Generic Issues (Public meeting)

Thursday, April 27

10:00 a.m.—Periodic Briefing by Advisory Committee on Nuclear Waste (ACNW) (Public meeting)

3:30 p.m.—Affirmation/Discussion and Vote (Public meeting)

a. Final Rulemaking—Fitness-for-Duty Programs (Tentative)

Week of May 1 (Tentative)

Tuesday, May 2

10:00 a.m.—Briefing on Severe Accident Research Plan (Public meeting)

2:00 p.m.—Briefing on Results of Maintenance Team Inspections (Public meeting)

Wednesday, May 3

10:00 a.m.—Briefing on Status of Second Draft of NUREG-1150 (Public meeting)

2:00 p.m.—Periodic Briefing by Advisory Committee on Reactor Safeguards (ACRS) (Public meeting)

3:30 p.m.—Affirmation/Discussion and Vote (Public meeting) (if needed)

Week of May 8 (Tentative)

Wednesday, May 10

10:00 a.m.—NPOC Briefing on the State of the Nuclear Industry (Public meeting)

2:00 p.m.—Briefing on Status of Operator Licensing Activities in the Area of Requalification Exams (Public meeting)

3:30 p.m.—Affirmation/Discussion and Vote (Public meeting) (if needed)

Week of May 15 (Tentative)

Monday, May 15

2:00 p.m.—Briefing on Interim Report on Accident Study for Plutonium Air Transport Packages (Public meeting)

Thursday, May 18

3:30 p.m.—Affirmation/Discussion and Vote (Public meeting) (if needed)

Friday, May 19

10:00 a.m.—Briefing on Final Rule and Regulatory Guide for Maintenance of Nuclear Power Plants (Public meeting)

ADDITIONAL INFORMATION: By a vote of 3-0 (Commissioner Carr was not present and Commissioner Curtiss was on travel and unavailable to participate) on April 17, the Commission determined pursuant to 5 U.S.C. 552b(e) and § 9.107(a) of the Commission's rules that Commission business required that "Affirmation of Commission Order Responding to a Motion to Quash Subpoena" (Public Meeting) scheduled for April 17, be held on less than one week's notice to the public.

By a vote of 3-0 (Commissioner Carr was not present and Commissioner Curtiss was on travel and unavailable to participate) on April 20, the Commission determined pursuant to 5 U.S.C. 552b(e) and § 9.107(a) of the Commission's rules that Commission business required that "Affirmation of Shoreham Full Power Authorization and Issues Raised by Joseph J. Macktal in the Comanche Peak Proceedings Including a Motion to Reconsider CLI-88-12" (Public Meeting) scheduled for April 20, be held on less than one week's notice of the public.

Note.—Affirmation sessions are initially scheduled and announced to the public on a time-reserved basis. Supplementary notice is provided in accordance with the Sunshine Act as specific items are identified and added to the meeting agenda. If there is no specific subject listed for affirmation, this means that no item has as yet been identified as requiring any Commission vote on this date.

To verify the status of meetings call (recording)—(301) 492-0292.

CONTACT PERSON FOR MORE INFORMATION: William Hill (301) 492-1661.

William M. Hill, Jr.,

Office of the Secretary.

April 20, 1989.

BILLING CODE 7590-01-M

UNITED STATES INSTITUTE OF PEACE

TIME AND DATE: 2:30-5:15 p.m., Tuesday, May 9, 1989.

PLACE: Cyprus Room, Carter Presidential Center, Emory University, Atlanta, Georgia.

STATUS: Open.

PURPOSE AND AGENDA: "Morality and Foreign Policy" is the eighth of a monthly series of Public Workshops scheduled by the United States Institute of Peace. This Workshop, cosponsored by the Carter Presidential Center at Emory University in Atlanta, will be a roundtable on the issue of morality and foreign policy. Both the theory and practice of the relationship will be focused upon—first, through a discussion of a new piece of work on morality and national security by University of Virginia theologian David Little and, second, by a discussion (chaired by Institute of Peace President and former U.S. Ambassador to Israel Samuel W. Lewis) of real-world situations in which morality and national security come into conflict. Panelists will be drawn from the scholarly and policy-making worlds and include former President Jimmy Carter. Public observance is welcomed.

CONTACT: Ms. Aileen C. Hefferren, Telephone 202-457-1700 or the Carter Center at 404-420-5162.

Dated: April 21, 1989.

Charles Duryea Smith,

General Counsel.

Corrections

Federal Register
Vol. 54, No. 78
Tuesday, April 25, 1989

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF AGRICULTURE

Rural Electrification Administration

7 CFR Part 1785

Cushion of Credit Account Computations and Procedures

Correction

In rule document 89-8022 beginning on page 13668 in the issue of Wednesday, April 5, 1989, make the following corrections:

1. On page 13669, in the first column, in the table of sections for Subpart A, the section number "1786.17" should read "1785.17".

§ 1785.17 [Corrected]

2. On the same page, in the same column, in Subpart A, a line of five asterisks should follow the heading for § 1785.17 to indicate that the text of that section remains unchanged.

BILLING CODE 1505-01-D

COMMODITY FUTURES TRADING COMMISSION

Establishment of the Commodity Futures Trading Commission Regulatory Coordination Advisory Committee

Correction

In notice document 89-9115 beginning on page 15245 in the issue of Monday, April 17, 1989, make the following corrections:

1. On page 15245, in the second column, the subject heading should read as it appears above.

2. On page 15245, in the second column, under **ACTION**, in the second line, "advisory commission" should read "advisory committee".

BILLING CODE 1505-01-D

DEPARTMENT OF EDUCATION

34 CFR Part 690

Pell Grant Program

Correction

In rule document 89-8645 beginning on page 14788 in the issue of Wednesday, April 12, 1989, make the following correction:

On page 14788, in the first column, under **EFFECTIVE DATE**, in the second line, "May 30, 1989," should read "45 days after publication in the **Federal Register**".

BILLING CODE 1505-01-D

DEPARTMENT OF LABOR

Employment and Training Administration

Research, Evaluation, and Pilot and Demonstration Projects Program: Availability of Funds for Fiscal Year 1989 and Request for Applications for Fiscal Years 1989 and 1990

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice of availability of funds and of solicitation for grant applications.

SUMMARY: The Employment and Training Administration announces the availability of funds for Fiscal Year (FY) 1989 for its Stewart B. McKinney Homeless Assistance Act Job Training for the Homeless Demonstration Program and is soliciting applications for FY 1989 and FY 1990.

DATES: The closing for receipt of applications under this announcement is 2:00 p.m. est on June 9, 1989. Applications submitted by mail and postmarked no later than June 5, 1989 will be considered.

Hand delivered means delivery by any private individual, messenger, courier or commercial delivery service with the exception of the U.S. Postal Service.

The term "postmark" means a printed, stamped or otherwise placed impression (exclusive of postage meter machine impression) that is readily identifiable without further action as having been supplied or affixed on the date of mailing by employees of the U.S. Postal Service.

ADDRESS: It is preferred that applications be mailed. Mail or hand deliver applications to: U.S. Department of Labor, Employment and Training Administration, Office of Financial and Administrative Management, Division of Acquisition and Assistance, Room C-4305, 200 Constitution Avenue NW., Washington, DC 20210, Attention: John Mitchka, Reference: SGA/DAA 89-301. To obtain an application package, contact John Mitchka, Division of Acquisition and Assistance, Telephone: (202) 535-0884.

FOR FURTHER INFORMATION CONTACT: John Mitchka, Division of Acquisition and Assistance, Telephone: (202) 523-7092.

SUPPLEMENTARY INFORMATION: The Employment and Training Administration (ETA) announces the availability of funds for its Job Training for the Homeless Demonstration Program for FY 1989 and a Solicitation for Grant Applications under that program for FY 89 and FY 90. Funding for these grants is authorized by the Stewart B. McKinney Homeless Assistance Act, Pub. L. 100-77, section 731(a), 42 U.S.C. 11441, as amended by the Stewart B. McKinney Homeless Assistance Amendments Act of 1988 (Pub. L. 100-628).

This program announcement consists of four parts. Part I provides background information on the ETA Research, Evaluation, and Pilot and Demonstration Projects Program. It describes the need for and the legislative background of job training for the homeless. Part II describes the program for which ETA solicits applications for funding of job training projects for homeless individuals. Part III describes the grant application process, and Part IV provides guidance on how to prepare and submit an application.

Part I—Background

A. ETA's PY 1988 and FY 1989 Research, Evaluation, and Pilot and Demonstration Program

This Solicitation for Grant Applications (SGA) notice, covering the general subject of job training for the homeless, is one of a series of such notice pertaining to different subject areas for which grant and contract awards will be made by ETA during Program Year (PY) 1988 (July 1, 1988-June 30, 1989) and during Fiscal Year (FY) 1989 (October 1, 1988-September 30, 1989), for research, evaluation, and pilot and demonstration (REP&D) projects.

These projects support the Department of Labor's (DOL) Workforce 2000 mission. According to recent DOL studies, the bulk of labor force entrants between now the year 2000 will consist of groups that have been traditionally underutilized or have experienced labor market barriers—*e.g.*, women, minorities, immigrants, and the homeless. At the same time, the employment base of the economy is changing in structure from that of manufacturing to services. Many new jobs will require higher levels of reading, communication, mathematical and problem-solving skills than at present.

We now face an unprecedented opportuntiy and need to help prepare those who have suffered chronic unemployment or underemployment—including homeless individuals—to meet the evolving requirements for workforce participation. The purpose of this program announcement is to solicit projects that will provide the information and data that are necessary before a national policy on training for the homeless may be developed.

In FY 1989, ETA will make grant awards for demonstration projects that provide for job training activities for homeless individuals. It is anticipated that a maximum of $6.809 million will be available in FY 1989 to support approximately 35 demonstration projects nationwide. The maximum amount for any of these grants will be $600,000. ETA intends to make grant awards during the fourth quarter of FY 1989 with a starting date of October 1, 1989. These funds must be expended by grantees by September 30, 1990. EPA may, at its option, extend these grants in FY 1990 and provide additional funding, if funds are available, performance has been acceptable, and it is determined to be in the best interest of the Government to do this. ETA may also, if funds are available for FY 1990, support additional projects from applications submitted under this notice.

B. The Homeless—Their Need for Employment and Training

No one knows exactly how many homeless people live in the United States. The estimates range from 250,000 to over 3 million individuals. It follows, therefore, that the number of proportion of the homeless who are employed, unemployed or employable is also unknown.

We do know that homeless persons often have a history of poverty. Further, while there are multiple and interrelated factors contributing to homelessness, the factor most often cited as contributing to homelessness is unemployment. Other factors often mentioned are the decline in the supply of low-income housing, and the deinstitutionalization of mentally ill patients.

We also know that the composition of the homeless population has changed. Unlike the stereotype of the Skid Row inhabitant of the past, in the 1980s the homeless are a heterogeneous population comprised of many subgroups. The homeless population is becoming younger, with an increase in minorities, women and families. There are more children (including runaways), veterans, immigrants, migrants, abuse victims, elderly, and handicapped people who are homeless. Many of the homeless are high school graduates and, despite unemployment being cited as a contributing factor to homelessness, many are employed.

While the unemployment rate has gone down dramatically since 1983, the impact the lower rate is having on those already homeless is unknown. Many homeless people acquire new problems from living on the streets and may not now be able to hold a job. Having no fixed address or home phone number compounds the difficulty in finding jobs.

C. Legislative Background

In July 1987, the Stewart B. McKinney Homeless Assistance Act (McKinney Act) become law. It is the first comprehensive Federal law to address the complex problem of homelessness in America. The law was amended effective November 7, 1988 (Pub. L. 100-628).

The McKinney Act was the result of Congress responding to its findings that the Nation faces a crisis due to lack of shelter for a growing number of individuals and families. Congress further found that the problem is expected to become worse because "the causes of homelessness are many and complex, and homeless individuals have diverse needs; [and] there is no single, simple solution to the problem because of the * * * different causes of homelessness, and the different needs of homeless individuals". McKinney Act, section 102(a) (3) and (4), 42 U.S.C. 1130(a) (3) and (4).

As part of the McKinney Act's comprehensive approach to addressing the problems of the homeless, section 731 of the McKinney Act (42 U.S.C. 11441) authorizes the Secretary of Labor to award grants for new job training demonstration projects for homeless individuals. The grants are administered by ETA. The overall program is called the Job Training for the Homeless Demonstration Program (JTHDP). It is intended to develop knowledge for future policy decisions on job training for the homeless. It authorizes funds for grants on a competitive basis to projects throughout the country that represent promising employment and training approaches for the homeless. Authorized activities for JTHDP grantees include remedial education, job search, job training, basic skills instruction, supportive services, outreach and coordination with related community programs. The Stewart B. McKinney Homeless Assistance Amendments Act of 1988 (Pub. L. 100-628), section 503, extended eligibility for grants to Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands. It also extended authorization for the program through FY 1990.

For FY 88, an appropriation of $7.7 million was received in December 1987. The Employment and Training Administration (ETA) began developing a grant solicitation notice in the fall of 1987 to move quickly when the money became available. The notice of fund availability and solicitation for grant applications was published in the **Federal Register** in April 1988. Applications were due June 20. As a result of the solicitation, ETA received 175 applications. These applications were reviewed by a technical panel. Thirty-three grants were awarded in late September and the grantees are currently operating projects.

ETA also administers the Job Training Partnership Act (JTPA), the Nation's major job training program for economically disadvantaged adults and youth. 29 U.S.C. 1501 *et seq.* JTPA does not specifically target programs on homeless individuals, although JTPA funds are being used to provide job training for homeless individuals in a number of localities. The job training demonstration program in the McKinney Act thus represents the first Federal effort specifically addressing employment-related problems of *all types* of homeless individuals.

In 1987, prior to the passage of the McKinney Act, the Office of the Assistant Secretary for Veterans' Employment and Training (OASVET) began targeted assistance for one subgroup of the homeless—the Jobs for Homeless Veterans Program—with discretionary funds set aside from Title IV, Part C, of JTPA (Veterans' Employment Programs). 29 U.S.C. 1721. Grantees (governmental units in selected cities) hire, trained and supervised veterans who have experienced homelessness to perform outreach to homeless veterans.

The McKinney Act at section 738 (42 U.S.C. 11448) provides for Homeless Veterans' Reintegration Projects (HVRP). The experience of the Jobs for Homeless Veterans Program will be used in the design and implementation of the HVRP. This program is administered by OASVET. The HVRP has also been reauthorized through FY 1990. It is a separate effort from the job training demonstration program discussed in this solicitation.

Part II—Program Description

A. Program Purpose and Goals

ETA's demonstration program is designed to be highly responsive to the intent of the McKinney Act. It has an overall purpose and two supporting goals. The overall purpose is:

—To provide information and direction for the future of job training programs for homeless Americans. The conferees acknowledged "that additional information and data are necessary before a detailed national policy on training for the homeless may be developed."

The supporting goals are:

—To gain information on how to provide effective employment and training services to homeless individuals to address the employment-related causes of homelessness and their job training needs; and

—To learn how States, local public agencies, private nonprofit organizations, and private businesses can develop effective systems of coordination to address the causes of homelessness and meet the needs of the homeless, including attainment of transitional or permanent housing outside of shelters.

The focus is on knowledge building to inform national policy, program content, and system development.

Recognizing the diversity of subgroups within the homeless population, ETA intends that the demonstration program as a whole will include the full spectrum of homeless people—not only the most job ready or those easiest to serve. Applicants may, however, propose projects that emphasize assistance to *subgroups* within the homeless population. These include—but are not limited to—the chronically mentally ill, substance abusers, families with children, single men, single women, and homeless youth. Because there is a separate program for homeless veterans under section 738 of the McKinney Act, 42 U.S.C. 11448, applicants may not propose programs that are limited solely to veterans.

ETA suggests that the "case management" approach is a preferred method for providing job training for the homeless. That is, one or more managers are charged with moving an individual through all the services necessary for placement and retention (for at least 13 weeks) in a stable job. The case management approach provides homeless individuals with a personal advocate to help negotiate bureaucratic obstacles. This approach has proved useful where there are multiple problems and an array of individual needs. This is not the only model, however, and other approaches will be considered.

B. Target Population

For purposes of this solicitation, the target population includes persons 14 years of age or older who are homeless. The term "homeless" or "homeless individual" includes persons who lack a fixed, regular, and adequate nighttime residence. It also includes persons whose primary nighttime residence is either a supervised public or private shelter designed to provide temporary living accommodations; an institution that provides a temporary residence for

BEST COPY AVAILABLE

VOL 54 ISS 78 AP 25 1989 UMI

individuals intended to be institutionalized; or a public or private place not designed for, or ordinarily used as, a regular sleeping accommodation for human beings.

C. Activities for Which Support Is Available

ETA is interested in demonstrating innovative and replicable approaches to providing job training to the target population. Each project must: (1) Provide coordination and outreach activities designed to achieve referral of homeless people to these demonstration projects; (2) provide in-shelter outreach and assessment activities and, where practicable, pre-employment services in order to increase participation of the target population; and (3) provide or contract for job training activities. These activities must include one or more of the following:

—Remedial education activities and basic skills instruction;

—Basic literacy instruction;

—Job search activities;

—Job counseling;

—Job preparatory training, including resume writing and interviewing skills; and

—Any other activities described in section 204 of JTPA (29 U.S.C. 1604) which will contribute to carrying out the purposes and goals of these demonstration projects. (See Appendix A of this notice for the language of JTPA, section 204, 29 U.S.C. 1604).

Five of the activities in JTPA section 204 (29 U.S.C. 1604) that ETA wishes to single out as especially important to the homeless population for placement and retention in stable jobs are institutional skill training, on-the-job training, work experience, followup services, and supportive services.

Given the multiple problems and needs of many homeless individuals, ETA will give special consideration to applications that emphasize approaches to job training for adults (over age 21) that provide a continuity of service to individuals from application through the end of the retention-in-employment period. Applications that propose to serve homeless youth (ages 14 through 21) may emphasize approaches that emphasize employability enhancement, such as high school completion, rather than job placement.

D. Evaluation Component

All grantees will be required to participate in an evaluation process. Evaluation will be conducted at two levels: (1) Individual project evaluations; and (2) national evaluation across all grantee projects.

The national evaluation is being managed by ETA as specified in section 736 of the McKinney Act, 42 U.S.C. 11446. It must complete a report to the President, to the Congress, and to the Interagency Council by April 1, 1990. The national evaluation is anticipated to continue past the April 1990 reporting date in order to capture the experience of projects that continue in operation past that date. In addition to the Department of Labor's evaluation, the Interagency Council must evaluate each project receiving assistance.

Both individual project evaluations and the national evaluation shall include (as specified by section 736(b) of the McKinney Act, 42 U.S.C. 11446), information on:

—The number of homeless individuals served;

—The number of homeless individuals placed in jobs;

—The average length of training time under the project;

—The average training cost under the project; and

—The average retention rate of placements of homeless individuals after training. ETA defines the period over which retention is to be measured as 13 weeks.

Other measures, such as the number of homeless individuals placed in transitional or permanent housing outside of shelters, may be added to the national evaluation.

Grantees will participate in this effort by providing staff to administer the project evaluation, make data available for the project and national evaluations, and submit preliminary and final individual project evaluation reports. Grantee budgets must include expected costs for evaluation activities. A grant will not be awarded to an applicant unless it has included an evaluation component in its application.

The national evaluation is being conducted to (1) determine the effectiveness of the national demonstration program and (2) compare, to the extent possible, outcomes in different programs and/or communities. Effectiveness will be measured primarily in terms of the degree to which grantees have met program performance standards. The national evaluation staff will provide technical assistance to grantees on all aspects of the evaluation (including developing formats for acquiring compatible information from the grantees), conduct aggregate-level data analysis, and prepare the preliminary and final national evaluation reports.

E. Coordination

Section 732 of the McKinney Act (42 U.S.C. 11442) requires States to describe in their Comprehensive Homeless Assistance Plan (CHAP) how the State will coordinate job training demonstration projects with other services for homeless individuals under the Act. The CHAP is required in section 401 of the McKinney Act (42 U.S.C. 11361). To assist in this coordination, all applications must be reviewed for consistency prior to submittal to ETA by the organization in each State responsible for development of the CHAP.

F. Reporting Requirements

The grantee shall furnish the reports and documents listed below:

1. Financial Reports

The grantee shall submit quarterly, to the Grant Officer, Department of Labor, an original and two copies of standard form 269, Financial Status report.

2. Program Reports

(a) *Quarterly Progress Reports.* The grantee shall submit to the Federal Representative within 20 days following the end of each quarter, three copies of a quarterly progress report, which provides a detailed account of services provided during each quarter of grant performance. Reports shall include, in brief narrative form, such information as:

(1) A description of overall progress of work activities accomplished during the reported period;

(2) An indication of any current problems which may delay performance, and proposed corrective action, if any; and

(3) Program status and financial data/information relative to expenditure rate versus budget, anticipated staff changes, etc.

(b) *Detailed Content Outline of the Evaluation Report.* Five copies must be submitted.

(c) *Preliminary Evaluation Report.* This report shall summarize project activities and results and shall be submitted in 10 copies.

(d) *Final Evaluation Report.* This report shall summarize project activities and results and shall be submitted in 10 copies by the grant expiration date.

Part III—Application Process

A. Eligible Applicants

As specified in section 731(a) of the McKinney Act, 42 U.S.C. 11441(A), applications for 12 month projects may be submitted by State and local public agencies, by private non-profit organizations, and by private businesses. Applications may also be submitted by Indian tribes as specified in section 762(b) of the McKinney Act, 42 U.S.C. 11472.

Eligible applicants include—but are clearly *not* limited to—JTPA Private Industry Councils (PICs) and/or JTPA administrative entities at the State and local level. Individuals are not eligible to apply. ETA encourages applications that are developed jointly by State and local agencies, by private non-profit organizations and/or by private businesses because this helps to coordinate resources and achieve maximum benefit from the grant funds.

B. Federal Fiscal Requirements

Section 735 of the McKinney Act (42 U.S.C. 11445) limits the Federal share of the cost of activities. ETA will make grant awards for at least 50 percent and no more than 90 percent of the cost of activities described in the application. Applicants are encouraged to provide the highest feasible non-Federal share of the cost of the project. High cost-sharing demonstrates applicant commitment to continue the activities and enables limited Federal resources to produce the maximum amount of information useful for the future of job training programs for homeless Americans.

As specified in section 762(a)(1) of the McKinney Act, 42 U.S.C. 11472(a)(1), a minimum of 1.5 percent of the FY 1989 and 1990 appropriations will be allocated to Indian-tribe applicants.

Pursuant to section 735(c) of the McKinney Act 42 U.S.C. 11445(c) ETA will not make grants in any State under this solicitation in an aggregate in excess of 15 percent of the amount appropriated in FY 1989 and FY 1990 for this grant program. Grants to Indian tribes will count toward this per-State aggregate limitation.

C. Criteria for Screening and Review

All applications that meet the deadline will be screened to determine completeness and conformity to the requirements of this announcement. Complete, conforming applications will then be reviewed and evaluated competitively against the evaluation criteria specified below in 2.) Evaluation Criteria.

1. Screening Requirements

In order for an application to be in conformance it must include the following:

(a) SF 424, application for Federal Assistance.

(b) SF 424A, Budget information-non construction.

SF 424 and SF 424A with instructions may be obtained by contacting John Mitchka, Division of Acquisition and Assistance, Telephone: (202) 523-7092.

(c) Applicants are required to assure that they will pay the non-Federal share of the activities from non-Federal sources. The non-Federal share may be in cash or in kind, fairly evaluated, including plant, equipment and resources. The Non-Federal share specified in the application shall not be less than ten percent and not be more than 50 percent of total estimated costs.

(d) Project Narrative: The narrative portion of the application must not exceed twenty (20) double-spaced pages, typewritten on one side of the paper only. The capability statement must not exceed two doubled-spaced typewritten pages.

The narrative must address the elements specified in Section 733 of the McKinney Act, 42 U.S.C. 11443:

—A description of activities for which assistance is sought (what the project will do and how the project will be conducted);

—Plans for coordination and outreach activities, particularly with case managers and care providers, designed to achieve referral to the proposed project;

—Plans to offer in-shelter outreach and assessment activities and, where practicable, pre-employment services, to increase participation of homeless individuals;

—A description of the standards by which performance will be measured under the project (these standards need not bear any relationship to those required by JTPA section 106, 29 U.S.C. 1516, for adult and youth programs under JTPA Title IIA).

—Assurance that a preliminary evaluation will be completed not later than the end of the first calendar year of project assistance; and

—Assurance that the applicant will pay the non-Federal share of the activities from non-Federal sources.

(e) Letter from the relevant State agency indicating that the application has been reviewed for consistency with the Comprehensive Homeless Assistance Plan, as specified above in II E.

(f) Certification regarding a drug-free workplace

(a) Definitions. As used in this provision,

"Controlled substance" means a controlled substance in schedules I through V of section 202 of the Controlled Substances Act (21 U.S.C. 812) and as further defined in regulation at 21 CFR 1308.11–1308.15.

"Conviction" means a finding of guilt (including a plea of nolo contendere) or imposition of sentence, or both, by any judicial body charged with the responsibility to determine violations of the Federal or State criminal drug statutes.

"Criminal drug statute" means a Federal or non-Federal criminal statute involving the manufacture, distribution, dispensing, possession or use of any controlled substance.

"Drug-free workplace" means a site for the performance of work done in connection with a specific contract at which employees of the Contractor are prohibited from engaging in the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance.

"Employee" means an employee of a Contractor directly engaged in the performance of work under a Government contract.

"Individual" means an offeror/contractor that has no more than one employee including the offeror/contractor.

(b) By submission of its offer, the offeror, if other than an individual, who is making an offer that equals or exceeds $25,000, certifies and agrees, that with respect to all employees of the offeror to be employed under a contract resulting from this solicitation, it will—

(1) Publish a statement notifying such employees that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the Contractor's workplace and specifying the actions that will be taken against employees for violations of such prohibition;

(2) Establish a drug-free awareness program to inform such employees about—

(i) The dangers of drug abuse in the workplace;

(ii) The Contractor's policy of maintaining a drug-free workplace;

(iii) Any available drug counseling, rehabilitation, and employee assistance programs; and

(iv) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;

(3) Provide all employees engaged in performance of the contract with a copy of the statement required by subparagraph (b)(1) of this provision;

(4) Notify such employees in the statement required by subparagraph (b)(1) of this provision, that as a condition of continued employment on the contract resulting from this solicitation, the employee will—

(i) Abide by the terms of the statement; and

(ii) Notify the employer of any criminal drug statute conviction for a

VOL

1989
UMI

violation occurring in the workplace no later than five (5) days after such conviction;

(5) Notify the contracting officer within ten (10) days after receiving notice under subdivision (b)(4) (ii) of this provision, from an employee or otherwise receiving actual notice of such conviction; and

(6) Within 30 days after receiving notice under subparagraph (a)(4) of this provision of a conviction, impose the following sanctions or remedial measure on any employee who is convicted of drug abuse violations occurring in the workplace;

(i) Take appropriate personnel action against such employee, up to and including termination; or

(ii) Require such employee to satisfactorily participate in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency.

(7) Make a good faith effort to maintain a drug-free workplace through implementation of subparagraphs (b)(1) through (b)(6) of this provision.

(c) By submission of its offer, the offeror, if an individual who is making an offer of any dollar value, certifies and agrees that the offeror will not engage in the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance in the performance of the contract resulting from this solicitation.

(d) Failure of the offeror to provide the certification required by paragraphs (b) or (c) of this provision, renders the offeror unqualified and ineligible for award. (See FAR 9.104–1(g) and 19.602–1(a)(2)(i).)

(e) In addition to other remedies available to the Government, the certification in paragraphs (b) or (c) of this provision concerns a matter within the jurisdiction of an agency of the United States and the making of a false, fictitious, or fraudulent certification may render the maker subject to prosecution under Title 18, United States Code, Section 1001.

2. Evaluation Criteria

Reviewers will score the applications, basing their scoring decisions on the following criteria.

(a) *Need for the Project: 10 points.* The application shall describe, in concrete terms, the problems of homeless individuals that prompt the applicant to propose the project. The application must discuss the need for the project in terms of its State and/or local significance, including estimates of the number of homeless individuals of the type proposed to be served in the area to be served. It must describe the importance of the issues to be addressed and how they relate to sec. 102 (Findings and Purpose) of the McKinney Act (42 U.S.C. 11301).

(b) *Project Service Methodology: 25 points.* The application must describe specific plans for conducting the project in terms of the tasks to be performed.

Project service methodology includes the following application elements, as specified in section 733 of the McKinney Act, 42 U.S.C. 11443:

—A description of activities for which assistance is sought (what the project will do and how the project will be conducted);

—Plans for coordination and outreach activities, particularly with case managers and care providers, designed to achieve referral to the proposed project. Coordination includes other services for homeless individuals discussed in the State CHAP;

—Plans to offer in-shelter outreach and assessment activities and, where practicable, pre-employment services, to increase participation of homeless individuals;

In addition to these elements of the application contained in the McKinney Act, the application must include:

—Discussion of the "plausibility" of the proposed project—the key assumptions underlying the project and evidence to support why the approach proposed is likely to accomplish the project objectives.

—Discussion (preferably incorporating a chart) providing a time-phasing of tasks and their interrelationships and demonstrating how the project will be started up, operated and phased out or supported when the grant period ends on September 30, 1990, and

—Discussion (preferably including client flow chart) which depicts the planned sequence of services to be provided to clients and the role of each participating organization.

(c) *Evaluation Methodology: 15 points.* Evaluation methodology includes the following application element, as specified in section 733 of the McKinney Act, 42 U.S.C. 11443:

—Assurance that a preliminary evaluation will be completed not later than the end of the first year of project assistance.

The application will also be scored on its description of evaluation activities, including methodology, measures, data sources, organization arrangements. This description must be consistent with the "Evaluation Component" section of Part II D, above, and should be consistent with the description of "Expected Outcomes," below.

(d) *Expected Outcomes: 10 points.* The proposed project is intended to result in a measurable, concrete reduction of a significant problem associated with homelessness that can be addressed by job training. Outcomes as opposed to process measures are preferred. These outcomes must include a clear description of project's performance standards as required by section 733(4) of the McKinney Act, 42 U.S.C. 11443(4). For the homeless population, ETA is especially interested in a high number of placements for adults and a high retention rate of placements over at least a 13-week period.

(e) *Level of Effort: 10 points.* The resources needed to conduct the project must be specified including personnel, time, funds, and facilities. These resources should be adequate to the work described in the application. The staff should be qualified and should have the skills required and demonstrated ability to produce the expected outcomes. The staffing pattern must clearly link responsibilities to project tasks. The total cost of the project must be reasonable in view of anticipated results. Collaborative efforts with other agencies or organizations must be clearly identified and written assurances referenced. A description by category (personnel, travel, etc.) of the total funds required and of the sources of outside support that will be used to meet the matching requirements must be included. The funds (total of Federal share and non-Federal share) must be specified. Projects proposing a higher non-Federal share will be considered more favorably under this criterion.

(f) *Organizational Capability: 30 points.* The application must provide a (maximum 3 pages double-spaced) background description of how the applicant organization (or the particular division of a larger organization which will have responsibility for this project) is organized and the types and quality of services it provides. It may include descriptions of any current or previous relevant experience in administrating and evaluating projects similar to those proposed for support in this solicitation (e.g., job training programs for homeless persons) and/or describe the competence of the project team and its demonstrated ability to produce service and evaluation results of the type proposed for support. It may include a description of the qualifications of key staff described in a few paragraphs rather than in formal vitae. This statement must include the names of contact persons from two organizations to which the applicant organization has provided services within the past 6 months. (If the applicant organization does not provide services to other organizations, the contact persons listed should be persons who can supply an independent assessment of the organizational capacity of the organization.) The statement must include the position of these contact persons within their organizations and their telephone numbers.

These evaluation criteria correspond to the narrative section of the application as specified in Part IV below. The descriptions of the six criteria above should be considered in developing the program narrative.

Applicants are advised that discussions may be necessary in order to clarify any inconsistencies in their applications. The final decision on the award will be based on what is most advantageous to the Federal Government as determined by the ETA Grant Officer. Evaluation by reviewers are advisory only to the Grant Officer.

Part IV—Instructions for Completing Applications

A. Contents

You are required to send an original and two copies of an application. Each application must contain five parts.

1. SF 424.

2. Project Narrative—should be no more than twenty (20) double-spaced typewritten pages, using one side of the paper only. Your narrative should provide information on how the application meets the evaluation criteria in Part III of this announcement.

We strongly recommend that you follow this format and page suggestions for the narrative:

a. Need for the Project (2 pages double-spaced).

b. Project Service Methodology (5–6 pages double-spaced).

c. Evalulation Methodology (2–3 pages double-spaced).

d. Expected Outcomes (3 pages double-spaced).

e. Level of Effort (2 pages double-spaced).

f. Organizational Capability Statement (3 pages double-spaced).

3. Letter from the appropriate State Agency reviewing application for consistency with the CHAP.

4. Certification Regarding a Drug-Free Workplace

The application may also contain letters that show collaboration or substantive commitment to the project by organizations other than the applicant organization. ETA suggests but does not require that applicants obtain such letters from local Private Industry Councils (PIC) and from chief elected officials (as defined in JTPA, section 4(4), 29 U.S.C. 1503(4), the State Governor or the governing body within a Service Delivery Area). Such letters are not part of the narrative and, therefore, are not counted against the twenty-page limit for the narrative. Letters received after the closing date will not be considered in the evaluation process.

5. SF 424 A. (Non-Construction)

Signed at Washington, DC, on April 17, 1989.

Roberts T. Jones,

Assistant Secretary for Employment and Training.

Appendix A—Section 204 of the Job Training Partnership Act (29 U.S.C. 1604)

Sec. 204. Services which may be made available to youth and adults with funds provided under this title may include, but need not be limited to—

(1) Job search assistance,
(2) Job counseling,
(3) Remedial education and basic skills training,
(4) Institutional skill training,
(5) On-the-job training,
(6) Programs of advanced career training which provide a formal combination of on-the-job and institutional training and internship assignments which prepare individuals for career employment,
(7) Training programs operated by the private sector, including those operated by labor organizations or by consortia of private sector employers utilizing private sector facilities, equipment, and personnel to train workers in occupations for which demand exceeds supply,
(8) Outreach to make individuals aware of, and encourage the use of employment and training services,
(9) Specialized surveys not available through other labor market information sources,
(10) Programs to develop work habits and other services to individuals to help them obtain and retain employment,
(11) Supportive services necessary to enable individuals to participate in the program and to assist them in retaining employment for not to exceed 8 months following completion of training,
(12) Upgrading and retraining,
(13) Education-to-work transition activities,
(14) Literacy training and bilingual training,
(15) Work experience,
(16) Vocational exploration,
(17) Attainment of certificates of high school equivalency,
(18) Job development,
(19) Employment generating activities to increase job opportunities for eligible individuals in the area,
(20) Pre-apprenticeship programs,
(21) Disseminating information on program activities to employers,
(22) Use of advanced learning technology for education, job preparation, and skills training,
(23) Development of job openings,
(24) On-site industry-specific training programs supportive of industrial and economic development,
(25) Followup services with participants placed in unsubsidized employment,
(26) Coordinated programs with other Federal employment-related activities,
(27) Needs-based payments necessary to participation in accordance with a locally developed formula or procedure, and
(28) Customized training conducted with a commitment by an employer or group of employers to employ an individual upon successful completion of that training.

Office of Management and Budget

Cumulative Report on Recissions and Deferrals; Notice

VOL 54 ISS 78 APR 25 1989 UMI

OFFICE OF MANAGEMENT AND BUDGET

Cumulative Report on Rescissions and Deferrals

April 1, 1989.

This report is submitted in fulfillment of the requirement of section 1014(e) of the Impoundment Control Act of 1974 (Pub. L. 93-344). Section 1014(e) provides for a monthly report listing all budget authority for this fiscal year for which, as of the first day of the month, a special message has been transmitted to the Congress.

This report gives the status as of April 1, 1989 of six rescission proposals and 14 deferrals contained in the first three special messages of FY 1989. These messages were transmitted to the Congress by President Ronald Reagan on September 30 and November 29, 1988, and January 9, 1989.

Rescissions (Table A and Attachment A)

As of April 1, 1989, there are no funds being withheld related to rescission proposals. Two of the six rescission proposals made by the prior Administration (R89-5 and R89-6, as described in Attachment A) continue to be supported by President Bush as offsets to supplemental requests.

Deferrals (Table B and Attachment B)

As of April 1, 1989 $6,448.2 million in budget authority was being deferred from obligation. Attachment B shows the history and status of each deferral reported during FY 1989.

Information From Special Messages

The special messages containing information on the rescission proposals and deferrals covered by this cumulative report are printed in the **Federal Register** listed below:

Vol. 53, FR p. 39679, Wednesday, October 12, 1988

Vol. 53, FR p. 49530, Wednesday, December 7, 1988

Vol. 54, FR p. 1650, Friday, January 13, 1989

Richard G. Darman,

Director.

78
AP
25
1989
UMI

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Fair Housing and Equal Opportunity

[Docket No. N-89-1960; FR-2618]

Fair Housing Initiatives Program; Competitive Solicitation

AGENCY: Office of the Assistant Secretary for Fair Housing and Equal Opportunity, HUD.

ACTION: Notice of funding availability.

SUMMARY: This notice solicits applications, from eligible State and local fair housing agencies and from public or private organizations formulating or carrying out programs to prevent or eliminate discriminatory housing practices, for funding under the Fair Housing Initiatives Program (FHIP). Applicants must meet specific eligibility criteria set forth in this notice and in 24 CFR Part 125 in order to qualify for consideration under this program. This notice pertains to competitive funding applications under the Education and Outreach Initiative which are State, local or regional in scope and to applications under the Private Enforcement Initiative. A separate notice will announce the funding of applications under the Education and Outreach Initiative which are national in scope.

FOR FURTHER INFORMATION CONTACT: Maxine B. Cunningham, Director, Federal, State and Local Programs Division, Office of Fair Housing and Equal Opportunity, Room 5212, 451 Seventh Street SW., Washington, DC 20410-2000. Telephone: (202) 755-0455. (V and TDD) (This is not a toll-free number.) Application kits are available upon written or telephone request from the above. To ensure a prompt response, it is suggested that requests for application kits be made by telephone.

DATES: An application for funding under this notice must be submitted between May 16, 1989 and June 16, 1989, unless it qualifies for a late application exception as specified in the application kit and is received before funds are awarded.

SUPPLEMENTARY INFORMATION: The legislation creating the Fair Housing Initiatives Program (FHIP), approved by the President on February 5, 1988, authorizes the Secretary to provide funding to State and local government or their agencies, public or private non-profit organizations, or other public or private entities formulating or carrying out programs to prevent or eliminate discriminatory housing practices. These funds will enable the recipients to carry out activities designed to obtain inforcement of the rights granted by the Federal Fair Housing Act or by substantially equivalent State or local fair housing laws, and education and outreach activities designed to inform the public concerning rights and obligations under such Federal, State or local laws prohibiting discrimination. Funding of enforcement of Fair Housing laws may include activities involving use of judical as well as administrative enforcement procedures.

The FHIP has three funding categories: The Administrative Enforcement Initiative, the Education and Outreach Initiative, and the Private Enforcement Initiative. This notice announces the availability of funding under the Education and Outreach Initiative for applications that are State, local or regional in scope and the availability of funding under the Private Enforcement Initiative.

Funds under the Education and Outreach Initiative which are State, local or regional in scope are available to State and local fair housing agencies, Community Housing Resources Boards, traditional civil rights organizations and other governmental, public and private agencies and organizations. Funding will be based upon the submission of applications for projects designed to inform and educate the general public and housing groups about fair housing rights and responsibilities under Federal, State and local fair housing laws and upon applications for outreach projects which promote specialized support and coordinated methods to provide for fair housing.

Funds under the Private Enforcement Initiative are available to non-profit organizations and other private entities that are formulating or carrying out programs to prevent or eliminate discriminatory housing practices. The purpose of these awards is to assist in developing, implementing, carrying out, or coordinating programs or activities designed to obtain enforcement of the rights granted by the Fair Housing Act or State or local laws that provide rights and remedies for alleged discriminatory housing practices that are substantially equivalent to the rights and remedies provided in the Fair Housing Act. Projects eligible for funding include: (1) Conducting investigations to document systemic discrimination in housing, (2) professionally conducting testing or other investigative support for administrative and judicial enforcement, (3) linking fair housing organizations regionally to address broader market discriminatory practices, and (4) establishing effective means of meeting legal expenses related to the litigation of fair housing cases.

Background

Title VIII of the Civil Rights Act of 1968, as amended, 42 U.S.C. 3600-20 (The Fair Housing Act), charges the Secretary of Housing and Urban Development with responsibility to accept and investigate complaints alleging discrimination based on race, color, religion, sex, handicap, familial status or national origin in the sale, rental, or financing of most housing. In addition, the Federal Fair Housing Act directs the Secretary to coordinate with State and local agencies administering fair housing laws and to cooperate with and to render technical assistance to public or private entities carrying out programs to prevent or eliminate discriminatory housing practices.

Section 561 of the Housing and Community Development Act of 1987 (Pub. L. 100-242) established the Fair Housing Initiatives Program to strengthen the Department's effort to enforce the Federal Fair Housing Act and to further fair housing. This program is intended to assist projects and activities designed to enhance compliance with the Fair Housing Act and substantially equivalent State and local fair housing laws.

Other Matters

The program components of the Fair Housing Initiatives Program are described in the Catalog of Federal Domestic Assistance at 14.408, Administrative Enforcement Initiative; 14.409, Education and Outreach Initiative, and 14.410, Private Enforcement Initiative.

Application requirements associated with this program have been approved by OMB and assigned approval number 2529-0033.

An independent evaluation of the FHIP Testing Guidelines will be conducted during the implementation of the programs funded under this notice. This evaluation will be conducted by HUD's Office of Policy Development and Research. Recipients of funds will be required to cooperate fully with this evaluation, including collecting and reporting a minimal amount of information.

I. General Provisions Governing Applications for Assistance

Each application for funding under the Fair Housing Initiatives Program must contain the items set forth below. Each application will be assessed against the general selection criteria set forth in this Notice of Funding Availability.

Recipients will be expected to comply with the requirements of section 504 of the Rehabilitation Act of 1973, 29 U.S.C. 794, and 24 CFR Part 8. Section 504 prohibits discrimination based on handicap in federally assisted programs.

A. A description of the practice (or practices) at the community, regional or national level which has affected adversely the achievement of the goal of fair housing. This description must include a discussion and analysis of the housing practices identified, including available information and studies relating to discriminatory housing practices and their historical background, and relevant demographic data indicating the nature and extent of the impact of such practices on persons seeking dwellings or services related to the sale, rental and financing of dwellings, in the general location where the applicant proposes to undertake activities;

B. A description of the specific activities to be conducted with FHIP funds, including the final products and any reports to be produced, the cost of each activity proposed and a schedule for completion of the funded activities;

C. A description of the applicant's experience in formulating or carrying out programs to prevent or eliminate discriminatory housing practices;

D. A statement indicating the need for Federal funding in support of the proposed project; and an estimate of such other public or private resources as may be available to assist the proposed activities;

E. A description of the procedures to be used by the applicant for monitoring the conduct and for assessing the results of the proposed activities;

F. A description of the benefits which successful completion of the project will produce to enhance fair housing and the concerns identified, and the indicators by which these benefits are to be measured; and

G. A description of the expected long term viability of project results.

II. General Selection Criteria for Ranking Applications for Assistance

All projects proposed in applications will be ranked on the basis of the following criteria for selection:

A. The anticipated impact of the project proposed on the concerns identified in the application (25 points);

B. The extent to which the applicant's professional and organizational experience will further the achievement of project goals (25 points);

C. The extent to which the project will provide benefits in support of fair housing after funded activities have been completed 20 points);

D. The extent to which the project utilizes other public or private resources that may be available 20 points); and

E. The extent to which the project will provide the maximum impact on the concerns identified in a cost-effective manner (10 points).

F. Further Clarification of Factors for Award

1. In determining the anticipated impact of the proposed project, HUD will consider the degree to which a proposed project addresses problems and issues that are significant fair housing problems and issues within the jurisdiction, as explained in the application or based upon other information available to HUD. Clarity and thoroughness of project description can be considered in this determination.

2. In determining the extent to which the applicant's professional and organizational experience will further the achievement of project goals, HUD will consider the experience and qualifications of existing personnel identified for key project positions, or a description of the process and qualifications to be used for selection of key personnel, including subcontractors/consultants, as well as the organization's past and current experience. Such experience should include both fair housing experience and experience in implementing education or outreach programs.

3. In determining the extent to which the project will provide the maximum impact on the concerns identified in a cost-effective manner, HUD will consider reasonableness of the proposed timetable for implementation and completion of the project, as well as the adequacy and clarity of proposed procedures to be used by the agency for monitoring progress of the project and ensuring timely completion. HUD will also consider information provided regarding how the project is cost effective.

4. In determining the extent to which the project will provide benefits after funded activities have been completed, HUD will consider the degree to which other project is of continuing use in dealing with housing discrimination.

5. In determining the extent to which other public or private resources are available, HUD will consider both monetary and in-kind resources.

G. Cost Factors—Cost will be the deciding factor when complete and eligible applications are evaluated against the factors for award and considered to be technically equivalent. Furthermore, an application may not be funded when costs are determined to be unrealistically low or unreasonably high.

H. Program Policy Factor-After eligible applications are evaluated against the factors for award, the Assistant Secretary will review the geographical distribution of potential recipients. In making awards, the Assistant Secretary may exercise discretion to make awards out of rank order for the purpose of ensuring equitable geographic distribution, or to minimize duplication of education and outreach efforts in a given State, region or locality.

II. The Education and Outreach Initiative

A. Eligibility

The following types of organizations are eligible to receive funding under the Education and Outreach Initiative:

1. State or local governments;

2. Public or private non-profit organizations or institutions, and other public or private entities (including Community Housing Resource Boards) that are formulating or carrying out programs to prevent or eliminate discriminatory housing practices.

B. Scope

Applications are solicited for specialized project proposals as described in 24 CFR 125.303 and in this section III.B.

This notice announces funding under this Initiative for the development of State, regional or local media campaigns or other special efforts to educate the general public and housing industry groups about fair housing rights and obligations.

All projects must address or have relevance to housing discrimination based on race, color, religion, sex, handicap, familial status or national original.

Educational projects that may be funded under the Education and Outreach Initiative may include (but are not limited to) the following:

1. Developing informative material on fair housing rights and responsibilities;

2. Developing fair housing and affirmative marketing instructional material for education programs for State, regional and local housing industry groups;

3. Providing educational seminars and working sessions for civic associations, community-based organizations and other groups; and

4. Developing educational material targeted at persons in need of specific or additional information on their fair housing rights.

VOL 54 ISS 78 AP 25 1989 UMI

Outreach projects that may be funded under the Educational and Outreach Initiative may include (but are not limited to) the following:

1. Developing State, regional or local media campaigns regarding fair housing;
2. Bringing housing industry and civic or fair housing groups together to identify illegal real estate practices and to determine how to correct them;
3. Designing specialized outreach projects to inform persons of the availability of housing opportunities;
4. Developing and implementing a response to new or more sophisticated practices that result in discriminatory housing practices; and
5. Developing mechanisms for the identification of and quick response to housing discrimination cases involving the threat of physical harm.

C. Applications for Funding

In addition to meeting the application requirements contained in Section I. above, all applications for Education and Outreach Initiative funding must describe how the activities or the final products of the project can be used by other agencies and organizations within the jurisdiction and in other jurisdications and what modifications, if any, would be necessary.

D. Coordination of Activities

Each non-governmental applicant for funding which is located within the jurisdiction of a State or local enforcement agency or agencies administering a fair housing law which has been recognized by the Department under 24 CFR Part 115 as being a substantially equivalent fair housing law must provide with its application evidence that it is has consulted with the agency or agencies to coordinate activities to be funded under the Education and Outreach Initiative.

E. Program Totals and Funding Estimates

Approximately $300,000 is available under this Notice for Education and Outreach funding. HUD estimates that approximately ten applications will be funded.

F. Applications

An applicant may submit only one application, but may propose more than one type of activity under this Initiative. Applicants must submit all information required in the application kit and must include sufficient information to establish that the application meets the criteria set forth at sections I., II. and III.C. above.

Applicants must provide information to establish that they meet the eligibility criteria in III.A. above. Projects should be no longer than 12 months in duration.

Projects shall not be proposed that are planned for implementation with applicant funds and would simply substitute FHIP funds for applicant funds. Projects that appear to be aimed solely or primarily at research or data gathering unrelated to existing or planned fair housing education or outreach programs will not be approved. Data gathering activities will require OMB approval under the Paperwork Reduction Act before commencement of the activity.

G. Award Procedures

Applications for funding under this initiative will be evaluated competitively, and awarded points based on the Factors for Award identified in section II above. Applications will be reviewed by a HUD Technical Evaluation Panel. The final decision rests with the Assistant Secretary or the Assistant Secretary's designee.

IV. Private Enforcement Initiative

A. Eligibility

The types of organizations which are eligible to receive assistance under the Private Enforcement Initiative are private non-profit organizations and other private entities that are formulating or carrying out programs to prevent or eliminate discriminatory housing practices. Organizations which can be eligible include, for example, private non-profit fair housing and civil rights groups.

All applications for funding must have relevance to matters pertaining to housing discriminations based on race, color, religion, sex, handicap, familial status or national origin.

B. Scope

Applications are solicited for specialized project proposals as described in 24 CFR 125.403 and 125.404 and in this notice.

Project applications may involve:

1. Conducting investigations of systemic housing discrimination;
2. Professionally conducting testing or other investigative support for administrative and judicial enforcement;
3. Linking fair housing organizations regionally in enforcement activities designed to combat broader market discriminatory practices; and
4. Establishing effective means of meeting legal expenses in support of litigation of fair housing cases.

No recipient of assistance under the Private Enforcement Initiative may use any funds provided by the Department for the payment of expenses in connection with litigation ag inst the United States.

Recipients of funds under this initiative shall be required to record in a standardized format, to be supplied by HUD, information appropriate to the funded project relating to the number of complaints or allegations of discrimination received; the basis of these complaints; type and number of tests utilized in the investigation of each allegation; time of case processing, including administrative or judicial case processing; the cost of testing activities and case processing; and case outcome or relief provided.

C. Applications for Funding

In addition to meeting the application requirements contained in Section I. above, all proposals for testing under the Private Enforcement Initiative must include:

1. Documentation that the applicant has at least one year of experience in carrying out a program to prevent or eliminate discriminatory housing practices and has sufficient knowledge of fair housing testing to enable the applicant to implement a testing program successfully;
2. A certification providing that the applicant will not solicit funds from or seek to provide fair housing educational or other services or products for compensation, directly or indirectly, to any person or organization which has been the subject of testing by the applicant for a 12-month period following a test;
3. A description of the process to be used to recruit testers;
4. A description of the tester training program;
5. Copies of forms used to document allegations and to record the experience of testers; and
6. A written agreement to cooperate fully with the HUD sponsored evaluation of this program.

A recipient failing to comply with the testing requirements or the procedures set forth in its application for funding shall be liable for such sanctions as may be authorized by law, including repayment of improperly used funds, termination of further participation in the initiative, reduction or limitation of further funding for investigatory activities, and denial of further participation in programs of the Department or of any Federal agency.

The recipient must agree to notify HUD of all complaints of all cases involving matters cognizable under the Federal Fair Housing Act.

D. Guidelines for Conduct of Funded Testing

Testing activities funded under the Private Enforcement Initiative must conform to the guidelines in 24 CFR 125.405. These guidelines are not intended to restrict individuals or entities participating in the Fair Housing Initiatives Program from pursuing any right or remedy guaranteed by Federal law, or from the conduct of other testing or other investigative activities not funded under the Private Enforcement Initiative.

Eligible testing activities must be conducted in accordance with procedures contained in the application for assistance. These procedures shall include the following:

1. A formal recruitment process designed to obtain a pool of credible and objective persons to serve as testers. Recuits must not have prior felony convictions or convictions of crimes involving fraud or perjury.
2. A tester training program which will
   a. Require the careful recordation of all relevant information on standardized forms, signed by the respective testers, following completion of the test;
   b. Prohibit any communication between pairs of testers relating to the conduct of the test or to testing experiences or results until all information has been recorded and the testers debriefed by the testing coordinator;
   c. Require that the same or substantially equivalent type of housing accommodations, financing, or service be requested; and
   d. Require that, to the extent practicable, testers identify themselves as having the same or substantially equivalent housing needs and demographic profile as the person who made the bona fide allegation, except for the race, color, religion, sex, handicap, familial status, nationality, or other attribute which is the basis of the alleged discrimination. In cases of testing for systemic discrimination (e.g., a pattern or practice of discriminatory housing practices by a housing provider or lender), demographic profiles may vary from that of the person who made the bona fide allegation so long as the test of each agent or owner is a "paired" test. For the purpose of these guidelines, a "paired test" means that the two testers who conduct the "paired test" shall
   i. Have the same or substantially similar demographic profiles except for their race, color, religion, handicap, familial status, sex, nationality, or other attribute which is the basis of the alleged discrimination;
   ii. Have the same or substantially similar housing requirements;
   iii. Initiate the test at the same office or in the same or substantially similar transactional conditions and circumstances; and
   iv. Conduct the test in a timely manner.
3. A tester assignment and control system which will assure that neither the tester, nor the organization conducting the test, including its employees and agents
   a. Has an economic interest in the outcome of the test, (without prejudice to the right of any person or entity to recover damages for any cognizable injury); or
   b. Has a specific bias toward either the person who made the bona fide allegation or the respondent; is a relative of one of the parties in the case; has had any employment or affiliation within one year with the person or organization to be tested; is a licensed competitor of such person or organization in the listing, rental, sale, or financing of real estate property; or has any other specific bias or conflict of interest which would prevent or limit his or her objectivity or fairness.

E. Program Totals and Funding Estimates

Approximately $3,000,000 is available under this notice for the Private Enforcement Initiative. Approximately $2,550,000 will be reserved for funding of testing activities; however, HUD retains the right to shift funds to other activities if we do not receive sufficient number of acceptable applications for testing activities. Acceptability will be determined based upon criteria for eligibility, completeness of budget information, and factors for award. HUD anticipates that approximately 30 projects will be funded.

F. Applications

Applicants may submit only one application; but may propose more than one type of activity in that application. Applicants must submit all information required in the application kit and must include sufficient information to establish that the application meets the criteria set forth at sections I. and IV.C., above.

Projects should be no longer than 12 months in duration. Projects that appear to be aimed solely or primarily at research or data gathering unrelated to existing or planned fair housing enforcement programs will not be approved. Data gathering activities will require OMB approval under the Paperwork Reduction Act before commencement of the activity.

G. Award Procedures

Applications for funding under this initiative will be evaluated competitively, and awarded points based on the Factors for Award identified in section II above. HUD will review the applications and assess them against the materials submitted by the applicant in its application. The final decision rests with the Assistant Secretary or the Assistant Secretary's designee.

V. Applicant Notification and Award Procedures

The following procedures are applicable to all funding under this notice.

A. Notification

No information will be available to applicants during the period of HUD evaluation except for notification in writing to those applicants that are determined to be ineligible. Awards are expected to be announced by HUD within three months of the closing date.

B. Negotiations

After HUD has ranked the applications and made an initial determination of applicants whose scores are above the funding threshold (but before the actual award), HUD may require that applicants in this group participate in negotiations and submit application revisions resulting from those negotiations. In cases where it is not possible to conclude the necessary negotiations successfully, awards will not be made. Negotiations will not be used to raise the rankings of applications that would otherwise fall below the funding threshold.

If an award is not made to an applicant whose application above the initial funding threshold because of an inability to complete successful negotiations, and if funds are available to fund any applications that may have fallen below the initial threshold, HUD will establish a new funding threshold and proceed as described in the preceding paragraph.

C. Funding Instrument

HUD expects to award a cost reimbursable cooperative agreement to each successful applicant. HUD reserves the right, however, to use the form of assistance agreement determined to be most appropriate after negotiation with the applicant.

Authority: Section 561 of the Housing and Community Development Act of 1987 (Pub. L. 100-242, approved February 5, 1988); Title VIII, Civil Rights Act of 1968 (42 U.S.C. 3600-

20); Sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Date: April 17, 1989.

Urban Mass Transportation Administration

49 CFR Part 611

Major Capital Investment Projects; Proposed Rulemaking

VOL. 54 ISS 78 AP 25 1989 UMI

DEPARTMENT OF TRANSPORTATION

Urban Mass Transportation Administration

49 CFR Part 611

[Docket No. 89-A]

RIN 2132-AA22

Major Capital Investment Projects

AGENCY: Urban Mass Transportation Administration (UMTA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Urban Mass Transportation Administration (UMTA) is issuing this notice of proposed rulemaking to implement the requirements of section 303 of the Surface Transportation and Uniform Relocation Assistance Act of 1987. The proposed regulation defines the procedures applicants must follow in developing fixed guideway (i.e., "new start") projects. It further sets forth the means by which UMTA will evaluate cost-effectiveness, the results of alternatives analysis, and the degree of local financial commitment as required by law.

DATES: Comment due date: Written comments should be received by June 26, 1989.

ADDRESS: Written comments should be addressed to: U.S. Department of Transportation, Urban Mass Transportation Administration, Office of the Chief Counsel, Docket No. 89-A, 400 Seventh Street, SW., Room 9316, Washington, DC, 20590. Comments will be available for review by the public at this address from 9:00 a.m. to 5:00 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Samuel L. Zimmerman, Director, Office of Planning Assistance, UMTA, Washington, DC, (202) 366-2360.

SUPPLEMENTARY INFORMATION:

I. Background

The Federal Government has provided a large share of the Nation's capital investment in urban mass transportation since the early 1970's. By the mid-1970's, because of the magnitude and scheduled duration of commitments being proposed, the Department found it useful to publish a statement of Federal policy to ensure that available Federal resources would be utilized in the most prudent and effective manner. Such a statement was issued in 1976, and was supplemented and revised in 1978, 1980, and 1984. The policy statements defined the procedures to be followed to advance proposed fixed guideway projects to the point where a commitment of Federal discretionary funds could be considered. In addition, in the 1984 policy, a rating system was established for identifying those projects that were considered to be the best candidates for the limited Federal discretionary funding available. The rating system was deemed to be necessary because the demand for Federal new start funding far exceeded the amount of discretionary funding that was likely to be available.

The key precepts of these policy statements were incorporated into law when Congress enacted the Surface Transportation and Uniform Relocation Assistance Act of 1987 (STURAA). In section 303 of STURAA, which added subsection 3(i) to the Urban Mass Transportation Act of 1964, as amended (UMT Act), Congress established a set of criteria to be used to determine fixed guideway transit projects eligible for Federal discretionary funding. Specifically, the law states that "[n]o grant or loan for construction of a new fixed guideway system or extension of any fixed guideway system may be made under this section unless the Secretary determines that the proposed project (1) is based on the results of an alternatives analysis and preliminary engineering, (2) is cost-effective, and (3) is supported by an acceptable degree of local financial commitment, including evidence of stable and dependable funding sources to construct, maintain, and operate the system or extension." Section 303 further directs the Secretary to promulgate a regulation setting forth the means "by which the Secretary will evaluate cost-effectiveness, results of alternatives analysis, and the degree of local financial commitment." In section 304 of STURAA, the Congress directs the Secretary to transmit, by January 20 of each year, a report which contains "a proposal of the allocation of the funds to be made available to finance grants and loans for the construction of new fixed guideway systems and extensions of fixed guideway systems among applicants for such assistance."

This proposed rulemaking would constitute the regulation called for by STURAA section 303. Readers should note that the proposed regulation consists of three parts: the text of proposed §§ 611.1 through 611.15, and Appendices A and B. Appendix A to Part 611 sets out the policies and procedures for the development of major urban mass transportation investments. Appendix B to Part 611 explains the rating system the Department would use each year to prepare its recommended allocation of section 3 new start funds.

It also should be noted that, for the past several years, the Department has opposed a continuation of the section 3 program, including discretionary funding for new starts. Specifically, the Department proposed to terminate the discretionary transit grant program funded by one penny of the Federal gasoline tax and distribute these funds by formula. This proposal reflected the need to reduce the Federal budget deficit through reductions in spending. The purpose of this notice of proposed rulemaking is to comply with the requirements of STURAA section 303, and readers of this notice should not infer that the current Administration supports a continuation of the section 3 New Start Program.

Agency Policy Statements

A brief review of the elements of the earlier agency policy statements provides a useful perspective. Experience with these policies has shown that fixed guideway transit systems are not, in many cases, as cost-effective as less capital intensive solutions to local transportation problems. Nevertheless, rail transit and bus guideway projects may be cost-effective solutions to local transportation problems in heavily traveled corridors with large concentrations of employment and other urban activities.

A 1976 policy statement established a process-oriented approach, designed to allow each urban area to take into account its unique characteristics in the planning, design and implementation of transportation improvements. It required as a condition of eligibility for Federal assistance that alternative investment strategies be considered in order to determine which investment best served the locality's transportation needs, promoted its social, economic, environmental and urban development goals, and supported national aims and objectives. Cost-effectiveness was defined in these general terms and a demonstration of cost-effectiveness was required for projects to be advanced for Federal funding assistance. The 1976 statement stressed the need to consider combinations of transit modes and technologies appropriate to the transportation service requirements of specific corridors, and required major fixed guideway systems to be implemented incrementally, with priority given to the most immediate needs of the locality. It called for the analysis of a comprehensive Transportation System Management (TSM) alternative, representing the best that can be done to improve transit service without making a major capital investment. These TSM actions typically include expanded bus service, paratransit, ridesharing, traffic engineering and regulatory and pricing strategies (but not fixed guideways) to facilitate transit and high-occupancy vehicle flow on existing highway facilities. It also called for actions to enhance a project's accessibility and convenience, and to improve the quality of transportation service in other parts of the metropolitan area which would not be served by the fixed guideway project. Finally, the 1976 statement emphasized the importance of public involvement throughout the development process.

A 1978 agency policy reinforced the 1976 policy and added further considerations. It explicitly stated that approval of a preliminary engineering grant would not imply any commitment to finance construction of a project. It required the development of a stable and reliable source of funding to cover operating deficits, and specified that construction grant contracts would be negotiated with a fixed ceiling on the Federal contribution, subject to a defined method of adjustment for inflation (the full funding contract). The 1978 statement suggested that the formal pledge of assistance known as the Letter of Intent be considered after preliminary engineering. Finally, it required local commitment to enhance prospects for economic viability of fixed guideway projects; for example, zoning policies and development incentives to stimulate high density private real estate development around selected transit stations.

A 1980 revised agency policy linked project development procedures more closely to the environmental impact statement (EIS) process. It allowed conceptual engineering studies during the preparation of the alternatives analysis and draft EIS, and completion of the final EIS during preliminary engineering rather than before that stage. The 1980 revised policy specified that a Letter of Intent would be considered only upon completion of circulation of the final EIS, and that it had to be based upon a comparison of the proposed project with other projects then pending. However, neither this statement nor the earlier ones specified how such an intercity comparison of projects might be made, describing only a process for sorting out alternatives within each urban area.

On May 18, 1984, UMTA published a revised Statement of Policy on Major Urban Mass Transportation Capital Investments in the Federal Register (49 FR 21284). The basic tenets and processes of the earlier statements were essentially retained and described anew in a section entitled "Project Development Process and Procedures," which also took into account recent legislation. The important addition, however, was that UMTA's own evaluation process was made more explicit. The policy described an intention to use more quantifiable techniques for evaluating proposals. Two primary criteria—cost-effectiveness and local fiscal effort—were established for rating new start projects and identifying those most worthy of Federal discretionary funding. The policy also identified threshold criteria that must be met before a project would be advanced from system planning to alternatives analysis and from alternatives analysis to preliminary engineering. In these respects, the 1984 statement was an attempt to make more operational the policy framework developed in earlier statements. It also responded to the legislative history of the Surface Transportation Assistance Act of 1982 which spoke to financing cost-effective fixed guideway projects and to extra local fiscal effort being taken into account. Specifically, the 1984 statement reflected language in the 1984 Senate Appropriation Report, Adopted in the Conference Report, suggesting that the principal factors to be considered should be the results of alternatives analysis, cost-effectiveness, and the degree of local financial commitment, including evidence of stable and reliable funding sources to maintain and operate the system. The conference report also suggested that UMTA consider the degree of local government support, private sector support, community support, and participation of minority business in new start projects.

The position taken in the 1984 statement was that if these policy tenets were given better definition and clarity in an operational rating system, fixed guideway investments had a place in the array of projects which would be considered for Federal transit funding. The alternative of trying to cope with unconstrained local demand without a clear evaluation system was viewed as unworkable.

With the enactment of section 303 of STURAA, Congress specifically has endorsed the principle that UMTA fund only those new start projects most deserving of Federal investment. As further noted in the STURAA legislative history, Congress clearly has directed that new start projects which are recommended for funding should be those, based on the results of alternatives analysis and preliminary engineering, which best contribute to the achievement of program goals, are cost-effective relative to other projects, and are supported by an acceptable degree of financial commitment, including evidence of stable and dependable funding sources to construct, maintain and operate the proposed project, along with the rest of the transit system in the area.

II. Today's Proposed Rule

This proposed rulemaking would constitute the regulation called for by section 3(i) of the UMT Act, as added by section 303 of STURAA. This rule, once promulgated, would be used by UMTA to evaluate cost-effectiveness, the results of alternatives analysis, and the degree of local financial commitment. This section of the preamble discusses the major elements of the proposed rule.

To a large degree, this proposed regulation builds upon the 1984 policy statement. It contains three parts: the text of proposed §§ 611.1 through 611.15, and two appendices. In gist, the text of proposed §§ 611.1 through 611.15 is drawn from the "Project Development Process and Procedures" section of the 1984 policy statement. The process for developing major urban mass transportation investments includes four general phases prior to actual construction: system planning, alternatives analysis, preliminary engineering, and final design. Approval by the UMTA Administrator is required before initiating the alternatives analysis, preliminary engineering, and final design phases. As proposals are advanced through these phases, estimates of their costs, effects, and impacts are developed and refined.

Appendix A, entitled "Policies and Procedures on the Development of Major Urban Mass Transportation Investments," is similarly an extension of the "Project Development Process and Procedures" section of the 1984 policy statement. Appendix B, "Description of the Major Investment Rating System," is drawn from the section of the 1984 policy statement entitled "Description of the Rating System."

This proposed rule also reflects UMTA's new incentive program for discretionary transit grants. On March 13, 1989, Secretary of Transportation Samuel Skinner announced a number of proposals to encourage transit agencies to "overmatch" Federal grant funds (i.e., to provide more than the legally stipulated non-Federal matching share of 25 percent).

A. Cost-Effectiveness

In this NPRM, UMTA is proposing to rely upon the cost-effectiveness criteria and cost-effectiveness thresholds established by the 1984 policy statement to determine whether or not a project is cost-effective per section 3(i) of the UMT Act.

The cost-effectiveness indices and thresholds are derived from the statutory objectives expressed in section 2 of the UMT Act. These objectives recognize that, while the primary responsibility for mass transit rests with State and local governments, there is a Federal interest in the provision of an essential level of urban mobility for the public by financially assisting the development of efficient urban mass transportation networks. The Federal interest is not necessarily an interest in networks which may provide maximum comfort, convenience, amenity and other such benefits.

Projects that fail to meet one of UMTA's cost-effectiveness thresholds will not be considered eligible for Federal participation under section 3 of the UMT Act. These thresholds rely on numerical indices that represent the ratio formed by dividing project-related costs by measures of transportation benefit. Appendix B explains how these indices are computed.

In summary, two cost-effectiveness indices are used to provide a quantitative measure of cost-effectiveness: The "new trip index" and the "user benefit index." The new trip index, introduced in UMTA's 1984 Major Capital Investment Policy, recognizes two measures of benefit for fixed guideway projects: changes in transit ridership and travel time savings for existing riders. The index is computed as a ratio in which annualized capital and operating costs comprise the numerator, and ridership changes constitute the denominator. Travel time savings are converted to their monetary equivalent using an average value of time, and are incorporated in the index as an offset to costs. The index takes the form of incremental cost (annualized capital and operating, less travel time offsets) per new transit trip.

The user benefit index has been developed to overcome several computational problems UMTA has encountered in using the new trip index over the past four years, as well as to respond to comments on the 1984 policy statement. This new measure combines ridership increases with travel time savings into a single measure of user benefits, and takes the form of cost (annualized capital and operating) per hour of user benefit. In theory, the user benefit measure should provide a more valid basis for project evaluation, but it has not been tested widely in practice and many local studies have not yet produced the data needed to compute user benefits. UMTA is requesting local agencies currently engaged in major investment project planning to prepare information that can be used to compute the user benefit measure. UMTA intends to use both the old measures of benefit (ridership increases and travel time savings) and the new user benefit measure to determine cost-effectiveness.

The thresholds to be used in UMTA's cost-effectiveness determination are based upon the value of a new transit rider and the value of an hour of user benefit. The thresholds identify, from the Federal perspective, the point beyond which the cost of achieving new transit ridership or user benefits is clearly excessive. Thus, these thresholds delineate the point beyond which a project cannot be considered cost-effective, and should not be funded.

For the new trip index, UMTA proposes a threshold of $6 per new trip, which matches the threshold that UMTA established for entering preliminary engineering under the 1984 policy statement. This threshold is based upon a 1984 study which found that a new transit trip would produce, on average, about $2.80 in direct user benefits. The calculation of direct user benefits in this study was based on a generous estimate of potential savings in parking costs, travel time, and auto operating costs for the average commuter who shifts from auto to transit. UMTA has factored the estimate from this study upward to $6, recognizing that fixed guideways may also produce indirect benefits, such as reduced emissions of air pollutants and support for desirable urban development. UMTA believes that this factoring—which is essentially a doubling of direct benefits—gives the benefit of any doubt to projects that might otherwise be deemed of questionable merit.

For the user benefit index, UMTA proposes a threshold of $8 per hour of user benefit. This threshold assumes that the perceived value of travel time for work trips is $4 per hour, reflecting 1984 wage rates and the relationship between wage rates and travel time values established by research literature. The perceived value of travel time also was factored upward to recognize potential indirect benefits. As with the cost per trip index, direct benefits have been doubled to establish this threshold value.

These thresholds are currently under review to make sure they relect the current cost of owning and operating an automobile and current wage rates. Accordingly, the final rule may contain updated values for the thresholds. Interested parties are encouraged to review and comment on the proposed thresholds.

The cost-effectiveness indices and thresholds that UMTA chooses to use in evaluating projects will directly reflect a project's ability to save travel time for existing transit users and to attract new transit riders. These measures are used because there is a close relationship between them and a project's ability to advance the essential goal of the Federal transit program, which is to assist in providing a basic level of public mobility. The achievement of other goals and objectives of public transportation investments, such as the reduction of energy consumption and air polluant emissions and the promotion of economic development, also are closely related to a project's ability to improve the level of transit service for existing transit riders and attract new riders. Thus, projects that provide substantial travel time savings and ridership increases are likely to not only satisfy the basic mobility objective, but also meet transit's other objectives as well.

B. Local Financial Commitment

Appendix A identifies the threshold criteria UMTA proposes to use to evaluate the degree of local financial commitment. The importance of the financial commitment criterion reflects the reality that some transit agencies do not have sufficient financial capacity to construct, operate, and maintain a new fixed guideway project while at the same time continuing to operate and maintain their existing transit systems. Recently, in fact, some urban areas have found it necessary to reduce bus service to provide capital and operating resources for new fixed guideway projects. This invariably has led to lower total public transportation usage, the opposite of what the Federal government is trying to achieve with its mass transportation grant programs.

Specifically, Appendix A sets forth several factors that UMTA will consider in assessing a potential grantee's financial capacity to undertake a new fixed guideway project. UMTA will focus, principally, on a grantee's proposed capital financing commitment, to ensure that all necessary State, local, and private revenues are indeed committed or dedicated to the project. UMTA also will consider a region's historical support for transit, and the grantee's projected operating costs and revenues. Where UMTA determines, based on this assessment, that the prospective grantee lacks the necessary financial capacity to undertake a new start, the project will be deemed ineligible for funding under the discretionary program.

In considering a region's historical support for transit, specifically, UMTA will be focusing on the stability and reliability of the applicant's funding sources over the recent past. Where an applicant can demonstrate a consistent or growing level of support for transit over time, there is less risk that that applicant would be unable to operate the new fixed guideway as planned, or would be compelled to reduce bus service in order to operate the fixed guideway. To assess an applicant's historical support for transit, UMTA will consider how well the applicant has maintained its existing mass transit equipment and facilities. UMTA also will consider whether the applicant has reduced service over the most recent three year period due to financial constraints.

It should be understood clearly that it is not UMTA's intention to favor grantees that historically have enjoyed comparatively large support from State and local revenues—given, for example, that they have had fixed guideway transit systems in place for many years—as opposed to grantees in younger, growing localities that have never had a guideway system. In short, UMTA will favor applicants in the best of fiscal health. Indeed, many of the potential applicants that are now in the best fiscal health are those serving younger, growing metropolitan areas.

In evaluating a grantee's financial planning, UMTA will take an approach similar to that used by bond rating agencies such as Moody's and Standard & Poor's. Fundamentally, UMTA will compare a grantee's financial forecasts with past performance. UMTA expects that most financial planning will rely on forecasts of farebox revenues; State, local, and Federal subsidies, both dedicated and appropriated (e.g., sales tax revenues); systemwide operating and maintenance costs, based on future levels of operations; and normal capital replacement needs. UMTA anticipates, also, that some grantees' financial planning will rely on assumptions regarding population, economic growth in the region, and other factors affecting transit ridership, such as auto operating costs, fares, and parking fees. UMTA will examine all of these forecasts and assumptions critically. Where these forecasts or assumptions differ from past trends, or are implausible, UMTA may choose to require revisions or further explanations before allowing a grantee to proceed to final design and construction.

In sum, UMTA will evaluate the logic and the health of a grantee's financial plan. In the usual course of events, some forecasts will not be realized, and some assumptions will prove inaccurate. UMTA is concerned that an overall local financial commitment to transit be strong and realistic enough that deviations from forecasts and assumptions will not require curtailments of mass transit service or excessive fare increases. Toward this end, UMTA will evaluate a composite financial plan, and the components of that plan, not to determine whether the specific figures are necessarily the most likely figures, but whether the local financial commitment is sufficient to absorb the fiscal shortfalls that could occur from a failure to achieve the forecasts. Thus, UMTA will analyze a financial plan from the vantage of a prudent banker or investor, whose primary concern would be that the plan make allowances for managing project costs under all normal variations in forecasting for the project. To define what variations might be reasonably expected for a project, UMTA will closely examine past trends for both the grantee's operations and the region, and experience across the Nation.

Interested parties are urged to provide comments on these proposed mechanisms for implementing the requirements of section 3(i) of the UMTA Act, and to suggest alternative mechanisms for meeting the intent of the law.

C. Rating System

The new start rating system, which was established in the 1984 policy statement, will be used to prioritize those projects that meet the threshold requirements of section 3(i) as outlined above. The agency anticipates that a number of the new start projects currently advancing through the project development process may satisfy section 3(i), and that Federal funding availability will not be sufficient to support all of these proposals. Thus, there will be a continuing need to identify, from among those projects eligible for section 3 funding, those which are most deserving of Federal assistance. This need is recognized in section 304 of the STURA Act (section 3(j) of the UMT Act) which directs the Department to provide Congress with a recommended allocation of section 3 funds. It is expected that the rating system would be the basis for the Department's funding recommendations for the new start program.

The new start rating system is proposed to be Appendix B to Part 611. As described in this Appendix, the primary factors affecting a project's rating will be cost-effectiveness and local financial commitment. Appendix B reflects the agency's 1984 policy, as amended to reflect response to comments raised about the policy, as well as an incentive program for discretionary grants that Secretary Skinner announced on March 13, 1989.

Secretary Skinner's initiative embraces several provisions from the 1984 policy, namely the rating system's emphasis on capital overmatch and the preference for cash rather than in-kind local share. What is new is that, other things being equal, under this proposal, a privately raised overmatch will rank an application higher than a publicly raised overmatch. Special priority will be given to applications containing innovative funding techniques which maximize local efforts to leverage and encourage private sector funding contributions in a manner that will reduce the net public cost of the system.

Appendix B also reflects agency response to comments received on the 1984 policy. First, as noted above, a second cost-effectiveness measure has been developed to overcome shortcomings in the cost per new trip index. Both the cost per new trip index and the cost per hour of user benefit index will be used in the rating system. Second, Appendix B explicitly recognizes the need to expand the scope of the evaluation beyond cost-effectiveness and local financial commitment. Other factors—such as the degree of local support, the status of local efforts to attain and maintain the National Ambient Air Quality Standards, and disadvantaged business enterprise participation—will be used to distinguish between projects that rate similarly in terms of cost-effectiveness and local financial commitment.

UMTA at this point has not established measures for comparing projects in terms of these other factors. Local officials are invited to provide whatever supporting information they can provide. In terms of community support, however, UMTA would be particularly interested in receiving information on: (1) Local commitments to land use and transportation policies that enhance the proposed project's cost-effectiveness and financial feasibility; (2) overall levels of local funding for the transit system over the most recent 5 year period; and (3) a comparison between local funding commitments and local ability to generate revenues for transit.

III. Section-By-Section Analysis

A. Section 611.1: Purpose and contents

This section states that this part defines the process applicants must follow to be considered eligible for a UMTA capital grant for a major urban mass transportation investment. It further states that the proposed regulation would serve as the rule mandated by section 3(i) of the UMT Act. It further specifies that the proposed regulation is comprised of §§ 611.1 through 611.15 and Appendices A and B.

B. Section 611.3: Applicability

This section states that this part applies to all major urban mass transportation investment projects proposed for UMTA funding. This basic principle is the same as that of the 1984 policy statement, that the project development process applies to all major urban mass transportation investments. The 1984 policy further stated that the rating system would not apply to proposals fully funded through the formula allocated programs. This is still UMTA's intent, as discussed in proposed Appendix B. The applicability of the threshold criteria to projects funded under both the discretionary and formula programs is discussed in proposed Appendix A.

C. Section 611.5: Definitions

The key terms in this part are defined in this section. These definitions are essentially unchanged from the 1984 policy statement, except that the proposed rule adds a definition for the term "cost-effectiveness evaluation."

In the 1984 policy, the definition of "major urban mass transportation investment" stated that, typically, the cost of a major investment will be in excess of $100 million. This statement was intended as a general guide to the order of magnitude of projects covered by the policy, not as an absolute threshold, but was often misinterpreted. To eliminate any confusion, and to reflect the requirements of section 3(i), which does not identify any such threshold, the reference to $100 million has been deleted from the definition. All grantees seeking UMTA funding for a new fixed guideway facility or extension will be expected to meet the requirements of this rule.

The definition of "fixed guideway" in the proposed rule is slightly different from the definition in section 12 of the UMT Act. In the UMT Act, public transportation systems that utilize a fixed catenary system (i.e., overhead wires) are included within the definition of fixed guideway. In the proposed rule, fixed catenary systems are not mentioned because some such projects—electrically powered trolley buses being the best example—are generally much less costly than projects with an exclusive right-of-way, do not normally require the same level of analysis and evaluation, and are not funded under the new start category. Fixed catenary systems that involve a reserved right-of-way or rails, such as light rail projects, do fall within the definition of fixed guideway in the proposed rule.

D. Section 611.7: Project development process

This section identifies the four phases of project planning and development, the general requirements applicable to these phases, and provisions regarding public involvement. These requirements have been extracted from the Project Development Process and Procedures section of the 1984 policy.

The need to obtain UMTA approval before initiating alternatives analysis, preliminary engineering, and final design stages is stipulated in this section. The threshold criteria to be used in evaluating these requests are spelled out in this section (and are further explained in Appendix A). These threshold criteria are intended to screen out, early in the process, those projects that are unlikely to meet the requirements of section 3(i) of the UMT Act. UMTA approval to advance through the project development process should be expected only where there is a reasonable possibility that a project will emerge that is cost-effective and supported by an acceptable degree of local financial support.

It should be noted that UMTA presently is reconsidering the cost-effectiveness threshold for entering the alternatives analysis phase. Since 1984, the threshold for entering alternatives analysis has been set at $10 per new transit trip, significantly higher than the $6 per new trip index for entering preliminary engineering. This was done to recognize the preliminary nature of cost and ridership estimates at the start of alternatives analysis. Experience has shown, however, that cost estimates tend to increase as a project advances through the project development process while ridership forecasts decline. This suggests that the threshold for entering alternatives analysis should be no higher than the threshold for entering preliminary engineering. The results of this reconsideration will be reflected in the final rule.

Paragraph (e) of this section, Project Management Oversight, refers to Part 633 of this title. Part 633 is still being developed. A Notice of Proposed Rulemaking was published in the **Federal Register** on August 11, 1987 (52 FR 29709).

E. Section 611.9: System planning phase

This section presents the requirements applicable to the system planning phase of project development. It consists of those critical system planning provisions of the 1984 policy statement.

The remaining provisions of the 1984 statement appear in Appendix A.

F. Section 611.11: Alternatives analysis phase

This section presents the requirements applicable to the alternatives analysis phase of project development. It consists of those critical alternatives analysis provisions of the 1984 policy statement. The remaining provisions of the 1984 statement appear in Appendix A.

G. Section 611.13: Preliminary engineering phase

This section presents the requirements applicable to the preliminary engineering phase of project development. It consists of those critical preliminary engineering provisions of the 1984 policy statement. The remaining provisions of the 1984 statement appear in Appendix A.

As noted in the 1984 policy statement, the preliminary engineering effort will encompass not only the locally preferred alternative but also a transportation system management (TSM) alternative and, in some cases, one or more guideway alternatives found to be cost-effective in the alternatives analysis phase.

H. Section 611.15: Final design phase

Federal funding commitments for project construction are considered at the time a project moves into the final design stage. This section identifies the requirements that must be met before UMTA will commit to funding a project. For new start projects proposed for funding under section 3, UMTA will not approve the initiation of final design until the requirements of section 3(i) have been satisfied. This requires a formal determination by UMTA that the project is cost-effective, is based on the results of alternatives analysis and preliminary engineering, and is supported by an acceptable degree of local financial commitment. (Projects that were in preliminary engineering, final design or construction on January 1, 1987, are not subject to this requirement, as stipulated in section 303 of the STURA Act of 1987.)

The criteria UMTA will use to make its determinations under section 3(i) are amplified in Appendix A. Specifically, Appendix A spells out the mathematical threshold values that must be met before a project will be considered cost-effective. Appendix A also details the factors that UMTA will consider in assessing the degree of local financial commitment.

For new start projects funded under section 9 and/or the formula portion of the Interstate Transfer Program, but not section 3, § 111.15(e) of the proposed rule requires grantees to provide certain certifications as to a project's cost-effectiveness, its safety, and local financial capacity. This requirement has been a part of UMTA's Section 9 Grant Application Instructions (Circular 9030.1A) since 1983, and is included here because of its regulatory nature. The intent is to avoid situations in which a recipient commences a new start project with formula funds and then looks to section 3 funding to complete the project or to fund routine capital needs which were superseded by the new start funding decision. For the cost-effectiveness certification, grantees may apply their own criteria but are expected to show that there is at least a minimum transit benefit associated with the project as demonstrated by an increase in ridership when compared with a transportation system management alternative.

IV. Request for Written Comments

UMTA seeks written comments from all interested parties on this proposed rule. UMTA's final rule will reflect the agency's consideration of all comments received within 60 days of the date of publication in the **Federal Register**.

UMTA welcomes comments on any and all matters related to the proposed rule, but there are a number of specific issues where comments would be particularly helpful. The questions below highlight matters on which UMTA specifically requests comments and supporting data.

A. Specific Issues for Comment

1. UMTA believes that the two indices described in this proposed rule—the "new trip index" and the "user benefit index"—provide a rational basis for identifying those projects that are cost-effective for the purpose of section 3(i) and for grouping cost-effective projects according to their investment worthiness. Of the two indices proposed by UMTA, are there compelling arguments that either one provides the better measure of project merit? Are there reasons to believe that the use of other evaluation techniques, such as cost benefit analysis or net present value analysis, would have significant advantages over the use of the UMTA indices?

2. Does the UMTA approach to cost-effectiveness assessment place unreasonable demands on the technical analysis process, given the state of the art in travel demand forecasting and cost estimation, and given the need to ensure consistency between cities? If so, what specific changes should be considered? To what degree would this rule create a need for additional UMTA-sponsored training and technical guidance?

3. The cost-effectiveness thresholds defined in this proposal are based upon a generous estimate of the operating cost, parking cost, and travel time savings for a typical auto commuter who shifts to a guideway transit mode of travel. The user cost savings thus derived has been doubled to recognize the existence of less quantifiable non-user benefits such as support for economical and desirable urban development and other socio-economic and environmental benefits such as reductions in air pollutant emissions and energy conservation. Commenters are invited to provide current data that could be used to help UMTA estimate the average user costs for urban work trips by automobile. Does the doubling of user costs provide a reasonable proxy for non-user benefits? Are there any other recommended approaches for determining cost-effectiveness thresholds and, if so, what data are available for calculating a threshold value?

4. In this proposed rule, a higher threshold is suggested for entering alternatives analysis than for entering preliminary engineering, recognizing the imprecision of cost and ridership estimates at the end of system planning. However, it also is recognized that system planning cost estimates are usually low and system planning ridership forecasts are usually high. Cost-effectiveness indices computed at this stage often greatly exaggerate a project's cost-effectiveness. To compensate, should the cost-effectiveness threshold for entering alternatives analysis be the same as the threshold for entering preliminary engineering?

5. The cost-effectiveness thresholds proposed by UMTA reflect technical considerations of project merit, not budgetary considerations. Should UMTA instead set the threshold at a budget-driven level, such that the proposed Federal share of all projects meeting the threshold would equal approximately the funds authorized for the new start program? Or should UMTA set an even more generous threshold level, thus allowing a larger number of projects to meet the threshold and compete for the limited supply of Federal new start funds?

6. Should the same cost-effectiveness threshold be used in all cities despite differences in traffic congestion, travel delays, wage rates, parking costs, air quality, and other factors? If not, how might UMTA develop and maintain the data base needed to calcuate different thresholds for different cities?

7. To address the requirements of section 3(i), UMTA proposes to evaluate the degree of local financial commitment by assessing the soundness of the capital financing plan, the region's historical support for transit, and the grantee's projected operating costs and revenues. Are there other financial indicators that UMTA should consider? Should more quantifiable threshold criteria be established for local financial commitment and, if so, what should they be?

8. In Appendix B, UMTA has identified a number of "other factors" that would be used to differentiate, in the ratings process, between projects with similar degrees of cost-effectiveness and local financial commitment. These factors include the level of community support, efforts to obtain the participation of the private sector, and agreements to limit the use of section 9 funds for operating assistance, and the status of local efforts to attain and maintain the National Ambient Air Quality Standards. Are there additional considerations that should be added to the list of "other factors"?

9. Secretary Skinner's incentive program for discretionary grants includes several proposals affecting new starts. In the new starts ratings process, UMTA proposes to give preference to cost-effective projects that are supported by a non-Federal matching share in excess of 25 percent. Participation by the private sector in raising the non-Federal overmatch dollars especially is encouraged. To be considered as bona fide overmatch, non-Federal funds should be in cash, not in-kind contributions. Requests will be considered for relaxation of UMTA's one corridor at a time policy, depending on the level of Federal assistance being sought. For those new start projects whose Federal participation is 30 percent or less, as well as for those projects seeking relatively small sums of new start assistance thanks to substantial local overmatch, expedited UMTA review is promised. Are those

VOL 54 ISS 78 AP 25 1989 UMI

proposals appropriate means for achieving UMTA's goal of rewarding grantees who are ready and willing to increase the percentage of non-Federal participation? What other proposals might be considered for reaching this goal?

B. Procedural steps to comment

To ensure consideration, comments must be received by June 26, 1989. All comments should be addressed to: U.S. Department of Transportation, Urban Mass Transportation Administration, Office of the Chief Counsel, Docket No. 89–A, 400 Seventh Street, SW., Room 9316, Washington, DC 20590.

Any commenter wishing acknowledgement of receipt of the comment should include a self-addressed, stamped postcard with the comment. The Docket Clerk will stamp the card with the date and time the comment is received and mail the card to the commenter.

V. Regulatory Impacts

A. Regulatory Analysis

This action has been reviewed under Executive Order 12291, and UMTA has determined that this is not a major rule. If promulgated, this rule would not result in an annual effect on the economy of $100 million or more, nor would it create a major increase in costs or prices for consumers, individual industries, or geographic regions, nor have significant adverse effects on competition, employment, investment, innovation or the ability of United States-based enterprises in domestic or export markets. However, the proposed regulation would be a "significant" rule, as defined by the Department's Policies and Procedures on Improving Governmental Regulations, because it involves important departmental policy and will generate substantial public interest. Accordingly, a draft regulatory evaluation has been prepared and is available for public inspection as part of the docket.

B. Executive Order 12612

This proposed rule has been reviewed under Executive Order 12612 on "Federalism," and UMTA has determined that it does not have implications for principles of Federalism that warrant the preparation of a Federalism Assessment. If promulgated, this rule will not limit the policymaking and administrative discretion of the States, nor will it affect the States' abilities to discharge traditional State governmental functions or otherwise affect any aspects of State sovereignty.

Indeed, consistent with the fundamental principles of Federalism as described in Executive Order 12612, the programs and policies of the Urban Mass Transportation Administration are purposely structured to place primary responsibility on States and local governments for the provision of mass transportation services to their communities, and to encourage States and local governments to achieve their objectives for mass transportation through cooperative effort. As is true for all UMTA programs and policies, this action grants maximum administrative discretion to States and local governments.

C. Regulatory Flexibility Act

In accordance with 5 U.S.C. 605(b), as added by the Regulatory Flexibility Act, Pub. L. 96–354, UMTA certifies that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities within the meaning of the Act.

D. Paperwork Reduction Act

The proposed regulation does not establish any new reporting or recordkeeping requirements.

List of Subjects in 49 CFR Part 611

Government contracts; Grant programs—Transportation; Mass transportation.

Accordingly, for the reasons described in the preamble, 49 CFR Chapter VI is proposed to be amended as follows:

A new Part 611 would be added to read as follows:

PART 611—MAJOR CAPITAL INVESTMENT PROJECTS

Sec.

611.1 Purpose and contents.
611.3 Applicability.
611.5 Definitions.
611.7 Project development process.
611.9 System planning phase.
611.11 Alternatives analysis phase.
611.13 Preliminary engineering phase.
611.15 Final design phase.

Appendix A to Part 611—UMTA Policies and Procedures on the Development of Major Urban Mass Transportation Investments

Appendix B to Part 611—Description of UMTA's New Start Rating System

Authority: 49 U.S.C. 1601 *et seq.*, 1602(i); 23 U.S.C. 103(e)(4); 23 U.S.C. 142; 40 CFR Parts 1500–1508.

§ 611.1 Purpose and contents.

(a) This part defines the process that State and local agencies must follow in developing major urban mass transportation investment projects that are to be considered for capital grants from UMTA. This part also implements section 3(i) of the UMT Act by setting forth the means by which UMTA will evaluate cost-effectiveness, the results of alternatives analysis, and the degree of local financial commitment.

(b) This part is comprised of §§ 611.1 through 611.15 and Appendices A and B to Part 611.

§ 611.3 Applicability.

(a) This part applies to all proposals for discretionary and formula grants authorized by sections 3 and 9 of the UMT Act, 23 U.S.C. section 103(e)(4) (Interstate Transfer Program), and 23 U.S.C. section 142 (Federal Aid Urban System Program).

(b) This part does not apply to, affect, or alter decisions, approvals, authorizations, or other actions made by UMTA before the effective date of this regulation.

§ 611.5 Definitions.

In this part: "Cost-effectiveness evaluation" means the comparison of the estimated capital and operating costs of a project (or alternative) with various measures of goal achievement (i.e., effectiveness). Both costs and effectiveness are computed relative to lower cost alternatives. The results of a cost-effectiveness evaluation are expressed as ratios, such as added cost per new transit trip or added cost per unit of user benefit.

"Fixed guideway" means any public transportation facility which utilizes and occupies a separate right-of-way or rails. This includes, but is not limited to, rapid rail, light rail, commuter rail, automated guideway transit, people movers, and exclusive facilities for buses and other high occupancy vehicles.

"Major urban mass transportation investment" means any project that involves the construction of a new fixed guideway segment or extension of an existing fixed guideway for use by mass transit vehicles. The construction of short guideway facilities for the purpose of localized operational improvements, including improved access to terminals or stations, will not be considered major urban mass transportation investments.

"The UMT Act" means the Urban Mass Transportation Act of 1964, as amended.

"Transportation system management (TSM) alternative" means a package of low to moderate cost improvements designed to make more efficient use of an existing transportation system. TSM alternatives typically include such actions as expanded bus service, high occupancy vehicle lanes that do not require major new construction, fringe parking, paratransit and ridesharing incentives, traffic engineering, and regulatory and pricing strategies to increase ridesharing and transit use.

"UMTA" means the Urban Mass Transportation Administration.

§ 611.7 Project development process.

(a) *Project phases.* The four phases of the process for developing a major urban mass transportation investment before construction are:

(1) The system planning phase;
(2) The alternatives analysis phase;
(3) The preliminary engineering phase; and
(4) The final design phase.

(b) *UMTA approval.* UMTA approval must be obtained before the initiation of alternatives analysis, preliminary engineering, and final design. Appendix A to this part sets forth the criteria UMTA will apply in reviewing a request to proceed to the alternatives analysis phase and preliminary engineering phase. Section 611.15 sets forth the criteria that UMTA will apply in reviewing a request to proceed to the final design phase. Approval to initiate one phase is not a commitment that UMTA will participate in a subsequent phase.

(c) *General requirements.* A proposal for a major urban mass transportation investment must be consistent with the urban area's comprehensive plan which articulates the overall direction for metropolitan development and identifies major transportation corridors.

(d) *Public involvement.* Local officials must provide full opportunities for the involvement of members of the general public, private interest groups, local elected officials, and all levels of government throughout the four phases of project development for a major urban mass transportation investment. Involvement shall be initiated early so that the public has an opportunity to influence the process in a timely and constructive fashion, particularly as to the alternatives and evaluation criteria to be considered, priority actions for implementation, and steps to avoid or minimize adverse environmental effects.

(e) *Project management oversight.* During the course of project development, project management plans must be prepared and implemented in accordance with Part 633 of this title (Project Management Oversight).

§ 611.9 System planning phase.

(a) System planning refers to the continuous, comprehensive, and cooperative transportation planning process that is conducted in each urbanized area under the requirement of 23 CFR Part 450 (Planning Assistance and Standards). System planning results in plans and programs which are consistent with the comprehensively planned development of the area and which support transportation improvements and project development activities.

(b) Where local officials choose to pursue UMTA funding for a major urban mass transportation investment, the system planning phase must result in:

(1) The selection of the corridor(s) to be proposed for advancement into alternatives analysis;

(2) The identification of the corridor's current and future transportation problems;

(3) The identification of a small set of promising alternatives for addressing those problems; and

(4) The assessment of the region's financial capacity to successfully undertake a major urban mass transportation investment while continuing to operate, maintain, and reinvest in the existing transit system.

§ 611.11 Alternatives analysis phase.

(a) To be eligible for UMTA capital funding for a major urban mass transportation investment, local officials must perform a corridor-level analysis of mode and alignment alternatives. At least one alternative must be a TSM alternative.

(b) For each alternative, the analysis must include:

(1) An estimation of capital, operating, and maintenance costs;

(2) An assessment of impacts on highway and transit service levels and transit ridership;

(3) A cost-effectiveness evaluation;

(4) An assessment of funding options, including an assessment of the stability and reliability of funding sources for meeting the costs of the existing transit system and proposed improvements;

(5) An assessment of institutional arrangements, such as the roles and responsibilities of State agencies, local governments, and the private sector in project implementation and operation; and

(6) An assessment of social, economic, and environmental impacts of importance to a decision on mode and alignment.

(c) Once UMTA accepts the technical results of these analyses, the results will be summarized in a draft environmental impact statement or environmental assessment that meets the requirements of 40 CFR Parts 1500 and 1508 (Regulations for Implementing the Procedural Provisions of the National Environmental Policy Act) and 23 CFR Part 771 (Environmental Impact and Related Procedures), if required.

(d) During the circulation period for the draft environmental impact statement, the applicant must hold at least one formal public hearing covering the analysis of alternatives and the environmental document.

(e) Following the environmental impact statement's circulation period or the environmental assessment's availability period, local officials must select a preferred mode and alignment alternative that will be referred to as the locally preferred alternative, and must adopt a plan for financing its capital and operating costs. Local officials must prepare a report documenting these decisions.

§ 611.13 Preliminary engineering phase.

(a) To maintain eligibility for UMTA capital funding for a major urban mass transportation investment, local officials must perform preliminary engineering on the locally preferred alternative and a TSM alternative. Preliminary engineering also may include one or more additional alternatives found to be cost-effective in the alternatives analysis phase.

(b) The preliminary engineering phase must include:

(1) An analysis of design alternatives leading to local decisions on the proposed project's major design features;

(2) A refinement of the capital and operating cost, level of service, ridership, environmental impact, and cost-effectiveness information developed during alternatives analysis;

(3) The implementation of the financial plan including, as appropriate, the negotiation of local agreements on the allocation and timing of existing financial resources, establishment of new revenue sources, and commitments to private financing;

(4) The completion of environmental requirements in accordance with 40 CFR Parts 1500 and 1508 (Regulations for Implementing the Procedural Provisions of the National Environmental Policy Act) and 23 CFR Part 771 and 49 CFR Part 613 (Environmental Impact and Related Procedures); and

VOL. 54 ISS 78 AP 25 1989 UMI

(5) Development of an early and systematic approach to promoting the participation of the private sector and, in particular, disadvantaged business enterprises in accordance with Part 23 of this title.

(c) UMTA must be provided early opportunities to review and concur in the methods of these analyses.

(d) If it is required that UMTA issue a final environmental impact statement, UMTA will do so only when UMTA accepts the technical findings and analyses of the statements.

§ 611.15 Final design.

(a) The final design phase for a major urban mass transportation investment will include:

(1) The acquisition of rights of way;

(2) The relocation of utilities;

(3) The preparation of final construction plans, detailed specifications, estimates and bid documents; and

(4) The negotiation of a full funding agreement between UMTA and the recipient of UMTA funds for the major urban mass transportation investment.

(b) Final design activities, property acquisition (with the exception of hardship or protective buying as defined in 23 CFR 712.204(d)), vehicle procurement, and construction may not be undertaken until the requirements of the National Environmental Policy Act have been satisfied.

(c) Where major urban mass transportation investments are proposed for funding under section 3 of the UMT Act or the discretionary authorities of the Interstate Transfer Program, UMTA approval to undertake final design will reflect decisions made under the rating system described in Appendix B.

(d) Major urban mass transportation investments proposed for funding under section 3 of the UMT Act will not be advanced into the final design phase unless:

(1) UMTA approved the initiation of preliminary engineering, final design, or construction before January 1, 1987, or

(2) UMTA determines that the proposed project is based on the results of alternatives analysis and preliminary engineering, is cost-effective, and is supported by an acceptable degree of local financial commitment. For the purpose of this determination a project is:

(i) Based on the results of alternatives analysis and preliminary engineering if alternatives analysis and preliminary engineering were completed as described herein, or the project fully satisfied the UMTA requirements that were in effect when planning and project development occurred;

(ii) Cost-effective if the results of alternatives analysis and preliminary engineering yield a cost-effectiveness index that either does not exceed $6.00 per new daily transit trip or does not exceed $8.00 per hour of user benefit; and

(iii) Supported by an acceptable degree of local financial commitment if sufficient funds are available to construct, operate, and maintain the project and its supporting feeder system while continuing to operate and maintain the existing transit system. The local financial commitment will be evaluated through an assessment of the capital financing committed to the project and the stability and reliability of the applicant's sources of operating revenue, as described in Appendices A and B to this part.

(e) Where major urban mass transportation investments are proposed for funding under section 9 of the UMT Act or the formula portion of the Interstate Transfer Program, the applicant must certify that:

(1) Sufficient funds are available to construct, operate, and maintain the project and its supporting feeder system while continuing to operate and maintain the existing transit system;

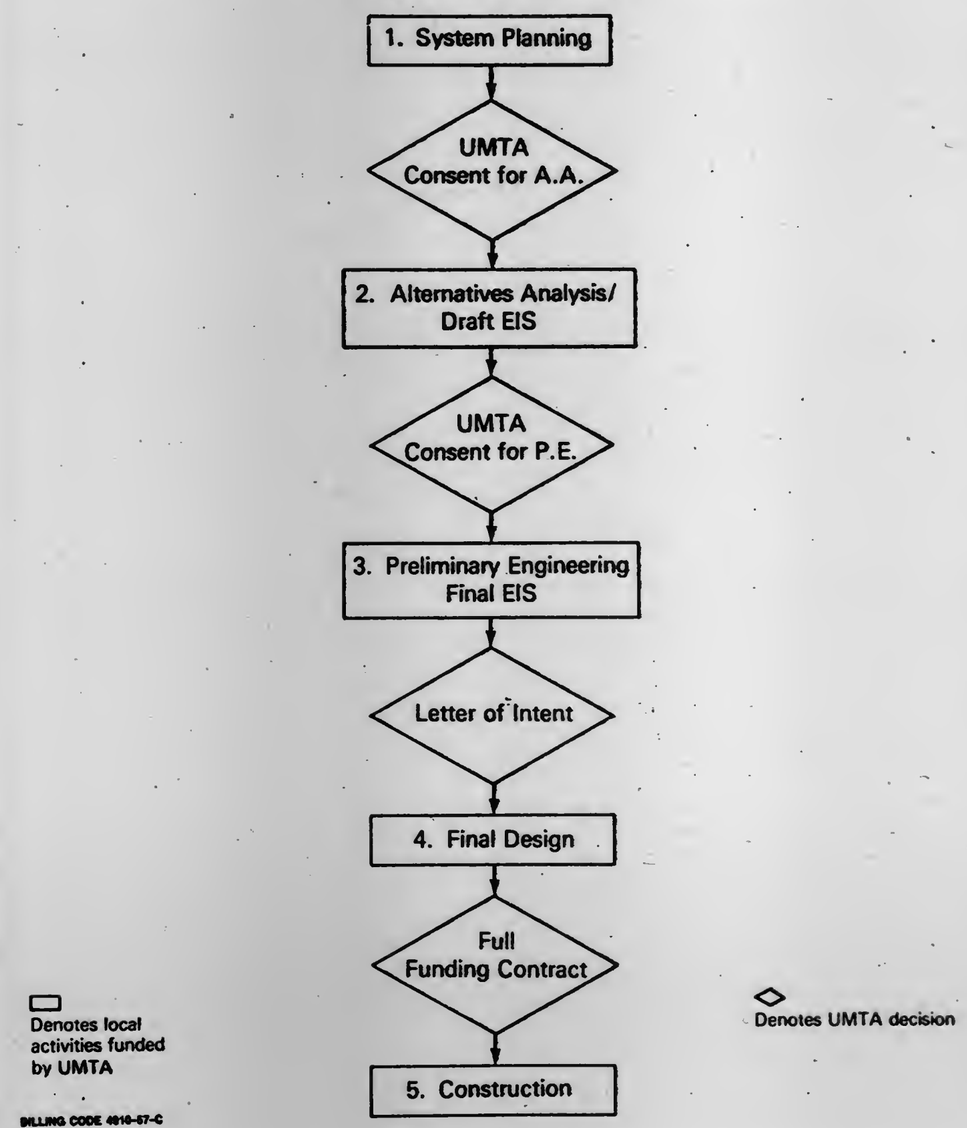
(2) The project is cost-effective based on the results of alternatives analysis and preliminary engineering;

(3) The project will meet minimum design criteria to ensure safe system construction and operation; and

(4) The applicant will not seek assistance under section 3 of the UMT Act for routine capital needs.

Appendix A to Part 611—UMTA Policies and Procedures on the Development of Major Urban Mass Transportation Investments

These policies and procedures are applicable to proposals for discretionary grants authorized by section 3 of the Urban Mass Transportation Act of 1964, as amended (UMT Act), and 23 U.S.C. section 103(e)(4) (Interstate Transfer Program). In addition, these policies and procedures apply to grants under the authority of section 9 of the UMT Act, and 23 U.S.C. section 142 (Federal-Aid Urban System Program). The purpose of this Appendix is to amplify the procedures set forth at 49 CFR Part 611, Major Capital Investment Projects.



Projects to rehabilitate or modernize existing fixed rail transit lines are outside the scope of this Appendix. However, major elements of modernization programs (e.g., electrification of existing services) may be financed under full funding agreements and be subjected to a similar evaluation approach. This will help ensure that Federal discretionary funds are directed toward projects that are cost-effective and supported by an adequate degree of local financial commitment.

General Description

The process for developing major urban mass transportation investments includes four general phases before actual construction: System planning, alternatives analysis, preliminary engineering, and final design. Approval by the UMTA Administrator is required before initiating the alternatives analysis, preliminary engineering, and final design phases. The planning and project development process is illustrated in Figure 1.

BILLING CODE 4910-57-M

FIGURE 1

BILLING CODE 4910-57-C

VOL 54 ISS 78 AP 25 1989 UMI

As proposals are advanced through these phases, estimates of their costs, effects, and impacts (as well as the costs, effects, and impacts of alternative courses of action) are developed and refined. The applicant's financial capacity is established, financing plans are developed, and local financial commitments are obtained. This allows local officials and UMTA to identify the options that are most cost-effective and that are supported by an acceptable degree of local financial commitment. The application of a similar process for over ten years has shown that a careful and systematic analysis of present and future transportation needs, followed by a detailed analysis of the relative costs and benefits of alternative courses of action for addressing them, improves the quality of both local and Federal decisionmaking and thus results in better use of limited Federal funds.

System Planning

This first phase of project development is the continuous, comprehensive, and cooperative transportation planning process that is carried out in each urbanized area under the Urban Transportation Planning requirements of 23 CFR Part 450 and 49 CFR Part 613. System planning is assisted financially by UMTA's section 8 planning grants, issued to the designated metropolitan planning organizations, together with planning funds provided by the Federal Highway Administration. System planning also may be supported by formula grants available under sections 9 and 9A of the UMT Act.

The system planning phase typically includes the examination of urban development trends, the collection of travel and economic data, and the forecasting of future travel. System planning includes an analysis of the region's general financial condition and its financial capability to operate the existing transit system, modernize outdated facilities, replace equipment as it wears out, and undertake new initiatives. Based on these preliminary studies, local officials identify current and future transportation problems and evaluate policies and investment options for addressing these problems. This leads to the adoption of a transportation plan that is consistent with the urban area's comprehensive plan and that includes, as necessary, strategies for obtaining necessary financial resources.

Long range regional transportation plans should not identify specific mass transit modes and alignments. The scale and time horizon of long range regional planning studies do not allow for the detailed analyses needed to support mode and alignment decisions.

The transportation plan should reflect an awareness that different types of transportation facilities and services may be most appropriate in different parts of the metropolitan area. Some parts of the area may be most suitable for highway improvements, while others are suitable for transit or multi-modal solutions to identified problems. To reach these decisions, the planning process should identify major transportation corridors, and each major corridor should be considered individually to determine the facilities and services that will best meet its projected requirements. Corridors which do not require new fixed guideway facilities should be provided with levels and types of transit appropriate to their needs, with the level of service being progressively upgraded as demand develops. The planning process should consider the need for local community-level transit service as well as for express line-haul connections that foster regionwide accessibility.

The comprehensive plan should be revised periodically as part of the continuing transportation planning process. Plan revisions will allow local decisionmakers to reflect changes in local goals, priorities, long-range forecasts, and financial realities; respond to new land development and travel patterns; adapt to new technologies as they are developed; and adjust to the impact of previously implemented actions.

If the transportation plan includes a corridor where a major urban mass transportation investment is proposed, the system planning process should identify a small set of promising mode and alignment alternatives that address the corridor's transportation problems and warrant detailed study in subsequent project development phases. Factors to be considered in identifying promising alternatives include cost-effectiveness, the region's financial capacity, and potential environmental impacts.

If local transportation plans call for major urban mass transportation investments in more than one corridor, only one corridor at a time will normally be considered for advancement as a potential candidate for discretionary section 3 funding. Each corridor will be considered for funding on its own merits. The one corridor at a time policy reflects the reality of a scarce capital resource, and the resulting need for projects to be capable of independent justification irrespective of the probability of obtaining additional Federal funds. The policy also helps ensure that limited Federal funds are equitably distributed throughout the nation; that the most cost-effective segments receive priority attention; and that maximum flexibility is preserved to modify the system in response to subsequent advances in technology, changes in growth patterns, and other unforeseen circumstances.

UMTA will look to the designated metropolitan planning organization to select the corridor to be advanced as a candidate for UMTA discretionary funding. Establishment of regional investment priorities is rightfully a local concern.

In saying that regional systems shall be developed in stages, one corridor at a time, UMTA does not intend to imply any direct connection between the term "region" and the geographic area covered by a single metropolitan planning organization (see 23 CFR 450.106). UMTA is aware that some metropolitan planning organizations (MPO's) oversee the planning process for several Standard Metropolitan Statistical Areas (SMSA). Within the geographic areas covered by these MPO's, there may be separate centers of population and employment, without close economic and social relationships, and there may be separate transit agencies and/or separate sources of local capital and operational funds. In such areas, UMTA is prepared to consider, on a case by case basis, advancing one corridor in each SMSA.

While UMTA is generally unwilling to consider exceptions to its one corridor at a time policy, it will do so in cases where local officials agree to provide a substantial overmatch to any Federal assistance being sought where the amount of Federal assistance sought is comparatively small. Exceptions also may be considered in cases where all of the prospective fixed guideway alternatives are relatively low in cost (that is, less than $100 million).

Alternatives Analysis

Any metropolitan area which ultimately intends to apply for UMTA capital assistance for a major urban mass transportation investment must perform an analysis of transportation alternatives that serves the corridor in question. This phase of project development leads to the selection of a locally preferred mode and alignment alternative and adoption of a financing plan. Alternatives analysis may be assisted financially by planning grants under section 8 of the UMT Act, supplemented as necessary by section 9 formula grants. It is UMTA policy that funds available under section 3 of the UMT Act will not be used for alternatives analysis. Funding for alternatives analysis should appear in the region's unified planning work program.

Approval by the UMTA Administrator is required before the alternatives analysis phase is undertaken. Approval will be given where the results of system planning demonstrate that there is a reasonable possibility that the fixed guideway alternatives proposed for study will meet the requirements of section 3(i) of the UMT Act, namely, alternatives which are potentially cost-effective and which can be expected to have an acceptable degree of local financial commitment. The UMTA Administrator can be expected to approve for alternatives analysis only those projects that meet the following threshold criteria:

1. Current transit ridership in the corridor proposed for study exceeds 15,000 daily transit trips. This threshold ensures that at least a modest transit market already exists in the corridor.

2. The alternatives proposed for study do not have excessive costs compared to their benefits. To address this criterion, preliminary cost-effectiveness indices are developed based on the results of system planning. (See Appendix B to this Part for an explanation of the cost-effectiveness index.) The threshold value for entering alternatives analysis is currently set at $10 per new daily transit trip, or $12 per hour of user benefit, using the total cost-effectiveness index as the basis for evaluation. This threshold value is based upon a generous estimate of the operating cost, parking cost, and travel time savings for a typical auto commuter who shifts to a guideway transit mode of travel. This estimate is factored upward to recognize indirect benefits and the preliminary nature of cost and ridership estimates at this stage.

3. The transit implementing agency is in reasonably sound financial condition. It should have, or have a realistic chance of obtaining, the financial capability to successfully undertake any of the proposed major transit investment alternatives while continuing to operate, maintain, and reinvest in the existing transit system.

If local officials make a commitment not to seek discretionary funds for construction, UMTA may approve the initiation of alternatives analysis even if the threshold tests are not satisfied. The alternatives analysis would then be used to address the environmental and other requirements that apply to projects supported with formula funds. These requirements include the financial, cost-effectiveness, and safety certifications called for in § 611.15(e) of this part.

The alternatives analysis phase considers the promising mode and alignment alternatives identified in system planning. In addition to any high cost options that show promise, the set of alternatives should include both medium- and low-cost options as well as a no-action alternative. Each of the build alternative should include TSM actions to increase the efficiency of the existing transit and highway system. One alternatives should consist solely of such TSM actions in order to provide a baseline that represents the most that can be done to address the corridor's transportation problems without a major investment.

The number of alternatives, as well as the scale of the analysis, should be commensurate with the magnitude of the transportation problem, the cost of the alternatives, and the significance of potential impacts. Early in the alternatives analysis phase, local officials and UMTA will agree on the range of alternatives to be addressed and a work plan for the analysis.

The analysis will assess each alternative's capital, operating, and maintenance costs; anticipated ridership; and impacts on highway and transit level of service. Social, economic and environmental impacts of importance to a decision on mode and alignment will be evaluated along with other factors considered important by the local community. The financial feasibility of each alternative will be assessed in terms of local, State, and private sector funding options and the availability of stable and dependable resources to cover the predicted operating and maintenance costs of the transit system. The analysis also will include an evaluation of the cost-effectiveness of the alternatives, where cost-effectiveness is measured as described in Appendix B to this Part. Local agencies should provide UMTA an early opportunity to review and concur in the methods and results of these analyses; only those methods and results that UMTA accepts will be used in UMTA's determination of cost-effectiveness.

During the alternatives analysis phase, UMTA and the applicant will prepare a draft Environmental Impact Statement (EIS) or Environmental Assessment (EA) in accordance with Council of Environmental Quality regulations (40 CFR Parts 1500 to 1508) and UMTA's environmental regulations (23 CFR Part 771 and 49 CFR Part 613). UMTA is responsible for ensuring that the environmental instrument fulfills Federal requirements and presents a complete and objective basis for mode and alignment decisions. Thus, UMTA will not approve an environmental instrument unless and until UMTA accepts the technical findings and analyses of the study. Following the EIS circulation period (for EA availability period), local officials will complete the alternatives analysis phase by selecting a preferred alternative and adopting a plan for financing its capital and operating costs.

Preliminary Engineering

This phase leads to the selection of the major design and operational features of the preferred alternative, development of a cost estimate with a high confidence level, and implementation of the financial plan. Preliminary engineering may be financed from section 9 formula program funds. Funding for preliminary engineering should appear in the region's transportation improvement program.

Written approval of the UMTA Administrator is required before fixed guideway projects may be advanced into preliminary engineering. Where the financial plan adopted in alternatives analysis shows that capital funding under section 3 of the UMT Act is envisioned, UMTA approval to proceed into preliminary engineering can be expected only if the locally preferred alternative does not have excessive costs compared to its benefits. This determination will be based upon the cost-effectiveness indices developed in alternatives analysis. The threshold value for entering preliminary engineering currently is set at $6 per new daily transit trip, or $8 per hour of user benefit, using the total index as the basis for evaluation.

Approval to enter preliminary engineering also will be predicated on the quality of the proposed financing plan for the locally preferred alternative. This will be measured on the basis of the region's capability to implement, operate, and maintain the project, including ancillary services and facilities such as feeder buses, and to operate and maintain the remainder of the region's transit system over the project's useful life.

In cases where local officials commit, through their financial plan, to construct the locally preferred alternative without section 3 funding, these threshold tests will not apply. However, there must be a minimun transit benefit associated with the project as indicated by an increase in ridership or user benefits compared with the TSM alternative. In addition, the applicant should be cognizant of the certifications required by § 6112.15(e) of this part.

During the preliminary engineering (PE), phase, local project sponsors refine the design of the proposal, taking into consideration all reasonable design alternatives. In addition, environmental requirements are completed. This will typically involve preparation of a final EIS – (and in some cases, a supplemental draft EIS). UMTA is responsible for ensuring that the EIS fulfills Federal requirements and provides a complete and objective basis for decisions on the design, operations, and mitigation measures for the guideway facility. UMTA will review and concur in the technical environmental and design work performed by local agencies and participate in the preparation of the EIS consistent with UMTA's responsibilities under the National Environmental Policy Act of 1969.

It is UMTA policy to encourage the application of value engineering techniques to all construction projects, and to require its use on major capital projects (see UMTA Order 9004.1, "Use of Value Engineering on Urban Mass Transportation Projects"). Generally, value engineering is performed toward the end of the PE phase by an independent consultant team. UMTA also encourages peer reviews.

The PE process results in estimates of project costs and impacts which have a high confidence level. Project management concepts also are finalized during preliminary engineering. The project management concepts define the scope of project implementation during the final design, construction, and start-up operation stages, including the establishment of policies for activities such as quality assurance, quality control, and safety.

The financial plan adopted at the end of alternatives analysis is implemented during PE. Agreements are reached on the allocation of existing financial resources, any required new revenue sources are put in place, and specific private financing commitments are obtained. By the conclusion of PE, all necessary State, local, and private revenues should be committed or dedicated to the project, subject in no case to legislative action or popular referendum.

Preliminary engineering encompasses not only the locally preferred and the TSM alternatives, but may also include one or more lower cost alternatives found to be cost-effective in the alternatives anlaysis phase. As necessary, estimates of the capital cost of each cost-effective alternative will be refined, together with forecasts of transit ridership and travel time. Estimates of future operating and maintenance expenses of cost-effective alternatives will also be updated.

Localities also are encouraged to incorporate into their planning at this stage, and to implement, a program of local supportive policies and actions designed to enhance the proposed project's cost-effectiveness and the degree of local financal commitment. These might include:

1. Land use plans, zoning policies, and development incentives that support high density development, particularly joint development, around transit stations.

2. Coordinated bus and/or paratransit feeder services to the guideway system.

3. Pricing, regulatory, or traffic control measures aimed at reducing the peak-period use of automobiles within transit guideway corridor (e.g., traffic metering and tolls, parking management strategies, employer subsidized transit fares).

4. Financing mechanisms which make use of taxes and/or fees paid by developers and property owners benefiting from the transit investment.

Localities seeking Federal assistance for a major urban mass transportation investment

will, in the course of preliminary engineering, be expected to develop an early and systematic approach to promoting the participation of small, disadvantaged, and women's business enterprises (DBEs and WBEs). In addition to addressing the requirements of UMTA's DBE regulations (49 CFR Part 23), they should revise their existing DBE and WBE plans in accordance with the nature of the proposed project, establishing specific policies and procedures designed to maximize the opportunities for DBEs and WBEs in the entire range of transit activities, from planning to final design, construction, and operations. Intensive outreach and technical assistance programs, contract specifications for DBE and WBE awards, and professional staffing to identify opportunities for DBE and WBE participation and qualified firms are some of the strategies that should be considered.

Federal funding commitments are ultimately considered at the conclusion of the PE phase. These decisions are based on the decision criteria outlined in the "Final Design" section below and, for projects proposed for funding with discretionary resources, the rating system described in Appendix B to this part. Commitments will be considered only for operable segments that can be completed within UMTA's available program authorization.

Final Design

This is the last phase of project development before construction and typically is financed with section 3 or Interstate Transfer funds. The final design phase includes the acquisition of right-of-way; utility relocation; and the preparation of final construction plans including construction management plans, detailed specifications, estimates and bid documents. Section 611.15 of this part sets forth the requirements that must be met before approval will be given to initiate the final design phase.

Where projects are proposed for funding under section 9, the initiation of final design will reflect decisions made under the new start rating system described in Appendix B to this part. Additional requirements apply to section 3 funded projects that were not in preliminary engineering, final design, or construction on January 1, 1987. In accordance with section 3(i) of the UMT Act, these projects will be advanced into final design only if UMTA determines that they are based on the results of alternatives analysis and preliminary engineering, are cost-effective, and are supported by an acceptable degree of local financial commitment.

UMTA's determination on cost-effectiveness will be based upon the threshold criteria for entry into preliminary engineering. As noted above, the threshold currently is set at $6 per new transit trip and $8 per hour of user benefit, using the total index as the basis for evaluation.

To determine whether a project is supported by an acceptable degree of local financial commitment, UMTA will evaluate both the capital financing committed to the project and the stability and reliability of the applicant's operating revenue. Three factors will be considered:

1. Adequacy of the capital financing commitment. To satisfy this criterion, the applicant will need to provide a capital finance plan that fully covers the projected non-Federal share of the capital costs, including provision for contingent cost overruns.

2. History of adequate financial support for transit. Dedicated funding sources should be in place, or there should be a clear pattern of general appropriations from State and local governments that demonstrates a consistent support for mass transit. In this regard, UMTA will consider how well existing facilities have been maintained, and will look with disfavor on applicants that have reduced service over the most recent three year period because of financial constraints.

3. Projected operating costs and revenues. Financial projections should show that, in all likelihood, the applicant will have sufficient financial resources to operate and maintain the proposed project and to operate, maintain, and reinvest in its existing transit system without new sources of revenue.

When a project has been selected for funding with section 3 funds, UMTA normally will approve funding for final design and may at that time issue a Letter of Intent. The Letter of Intent is a formal pledge which documents UMTA's intention to obligate funds for a particular project, but is not a Federal obligation or administrative commitment. The total amount of potential Federal obligations covered by all outstanding Letters of Intent cannot exceed the amount allocated for new starts under section 3, less an amount necessary for other grants not covered by Letters of Intent.

Once the final design phase has been initiated, regardless of the source of Federal funding to be used, UMTA and the grantee will negotiate a construction grant contract (i.e., a full funding agreement) with a fixed ceiling on the Federal contribution, subject to a defined method of adjustment for inflation. Localities will be required to complete construction of the project, as defined to the point of initiation of revenue operations, and to absorb any additional costs incurred, except under certain specified extraordinary circumstances. The full funding agreement also will include a mutually agreeable schedule for anticipated Federal contributions during the construction period. Specific annual contributions under the Letter of Intent and full funding agreement will be subject to the availability of Federal funds and the ability of the grant recipient to use the funds effectively.

The full funding agreement will incorporate any local commitments to fund the non-Federal capital match (including the overmatch used to rate the project), to dedicate resources to finance projected operating deficits, and to forego the use of section 9 for operating assistance. The full funding agreement will also provide for the implementation of supporting feeder bus systems and will document local commitments to supportive policies and actions.

Appendix B to Part 611.—Description of UMTA's New Start Rating System

Fixed guideway projects are developed in four phases before actual construction: system planning, alternatives analysis, preliminary engineering, and final design. This process is described fully in the foregoing regulation and in Appendix A to this part, "Policies and Procedures for the Development of Major Urban Mass Transportation Investments." This Appendix B describes the rating process UMTA will use to evaluate major urban mass transportation investments and identify those most worthy of Federal capital assistance.

This rating system applies to proposals for discretionary grants authorized by section 3 of the Urban Mass Transportation Act of 1964, as amended (UMT Act). In addition, it applies to grants under the authority of section 9 of the UMT Act, 23 U.S.C. 142 (Federal-Aid Urban System Program), and 23 U.S.C. 103(e)(4) (Interstate Transfer Program) if they supplement discretionary grants.

The rating system complements the UMTA determinations mandated by section 3(i) of the UMT Act, enacted as part of the Surface Transportation and Uniform Relocation Assistance Act of 1987 (STURAA). Under UMT Act section 3(i), new start funds can be used for only those projects that are based on the results of alternatives analysis and preliminary engineering, that are cost-effective, and that are supported by an acceptable degree of local financial commitment. The rating system is used to compare those projects that meet the requirements of section 3(i). It identifies those projects most deserving of Federal discretionary assistance from among those projects that meet the minimum acceptable levels of cost-effectiveness and local financial commitment.

The rating system will be applied annually during preparation of the report mandated by section 3(j) of the UMT Act. This report is compiled in the first quarter of each fiscal year to guide decisions for the succeeding fiscal year. This report will provide the Congress, the Secretary of Transportation, the Office of Management and Budget, and the public with information on projects that have completed alternatives analysis, and projects that have completed preliminary engineering, and their respective ratings. An explanatory narrative will accompany the ratings.

Statutory Objectives and the Federal Interest

UMTA's new starts rating system is founded on UMT Act statutory objectives. Two fundamental objectives, set by section 2 of the Urban Mass Transportation Act, are "to encourage the planning and establishment of areawide urban mass transportation systems needed for economical and desirable urban development," and "to provide assistance to State and local governments and their instruments in financing such systems, to be operated by public or private mass transportation companies as determined by local needs."

Consistent with these fundamental objectives, the Federal interest underlying

UMTA's new starts rating system is the provision of an essential level of urban mobility for the public by financially assisting the development of efficient urban mass transportation networks. The Federal government is not necessarily interested in networks which may provide maximum comfort, convenience, amenities, and other like benefits. This rating system does not preclude local authorities from proposing projects which tend to maximize such benefits, but it identifies the extra costs and accounts for them in the rating process. It should also be understood that, while the rating system recognizes a Federal interest in mass transit, the primary responsibility for mass transit rests with State and local governments.

Rating Criteria

UMTA's new starts rating system is driven by the two primary criteria mandated by UMT Act section 3(i): Cost-effectiveness and local financial commitment. Implicit in the consideration of these criteria is consideration of the results of alternatives analysis and preliminary engineering, also mandated by UMT Act section 3(i). UMTA is mindful, also, of the legislative history of STURAA in which the Congress expressed concerns regarding community support and disadvantaged business enterprise participation in UMTA-funded new starts. Thus, the rating system provides for consideration of these factors when projects rate similarly in terms of cost-effectiveness and local financial commitment.

Because the two primary criteria, cost-effectiveness and local financial commitment, are quantifiable, it is possible to formulate numerical indices of Federal investment worthiness as a primary guide to ratings. These two criteria and their use in such indices are given further definition as follows.

Cost-Effectiveness

The cost-effectiveness evaluation assesses the investment worthiness of a fixed guideway alternative by comparing its costs and benefits with the costs and benefits of a transportation system management (TSM) alternative. TSM alternatives typically include such actions as expanded bus service, high occupancy vehicle lanes that do not require major new construction, fringe parking, paratransit and ridesharing incentives, traffic engineering, and regulatory and pricing strategies to discourage single-occupant auto use. The costs of the fixed guideway and TSM alternatives are annualized to account for the different time streams of capital and operating expenditures as well as the different expected lifetimes of each alternative. The annualized costs and benefits of the TSM alternative are then subtracted from the annualized costs and benefits of the fixed guideway alternative, so that the added costs of the fixed guideway can be compared with its added benefits. Two cost-effectiveness indices are used to provided a quantitative measure of cost-effectiveness: the new trip index and the user benefit index.

The new trip index was introduced in UMTA's 1984 Major Capital Investment Policy (49 FR 98, May 18, 1984). The index recognizes two measures of benefit for fixed guideway projects: changes in transit ridership and travel time savings for existing riders. The index is computed as a ratio in which annualized capital and operating costs comprise the numerator, and ridership changes constitute the denominator. Travel time savings are converted to their monetary equivalent using an average value of time, and are incorporated in the index as an offset to costs. The index takes the form of incremental cost (annuallized capital and operating, less travel time offsets) per new transit trip.

The two measures of benefit included in the new trip index have proved to be good indicators of the benefits of primary Federal interest as well as general proxies for a wide range of other benefits associated with major investment projects. Additional ridership is a measure of how well a transit facility improves transit service, and also reflects many of transit's potential secondary benefits such as the structuring of urban development patterns and reductions in congestion, pollutant emissions, and energy consumption. The travel time savings for existing riders measure accounts for improved travel conditions for those already using transit, and is a good indicator of improved mobility for the transit dependent.

The user benefit index has been developed in responses to comments on the 1984 policy statement. This new measure combines ridership increases with travel times savings into a single measure of user benefits, and takes the form of cost (annualized capital and operating) per hour of user benefit. In theory, the user benefit measure should provide a more valid basis for project evaluation, but it has not been tested in practice, and many local studies have not yet produced the data needed to compute user benefits. UMTA is requesting local agencies currently engaged in major investment project planning to prepare information that can be used to compute the user benefit measure. Meanwhile, UMTA intends to use both the old measures of benefit (ridership increases and travel time savings) and the new user benefit measure in applying the rating system.

The new trip index and the user benefit index are calculated two ways. The "total index" is computed on the basis of total captial costs and reflects project merit irrespective of the source of funding. The "Federal index" reflects transportation benefits and operating cost savings noted above, and focuses on the capital costs of specific interest to the Federal Government: namely, the requested Federal contribution to capital costs.

In computing the indices of project merit, UMTA will consider the extent to which the alternatives analysis has indicated that another guideway alternative in the corridor would be more cost-effective than the locally preferred project. Where there is a more cost-effective guideway alternative, the rating of the locally preferred project will be reduced. Furthermore, where there is a lower cost guideway alternative which produces more benefits than the locally preferred project, a larger local capital contribution will be required for an applicant to be able to construct the locally preferred project.

Local Financial Commitment

The degree of local financial commitment is a particularly important criterion because it encourages communities to provide a larger capital match, and to develop stable and reliable sources for operating, maintenance, and capital replacement expenses. Thus, this criterion both leverages and protects limited Federal resources. A large local capital match will stretch scarce Federal dollars and permit Federal support for a larger number of worthy projects. The development of stable and reliable revenue sources reduces the risk that, after making a very large Federal capital investment, the grantee will not be able to adequately maintain and operate the project and other elements of its transit system. Private sector urban development also is taken into account to the extent that the private sector is committed to supporting transit capital or operating costs. Such commitments show that the private sector sees merit in the project, and are thus an indicator of investment worthiness.

The rating system uses the local financial commitment criterion to differentiate between projects that exhibit similar degrees of cost-effectiveness. Four factors are taken into account in this evaluation: the amount of capital overmatch as a percentage of the project's capital costs, the strength of the local plan of capital financing, the source of the local capital overmatch, and the stability and reliability of the financial resources to operate and maintain the applicant's transit system. Among projects which rate similarly in terms of cost-effectiveness, preference will be given to projects where:

1. The applicant agrees to provide substantially more than the statutory minimum capital match.

2. The applicant's capital finance plan is considered to be unusually sound in terms of its coverage of projected non-Federal capital costs and allowances for cost overruns.

3. The private sector participates in the raising of the non-Federal overmatch dollars. (Other things being equal, a privately raised overmatch will rank an application higher than a publicly raised one. Special priority will also be given to applications which contain innovative funding techniques which maximize local efforts to leverage and encourage private sector funding contributions in a manner that will reduce the net public cost of the system.)

4. Financial projections clearly show that the applicant has more than adequate financial capacity to operate the proposed project, to undertake other programmed improvements, and to operate, maintain, and reinvest in its existing transit system with a margin of safety for cost overruns and funding shortfalls.

With respect to the source of funds to provide the local share of net project cost, applicants utilizing a cash rather than an in-kind source would be judged to be making the greater local fiscal effort. In any case, in-kind local share would not qualify for overmatch credit.

UMI

Other Factors

Additional evaluation factors may be taken into account in order to distinguish between projects that rate similarly in terms of cost-effectiveness and local financial commitment. Such factors could include:

1. Level of community support, as demonstrated by local commitments to supportive land use and transportation policies;
2. Efforts to obtain the participation of disadvantaged businesses;
3. The status of local efforts to attain and maintain the National Ambient Air Quality Standards; and
4. Any preferred agreements to limit the long term use of section 9 funds for operating assistance. Such commitments and agreements will ultimately be included in the terms and conditions of the full funding agreement.

Development of the Ratings

Early in the first quarter of each fiscal year, UMTA intends to rate the projects that are candidates for funding in the following fiscal year. The ratings would be used in preparing a report to Congress, as called for by UMT Act section 3(j), containing the Department's proposal as to the amount of Section 3 discretionary funding that should be made available for new start projects, rail modernization, and bus improvements in the coming fiscal year.

The report also would contain a recommended allocation of the section 3 new start funds, reflecting existing funding commitments and the ratings of proposed new projects.

The ratings will focus on those projects that have completed or are completing the preliminary engineering phase, since these are the most likely candidates for capital funding in the following fiscal year. Projects that are in the early stages of preliminary engineering or which are completing alternatives analysis may also be rated for information purposes, so as to indicate potential out-year funding requests. Ratings will be updated for projects completing preliminary engineering after the first quarter. The allocation of uncommitted funds will be re-evaluated, if feasible, at subsequent points in the Federal budget cycle.

As a set of projects is selected for possible Federal support, consideration will be given to the amount of uncommitted funds in the UMTA budget authorization allocated for fixed guideway projects. A Letter of Intent or a full funding agreement will not be executed for a single project which would consume all, or substantially all, of UMTA's unobligated budget authority. In addition, by law, the sum of all the Letters of Intent and full funding agreements cannot exceed the unobligated budget authority.

Summary

UMTA's new start ratings system relies upon cost-effectiveness indices to identify those projects which are clearly superior, those with some merit, and those which are obviously least worthy. Those which rate most highly in terms of cost-effectiveness are placed in the top group, and projects which rate less well are placed in a separate group or groups. (Projects that fail to meet the cost-effectiveness thresholds and are not supported by an acceptable degree of local financial commitment are eliminated from consideration, consistent with section 3(i) of the UMT Act.) The final position of projects within each group is then determined by applying several measures of local financial commitment and possibly other factors. It is expected that the project ratings would provide the technical basis for UMTA's annual funding recommendations to the Congress.

The rating system extracts objective indices of project merit from the technical information developed in the local planning and project development process. The system recognizes the margin of error implicit in any forecast and avoids an automatic, discrete ranking of projects on the basis of a single, composite criterion. By avoiding a mechanical reliance on forecast data, it permits the application of informed judgment and emphasis on selected policy objectives. This approach to rating potential investments is similar to that used by private financial institutions to evaluate or grade investment options and assess risk and uncertainty. Private institutions typically use a set of objective criteria to place investment options into broad groups with similar worthiness and then, if necessary, apply judgmental criteria to determine the final positioning of projects within the groups. In the UMTA rating system, the cost-effectiveness indices are the objective measures of project merit or investment worthiness, and the degree of local financial commitment is the most important judgmental criterion.

Federal Acquisition Regulation (FAR); Additional Awards

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulatory Council are considering a change to 14.407–1(c)(4) and 15.1002 to require that, when an award is made to an offeror for less than all of the items that may be awarded to that offeror, and additional items are being withheld for subsequent award, the award notice shall state that the Government may make subsequent awards on those additional items within the offer acceptance period, and to clarify that notice of potential subsequent award must be provided with each award that may be followed by a subsequent award. The current language requires notice only with the first award.

DATE: Comment should be submitted to the FAR Secretariat at the address shown below on or before June 26, 1989 to be considered in the formulation of a final rule.

ADDRESS: Interested parties should submit written comments to: General Services Administration, FAR Secretariat (VRS), 18th and F Streets, NW., Room 4041, Washington, DC 20405.

Please cite FAR Case 89–20 in all correspondence related to this issue.

FOR FURTHER INFORMATION CONTACT: Margaret A. Willis, FAR Secretariat, Room 4041, GS Building, Washington, DC 20405, (202) 523–4755.

SUPPLEMENTARY INFORMATION:

A. Regulatory Flexibility Act

The proposed rule is not expected to have a significant economic impact on a substantial number of small entities and analysis of the proposed revision indicates that it is not a "significant revision" within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 3501, *et seq.* because it does not have a significant effort beyond the internal operating procedures of individual contracting offices.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the proposed changes to the FAR do not impose recodkeeping information collection requirements or collection of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Parts 14 and 15

Government procurement.

Dated: April 14, 1989.

Harry S. Rosinski,

Acting Director, Office of Federal Acquisition and Regulatory Policy.

Therefore, 48 CFR Parts 14 and 15 are amended as set forth below:

1. The authority citation for 48 CFR Parts 14 and 15 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. Chapter 137; and 42 U.S.C. 2473(c).

PART 14—SEALED BIDDING

2. Section 14.407–1 is amended by revising paragraph (c)(4) to read as follows:

14.407–1 General.

* * * * *

(c) * * *

(4) When an award is made to a bidder for less than all of the items that may be awarded to that bidder and additional items are being withheld for subsequent award, the award shall state that the Government may make subsequent awards on those additional items within the bid acceptance period.

* * * * *

PART 15—[AMENDED]

3. Section 15.1002 is amended by adding a second sentence to read as follows:

15.1002 Notification to successful offeror.

* * * When an award is made to an offeror for less than all of the items that may be awarded to that offeror and additional items are being withheld for subsequent award, each notice shall state that the Government may make subsequent awards on those additional items within the offer acceptance period.

DEPARTMENT OF EDUCATION

National Institute on Disability and Rehabilitation Research; Funding Priorities for Research Activities

AGENCY: Department of Education.

ACTION: Notice of Final Funding Priorities for Fiscal Years 1989–1990.

SUMMARY: The Secretary of Education announces final funding priorities for some of the research activities to be supported under the Rehabilitation Research and Training Center (RRTC), Rehabilitation Engineering Center (REC), Research and Demonstration (R & D), and Knowledge Dissemination and Utilization (D & U) programs of the National Institute on Disability and Rehabilitation Research (NIDRR) in fiscal years 1989 and 1990. NIDRR intends to provide funding support for some of these priorities in fiscal year 1989. Information concerning priorities to be supported in fiscal 1989 is contained in a separate consolidated application package published elsewhere in this issue of the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Betty Jo Berland, National Institute on Disability and Rehabilitation Research, Department of Education, 400 Maryland Avenue SW., Room 3070, Switzer Building, Washington, DC 20202–2601.

EFFECTIVE DATE: These priorities take effect either 45 days after publication in the **Federal Register** or later if Congress takes certain adjournments. If you want to know the effective date of these priorities, call or write the Department of Education contact person.

SUPPLEMENTARY INFORMATION: On November 15, 1988, NIDRR published proposed funding priorities for two fiscal years under several NIDRR programs in the **Federal Register** at 53 FR 46062. NIDRR's regulations authorize the Secretary to establish research priorities by reserving funds to support particular research activities (see 34 CFR 352.32). The publication of final funding priorities does not bind the Federal Government to fund projects in any of these areas, except as otherwise directed by statute. Funding of particular projects depends on the availability of funds and on the quality of the applications that are received. The following priorities represent areas of research derived from "state-of-the-art" meetings, planning conferences, and other participatory activities. This notice presents each program separately, with a description of the program followed by the final funding priorities for that program.

Analysis of Comments and Changes

NIDRR received a substantial number of comments on many of the proposed priorities. A synopsis and an analysis of comments received on these priorities and the Secretary's responses to them follow.

Rehabilitation Research and Training Centers (RRTCs) Rehabilitation for Persons With Long-Term Mental Illness

Comment: One commenter suggested that the research on families be broadened to include peers and other members of a client's support system. The commenter made two additional suggestions: (1) that a study of the impact of consumer management on vocational outcomes be added to the priority and (2) that studies of coping strategies and stress interventions successfully employed by ex-patients merit inclusion. Another commenter recommended that there be a study of the use of computers in rehabilitation of persons with long-term mental illness.

Discussion: The Secretary agrees that these are important concerns. However, most of these suggestions can be incorporated by an applicant in response to the present priority. NIDRR prefers to limit the required elements of a priority, and not to specify the approach to be used. An applicant may include peers and ex-patients as well as families in its studies of support mechanisms. Similarly, an applicant may develop model vocational rehabilitation interventions that include either consumer management or computer applications, or both. However, NIDRR will not require that all applicants test these specific interventions.

Changes: None.

Research and Training Center in Independent Living (IL)

Comment: Many commenters responded to this priority by objecting to the publication of proposed priorities for two years, without any indication of which priorities are proposed for funding in which fiscal year. Many commenters also objected to the lack of systematic involvement of representatives of the independent living field in the development of the priority. They further urged that funding levels should be included in notices of proposed priorities, to permit the public to judge the feasibility of implementing the priorities within program and funding constraints.

Most of these commenters contended that the scope and magnitude of the proposed priority are too extensive to be accomplished by one Center. Many commenters recommended that two RRTC's should be funded: one focusing on social policy issues related to achieving the goals of independent living, and another focusing on issues related to the management and improvement of Independent Living Center operations.

The general thrust of a large number of comments was that the priorities for the RRTC on Independent Living should focus on policy issues affecting independent living, with an emphasis on consumer involvement, consumer accessibility, and consumer control. The commenters further recommended that an emphasis be added to the priority on the identification and reduction of barriers to independent living, accessibility, and equal opportunity.

A group of commenters recommended that NIDRR delete or modify priority statements referring to long-term-care institutions and to specialized Independent Living Centers (ILCs) as those institutions are innately antithetical to the Independent Living concept. Commenters also recommended deleting priority statements relating to the study of patterns of funding and the study comparing specialized and generic ILCs. They believed that the study of funding patterns would be duplicative of another study already in progress.

Discussion: The Secretary has proposed priorities for two years at a time in order to simplify the processing and publication of notices, to give the field early notice of some of the pending priorities, and to give the agency greater flexibility in selecting priorities for funding in either or both years. The Department is required to publish priorities for public comment because priorities impose restrictions on applicants beyond those imposed by the statute, and thus they are considered to be regulatory. The Department is required by law to provide a period of public comment on regulatory actions. However, funding levels are not proposed for public comment since they are not regulatory in nature.

NIDRR regrets that the need to afford the field early notice of fiscal year 1990 priorities precluded the participatory planning meeting on the independent living priority that was to be held in 1989. However, the agency did consult with the staff of the Independent Living Program Division in the Rehabilitation Services Administration, and there is an ongoing channel of communication between the current RRTCs in Independent Living and their NIDRR Project Officer. Also, the Notice of Proposed Rulemaking process does

provide an opportunity for the field to make suggestions regarding the content of NIDRR priorities. The Department will consider alternative approaches for future fiscal years.

NIDRR agrees that the scope of activities identified in the proposed priority for an RRTC in independent living is too broad and diffuse for one Center. Therefore, NIDRR has modified the priorities to comprise two separate Centers.

With respect to the first activity in the proposed priority, NIDRR agrees with the commenters that the development of model approaches to improving consumer accessibility is important. With respect to the second activity, NIDRR believes that it is important to investigate the potential relevance of independent living concepts and programs in preparing individuals in a variety of long-term care settings to develop independent living skills and attitudes to facilitate their transition from institutions to living in the community. NIDRR agrees that a redundant study of funding patterns should not be undertaken.

NIDRR also agrees that, although some types of specialized IL Centers do exist, there is no pressing research objective to be met by comparing generic and specialized Centers.

Changes: NIDRR has divided the priority to create core areas for two RRTCs in Independent Living research, one in management and one in policy. One Center will include primarily those elements related to improving the operation of Independent Living Centers and services. The other RRTC will investigate policy issues related to independent living. NIDRR also has consolidated specific references to projects on long-term care settings, and eliminated references to studies of specialized ILCs and funding patterns. NIDRR has amended the priority to include a requirement to ". . . develop and test models to improve the accessibility of general community services to people with disabilities and integrate those services with Independent Living services," as requested by a large number of commenters.

A further change has been added to the priority to "develop and disseminate model strategies for ILCs to promote community accessibility in such areas as removal of architectural barriers, communications, employment, housing, and transportation." NIDRR also has eliminated the requirement for a study of funding patterns.

Community Integration for Persons With Mental Retardation

Comment: A number of commenters emphasized the need for more technical assistance to States and communities. Some of these commenters questioned the need for further research on community integration, arguing that dissemination of best practices was more important at this time. One commenter suggested that the target group should be expanded to include other developmental disabilities. Several commenters recommended that NIDRP place additional requirements in the priority, such as a requirement for state-of-the-art conferences for dissemination and for dissemination to a broad range of specific audiences, including generic service providers, policymakers, administrators, and parents.

Discussion: Although RRTCs do have a mandate for training and related activities, generally interpreted to include information dissemination and some technical assistance, NIDRR notes that its mandate and resources for in-depth technical assistance are limited. Most RRTCs provide technical assistance through their information services or through training. Alternatively, an RRTC may develop models for States and communities to acquire technical assistance with other resources. However, it will not be a major component of this RRTC. Similarly, the authority for RRTCs stipulates that they be research Centers. NIDRR believes that there is a need for new knowledge on many issues of community integration for persons with mental retardation, and thus is announcing a priority for an RRTC to conduct research and related activities in this area.

NIDRR believes there is a need for further research and, therefore, that the focus of the priority should be community integration of individuals with mental retardation. However, because individuals with other developmental disabilities are often in the same institutional populations or subject to similar segregation, NIDRR would not constrain the Center from including individuals with other developmental disabilities in its scope of work.

Finally, NIDRR prefers not to add requirements and restrictions to the priority. Applicants are free to propose whatever approaches to the stated problems they believe will be effective.

Changes: None.

Rehabilitation Engineering Centers (RECs) the Application of Computer-Assisted Design and Computer-Assisted Manufacture Methods to Prosthetics and Orthotics

Comment: A number of commenters stated that the proposed priority would be duplicative of substantial work now being done in computer-assisted design and computer-assisted manufacture (CAD–CAM) at various establishments, including the Rehabilitation Engineering Center at Northwestern University. They also noted that there is a capacity to support these endeavors in the private sector; the prosthetics and orthotics industry is a mature one that routinely uses CAD–CAM. One respondent stated that it would be inappropriate for NIDRR to devote an REC to the refinement of one tool—CAD–CAM—rather than to focus on solving problems of individuals with disabilities. Several commenters also stressed that innovations in prosthetics and orthotics are likely to come through small projects generated by the numerous practitioners and small businesses in the field.

Discussion: NIDRR proposed the priority with the goal of ensuring that state-of-the-art technological approaches would be applied to developing devices to benefit individuals with disabilities. The consensus of the commenters was that the potential use of CAD–CAM is already being widely tested and the priority would be unlikely to advance knowledge in that area.

NIDRR agrees that additional field-initiated research is likely to be a productive approach to developing improved prostheses and orthoses.

Therefore, NIDRR will withdraw the proposed priority for further consideration, while encouraging researchers to submit applications in the investigator-initiated programs—Innovation Grants and Field-Initiated Research.

Changes: The proposed priority has been withdrawn.

Applications of Technology to the Rehabilitation of Children With Orthopedic Disabilities

Comments: NIDRR received several comments that suggested the scope of the priority was too narrow, as it appeared to focus on prostheses for amputees. They recommended a more inclusive target group and a range of broader goals and objectives for the Center. Commenters urged that the Center focus on the special developmental needs of children.

VOL
54
ISS
78
AP
25
1989
UMI

Discussion: NIDRR intended for the REC to have a broad scope, focusing on children with all types of neuromuscular and musculoskeletal disabilities. NIDRR believes that the Center should be concerned with: (1) A wide range of prosthetic and orthotic systems, devices, controls, materials, fabrication and techniques; (2) increasing the utility of devices by making them more cosmetically acceptable; and (3) developing techniques to assist children and their families to identify, acquire, finance, and use appropriate devices. The development of these systems and devices should be done with an awareness of the special needs of children in various developmental phases.

Changes: The priority has been revised to include neuromuscular as well as musculoskeletal impairments, to incorporate an emphasis on sensitivity to the developing needs of the child, and to clarify the scope of work as discussed above.

Personal Licensed Transportation Systems for Disabled Persons

Comment: One commenter urged that there be more emphasis on driver assessment, technology for matching drivers to adaptive equipment, and development of standards for licensing drivers with disabilities. Some commenters suggested that there should be a separate REC to focus on driver assessments. Several commenters urged that the successful applicant would have to be associated with a service delivery system, since there would be insufficient time or resources to establish a service system within the framework of the grant award.

Discussion: NIDRR agrees that the REC should develop and evaluate equipment that could be used to match driver capacity with adaptive equipment. However, because NIDRR believes this REC should focus on adaptive equipment, the development of standards (whether for drivers or for automotive equipment), should not be part of this priority. NIDRR prefers that driver training programs be supported through other sources. If research on driver training or driver assessment is needed, potential investigators are urged to consider the Field-Initiated and Innovation grants programs. NIDRR agrees that it would not be realistic or an effective use of grant monies for the grantee to establish a service system.

Changes: The priority has been modified to include the development and testing of equipment to properly match disabled individuals with adaptive equipment. The phrase, "establish * * * a service delivery system * * *" has been deleted.

Blindness and Low Vision Sensory Aids

Comment: NIDRR received a number of substantive suggestions from two major organizations. Both commenters urged that the Center should study the issues surrounding diagnosis of vision disorders in infants and young children. One commenter suggested that the private sector could better develop improved access to bank teller machines. Commenters also suggested that the evaluation of human factors could lead to a more satisfactory explanation of the underutilization of reading machines.

Discussion: NIDRR agrees that it is important to investigate methods for early diagnosis of visual impairment in infants and young children. NIDRR also agrees that there is a need to assess the impact of human factors, such as ability to read, upon the use of reading machines. While access to automated bank tellers was cited only as an example in the proposed priority, NIDRR agrees that the use of the example may have been misleading.

Changes: The reference to bank teller machines has been deleted. A statement has been added that the Center shall "Develop and Disseminate enhanced technology and methods for neonatal and early infancy detection and monitoring of developing visual impairments." The priority has also been expanded to include the evaluation of human factors in the use of reading machines as well as the technology of reading machines.

Research and Demonstration Program

Chronic Low Back Pain

Comment: A few commenters stated that the scope of activities under the proposed priority is too extensive for a project of the customary size, and would require a substantial Center or several smaller projects. The commenters also stated that the vocational objectives and general rehabilitation studies were the most important components of the project.

Discussion: The Secretary agrees that the proposed priority prescribed a scope of activities that is too extensive and varied for a single discrete project. NIDRR believes that the component activities can be divided logically between those that relate to general rehabilitation for persons with low back pain and those that focus on vocational implications of low back pain. NIDRR further agrees that the activities requiring collaborative prospective studies are too extensive for the scope of these projects.

Changes: The Secretary is announcing two different final priorities. One will focus on the vocational aspects of rehabilitation of low back pain and one will focus on general rehabilitation issues. One priority will be funded in fiscal year 1989. Two of the specific project activities requiring collaborative prospective studies have been eliminated from the priority.

Knowledge Dissemination and Utilization Program Networking With Independent Living Centers (ILCs) and Independent Living Service Providers (ILSPs)

Comment: A number of commenters urged that this priority be retained and expanded to include access to the network by all Independent Living Centers. They also noted that many nonparticipating ILCs and ILSPs need more implementation assistance if they are to take advantage of the network programs.

Discussion: NIDRR agrees that a national network is the desired objective.

At the same time that a national network using the best available technology is created, it is important to include in the project a component of knowledge about and responsiveness to the needs and capacities of the ILCs and ILSPs. NIDRR is convinced that the earlier demonstration projects have indicated that a national network, using commonly available personal computer technology and telecommunications, is now feasible as well as desirable. While there should be a single national network, there should also be regionalized satellites to provide implementation assistance to ILCs as well as information brokerage.

Changes: NIDRR has revised the priority to call for one national network, with regional satellites to provide implementation assistance, information brokerage, and training on the use of the system.

General Comments

Comment: One commenter recommended that there be priorities directed to the rehabilitation of individuals after traumatic brain injury (TBI). The commenter also suggested that individuals with TBI should be included specifically as target populations in many of the existing priorities.

Discussion: NIDRR agrees that TBI is a very important problem for rehabilitation research. In the past year, NIDRR has funded four RRTCs devoted to research and training on TBI, as well as 13 discrete research projects, and five comprehensive care model demonstrations. The funds devoted to research and related activities exclusively in TBI amount to over five million dollars, or approximately one-tenth of the NIDRR budget. In addition, NIDRR supports programs to train researchers in the area of TBI, and TBI is included in the research populations and beneficiaries of numerous other activities, including recreation, attendant care, and vocational research projects. NIDRR believes it is important to have the findings from some of this ongoing research before planning future research priorities in TBI.

In those priorities in which a target population is not specified, applicants are free to propose research relating to any disability group that they consider a suitable population that could benefit from the proposed research. NIDRR prefers not to restrict applicants under these priorities to any particular disability groups. To do so could exclude researchers who do not have access to certain target populations in all of the relevant generic priorities, such as rural programs, stress, supported employment, and the vocational rehabilitation projects.

Changes: None.

Background

Authority for the Rehabilitation Research and Training Centers (RRTC) program of NIDRR is contained in section 204(b)(1) of the Rehabilitation Act of 1973, as amended. Under the RRTC program, awards are made to institutions of higher education, or to public and private organizations, including Indian tribes and tribal organizations, that are affiliated with institutions of higher education. RRTCs conduct programmatic, multidisciplinary, and synergistic research, training, and information dissemination in designated areas of high priority.

A program of RRTCs has been established to conduct coordinated and advanced programs of rehabilitation research and to provide training to rehabilitation personnel engaged in research or the provision of services. RRTCs must be operated in collaboration with institutions of higher education and must be associated with rehabilitation service programs. Each Center conducts a synergistic program of research, evaluation, and training activities focused on a particular rehabilitation problem area. Each Center is encouraged to develop practical applications for all of its research findings. Centers generally disseminate and encourage the utilization of new rehabilitation knowledge through such means as writing and publishing undergraduate and graduate texts and curricula and publishing findings in professional journals. All materials that the Centers develop for dissemination and training must be accessible to individuals with a range of handicapping conditions. RRTCs also conduct programs of in-service training for rehabilitation practitioners, education at the pre-doctoral and post-doctoral levels, and continuing education. Each RRTC must conduct an interdisciplinary program of training in rehabilitation research, including training in research methodology and applied research experience, that will contribute to the number of qualified researchers working in the area of rehabilitation research. Centers must also conduct state-of-the-art studies in relevant aspects of their priority areas. Each RRTC must also provide training to individuals with disabilities and their families in managing and coping with disabilities.

Not later than three years after the establishment of any RRTC, NIDRR will conduct one or more reviews of the activities and achievements of the Center. Continued funding of a Center depends at all times on satisfactory performance and accomplishment, in accordance with the provisions of 34 CFR 75.253(a).

Final Funding Priorities for RRTCs (3)

Rehabilitation for Persons With Long-Term Mental Illness (LTMI)

There are over two million persons with long-term, severe mental illness. Improved rehabilitation interventions and service delivery models are needed to afford better opportunities for this population to remain out of institutions and to attain satisfactory lives in their communities. The population of adults with severe psychiatric disabilities spans all ages.

Results of research and practice indicate that specialized rehabilitative interventions can increase the likelihood of community adjustment for persons with long-term mental illness. It is important to continue to develop and test more effective rehabilitative interventions, including especially those that contribute to improvements in education, vocational status, and general health care.

NIDRR, with the cooperation of the National Institute of Mental Health, intends to fund an RRTC to address these issues. Any Center to be funded under this priority must involve persons with long-term mental illness and their family members in the planning, conduct, and evaluation of the research and training activities.

An absolute priority is announced for an RRTC to:

- Analyze employment patterns, obstacles to employment, and employment options for individuals with long-term, severe mental illness;
- Develop and test model rehabilitative program interventions to improve employment outcomes, and assess the cost-effectiveness of these options;
- Analyze the role of rehabilitative interventions in the management of crisis episodes, study the relationship between crisis assistance programs and rehabilitation, and develop and test models for appropriate management of crises in rehabilitation;
- Analyze the relationship between psychiatric and mental health treatment regimens and rehabilitation interventions, and develop and test model programs for integrating mental health treatment with rehabilitation;
- Identify the most effective techniques to assist families with individuals with long-term severe mental illness both to maintain family functioning and to maximize the effective contribution of family members to the rehabilitation process;
- Develop and test new rehabilitation intervention techniques and systems of rehabilitative care, examining methods to integrate effectively a range of discrete community or hospital-based services in planning, implementing, financing, and evaluating client rehabilitation;
- Conduct at least one study of the state-of-the-art in one of the above areas; and
- Provide training to relevant parties, including vocational rehabilitation counselors, family members, and other service providers, and disseminate all findings to appropriate audiences.

Research and Training Center in Independent Living

The concept of Independent Living (IL) has emerged as an important service program as well as an important principle for individuals with disabilities. This concept embraces such goals as self-determination, self-help, deinstitutionalization, and barrier-free access to services and opportunities previously unavailable to persons with disabilities. The Congress acknowledged the importance of this theme in the passage of Title VII of the Rehabilitation Amendments of 1978, establishing a separate authority for Independent Living service programs.

BEST COPY AVAILABLE

VOL
54
ISS
78
AP
25
1989
UMI

The 1984 amendments to the 1978 Act appropriated funds to implement Part A of Title VII by State agencies to implement statewide IL delivery systems. The Rehabilitation Act Amendments of 1986 mandated the development of program standards and performance indicators to assess the performance of the federally-funded Independent Living programs.

Implementation of the Independent Living programs of the Act requires an understanding of the boundaries of the program (e.g., eligibility, types of services), high quality program management, and the goals, philosophy, and social policy implications of Independent Living. Continuing research is needed to support the development and refinement of the independent living concept and to enhance the quality of services and the success of the programs.

NIDRR is announcing final funding priorities for two RRTCs in independent living: one Center to focus on improving the effectiveness of ILCs and ILSPs, and the other Center to focus on the refinement and extension of independent living concepts and services.

Improving Management Effectiveness in Independent Living Centers

An absolute priority is announced for an RRTC to:

- Develop research-based management models and management training programs and provide training and technical assistance to independent living program staff to enhance management performance;
- Develop and test models for independent living programs to assist in the transition of individuals from both long- and short-term rehabilitation care facilities into independent living in the community;
- Develop, on the basis of assessments and analyses, and test models whereby IL programs can be involved most effectively in the effort to improve the delivery of rehabilitation engineering services and technological aids and devices to persons with disabilities;
- Assess the potential of ILCs to provide services to previously underserved populations, such as those with cognitive impairments and emotional disorders, those with low-incidence disabilities, and minority populations;
- Develop and test research-based models to coordinate IL with vocational rehabilitation programs and with supported employment programs in order to enhance the effectiveness of all three types of programs and improve outcomes for individuals with disabilities; and
- Develop and test research-based training programs and provide training to relevant staff of IL programs at the State and Center levels on the findings of the research and disseminate findings widely throughout the IL and rehabilitation fields.

Research in Policy Issues in Independent Living

An absolute priority is announced for an RRTC to:

- Study and test strategies to support and enhance the effectiveness of individuals with disabilities in setting policies for independent living programs and in achieving personal independent living objectives;
- Assess the quality of community services available to individuals with disabilities, evaluate the impact of those services on independent living, and develop and test models to improve the accessibility of general community services to people with disabilities and integrate general community services with IL services to enhance the ability of persons with disabilities to live independently;
- Develop and disseminate model strategies for ILCs to promote community accessibility in such areas as removal of architectural barriers, communications, employment, housing, and transportation;
- Identify two significant policy issues affecting the achievement of independent living objectives and conduct one study of the state-of-the-art in research and best practices in each of these two areas over the course of the project period; and
- Develop and test training programs and provide training to relevant staff of independent living programs at the State and Center levels on the findings of the research and disseminate findings widely throughout the independent living and rehabilitation fields.

Community Integration for Persons With Mental Retardation

Professionals and policymakers are realizing that children and adults with mental retardation fare best in natural community environments. It is no longer a matter of whether people with the most severe disabilities can be served in their communities. It is a question of how to best support people with severe mental retardation to enable them to remain and thrive in their communities. However, it is not good enough to be "in" the community; people with severe mental retardation must be part of their communities. The objective of this Center is to develop and disseminate state-of-the-art technologies for achieving this goal.

Families and communities must have current information regarding best practices and creative funding mechanisms for developing and staffing family-scale living arrangements for people with mental retardation. One of the major problems facing the field is that of staff burn-out and excessive turnover. Effective strategies are needed to recruit, train, and retain direct care staff so that turnover rates, which now exceed twenty percent annually, can be reduced. Families need information that will help them identify the characteristics of high quality living environments and community-based vocational and recreational programs. States and communities need information that will enable them to modify service delivery systems and community-based programs in order to meet the individual needs of persons with mental retardation who are leaving large public and private institutions. They need to know how to identify and replicate existing programs and how to design new programs that will maximize the independence, productivity, and social integration of persons with mental retardation. In addition, social agencies need information to develop better methods to coordinate the delivery of social, educational, transportation, and vocational services and to reduce the existing fragmentation of services.

Generic community-based services and programs offer ideal settings for the enhancement of social networks for people with mental retardation. Community-based service providers need to learn how to identify generic programs that can be helpful to persons with mental retardation and help them to integrate the target group into general community social programs.

The Center is to conduct a program of coordinated research and training activities and to disseminate rehabilitation approaches that will assist States, communities, and families to develop strategies for ensuring the full participation of people with mental retardation in their communities.

Any Center to be supported in response to this priority should involve persons with mental retardation and their families in the design, implementation, and evaluation of Center activities.

An absolute priority is announced for an RRTC to:

- Identify best practices and creative funding mechanisms that will allow for the development of family-scale living arrangements and develop and disseminate strategies that will promote the adoption of these best practices;
- Develop and test research-based models for recruiting, training, and retaining direct care personnel in agencies providing services to individuals with mental retardation;
- Identify, develop, and evaluate strategies that will enable States and communities to facilitate successful integration into the community of persons with mental retardation who are leaving institutions;
- Conduct a study to identify and analyze Federal, State, and local funding available for the rehabilitation of persons with mental retardation and suggest ways to improve the coordination of funding mechanisms;
- Identify best practices and the characteristics of natural environments that are successful in enhancing the independence, productivity, and social integration of persons with mental retardation and develop materials that will help families and service providers design new and evaluate existing community-based programs;
- Develop and test research-based models for the integration of persons with mental retardation into generic social service programs;
- Develop a database on community integration information and serve as a national resource for information in this area; and
- Conduct at least two studies of the state-of-the-art on community integration of persons with mental retardation and disseminate the research findings.

Rehabilitation Engineering Centers (RECs)

Authority for the Rehabilitation Engineering Center program of NIDRR is contained in section 204(b)(2) of the Rehabilitation Act of 1973, as amended. Under this program, awards are made to public and private agencies and organizations including institutions of higher education, Indian tribes, and tribal organizations.

NIDRR supports a program of Rehabilitation Engineering Centers (RECs) that conduct coordinated programs of advanced research of an engineering or technological nature. RECs work to develop systems for the exchange of technical and engineering information and to improve the distribution of technological devices and equipment to individuals with handicaps. Each REC must be located in a clinical rehabilitation setting and is encouraged to collaborate with institutions of higher education. Each REC conducts a program of research, scientific evaluation, and training that advances the state-of-the-art in technology or its application; contributes substantially to the solution of rehabilitation problems; and becomes an acknowledged center of excellence in a given subject area. RECs are encouraged to develop practical applications for their research through scientific evaluation activities that validate their findings as well as related findings of other centers. RECs generally conduct training programs to disseminate and encourage utilization of new rehabilitation engineering knowledge through such means as development of or contribution to undergraduate and graduate texts and curricula, in-service training, continuing education, and the distribution of information and appropriate technology. Each REC must ensure that all training and information materials developed by the Center are presented in several formats that will be accessible to individuals with various types of sensory and mobility impairments.

NIDRR will conduct, not later than three years after the establishment of any REC, one or more reviews of the activities and achievements of the Center, to include review by peers. Continued funding depends at all times on satisfactory performance and accomplishment in accordance with the provisions of 34 CFR 75.253(a).

Final Funding Priorities for RECs (3)

Personal Licensed Transportation Systems for Disabled Persons

The ability to move from place to place rapidly, conveniently, safely, and economically is a prerequisite to full participation in American society. Although both private and public transportation systems exist, private transportation in a personal vehicle is frequently the only means of transportation available for the handicapped person. There are, however, no commonly accepted standards for the adaptation of personal vehicles to accommodate disabled individuals as drivers or passengers. Adaptations may compromise the structural stability and safety of the vehicle, may not provide easy boarding or safe and rapid exit from the vehicle, and may include unsafe or ineffective control devices. Seating systems and systems for securing wheelchairs in the vehicles are often unsafe and ineffective.

Any Center to be funded in response to this priority should include persons with disabilities, their families and the community rehabilitation service providers in the planning, implementation and assessment of Center activities, especially in the assessment of needs, the identification of devices and systems to be tested, and the dissemination of information.

The Center shall be associated with a service delivery system that provides means of personal automotive transportation for persons with disabilities, and shall serve as a national model for the evaluation, testing, and collection of information regarding real-world performance of adapted vehicles as a mechanism for increasing the flow of information and communication between the researchers, consumers, service providers, and the automotive industry.

The Center shall establish and maintain mechanisms for collaborating and cooperating with: agencies and organizations responsible for the development and maintenance of any standards for adaptive motor vehicles; with the private sector to promote the manufacture, distribution, and testing of new devices and systems; with the REC in wheelchair modifications for technology sharing in wheelchair designs, and with the rehabilitation service delivery system to ensure the transfer of information to service providers.

The Center shall serve as a national resource for information on personal vehicle designs and adaptations for disabled persons and maintain a database on national and international research and development activities in this area for reference and dissemination.

An absolute priority is announced for an REC to:

- Evaluate existing vehicle modification devices and equipment and develop and test new devices and systems that include personal vehicle safety systems such as wheelchair tie-downs, occupant restraints, emergency exit systems, alerting devices for hearing impaired drivers, and primary and secondary control systems that do not compromise the vehicle's compliance with standards set by the Society of Automotive Engineers and the United States Department of Transportation;
- Evaluate, and develop if necessary, equipment to be used in assessing disabled individuals' needs for adaptive equipment and matching individuals and equipment;
- Develop and evaluate access and exit systems including ramps, lifts, and wheelchair loading devices that provide access to personal vehicles while maintaining the structural integrity of the vehicle;
- Develop materials for national dissemination of information on the

VOL 54 ISS 78 AP 25 1989 UMI

adaptive vehicle devices and provide training to engineers, disabled drivers, personal attendants, and rehabilitation counselors in the proper use of these devices;

• Disseminate materials to automobile manufacturers and educate them on the benefits of producing and marketing such devices; and

• Conduct at least one comprehensive study of the state-of-the-art in personal vehicle transportation systems for disabled persons to increase the knowledge base and to provide recommendations for future research in the area.

Applications of Technology to the Rehabilitation of Children with Orthopedic Disabilities

Orthopedic impairments sufficient to cause disability account for one-third of all disabilities in children. The prevalence of orthopedic impairments, neuromuscular impairments, and musculoskeletal anomalies for children from birth to age 17 presents serious problems for the development of these children and for the quality of their lives.

Although technology is now available for restoring some lost functions, there continues to be a marked delay in the acquisition of devices needed to restore function and prevent further limitation in children. There is a lack of available professionally-trained clinicians to attend to the needs of disabled children for advanced technology as well as for maintenance and repair at local levels.

A Center to be established in response to this priority must undertake all activities with a concern for the effects of functional restoration and adaptive devices on the development of children. They must be aware of the changing developmental needs of children and be responsive to those concerns.

An absolute priority is announced for an REC to:

• Develop and evaluate prosthetic and orthotic systems and related adaptive devices to meet the needs of children with neuromuscular or musculoskeletal impairments;

• Identify and assess the suitability of appropriate materials for use in these devices, including considerations of weight, utility, and cosmetic acceptability;

• Develop improved methods for fabricating assistive devices for children;

• Develop and evaluate improved body-powered and externally-powered terminal devices for enhancing strength of grasp, externally-powered elbows and shoulders, and adjustable sockets for children;

• Develop and evaluate new control systems to enable children to operate externally-powered components more effectively;

• Develop innovative strategies to enable children and their families to learn about, finance, and use the new technology; and

• Develop and demonstrate dissemination centers that enable children and families, as well as clinicians, to see and test available equipment.

Blindness and Low Vision Sensory Aids

Blindness and visual impairment lead to severe handicaps in education, employment, recreation and daily living. The National Center for Health Statistics and other authorities variously estimate the number of legally blind persons in the United States at 400,000 to 600,000, with another 1.4 million who are severely visually impaired. More than 10 million others have significant visual impairment which cannot be further improved with corrective lenses. Aside from those with reduced visual acuity and fields, there are also large and rapidly increasing numbers of older individuals with impairments in contrast, binocularity, and adaptation which handicap their performance in a wide variety of everyday tasks.

Other increasingly complicating factors are the ever-greater numbers of persons with other (often auditory) impairments combined with visual disability, and the growing incidence of premature infants at risk for visual handicap.

Technological innovations arising from the development of new scientific and medical knowledge can have a positive impact on these problems. Progress has already been made in this field, including advances in communication, computer access, educational and vocational aids, and optical amplifiers for low vision, orientation and mobility aids, and improved functional vision assessment. However, in addition to further improvements in these areas, there are emerging areas of technology to be explored. Some of these new areas are related to the changing demographics of the visually impaired population, particularly the increasing need for rehabilitation of those whose visual impairments are due to progressive diseases. Other emerging challenges are due to the rapid advance in computer applications (including computer graphics), communications, and other technologies which must be made accessible to the blind individual for the future.

An absolute priority is announced for an REC to:

• Develop a range of electronic education aids to assist the teaching of perceptual, manipulative, and cognitive skills to the child with visual or multiple handicaps;

• Develop and disseminate enhanced technology and methods for neonatal and early infancy detection and monitoring of developing visual impairments;

• Develop improved characterizations of the disease processes underlying such progressive visual disorders as age-related maculopathy (ARM), in order to adapt to the changing rehabilitation needs, including the relation of ARM to other diseases of the geriatric population;

• Develop a collaborative team approach incorporating clinicians in vision and audition, pediatricians, neurologists, and researchers, to develop innovative methods to refine diagnosis, prognosticate developmental anomalies, and devise optimal rehabilitative strategies for multifaceted problems such as vision/hearing multihandicaps and cortical blindness;

• Apply new scientific and medical knowledge to the design and selection of improved low vision aids for filtering, magnification, and illumination, with improved matching between the device, environmental modifications, and the underlying disease characteristics;

• Develop population data to better define the potential markets for various classes of sensory aid technology;

• Develop new technology and methods for improving access by blind and visually impaired persons to computers, including better approaches for obtaining overviews of screen and file contents and access to the increasingly graphics-oriented computer hardware and software coming into general use;

• Explore technology to promote easier access by blind persons to other computerized equipment and information such as music synthesizers, bar code readers, electronic databases and communication systems, and to enable them to benefit from computer-assisted instruction;

• Evaluate reading machine technology and the human factors involved in the use of reading machines to address the reasons for the present apparent underutilization of these systems;

• Develop and test specialized job-site modifications, using the latest available technology, to enhance employment opportunities for blind individuals;

• Develop and test new and responsive technology for communication, employment, and daily living to meet the needs of deaf-blind persons;

• Provide information on sensory aids to consumers and professionals, and develop a method to obtain feedback on needs and satisfaction; and

• Design and conduct appropriate training activities for rehabilitative personnel, clinicians, and consumers to disseminate and encourage utilization of new rehabilitation engineering knowledge.

Research and Demonstration Program (R&D)

Research and Demonstration Projects (R&D) support research and demonstrations in single project areas on problems encountered by individuals with handicaps in their daily activities. These projects may conduct research on rehabilitation techniques and services, including analysis of medical, industrial, vocational, social, psychiatric, psychological, recreational, economic, and other factors to improve the rehabilitation of individuals with disabilities. The authority for this program is contained in Section 204(a) of the Rehabilitation Act of 1973, as amended.

Final Funding Priorities for R&D (10)

Supported Employment Programs for Persons With Long-Term Mental Illness

The Advisory Group on Psychiatric Disability and Supported Employment of the Rehabilitation Services Administration (RSA) has considered service and research needs for persons with long-term mental illness. Recent developments, including the Rehabilitation Act Amendments of 1986 and the supported employment "State-Change" demonstration projects, have greatly expanded the number of supported employment activities for persons with long-term mental illness. There has been a growing number of requests to the University of Oregon Supported Employment Technical Assistance project for assistance in organizing supported employment activities and in identification of project components for individuals with mental illness. State agencies and mental health organizations will benefit from research results at this time. Results are also needed to report to the Congress on program developments. Project materials will be used to implement and improve local and state-supported employment activities for persons with long-term mental illness.

An absolute priority is announced for a project to:

• Examine the organizational configuration, staff training and characteristics, service population, service and caseload mix, caseload size, and funding approaches for supported employment programs for this target population;

• Identify organizational interrelationships of mental health, vocational rehabilitation, and psychosocial rehabilitation programs and test models for optimum services; and

• Identify effective program features and client outcomes, including types of employment, methods of long term support, service strategies, and funding patterns.

Chronic Low Back Pain

A major goal of the treatment of patients with chronic low back pain should be to increase functional capacity, probably the most important factor in preventing recurrence of low back injury. More directly, improved functional capacity allows the patient with chronic back pain to enter a more active and productive life, minimizing associated disability. Current information on functional capacity is based primarily on data acquired on injured athletes, and the database should be expanded. There is a need for more information on the cost/benefit characteristics of various physical training programs as they relate to all patients with chronic back pain. There is little information available, as well, on the relative importance of specific muscle group and regional flexibility training compared to whole body work-hardening programs, which include more eccentric loading and coordination demands. Two priorities are announced—one to focus on the vocational aspects of the rehabilitation of individuals with low back pain and one to focus on general rehabilitation issues.

Studies in the Rehabilitation of Individuals With Low Back Pain

An absolute priority is announced for a project to:

• Determine the relative importance of physical, psychological, and occupational components of the multidisciplinary programmatic approach to treatment of patients with chronic low back pain;

• Study the importance of patient independence and self care on rehabilitation of low back pain and prevention of recurrence; and

• Evaluate successful rehabilitation programs to determine their cost/effectiveness.

Studies on the Vocational Aspects of Low Back Pain Rehabilitation

An absolute priority is announced for a project to:

• Develop a generic test battery to determine capability for return to work and activities of daily living without recurrence of low back pain, including minimal clinical evaluation, psychological evaluation, and physical (whole body), mechanical, and physiological tests;

• Determine minimum outcome criteria for grading pain versus disability, to include: pain relief, level of function, return to work, medication, utilization of health care system, quality of life, litigation, recurrence, and profiles of health care providers; and

• Develop and test methods of early identification of those who will not return to work.

Research in Adventitious Hearing Impairment

Most research on adult onset hearing loss has focused on diagnostic and amplification technologies and on neurological, anatomical and physiological changes in the cochlea, august nerve, brain stem, and cortex. Aural rehabilitation models have been published. However, despite the prevalence of hearing loss, and despite abundant anecdotal accounts of its human and economic costs, there has been surprisingly little research to examine the psychosocial effects of hearing loss in adulthood.

In 1986, NIDRR convened a conference on aging and rehabilitation; in one segment of that conference, a number of research scientists, health care professionals, and persons from service-delivery agencies met to discuss priorities for collaborative research on adult onset hearing loss. This priority is based on research needs identified at that conference. NIDRR announced this priority for competition in fiscal year 1988, but none of the applicants was deemed suitable for funding. Therefore, a new competition will be held.

An absolute priority is announced for a project to:

• Analyze characteristics of adults who have adjusted successfully to hearing impairment, including such variables as personality factors, nature and severity of the hearing loss, communication styles, support networks, and interventions with professionals;

VOL. 54 ISS 78 AP 25 1989 UMI

• Identify successful rehabilitation strategies, emphasizing professional attitudes toward persons with hearing loss and behaviors that may impede or facilitate adjustment;

• Investigate interactions between biological and psychosocial phenomena, with an emphasis on assessing the extent to which these interactions exacerbate disability caused by hearing loss in middle and later life; and

• Evaluate existing databases on health status, psychological characteristics, and behavioral patterns to determine the impact of adventitious hearing impairment.

Rural Job Development and Job Placement

Small businesses are the primary sources of employment in rural areas. With the decline in the number of active farms, small businesses that depend on farms are also in economic jeopardy. Farmers who are disabled in farm accidents (200,000 disabling injuries occur in the agriculture industry each year, amounting to 58 per 1,000 active farmers) may not be able to return to farming. Alternative employment placements will have to be developed and retraining provided for primary employment or for secondary employment to supplement low farm prices for those who do go back to farming.

An absolute priority is announced for a project to:

• Analyze employment patterns and the hiring practices of various categories of employers in rural areas and project future employment opportunities in various industry sectors and occupational classifications; and

• Develop and test research-based strategies for use by rehabilitation agencies and community-based organizations in developing new placement opportunities and providing training for those new opportunities.

Community-Based Rural Projects

There are fledgling community-based independent living and service delivery programs in rural areas that need technical assistance in order to develop or continue. Some have received RSA Independent Living or other Federal or State support in the start-up process; others are entirely community-level efforts.

Programs in rural areas encounter unique difficulties. For example, the lack of transportation and the high cost of communication and travel barriers are burdens to programs in rural communities. Rural independent living programs need assistance to develop mutual supports, combine resources, keep abreast of information resources, and implement new ideas into practice. It is important that such programs be "owned" by the communities and, therefore, continue when Federal funding has expired.

An absolute priority is announced for a project to:

• Identify exemplary rural independent living programs that have successfully assembled unique resources to increase the potential of persons with disabilities for living independently in rural areas;

• Verify the effectiveness of these programs and develop strategies to replicate these practices in other areas for similar groups, including an assessment of a variety of factors unique to rural areas such as cultural and historical patterns, unique employment settings, exceptional terrain or climatic conditions, and extremely depressed economic conditions; and

• Share information from this nationwide project with the Research and Training Center on Rural Rehabilitation Services at the University of Montana for further refinement and dissemination.

Effective Client-Counselor Interactions in Vocational Rehabilitation

Basic principles of rehabilitation formed in law and in professional training emphasize that the consumer of services must play an active, expressive role in reaching his or her objectives. All individuals served through the State-Federal vocational rehabilitation program must have an Individualized Written Rehabilitation Program (IWRP) that reflects their substantial involvement. The psychosocial rehabilitation approach that was designed to foster the independence and development of people with emotional disabilities has been described, in part, as directed to the development of full human capacity, self-determination and normalization through a deprofessionalized, non-medical model, environmentally sensitive work-centered process. Similar principles are incorporated in the ideals of supported employment. However, these idealistic models of active consumer self-determination often are not verified in empirical studies of client satisfaction and case management. Continuous identification and verification of these factors is essential to effective counseling.

An absolute priority is announced for a project to:

• Identify specific techniques, attributes, skills, characteristics, features, and related factors of client-counselor interaction that increase the participation of individuals, particularly severely disabled people, in making decisions regarding their rehabilitation; and

• Develop models and recommendations for ongoing processes and information-sharing or training programs to promote effective client-counselor interaction and to reach the audiences concerned with enhanced individual client self-advocacy in rehabilitation.

Developing Vocational Rehabilitation Programming for Low-Incidence Geographically Dispersed Disabled Populations

Statistical compilations on the prevalence of need for assistance in activities of daily living (ADL) among disabled adults, the incidence of selected congenital malformations per 10,000 total births, and of handicapping conditions of persons enrolled in various education and rehabilitation programs reveal a pattern of numerous conditions for which there are not precise or reliable estimates of prevalence. Some examples of these low-incidence or low-prevalence conditions from National Health Interview Surveys, 1983–1985, include Spina Bifida, absence of arms or hands, skin cancer, bone cancer, leukemia, absence of fingers-toes-feet, and certain anemias.

State vocational rehabilitation agencies, special education programs, medical rehabilitation facilities, disability income benefits programs, and disability researchers have identified the need for improved knowledge of the rehabilitation needs of, and effective programming for, such populations. There is particular need for collaborative planning models for human service provider organizations to use in developing and exchanging information, making individual referrals, supporting family members of low-incidence groups, and collaborating with self-help and advocacy organizations.

An absolute priority is announced for a project to:

• Conduct an extensive literature review and programmatic survey to identify, classify, and prioritize for project investigation major problem areas in the rehabilitation of low-incidence disabled populations

• Develop and demonstrate improved methods of programming for low-incidence, geographically dispersed disabled populations, including information exchanges, referral networks, advocacy group involvement, and identification of "best practices" and

• Convene a National State-of-the-Art Conference and implement a national dissemination and utilization plan to highlight findings of the project.

Issues in the Expansion of Private-Sector Rehabilitation Services

A recent report, *Private Sector Rehabilitation: Lessons and Options for Public Policy*, prepared for the U.S. Department of Education under contract No. 300–85–D141, identified a variety of innovative patterns of collaboration between proprietary rehabilitation providers and public rehabilitation agencies. In particular, "fee-for-service" units staffed by salaried State employees and operated with State funding appear to offer a viable, "Fair Competition" public sector alternative to private providers in areas such as rehabilitation of injured workers. Also, State use of private vendors to deliver case management in providing services to traditional State vocational rehabilitation agency clients was determined to be a possible option in an Arizona study. However, existing data are inadequate for determining long-term benefit-cost implications for these and related alternatives in public-private rehabilitation collaboration.

An absolute priority is announced for a project to:

• Analyze variables associated with use of "fee-for-service" and "vendor service" arrangements in the delivery of rehabilitation services to workers' compensation claimants, with special emphasis on the effects of litigation, settlements, re-entry to public rehabilitation services systems, availability of public versus private services, and eligibility questions;

• Analyze the extent to which disabled persons are served outside of the State vocational rehabilitation system, and determine the characteristics of the clients, the nature and costs of services, and outcomes; and

• Develop and assess research-based management strategies to assist public rehabilitation managers to operate services in collaboration with or parallel to those of private service providers.

Supported Employment and Enhanced Maximizing Human Potential

A number of research studies have identified the need to address the impact of supported employment on the "quality of life" of supported employees and their families. Although many studies have addressed the remunerative outcomes of supported employment, published reports have not yet fully explored "intangible benefits" or qualitative factors in individuals' lives that change as a result of supported employment. Suggested areas for study include those related to individual behavior and skills, physical health, community participation, mental health and self-concept, and family satisfaction of supported employees. Research on this topic has been impeded by the lack of accepted definitions of "quality of life," inadequate qualitative measures, and analytical problems such as unintrusive access to personal and job information and limitations in structuring comparison groups of individuals in supported employment versus comparable non-vocational or non-supported employment settings.

An absolute priority is announced for a project to:

• Conduct an empirical investigation of one or more supported employment disability populations, such as developmentally disabled individuals, physically disabled individuals, persons who have traumatic brain injury or long-term mental illness, to determine the qualitative impact of supported employment in terms of behavior, physical and mental health, community integration, family satisfaction, and such additional areas as the investigator deems significant; and

• Report the results of the study in a national conference with substantial participation of consumers, providers, family members, employers, researchers, and public officials.

Stress and Disability Management

Stress has been described as a feeling of being under pressure, of not being able to cope, of feeling irritable, anxious, and as if things are out of control (Department of Health and Human Services Employee Assistance Service). Stress affects individuals in different ways; some manifestations of stress include decreased job productivity, increased absenteeism, increased worker dissatisfaction, deteriorating health, problems in interpersonal relationships, and increased use of alcohol and drugs. Many of these same factors have been associated with the onset of disability in employed persons, whether due to accident on or off the job, a chronic health problem, or the sudden appearance of a health problem. The combination of loss of control, emotional distress, and disability often becomes a constraint to communication and redress of difficulties for disabled workers. Disabled workers, due to the stress they may be experiencing, are often unwilling or unable to seek the help of disability management resources such as trained supervisors, employee assistance programs, or rehabilitation referrals. Moreover, cooperation of the disabled worker is necessary for active employee participation in achieving the optimum person-environment fit on the job based on individual and organizational characteristics.

An absolute priority is announced for a project to:

• Analyze the relationship between stress factors and disability management components to identify barriers and incentives which, when addressed in employment settings, will improve on-the-job assistance to disabled workers in such areas as coping strategies, redesigning jobs, person-environment fit, relaxation training, and health risk awareness; and

• Conduct controlled demonstrations of the use of disability management techniques with "at risk" high stress groups (medical texts associate cardiovascular disease, gastro-intestinal disorders, musculoskeletal problems, and deficient immune systems with stress), providing appropriate measurement of results in productivity, absenteeism, employee satisfaction, employer satisfaction, benefits use, interpersonal communications between worker and supervisor, and related variables.

Knowledge Dissemination and Utilization Program (D&U)

Knowledge Dissemination and Utilization Projects (D&U) ensure that rehabilitation knowledge generated from projects and centers funded by NIDRR and others is utilized fully to improve the lives of handicapped persons. The authority for this program is contained in Sections 202 and 204 (a) and (b)(5) of the Rehabilitation Act of 1973, as amended.

Final Funding Priorities for D & U (5)

Regional Information Exchanges

There is a need to promote the widespread use of new, validated rehabilitation practices and exemplary rehabilitation programs in selected priority areas in order to improve the service delivery system for disabled individuals. NIDRR proposes to address this need by establishing one or more regional information exchanges similar to the regional diffusion networks that are now operating. NIDRR believes that these exchanges will be most effective if they focus on facilitating the adoption of program models developed locally or within the same region. Also, NIDRR believes that this information exchange will be strengthened by the inclusion of expert consultants available to provide

VOL
54
ISS
78
AP
25
1989
UMI

specific technical assistance aimed at rehabilitation agencies.

Priority areas for diffusion efforts during the period of this priority will include the use of rehabilitation technology in vocational rehabilitation, barrier-free environments, and transitional employment programs, and other topic areas that are of concern to the specific region or that are agreed upon by NIDRR and the recipient of the award.

An absolute priority is announced for one or more projects to:

- Develop criteria for identifying exemplary rehabilitation programs, and develop information collection instruments which include measurements related to the identified criteria;
- Solicit nominations of exemplary programs in the priority area from program operators, consumer organizations, and other relevant parties in the selected region, giving consideration to inclusion of special demonstration projects funded by the Rehabilitation Services Administration or other Federal agencies;
- Develop and implement a procedure to select the most promising programs for further consideration and arrange independent peer reviews of those programs to determine exemplary programs for diffusion purposes;
- Develop public relations and marketing approaches to make the wide audience of rehabilitation service providers and special educators aware of the exemplary programs and stimulate their interest in adopting or adapting similar models, assisted by the diffusion network;
- Facilitate the exchange of technical assistance between the exemplary program and the requesting adopter program through onsite demonstrations, training materials, and direct consultation;
- Develop and maintain a referral system of expert consultants in these priority areas of the project to facilitate the linkage of service providers and disabled consumers to knowledgeable resources; and
- Maintain appropriate data on the diffusion network to support an evaluation of its effectiveness.

Networking with Centers for Independent Living and Independent Living Service Providers

There are approximately 360 independent living centers (ILCs) and independent living service providers (ILSPs) providing services on the local level throughout the United States. Over one-half of those receive funding from the Rehabilitation Services Administration.

For the past two years NIDRR has funded three projects to develop, demonstrate and evaluate the effectiveness and utilization of computer networking among ILCs and ILSPs. The projects surveyed ILCs and ILSPs regarding computer capacity, communication and information needs. The projects developed and provided information databases on management techniques and simplified software, resources, policy and program developments. The projects also created bulletin boards for communication and information sharing among centers and established access to a national database.

These projects demonstrated the interest and capability of ILCs and ILSPs to utilize networks and databases effectively, share techniques and data among centers, and serve as local information and referral sources for information compiled on the national level (e.g., the ABLEDATA and REHABDATA information bases). The projects also demonstrated a need for aggregating local and regional databases for use at the national level. Competent information brokers are needed to provide training and technical assistance and facilitate access to national databases and information.

Any project to be funded under this priority must directly involve disabled persons, including those who have experience with independent living service provision, in the planning, development and conduct of the project activities;

An absolute priority is announced for a project to:

- Establish and maintain, with adequate staff and hardware and software support, a national computer information network in IL using a toll-free telecommunications system;
- Establish three to five multiregional network support satellites adequate to provide support to a nationwide network, to provide assistance, training, and information brokerage services to ILCs and ILSPs to facilitate their roles as brokers of information within their communities;
- Provide, through the multiregional satellites, technical assistance and training to promote use of the system by ILCs and ILSPs;
- Develop computer databases on available resources and information including management, planning and evaluation materials and software, employment opportunities, conferences and educational opportunities, funding opportunities, housing, IL services and resources, policy issues, and related resources important to independent living
- Develop computer conferencing capability to enable network members to communicate among ILCs and ILSPs on issues and problems of concern and participate in group educational sessions;
- Facilitate access to national databases, including REHABDATA and ABLEDATA, and designate a knowledgeable and trained staff person to serve as the Project Information Broker to provide information, training and technical assistance on the databases to the IL-based information broker;
- Provide on-line access to databases created by NIDRR-funded projects and others, including the databases compiled by this project;
- Develop a database system to collect and compile "experiential" data for systemwide information and referral, using consistent terminology and indexing for data input at the State and local levels;
- Facilitate creation of such experiential databases among local ILCs and aggregate them on a multiregional basis; and
- Conduct annual evaluations to ensure the system is meeting the needs of the participants.

Demographic Data Analysis

Effective planning for research, services, or policy related to the disabled population requires detailed information about the size and characteristics of the population. This information is needed by Federal, State, and local agencies to plan services, transportation, housing, income maintenance, and recreation.

Federal, State and private administrators and planners have identified a need for a central source for demographic and other data on disability, and a comprehensive system for the collection of those data. A number of Federal agencies, some States, and many private research institutions collect information, analyze some of it, and often produce public use tapes that also include great amounts of analyzed data. As a consequence, much of the most critical data on disability are not analyzed or are poorly disseminated, or both. There is a continuing demand for information on the incidence and prevalence of disability and its distribution among various population groups. Other data such as service use, distribution of benefits, earnings, and costs of care would be invaluable to disabled individuals and their organizations, planners, researchers, and policymakers.

Information developed through this activity should be made available to a variety of potential users, and potential users should be involved in the planning, implementation and evaluation of the project.

An absolute priority is announced for a project to:

- Develop and update estimates of the incidence, prevalence, and distribution of various disabilities, using existing data;
- Develop a database of information from governmental and nongovernmental data collection efforts, encompassing information on specific disability conditions, limitations in activities of daily living, patterns of service use, needs for assistive devices, employment and earnings, benefits payments, insurance, and demographic data;
- Conduct secondary analysis of major data files, such as the Survey of Income and Program Participation and the Health Interview Survey, and others to provide needed information; and
- Develop and disseminate to consumers and professionals information on the characteristics of the disabled population.

The International Exchange of Information and Experts in Rehabilitation

There are rehabilitation practices and research projects in other nations that can serve as the impetus for improvements in rehabilitation research and service delivery in the United States. For example, the now widely accepted practice of immediate post-surgical fitting of prostheses was developed in Poland; the concept of disability management at the workplace was brought to U.S. attention as a result of concepts uncovered in past international exchanges; and Functional Electrical Stimulation programs in the United States owe much to early work done in Yugoslavia. In addition, there are practices in the United States that could be extremely beneficial to foreign professionals and researchers.

Fostering such cross-cultural collaboration and providing networks to maintain collegial contacts requires personal exposure of researchers and professionals to other cultures. In addition, the good practices and knowledge derived from abroad need to be disseminated to U.S. audiences through monographs and utilization conferences.

An absolute priority is announced for a project to:

- Identify areas of policy and practice that are of significant concern to NIDRR and to disabled persons and the rehabilitation community generally in the United States and in which there are significant developments in other countries that could provide useful guidance for United States agencies;
- Develop and implement a plan for United States experts to study specific policies, practices, programs and research results in other nations;
- Provide for the preparation of monographs on rehabilitation research topics by foreign experts or U.S. experts who have had beneficial study visits abroad;
- Conduct utilization conferences to disseminate information on selected topics of international significance to rehabilitation; and
- Evaluate the impact on specific rehabilitation practices in the United States of international exchange of information and experts arranged for under the project.

Developing Consumer Group Capacity to Facilitate Technology Transfer

There is a major new emphasis on delivering technological aids and devices to consumers in a timely, appropriate, and effective manner. The development of technological knowledge and assistive devices far exceeds the mechanisms for transferring those aids into regular use. NIDRR and OSERS are involved in major new efforts to improve the delivery and use of aids and devices.

Independent living organizations, parent organizations, and other consumer groups have direct contacts with individuals with disabilities and often first-hand knowledge of their technology needs. These groups could be invaluable resources in assisting in the spread of knowledge, the acquisition of technology, the appropriate use of technology, and consumer feedback on the effectiveness of the technology. The potential contributions of such organizations to the national effort to improve technology service delivery need to be explored and augmented.

An absolute priority is announced for a project to:

- Explore the optimum roles for independent living programs, parent groups, and other consumer organizations in identifying and promoting the acquisition, use, and assessment of technological aids and assistive devices by persons with disabilities;
- Investigate opportunities for innovative involvement of consumer groups with RECs, State rehabilitation agencies, and technology delivery programs; and
- Develop and test research-based models to involve organizations representing consumers in facilitating the appropriate use of assistive technology.

Authority: 29 U.S.C. 760–762.

Dated: March 30, 1989.

(Catalog of Federal Domestic Assistance Nos. 84.133A, 84.133B, 84.133D, and 84.133E, National Institute on Disability and Rehabilitation Research)

Lauro F. Cavazos,

Secretary of Education.

[FR Doc. 89-9804 Filed 4-24-89; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF EDUCATION

Office of Special Education and Rehabilitative Services

[CFDA Nos.: 84.133A, 84.133D, and 84.133E]

National Institute on Disability and Rehabilitation Research; Invitation of Applications for New Awards Under Certain Programs for Fiscal Year 1989

Note to Applicants

This notice is a complete application package. The notice contains information, application forms, and instructions needed to apply for a grant under these competitions. The priorities for these programs are published in a separate part of this issue of the **Federal Register.**

The estimates of funding levels in this notice do not bind the Department of Education to make awards in any of these categories, or to any specific number of awards or funding levels, unless otherwise specified in statute.

Applicable Regulations

The Education Department General Administrative Regulations (EDGAR), 34 CFR Parts 74, 75, 77, 79, 80, and 85; and the following program regulations:

Research and Demonstration Program (CFDA No. 84.133A) 34 CFR Parts 350 and 351.

Knowledge Dissemination and Utilization Program (CFDA No. 84.133D) 34 CFR Parts 350 and 355.

Rehabilitation Engineering Centers Program (CFDA No. 84.133E) 34 CFR Part 353.

VOL. 54 ISS 78 APR 25 1989 UMI

PROGRAM TITLE: RESEARCH AND DEMONSTRATION APPLICATION NOTICES FOR FISCAL YEAR 1989

CDFA No.	Program title	Funding priority	Deadline for transmittal of applications	Estimated No. of awards	Estimated size of awards	Project period (months)
84.133A	Research and demonstration.	Studies on the vocational aspects of low back pain rehabilitation.	July 9, 1989	1	$175,000	36
		Research in adventitious hearing impairment		1	175,000	36
		Rural job development and job placement		1	175,000	36
		Issues in the expansion of private sector rehabilitation services.		1	175,000	36

Selection Criteria: The Secretary uses the following selection criteria in 34 CFR 350.34 to evaluate applications under this program.

(a) *Potential Impact of Outcomes: Importance of Program* (Weight 3.0). The Secretary reviews each application to determine to what degree—

(1) The proposed activity relates to the announced priority;

(2) The research is likely to produce new and useful information (research activities only);

(3) The need and target population are adequately defined;

(4) The outcomes are likely to benefit the defined target population;

(5) The training needs are clearly defined (training activities only);

(6) The training methods and developed subject matter are likely to meet the defined need (training activities only); and

(7) The need for information exists (utilization activities only).

(b) *Potential Impact on Outcomes: Dissemination/Utilization* (Weight 3.0). The Secretary reviews each application to determine to what degree—

(1) The research results are likely to become available to others working in the field (research activities only);

(2) The means to disseminate and promote utilization by others are defined;

(3) The training methods and content are to be packaged for dissemination and use by others (training activities only); and

(4) The utilization approach is likely to address the defined need (utilization activities only).

(c) *Probability of Achieving Proposed Outcomes: Program/Project Design* (Weight 5.0). The Secretary reviews each application to determine to what degree—

(1) The objectives of the project(s) are clearly stated;

(2) The hypothesis is sound and based on evidence (research activities only);

(3) The project design/methodology is likely to achieve the objectives;

(4) The measurement methodology and analysis is sound;

(5) The conceptual model (if used) is sound (development/demonstration activities only);

(6) The sample populations are correct and significant (research and development/demonstration activities only);

(7) The human subjects are sufficiently protected (research and development/demonstration activities only);

(8) The device(s) or model system is to be developed in an appropriate environment;

(9) The training content is comprehensive and at an appropriate level (training activities only);

(10) The training methods are likely to be effective (training activities only);

(11) The new materials (if developed) are likely to be of high quality and uniqueness (training activities only);

(12) The target populations are linked to the project (utilization activities only); and

(13) The format of the dissemination medium is the best to achieve the desired result (utilization activities only).

(d) *Probability of Achieving Proposed Outcomes: Key Personnel* (Weight 4.0). The Secretary reviews each application to determine to what degree—

(1) The principal investigator and other key staff have adequate training and/or experience and demonstrate appropriate potential to conduct the proposed research, demonstration, training, development, or dissemination activity;

(2) The principal investigator and other key staff are familiar with pertinent literature and/or methods;

(3) All required disciplines are effectively covered;

(4) Commitments of staff time are adequate for the project; and

(5) The applicant is likely, as part of its nondiscriminatory employment practices, to encourage applications for employment from persons who are members of groups that traditionally have been underrepresented, such as—

(i) Members of racial or ethnic minority groups;

(ii) Women;

(iii) Handicapped persons; and

(iv) The elderly.

(e) *Probability of Achieving Proposed Outcomes: Evaluation Plan* (Weight 1.0). The Secretary reviews each application to determine to what degree—

(1) There is a mechanism to evaluate plans, progress and results;

(2) The evaluation methods and objectives are likely to produce data that are quantifiable; and

(3) The evaluation results, where relevant, are likely to be assessed in a service setting.

(f) *Program/Project Management: Plan of Operation* (Weight 2.0). The Secretary reviews each application to determine to what degree—

(1) There is an effective plan of operation that insures proper and efficient administration of the project(s);

(2) The applicant's planned use of its resources and personnel is likely to achieve each objective;

(3) Collaboration between institutions, if proposed, is likely to be effective; and

(4) There is a clear description of how the applicant will include eligible project participants who have been traditionally underrepresented, such as—

(i) Members of racial or ethnic minority groups;

(ii) Women;

(iii) Handicapped persons; and

(iv) The elderly.

(g) *Program/Project Management: Adequacy of Resources* (Weight 1.0). The Secretary reviews each application to determine to what degree—

(1) The facilities planned for use are adequate;

(2) The equipment and supplies planned for use are adequate; and

(3) The commitment of the applicant to provide administrative support and adequate facilities is evident.

(h) *Program/Project Management: (Budget and Cost Effectiveness)* (Weight 1.0). The Secretary reviews each application to determine to what degree—

(1) The budget for the project(s) is adequate to support the activities;

(2) The costs are reasonable in relation to the objectives of the project(s); and

(3) The budget for subcontracts (if required) is detailed and appropriate.

Eligible Applicants

Parties eligible to apply for grants under this program are public and private nonprofit and for-profit agencies and organizations, including institutions of higher education and Indian tribes and tribal organizations.

Authority: 29 U.S.C. 761a and 762.

PROGRAM TITLE: KNOWLEDGE DISSEMINATION AND UTILIZATION APPLICATION NOTICES FOR FISCAL YEAR 1989

CDFA No.	Program title	Funding priority	Deadline for transmittal of applications	Estimated No. of awards	Est. size of awards	Project period (months)
84.133D	Knowledge Dissemination and Utilization.	Networking with Centers for Independent Living Centers and Independent Living Service Providers.	June 9, 1989	1	$400,000	46
		Developing Consumer Group Capacity to Facilitate Technology Transfer.		1	150,000	36

Selection Criteria: The Secretary uses the selection criteria in 34 CFR 350.34 to evaluate applications under this program. Those criteria are the same as those published above under the Research and Demonstration Program, 84.133A.

Authority: 29 U.S.C. 761(a), 762(a), and 762(b)(5).

PROGRAM TITLE: REHABILITATION ENGINEERING CENTERS APPLICATION NOTICES FOR FISCAL YEAR 1989

CDFA No.	Program title	Funding priority	Deadline for transmittal of applications	Estimated No. of awards	Est. size of awards	Project period (months)
83.133E	Rehabilitation Engineering Centers.	Personal Licensed Transportation Systems for Disabled Persons.	June 9, 1989	1	$500,000	60

Selection Criteria: The Secretary uses the following selection criteria in 34 CFR 353.31 to evaluate applications under this program.

(a) *Relevance and importance of the research program* (25 points). The Secretary reviews each application to determine to what degree—

(1) The proposed activities are responsive to a priority established by the Secretary and address a significant need of a disabled target population and rehabilitation service providers;

(2) The overall research program of the Center includes appropriate interdisciplinary and collaborative research activities, is likely to lead to new and useful knowledge in the priority area and to the development of new technology or new applications of existing technology, and is likely to become a nationally recognized source of information on technology in the priority area; and

(3) The applicant demonstrates that all component activities of the Center are related to the overall objectives of the Center, and will build upon and complement each other to enhance the likelihood of finding solutions to significant rehabilitation problems.

(b) *Quality of the research design* (25 points). The Secretary reviews each application to determine to what degree—

(1) The applicant proposes a comprehensive program of research for the total project period, including at least three interrelated research projects;

(2) The research design and methodology of each proposed activity are meritorious in that—

(i) The literature review is appropriate and indicates familiarity with the state-of-the-art and current research in rehabilitation technology;

(ii) The research hypotheses are important and scientifically relevant;

(iii) The sample populations are appropriate and significant;

(iv) The data collection and measurement techniques are appropriate and likely to be effective;

(v) The data analysis methods are appropriate; and

(vi) The applicant assures that human subjects, animals, and the environment are adequately protected;

(3) The plan for development, clinical testing, and evaluation of new devices and technology is likely to yield significant products; and

(4) The application discusses the anticipated research results and demonstrates how those results would satisfy the original hypotheses and could be used for planning additional research, including the generation of new hypotheses where applicable.

(c) *Quality of the dissemination and utilization program* (25 points). The Secretary reviews each application to determine the degree to which—

(1) The proposed plan for dissemination provides evidence that research results will be effectively disseminated and utilized based on the identification of appropriate and accessible target groups; the proposed activities are relevant to the regional and national needs of the rehabilitation field; and dissemination packages will be prepared in a form usable by individuals with all types of disabilities;

(2) The proposed plan for dissemination and utilization of the research and development provides for—

(i) Orientation programs for rehabilitation service personnel to improve the application of rehabilitation technology;

(ii) Programs which specifically demonstrate means for utilizing rehabilitation technology;

(iii) Technical assistance and consultation that are responsive to

VOL
54
ISS
78
AP
25
1989
UMI

concerns of service providers and consumers; and

(iv) Dissemination of research findings through publication in professional journals, textbooks, and consumer and other publications, and through other appropriate media such as audiovisual materials and telecommunications, in an effort to make research results accessible to manufacturers, rehabilitation service providers, and researchers, educators, disabled individuals and their families, and others; and

(3) There is an appropriate plan to ensure the distribution and utilization of new devices and technology.

(d) *Quality of the organization and management* (25 points). The Secretary reviews each application to determine the degree to which—

(1) The staffing plan for the Center provides evidence that the principal investigator and other personnel have appropriate training and experience in disciplines required to conduct the proposed activities; the commitment of time for all staff is adequate to conduct all proposed activities; and the Center, as part of its nondiscriminatory employment practices, will ensure that its personnel are selected for employment without regard to race, color, national origin, gender, age, or handicapping condition.

(2) The budgets for the Center and each of the proposed activities are reasonable, adequate, and cost-effective for the proposed activities;

(3) The facilities, equipment, and other resources are adequate and are appropriately accessible to persons with disabilities;

(4) The plan of operations is adequate to accomplish the Center's objectives and to ensure proper and efficient management of the Center;

(5) The proposed relationships with Federal, State, and local rehabilitation service providers and consumer organizations are likely to ensure that the Center program is relevant and applicable to the needs of consumers and service providers;

(6) The past performance and accomplishments of the applicant indicate an ability to complete successfully the proposed scope of work;

(7) The application demonstrates appropriate commitment and support by the host institution and opportunities for interdisciplinary activities and collaboration with other institutions; and

(8) The plan for evaluation of the Center will assess annually the outcomes of the discrete and interrelated research projects, the impact of the training and dissemination activities on the target populations, and the extent to which the overall objectives have been accomplished.

Authority: 29 U.S.C. 760, 762(b)(2).

Instructions for Transmittal of Applications

(a) If an applicant wants to apply for a grant, the applicant shall—

(1) Mail the original and two copies of the application on or before the deadline date to: U.S. Department of Education, Application Control Center, Attention: (CFDA # [Applicant must insert number and letter]), Washington, DC 20202–4725 or

(2) Hand deliver the original and two copies of the application by 4:30 p.m. [Washington, DC time] on the deadline date to: U.S. Department of Education, Application Control Center, Attention: (CFDA # [Applicant must insert number and letter]), Room #3633, Regional Office Building #3, 7th and D Streets, SW., Washington, DC.

(b) An applicant must show one of the following as proof of mailing:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the Secretary.

(c) If an application is mailed through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing:

(1) A private metered postmark.

(2) A mail receipt that is not dated by the U.S. Postal Service.

Notes: (1) The U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

(2) An applicant wishing to know that its application has been received by the Department must include with the application a stamped self-addressed postcard containing the CFDA number and title of this program.

(3) The applicant *must* indicate on the envelope and—if not provided by the Department—in Item 10 of the Application for Federal Assistance (Standard Form 424) the CFDA number—and letter, if any—of the competition under which the application is being submitted.

Application Forms and Instructions

The appendix to this application is divided into four parts. These parts are organized in the same manner that the submitted application should be organized. These parts are as follows:

PART I: Application for Federal Assistance (Standard Form 424 (Rev. 4–88)) and instructions.

PART II: Budget Information—Non-Construction Programs (Standard Form 424A) and instructions.

PART III: Application narrative.

PART IV: Estimated Public Reporting Burden. Assurances—Non-Construction Programs (Standard Form 424B).

Certification Regarding Debarment, Suspension, and Other Responsibility Matters: Primary Covered Transactions (ED Form GCS–006) and instructions.

Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion: Lower Tier Covered Transactions (ED Form GCS–009) and instructions. (NOTE: ED Form GCS–009 is intended for the use of primary participants and should not be transmitted to the Department.)

One or both of the following, as appropriate:

Certification Regarding Drug-Free Workplace Requirements: Grantees Other than Individuals (ED 80–0004).

Certification Regarding Drug-Free Workplace Requirements: Grantees Who Are Individuals (ED 80–0005).

An applicant may submit information on a photostatic copy of the application and budget forms, the assurances, and the certifications. However, the application form, the assurances, and the certifications must each have an original signature. No grant may be awarded unless a completed application form has been received.

FOR FURTHER INFORMATION CONTACT: The National Institute on Disability and Rehabilitation Research, 400 Maryland Avenue SW., Washington, DC 20202. Telephone: (202) 732–1207; deaf and hearing-impaired persons may call (202) 732–1198 for TDD services.

Authority: 29 U.S.C. 760–762.

Dated: April 17, 1989.

Patricia McGill Smith,

Acting Assistant Secretary, Office of Special Education and Rehabilitative Services.

FREQUENT QUESTIONS

1. CAN I GET AN EXTENSION OF THE DUE DATE?

No! On rare occasions the Department of Education may extend a closing date for all applicants. If that occurs, a notice of the revised due date is published in the Federal Register. However, there are no extensions or exceptions to the due date made for individual applicants.

2. WHAT SHOULD BE INCLUDED IN THE APPLICATION?

The application should include a project narrative, vitae of key personnel, and a budget, as well as the Assurances forms included in this package. Vitae of staff or consultants should include the individual's title and role in the proposed project, and other information that is specifically pertinent to this proposed project. The budgets for both the first year and subsequent project years should be included.

If collaboration with another organization is involved in the proposed activity, the application should include assurances of participation by the other parties, including written agreements or assurances of cooperation. It is not useful to

include general letters of support or endorsement in the application.

If the applicant proposes to use unique tests or other measurement instruments that not widely known in the field, it would be helpful to include the instrument in the application.

Many applications contain voluminous appendices that are not helpful and in many cases cannot even be mailed to the reviewers. It is generally not helpful to include such things as brochures, general capability statements of collaborating organizations, maps, copies of publications, or descriptions of other projects completed by the applicant.

3. WHAT FORMAT SHOULD BE USED FOR THE APPLICATION?

NIDRR generally advises applicants that they may organize the application to follow the selection criteria that will be used. The specific review criteria vary according to the specific program, and are contained in this Consolidated Application Package.

4. MAY I SUBMIT APPLICATIONS TO MORE THAN ONE PROGRAM COMPETITION NIDRR OR MORE THAN ONE APPLICATION TO A PROGRAM?

Yes, you may submit applications to any program for which they are responsive to the program requirements. You may submit the same application to as many competitions as you believe appropriate. You may also submit more than one application in any given competition.

5. WHAT IS THE ALLOWABLE INDIRECT COST RATE?

The limits on indirect costs vary according to the program

VOL 54 ISS 78 AP 25 1989 UMI

and the type of application.

Applications that are for training activities should limit indirect charges to the lesser of the actual indirect costs or eight percent of the total direct costs of the program, as noted in the Education Department General Administrative Regulations (EDGAR).

All other applicants in the R&D, D&U, and REC programs should limit indirect charges to the organization's approved rate. If the organization does not have an approved rate, the application should include an estimated actual rate.

6. CAN PROFITMAKING BUSINESSES APPLY FOR GRANTS?

Yes. However, for-profit organizations will not be able to collect a fee or profit on the grant, and in some programs will be required to share in the costs of the project.

7. CAN INDIVIDUALS APPLY FOR GRANTS?

No. Only organizations are eligible to apply for grants under NIDRR programs.

8. IS THERE A COST-SHARING OR MATCHING REQUIREMENT?

Cost-sharing is required in the Research and Demonstration Projects program, with certain exceptions noted in the law; and the Knowledge Dissemination and Utilization program. For the Rehabilitation Engineering Centers, the Secretary has the option to require matching. It is generally the practice of the agency to require cost-sharing under this program.

There is no set rate for cost-sharing. The cost-sharing is negotiated at the time an award is made and is not part of the

evaluation of the application.

9. CAN NIDRR STAFF ADVISE ME WHETHER MY PROJECT IS OF INTEREST TO NIDRR OR LIKELY TO BE FUNDED?

No. NIDRR staff can advise you of the requirements of the program in which you propose to submit your application. However, staff cannot advise you of whether your subject area or proposed approach is likely to receive approval.

10. HOW DO I ASSURE THAT MY APPLICATION WILL BE REFERRED TO THE MOST APPROPRIATE PANEL FOR REVIEW?

Applicants should be sure that their applications are referred to the correct competition by clearly including the competition title and CFDA number, including alphabetical code, on the Standard Form 424, and including the title of the priority to which they are responding.

11. HOW SOON AFTER SUBMITTING MY APPLICATION CAN I FIND OUT IF IT WILL BE FUNDED?

The time from closing date to grant award date varies from program to program. Generally speaking, NIDRR endeavors to have awards made within five to six months of the closing date. Unsuccessful applicants generally will be notified within that time frame as well. For the purpose of estimating a project start date, the applicant should estimate approximately six months from the closing date, but no later than the following September 30.

VOL
54
ISS
78
AP
25
1989

12. CAN I CALL NIDRR TO FIND OUT IF MY APPLICATION IS BEING FUNDED?

No! When NIDRR is able to release information on the status of grant applications, it will notify applicants by letter. The results of the peer review cannot be released except through this formal notification.

13. IF MY APPLICATION IS SUCCESSFUL, CAN I ASSUME I WILL GET THE REQUESTED BUDGET AMOUNT IN SUBSEQUENT YEARS?

No. Those budget projections are necessary and helpful for planning purposes. However, a complete budget and budget justification must be submitted for each year of the project and there will be negotiations on the budget each year.

14. WILL ALL APPROVED APPLICATIONS BE FUNDED?

No. It often happens that the peer review panels approve for funding more applications than NIDRR can fund within available resources. Applicants who are approved but not funded are encouraged to consider submitting similar applications in future competitions.

INSTRUCTIONS FOR THE SF 424

This is a standard form used by applicants as a required facesheet for preapplications and applications submitted for Federal assistance. It will be used by Federal agencies to obtain applicant certification that States which have established a review and comment procedure in response to Executive Order 12372 and have selected the program to be included in their process, have been given an opportunity to review the applicant's submission.

Item: Entry:

1. Self-explanatory.
2. Date application submitted to Federal agency (or State if applicable) & applicant's control number (if applicable).
3. State use only (if applicable).
4. If this application is to continue or revise an existing award, enter present Federal identifier number. If for a new project, leave blank.
5. Legal name of applicant, name of primary organizational unit which will undertake the assistance activity, complete address of the applicant, and name and telephone number of the person to contact on matters related to this application.
6. Enter Employer Identification Number (EIN) as assigned by the Internal Revenue Service.
7. Enter the appropriate letter in the space provided.
8. Check appropriate box and enter appropriate letter(s) in the space(s) provided:
   - "New" means a new assistance award.
   - "Continuation" means an extension for an additional funding/budget period for a project with a projected completion date.
   - "Revision" means any change in the Federal Government's financial obligation or contingent liability from an existing obligation.
9. Name of Federal agency from which assistance is being requested with this application.
10. Use the Catalog of Federal Domestic Assistance number and title of the program under which assistance is requested.
11. Enter a brief descriptive title of the project. If more than one program is involved, you should append an explanation on a separate sheet. If appropriate (e.g., construction or real property projects), attach a map showing project location. For preapplications, use a separate sheet to provide a summary description of this project.

Item: Entry:

12. List only the largest political entities affected (e.g., State, counties, cities).
13. Self-explanatory.
14. List the applicant's Congressional District and any District(s) affected by the program or project.
15. Amount requested or to be contributed during the first funding/budget period by each contributor. Value of in-kind contributions should be included on appropriate lines as applicable. If the action will result in a dollar change to an existing award, indicate *only* the amount of the change. For decreases, enclose the amounts in parentheses. If both basic and supplemental amounts are included, show breakdown on an attached sheet. For multiple program funding, use totals and show breakdown using same categories as item 15.
16. Applicants should contact the State Single Point of Contact (SPOC) for Federal Executive Order 12372 to determine whether the application is subject to the State intergovernmental review process.
17. This question applies to the applicant organization, not the person who signs as the authorized representative. Categories of debt include delinquent audit disallowances, loans and taxes.
18. To be signed by the authorized representative of the applicant. A copy of the governing body's authorization for you to sign this application as official representative must be on file in the applicant's office. (Certain Federal agencies may require that this authorization be submitted as part of the application.)

INSTRUCTIONS FOR THE SF-424A

General Instructions

This form is designed so that application can be made for funds from one or more grant programs. In preparing the budget, adhere to any existing Federal grantor agency guidelines which prescribe how and whether budgeted amounts should be separately shown for different functions or activities within the program. For some programs, grantor agencies may require budgets to be separately shown by function or activity. For other programs, grantor agencies may require a breakdown by function or activity. Sections A,B,C, and D should include budget estimates for the whole project except when applying for assistance which requires Federal authorization in annual or other funding period increments. In the latter case, Sections A,B, C, and D should provide the budget for the first budget period (usually a year) and Section E should present the need for Federal assistance in the subsequent budget periods. All applications should contain a breakdown by the object class categories shown in Lines a-k of Section B.

Section A. Budget Summary
Lines 1-4, Columns (a) and (b)

For applications pertaining to a *single* Federal grant program (Federal Domestic Assistance Catalog number) and *not requiring* a functional or activity breakdown, enter on Line 1 under Column (a) the catalog program title and the catalog number in Column (b).

For applications pertaining to a *single* program *requiring* budget amounts by multiple functions or activities, enter the name of each activity or function on each line in Column (a), and enter the catalog number in Column (b). For applications pertaining to multiple programs where none of the programs require a breakdown by function or activity, enter the catalog program title on each line in *Column* (a) and the respective catalog number on each line in Column (b).

For applications pertaining to *multiple* programs where one or more programs *require* a breakdown by function or activity, prepare a separate sheet for each program requiring the breakdown. Additional sheets should be used when one form does not provide adequate space for all breakdown of data required. However, when more than one sheet is used, the first page should provide the summary totals by programs.

Lines 1-4, Columns (c) through (g.)

For new applications, leave Columns (c) and (d) blank. For each line entry in Columns (a) and (b), enter in Columns (e), (f), and (g) the appropriate amounts of funds needed to support the project for the first funding period (usually a year).

Lines 1-4, Columns (c) through (g.) (continued)

For continuing grant program applications, submit these forms before the end of each funding period as required by the grantor agency. Enter in Columns (c) and (d) the estimated amounts of funds which will remain unobligated at the end of the grant funding period only if the Federal grantor agency instructions provide for this. Otherwise, leave these columns blank. Enter in columns (e) and (f) the amounts of funds needed for the upcoming period. The amount(s) in Column (g) should be the sum of amounts in Columns (e) and (f).

For supplemental grants and changes to existing grants, do not use Columns (c) and (d). Enter in Column (e) the amount of the increase or decrease of Federal funds and enter in Column (f) the amount of the increase or decrease of non-Federal funds. In Column (g) enter the new total budgeted amount (Federal and non-Federal) which includes the total previous authorized budgeted amounts plus or minus, as appropriate, the amounts shown in Columns (e) and (f). The amount(s) in Column (g) should not equal the sum of amounts in Columns (e) and (f).

Line 5 — Show the totals for all columns used.

Section B Budget Categories

In the column headings (1) through (4), enter the titles of the same programs, functions, and activities shown on Lines 1-4, Column (a), Section A. When additional sheets are prepared for Section A, provide similar column headings on each sheet. For each program, function or activity, fill in the total requirements for funds (both Federal and non-Federal) by object class categories.

Lines 6a-i — Show the totals of Lines 6a to 6h in each column.

Line 6j – Show the amount of indirect cost.

Line 6k – Enter the total of amounts on Lines 6i and 6j. For all applications for new grants and continuation grants the total amount in column (5), Line 6k, should be the same as the total amount shown in Section A, Column (g), Line 5. For supplemental grants and changes to grants, the total amount of the increase or decrease as shown in Columns (1)-(4), Line 6k should be the same as the sum of the amounts in Section A, Columns (e) and (f) on Line 5.

VOL 54 ISS 78 AP 25 1989 UMI

INSTRUCTIONS FOR THE SF-424A *(continued)*

Line 7 – Enter the estimated amount of income, if any, expected to be generated from this project. Do not add or subtract this amount from the total project amount. Show under the program narrative statement the nature and source of income. The estimated amount of program income may be considered by the federal grantor agency in determining the total amount of the grant.

Section C. Non-Federal-Resources

Lines 8-11 – Enter amounts of non-Federal resources that will be used on the grant. If in-kind contributions are included, provide a brief explanation on a separate sheet.

Column (a) – Enter the program titles identical to Column (a), Section A. A breakdown by function or activity is not necessary.

Column (b) – Enter the contribution to be made by the applicant.

Column (c) – Enter the amount of the State's cash and in-kind contribution if the applicant is not a State or State agency. Applicants which are a State or State agencies should leave this column blank.

Column (d) – Enter the amount of cash and in-kind contributions to be made from all other sources.

Column (e) – Enter totals of Columns (b), (c), and (d).

Line 12 — Enter the total for each of Columns (b)-(e). The amount in Column (e) should be equal to the amount on Line 5, Column (f), Section A.

Section D. Forecasted Cash Needs

Line 13 – Enter the amount of cash needed by quarter from the grantor agency during the first year.

Line 14 – Enter the amount of cash from all other sources needed by quarter during the first year.

Line 15 – Enter the totals of amounts on Lines 13 and 14.

Section E. Budget Estimates of Federal Funds Needed for Balance of the Project

Lines 16 - 19 – Enter in Column (a) the same grant program titles shown in Column (a), Section A. A breakdown by function or activity is not necessary. For new applications and continuation grant applications, enter in the proper columns amounts of Federal funds which will be needed to complete the program or project over the succeeding funding periods (usually in years). This section need not be completed for revisions (amendments, changes, or supplements) to funds for the current year of existing grants.

If more than four lines are needed to list the program titles, submit additional schedules as necessary.

Line 20 – Enter the total for each of the Columns (b)-(e). When additional schedules are prepared for this Section, annotate accordingly and show the overall totals on this line.

Section F. Other Budget Information

Line 21 – Use this space to explain amounts for individual direct object-class cost categories that may appear to be out of the ordinary or to explain the details as required by the Federal grantor agency.

Line 22 – Enter the type of indirect rate (provisional, predetermined, final or fixed) that will be in effect during the funding period, the estimated amount of the base to which the rate is applied, and the total indirect expense.

Line 23 – Provide any other explanations or comments deemed necessary.

Research and Demonstration (84.133A)

Knowledge Dissemination and Utilization (84. 133D)

Rehabilitation Engineering Centers (84.133E)

Public reporting burden for these collections of information is estimated to average 30 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Send comments regarding this burden estimate or any other aspect of these collections of information, including suggestions for reducing this burden, to: the U.S. Department of Education, Information Management and Compliance Division, Washington, D.C. 20202-4651; and to the Office of Management and Budget, Paperwork Reduction Project 1820-0027, Washington, D.C. 20503.

ASSURANCES — NON-CONSTRUCTION PROGRAMS

Note: Certain of these assurances may not be applicable to your project or program. If you have questions, please contact the awarding agency. Further, certain Federal awarding agencies may require applicants to certify to additional assurances. If such is the case, you will be notified.

As the duly authorized representative of the applicant I certify that the applicant:

1. Has the legal authority to apply for Federal assistance, and the institutional, managerial and financial capability (including funds sufficient to pay the non-Federal share of project costs) to ensure proper planning, management and completion of the project described in this application.
2. Will give the awarding agency, the Comptroller General of the United States, and if appropriate, the State, through any authorized representative, access to and the right to examine all records, books, papers, or documents related to the award; and will establish a proper accounting system in accordance with generally accepted accounting standards or agency directives.
3. Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.
4. Will initiate and complete the work within the applicable time frame after receipt of approval of the awarding agency.
5. Will comply with the Intergovernmental Personnel Act of 1970 (42 U.S.C. §§ 4728-4763) relating to prescribed standards for merit systems for programs funded under one of the nineteen statutes or regulations specified in Appendix A of OPM's Standards for a Merit System of Personnel Administration (5 C.F.R. 900, Subpart F).
6. Will comply with all Federal statutes relating to nondiscrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§ 1681-1683, and 1685-1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. § 794), which prohibits discrimination on the basis of handicaps; (d) the Age Discrimination Act of 1975, as amended (42 U.S.C.§§ 6101-6107), which prohibits discrimination on the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended, relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) §§ 523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. 290 dd-3 and 290 ee-3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. § 3601 et seq.), as amended, relating to nondiscrimination in the sale, rental or financing of housing; (i) any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and (j) the requirements of any other nondiscrimination statute(s) which may apply to the application.
7. Will comply, or has already complied, with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91-646) which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of Federal or federally assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of Federal participation in purchases.
8. Will comply with the provisions of the Hatch Act (5 U.S.C. §§ 1501-1508 and 7324-7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.
9. Will comply, as applicable, with the provisions of the Davis-Bacon Act (40 U.S.C. §§ 276a to 276a-7), the Copeland Act (40 U.S.C. § 276c and 18 U.S.C. §§ 874), and the Contract Work Hours and Safety Standards Act (40 U.S.C. §§ 327-333), regarding labor standards for federally assisted construction subagreements.

10. Will comply, if applicable, with flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973 (P.L. 93-234) which requires recipients in a special flood hazard area to participate in the program andto purchase flood insurance if the total cost of insurable construction and acquisition is $10,000 or more.
11. Will comply with environmental standards which may be prescribed pursuant to the following: (a) institution of environmental quality control measures under the National Environmental Policy Act of 1969 (P.L. 91-190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in floodplains in accordance with EO 11988; (e) assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C §§ 1451 et seq); (f) conformity of Federal actions to State (Clear Air) Implementation Plans under Section 176(c) of the Clear Air Act of 1955, as amended (42 U.S.C. § 7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended, (P.L. 93-523); and (h) protection of endangered species under the Endangered Species Act of 1973, as amended, (P L. 93-205).
12. Will comply with the Wild and Scenic Rivers Act of 1968 (16 U.S.C. §§ 1271 et seq.) related to protecting components or potential components of the national wild and scenic rivers system.
13. Will assist the awarding agency in assuring compliance with Section 106 of the National Historic Preservation Act of 1966, as amended (16 U.S.C 470), EO 11593 (identification and protection of historic properties), and the Archaeological and Historic Preservation Act of 1974 (16 U.S.C. 469a-1 et seq.).
14. Will comply with P L. 93-348 regarding the protection of human subjects involved in research, development, and related activities supported by this award of assistance.
15. Will comply with the Laboratory Animal Welfare Act of 1966 (P.L. 89-544, as amended, 7 U.S.C. 2131 et seq.) pertaining to the care, handling, and treatment of warm blooded animals held for research, teaching, or other activities supported by this award of assistance.
16. Will comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. §§ 4801 et seq.) which prohibits the use of lead based paint in construction or rehabilitation of residence structures.
17. Will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act of 1984.
18. Will comply with all applicable requirements of all other Federal laws, executive orders, regulations and policies governing this program.

Certification Regarding Debarment, Suspension, and Other Responsibility Matters Primary Covered Transactions

This certification is required by the regulations implementing Executive Order 12549, Debarment and Suspension, 34 CFR Part 85, Section 85.510, Participants' responsibilities. The regulations were published as Part VII of the May 26, 1988 Federal Register (pages 19160-19211). Copies of the regulations may be obtained by contacting the U.S. Department of Education, Grants and Contracts Service, 400 Maryland Avenue, S.W. (Room 3633 GSA Regional Office Building No. 3), Washington, D.C. 20202-4725, telephone (202) 732-2505.

(BEFORE COMPLETING CERTIFICATION, READ INSTRUCTIONS ON REVERSE)

(1) The prospective primary participant certifies to the best of its knowledge and belief, that it and its principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;

(b) Have not within a three-year period preceding this proposal been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

(c) Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State or local) with commission of any of the offenses enumerated in paragraph (1)(b) of this certification; and

(d) Have not within a three-year period preceding this application/proposal had one or more public transactions (Federal, State or local) terminated for cause or default.

(2) Where the prospective primary participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal.

Organization Name | PR/Award Number or Project Name

Name and Title of Authorized Representative

Signature | Date

ED Form GCS-008, (REV.12/88)

Instructions for Certification

1. By signing and submitting this proposal, the prospective primary participant is providing the certification set out below.

2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. The prospective participant shall submit an explanation of why it cannot provide the certification set out below. The certification or explanation will be considered in connection with the department or agency's determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.

3. The certification in this clause is a material representation of fact upon which reliance was placed when the department or agency determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the department or agency may terminate this transaction for cause or default.

4. The prospective primary participant shall provide immediate written notice to the department or agency to whom this proposal is submitted if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

5. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of the rules implementing Executive Order 12549. You may contact the department or agency to which this proposal is being submitted for assistance in obtaining a copy of those regulations.

6. The prospective primary participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency entering into this transaction.

7. The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion--Lower Tier Covered Transactions," provided by the department or agency entering into this covered transaction, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List.

9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the department or agency may terminate this transaction for cause or default.

Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion Lower Tier Covered Transactions

This certification is required by the regulations implementing Executive Order 12549, Debarment and Suspension, 34 CFR Part 85, Section 85.510, Participants' responsibilities. The regulations were published as Part VII of the May 26, 1988 Federal Register (pages 19160-19211). Copies of the regulations may be obtained by contacting the person to which this proposal is submitted.

(BEFORE COMPLETING CERTIFICATION, READ INSTRUCTIONS ON REVERSE)

(1) The prospective lower tier participant certifies, by submission of this proposal, that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency.

(2) Where the prospective lower tier participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal.

Instructions for Certification

1. By signing and submitting this proposal, the prospective lower tier participant is providing the certification set out below.

2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

3. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

4. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of rules implementing Executive Order 12549. You may contact the person to which this proposal is submitted for assistance in obtaining a copy of those regulations.

5. The prospective lower tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated.

6. The prospective lower tier participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion--Lower Tier Covered Transactions," without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

7. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List.

8. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

9. Except for transactions authorized under paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

VOL. 54 ISS 78 AP 25 1989 UMI

Certification Regarding Drug-Free Workplace Requirements Grantees Other Than Individuals

This certification is required by the regulations implementing the Drug-Free Workplace Act of 1988, 34 CFR Part 85, Subpart F. The regulations, published in the January 31, 1989 Federal Register, require certification by grantees, prior to award, that they will maintain a drug-free workplace. The certification set out below is a material representation of fact upon which reliance will be placed when the agency determines to award the grant. False certification or violation of the certification shall be grounds for suspension of payments, suspension or termination of grants, or governmentwide suspension or debarment (see 34 CFR Part 85, Sections 85.615 and 85.620).

The grantee certifies that it will provide a drug-free workplace by:

(a) Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the grantee's workplace and specifying the actions that will be taken against employees for violation of such prohibition;

(b) Establishing a drug-free awareness program to inform employees about--

(1) The dangers of drug abuse in the workplace;
(2) The grantee's policy of maintaining a drug-free workplace;
(3) Any available drug counseling, rehabilitation, and employee assistance programs; and
(4) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;

(c) Making it a requirement that each employee to be engaged in the performance of the grant be given a copy of the statement required by paragraph (a);

(d) Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under the grant, the employee will--

(1) Abide by the terms of the statement; and
(2) Notify the employer of any criminal drug statute conviction for a violation occurring in the workplace no later than five days after such conviction;

(e) Notifying the agency within ten days after receiving notice under subparagraph (d)(2) from an employee or otherwise receiving actual notice of such conviction;

(f) Taking one of the following actions, within 30 days of receiving notice under subparagraph (d)(2), with respect to any employee who is so convicted--

(1) Taking appropriate personnel action against such an employee, up to and including termination; or
(2) Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency;

(g) Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a), (b), (c), (d), (e) and (f).

Department of Labor

Employment and Training Administration

Job Training Partnership Act; State Designations of Entities as Dislocated Worker Units Under Title III, As Amended by Economic Dislocation and Worker Adjustment Assistance Act; Notice

VOL 54 ISS 78 AP 25 1989 UMI

DEPARTMENT OF LABOR

Employment and Training Administration

Job Training Partnership Act; State Designations of Entities as Dislocated Worker Units Under Title III, as Amended by Economic Dislocation and Worker Adjustment Assistance Act

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: The Department of Labor is publishing for public information names, addresses, and telephone numbers of entities designated by State as Dislocated Worker Units.

FOR FURTHER INFORMATION CONTACT: Mr. Robert N. Colombo, Director, Office of Employment and Training Programs, Employment and Training Administration, Department of Labor, Room N-4469, 200 Constitution Avenue NW., Washington, DC 20210. Telephone: 202-535-0577 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: Title III of the Job Training Partnership Act (JTPA), as amended by the Economic Dislocation and Worker Adjustment Assistance Act (EDWAA), provides that the Department of Labor (DOL or Department) shall fund programs for States to assist dislocated workers. Section 311(b)(2) of JTPA provides that States will designate or create an identifiable State Dislocated Worker Unit (DWU) or office with the capability to respond rapidly, onsite, to permanent plant closures and substantial layoffs throughout the State. The DWU is a key feature of the States' implementation of the new programs under EDWAA.

On March 6, 1989, the Assistant Secretary of Labor sent a letter to each of the Governors to verify a listing of their State DWU designated entity. After consideration of written responses received, and further verification by telephone, DOL is publishing this notice. Periodic updates of this listing will be published, based on revisions received by the Department.

Signed at Washington, DC, this 19th day of April 1989.

Roberts T. Jones,

Assistant Secretary of Labor.

Dislocated Worker Units Nationwide

Alabama

[Docket No. 25885; Notice No. 89-10]

RIN: 2120-AC27

Rotorcraft Regulatory Changes Based on European Joint Airworthiness Requirements Proposals

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes changes to the type certification requirements for both normal and transport category rotorcraft. The changes would revise airworthiness standards for systems, propulsion, and airframes, and would introduce safety improvements, clarify existing regulations, and standardize terminology. The changes are based on some of the proposals that were submitted to the FAA by the European Joint Airworthiness Requirements (JAR) 29 group. These proposals are intended to encourage the European community's acceptance of the Federal Aviation Regulations' rotorcraft type certification requirements and to obviate the development of a new and different European standard. Adoption of these changes will achieve increased commonality of airworthiness standards among the respective countries.

DATES: Comments must be received on or before October 23, 1989.

ADDRESSES: Comments related to this proposal should be mailed in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-10), Docket No. 25885; 800 Independence Avenue SW., Washington, DC 20591, or delivered in duplicate to: Room 915-G, 800 Independence Avenue SW., Washington, DC. Comments must be marked "Docket No. 25885." Comments may be inspected in Room 915-G between 8:30 a.m. and 5 p.m., weekdays, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Robert T. Weaver, FAA, Regulations Group, ASW-111, Rotorcraft Directorate, Aircraft Certification Service, Southwest Region, Fort Worth, Texas 76193-0111, telephone number (817) 624-5111.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the proposed rulemaking by submitting written data, views, or arguments as they may desire, including comments relating to the environmental, energy, or economic impact that might result from adopting the proposals contained in this notice. Communications should identify the regulatory docket and be submitted in duplicate to the address above. All comments received on or before the closing date for comments will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Commenters wishing to have the FAA acknowledge receipt of their comments submitted in response to this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments on Docket No. 25885." The postcard will be date/time stamped and returned to the commenter.

For convenience, each proposal in this notice is numbered separately. When submitting comments, please refer to proposals by these numbers and by the section of the FAR to which they relate.

Availability of this Notice

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Office of Public Affairs, ATTN: Public Inquiry Center, APA-430, 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 267-3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should request a copy of Advisory Circular No. 11-2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

Background

At a meeting between FAA representatives and the European Airworthiness Authorities Steering Committee (AASC) held in Washington, DC, in April 1983, the AASC agreed to provide the FAA with a comprehensive list of recommended changes for FAR Part 29 suitable for adoption as airworthiness standards by AASC members. The AASC subsequently established a JAR 29 group to develop transport category rotorcraft airworthiness standards for European type certification programs. This JAR 29 group was tasked with providing a recommended list of changes for Part 29.

The FAA wrote to the AASC and industry groups on May 9, 1983, soliciting comments on key issues. The initial responses to that solicitation were published in the Federal Register (49 FR 19309, May 7, 1984). Subsequently, on September 15, 1984, the AASC submitted a more comprehensive list of proposals for Part 29. The 92 proposals contained in the revised list suggested changes to Part 29 as amended through Amendment 29-16. An FAA review found that 34 of these proposals had either been incorporated, at least in part, in Part 29, as revised by Amendments 29-17 through 29-24, or were being considered in active rulemaking projects. Of the 58 proposals remaining, 25 were rejected, in whole or in part, for various reasons involving failure to meet Executive Order 12291 or DOT rulemaking requirements. The results of the FAA review were provided to the JAR 29 group by letter on March 18, 1985, and included a status report on the proposals being considered in active rulemaking projects.

During further review of the remaining AASC proposals not included in existing rulemaking projects, the FAA determined that several of the proposals warranted public discussion by interested persons. Accordingly, the FAA announced that a public meeting would be held in Fort Worth, Texas, May 1-2, 1986 (51 FR 4504; February 5, 1986), and that the AASC proposals were available for public review. Over 50 persons attended the meeting which convened on May 1, 1986, and remained in session until each proposal not already in rulemaking had been discussed. A transcript of those discussions is included in the docket for this notice.

Although the AASC proposals were confined to Part 29, and only Part 29 proposals were discussed at the May 1-2, 1986, meeting, this notice proposes changes to the rotorcraft certification rules in both Parts 27 and 29. This is for reasons of: (1) Efficiency in processing rulemaking actions, and (2) standardization between Parts 27 and 29 where nearly identical sections presently exist.

An appendix at the end of this notice includes a list of AASC proposals which the FAA has decided not to include in this notice. The reasons for deferring or rejecting the proposals are specified in the appendix.

Regulatory Evaluation Summary

With the exception of proposed new § 29.929, each of the proposed regulatory changes contained in this notice has been determined to have negligible or no economic impact. These proposed changes are either editorial or clarifying in nature, or they codify current industry or FAA certification practice and procedure, or conformity with them could be accomplished at a negligible cost. No estimates of specific costs or savings are made for these proposals. The proposals having a negligible impact on certification costs are not discussed in this economic evaluation, but are listed in the preliminary regulatory evaluation filed in the docket for this notice.

The only proposal with an economic impact is proposed new § 29.929 which contains an additional requirement for a flight endurance test. The estimated incremental cost of proposed new § 29.929 is derived from information provided to the FAA by rotorcraft industry certification experts, and reflects the best judgment of the FAA at this time. These estimates are subject to change contingent upon additional information that might be provided during the public comment period.

Initial estimates of the cost that might be incurred in conducting the flight test range from $450,000 to $750,000. The exact amount depends on the size and complexity of the rotorcraft involved. These estimates are based on 150 hours of engineering flight testing at $3,000 to $5,000 per hour. The cost includes one flight test helicopter, an engineering flight test crew comprised of one or two pilots and a flight test engineer, maintenance personnel, instrumentation, and use of an engineering department for data reduction. Over the next 10 years, three newly certificated models are forecast. However, these initial estimates of cost do not take into account the fact that a significant amount of the testing conducted in accordance with this proposal normally would serve as credit for the function and reliability testing already required by § 21.35. Therefore, assuming credit for such testing, the extent of the proposed required test and its cost would be diminished. The estimated cost of this proposal on a rotorcraft certification program would more accurately be $200,000 to $400,000 if approximately half of the § 29.929 flight test requirements could be credited to the function and reliability testing requirements in § 21.35.

Historic transport category rotorcraft accident data do not provide a totally adequate basis for evaluating the effectiveness of flight endurance testing in mitigating casualty losses in survivable accidents. The FAA invites specific comments regarding proposed § 29.929 that address the following questions:

1. Have there been rotorcraft accidents which can be related to the lack of flight endurance testing of drive system components for 150 hours as this NPRM proposes?

2. Are the current methods of endurance testing in accordance with § 29.923 and flight function and reliability testing of § 21.35 (b) and (f) as effective in preventing drive system and airframe interference problems as the proposed § 29.929 endurance testing?

3. Are there alternative methods of accomplishing the objectives of the proposal; e.g., to supplement ground endurance tests of § 29.923 with the more realistic loads and flexibilities of flight tests and to limit more specifically replacement of components during testing than § 21.35 allows?

Although the FAA is not aware of historic accident data for transport category rotorcraft which provide a complete basis for an evaluation of the effectiveness of flight endurance testing in mitigating casualty losses in survivable accidents, the benefits of the proposed rule would equate with its cost if this proposal would prevent one fatality over the next 10 years. For purposes of analysis, the FAA assumes the minimum value of a human life at $1 million dollars and the estimated range of the incremental cost of compliance at $200,000 to $400,000 per helicopter certification for three anticipated certifications over the next 10 years. The estimated range of the incremental cost of compliance takes into account the significant amount of function and reliability testing that already is required to conform with the requirements of § 21.35.

Regulatory Flexibility Determination

The FAA has determined that under the criteria of the Regulatory Flexibility Act (RFA) of 1980, the amendments to Parts 27 and 29 proposed in this notice, at promulgation, would not have a significant economic impact on a substantial number of small entities. The RFA requires agencies specifically to review proposed rules which may have a "significant economic impact on a substantial number of small entities." The FAA has adopted criteria and guidelines for rulemaking officials to apply when determining if a proposed or existing rule has a significant economic impact on a substantial number of small entities. The FAA criteria for a small entity define a small helicopter manufacturer as an independently owned and operated firm having fewer than 75 employees. According to the FAA size standard criteria only one of the present ten rotorcraft manufacturers subject to the certification changes to Parts 27 and 29 meets these criteria. Accordingly, the proposed amendments to Parts 27 and 29 contained in this notice will not impact a substantial number of small entities.

International Trade Statement

The FAA believes that the certification cost which may be imposed by these proposals will not result in a competitive trade disadvantage or advantage for U.S. manufacturers in domestic or foreign markets. This assumption is based on the fact that foreign manufacturers must comply with the certification standards of Parts 27 and 29 as a condition to entry into U.S. markets. Considering the size of the U.S. market, foreign manufacturers are likely to comply with certification standards of the United States, which is the largest segment of their export market. Foreign and U.S. manufacturers are expected to pass the new certification costs on to consumers in their respective domestic and foreign markets.

Federalism Implications

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Conclusion

The FAA has determined that this document involves proposed regulations which are not considered major under the procedures and criteria prescribed in Executive Order 12291 or significant under Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the person identified in the section entitled "**FOR FURTHER INFORMATION CONTACT.**" For the reasons stated in the regulatory evaluation, I certify that these regulations, if promulgated, would not have a significant economic impact on a substantial number of small entities. In addition, these proposals, if adopted, would have little or no impact on trade

VOL 54 ISS 78 APR 25 1989 UMI

opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

The Proposed Amendments

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Parts 27 and 29 of the FAR (14 CFR Parts 27 and 29) as follows:

PART 27—AIRWORTHINESS STANDARDS: NORMAL CATEGORY ROTORCRAFT

1. The authority citation for Part 27 continues to read as follows:

Authority: 49 U.S.C. 1344, 1354(a), 1355, 1421, 1423, 1425, 1428, 1429, and 1430; 49 U.S.C. 106(g) (Revised Pub. L. 97-449; January 12, 1983).

§§ 27.401 and 27.403 [Removed]

2. By removing §§ 27.401 and 27.403.

Explanation: The AASC proposal pointed out that § 29.401(a) is simply a reference to § 29.923 and the structural strength requirements of § 29.401(b) are covered adequately in §§ 29.337, 29.339, and 29.341. The structural strength requirements of § 29.403 also are covered adequately in §§ 29.337, 29.339, and 29.341. No commenters at the public meeting objected to the proposed removal of §§ 29.401 and 29.403. Since the corresponding sections in Part 27 have identical requirements to the above referenced sections in Part 29, §§ 37.401 and 27.403 would be removed for similar reasons.

§ 27.413 [Removed]

3. By removing § 27.413.

Explanation: The AASC proposal at the public meeting for removing § 29.413 is based on the specification of the arbitrary loads by § 29.413 and by its requirements for combined gust and maneuver loads not specified for other structure. The structural strength requirements of § 29.413 are covered adequately in §§ 29.337, 29.339, and 29.341. No objections to the proposed removal of § 29.413 were received at the public meeting. Therefore, § 27.413, which is identical to § 29.413, would be removed for similar reasons.

4. By revising § 27.775 to read as follows:

§ 27.775 Windshields and windows.

Windshields and windows must be made of material which will not break into dangerous fragments.

Explanation: The proposal would clarify that transparency materials other than glass may be used in windshields and windows if they "will not break into dangerous fragments." For additional information see the explanation for the proposed revision to § 29.775.

5. By amending § 27.787 by revising paragraph (c) to read as follows:

§ 27.787 Cargo and baggage compartments.

* * * * *

(c) Under the emergency landing conditions of § 27.561, cargo and baggage compartments must either—

(1) Be positioned so that if the contents break loose they are unlikely to cause injury to the occupants or restrict any of the escape facilities provided for use after an emergency landing; or

(2) Have sufficient strength to withstand the conditions specified in § 27.561 together with the means of restraint, and their attachments, required by paragraph (b) of this section when containing the maximum authorized weight of cargo and baggage at the critical loading distribution.

* * * * *

Explanation: The current rule specifies only that occupant protection be provided for forward inertia loads on cargo and baggage. The proposal would require occupant protection for all emergency landing loads on cargo and baggage; i.e., vertical and sideward as well as forward loads. The proposal would also clarify that the requirement can be met either by containing the cargo and baggage under emergency landing loads *or* by positioning the cargo or baggage not to injure occupants or impede emergency egress when subjected to emergency landing loads.

PART 29—AIRWORTHINESS STANDARDS: TRANSPORT CATEGORY ROTORCRAFT

6. The authority citation for Part 29 continues to read as follows:

Authority: 49 U.S.C. 1344, 1354(a), 1355, 1421, 1423, 1424, 1425, 1428, 1429, and 1430; 49 U.S.C. 106(g) (Revised Pub. L. 97-449; January 12, 1983).

§§ 29.401 and 29.403 [Removed]

7. By removing §§ 29.401 and 29.403.

Explanation: The AASC proposal pointed out that § 29.401(a) is simply a reference to § 29.923 and the structural strength requirements of § 29.401(b) are covered adequately in §§ 29.337, 29.339, and 29.341. The structural strength requirements of § 29.403 also are covered adequately in §§ 29.337, 29.339, and 29.341. No participants at the public meeting objected to the proposed removal of §§ 29.401 and 29.403.

§ 29.413 [Removed]

8. By removing § 29.413.

Explanation: The AASC proposal at the public meeting for removing § 29.413 is based on the specification of arbitrary loads by § 29.413 and by its requirements for combined gust and maneuver loads not specified for other structure. The structural strength requirements of § 29.413 are covered adequately in §§ 29.337, 29.339, and 29.341. No objections to the proposed removal of § 29.413 were received at the public meeting.

9. By revising § 29.775 to read as follows:

§ 29.775 Windshields and windows.

Windshields and windows must be made of material which will not break into dangerous fragments.

Explanation: The proposal would clarify that transparency materials other than glass may be used in windshields and windows if they "will not break into dangerous fragments." The current rule specifies only that "nonsplintering safety glass must be used."

An AASC proposal also recommended that a material that will not suddenly turn opaque in use be required. This is redundant to existing § 29.773; however, additional guidance is appropriate for advisory circular material.

An accompanying AASC proposal to prohibit "danger of fire or structural failure" in the event of failure of any windshield heating system is adequately covered in § 29.1309 which requires failure analyses to be conducted, and accordingly has not been included here.

10. By amending § 29.783 by adding a new paragraph (h) as follows:

§ 29.783 Doors.

* * * * *

(h) Nonjettisonable doors used as ditching emergency exits must have means to enable them to be secured in the open position and remain secure for emergency egress in sea state conditions prescribed for ditching.

Explanation: The proposal is based on service experience where an unsecured door proved a serious impediment to use of the exit for launching and boarding a liferaft. The proposal would require that means be provided to secure the door in the open position.

11. By amending § 29.787 by revising paragraph (c) to read as follows:

§ 29.787 Cargo and baggage compartments.

* * * * *

(c) Under the emergency landing conditions of § 29.561, cargo and baggage compartments must either—

(1) Be positioned so that if the contents break loose they are unlikely to cause injury to the occupants or restrict any of the escape unlikely to cause injury to the occupants or restrict any of the escape facilities provided for use after an emergency landing; or

(2) Have sufficient strength to withstand the conditions specified in § 29.561 together with the means of restraint, and their attachments, required by paragraph (b) of this section when containing the maximum authorized weight of cargo and baggage at the critical loading distribution.

* * * * *

Explanation: See the explanation for the proposed change to § 27.787.

12. By amending § 29.811 by revising paragraph (a) to read as follows:

§ 29.811 Emergency exit marking.

(a) Each passenger emergency exit, its means of access, and its means of opening must be conspicuously marked for the guidance of occupants using the exits in daylight or in the dark of the night. For rotorcraft equipped for overwater flights such markings must remain adequate if the rotorcraft is capsized and the cabin is submerged.

* * * * *

Explanation: In recent years, offshore helicopter operations have increased dramatically. Several ditchings have occurred, and some ditched helicopters have capsized. These service experiences have demonstrated a need to improve emergency exit markings for the low light conditions of nighttime and for submerged cabins. The proposal would add a general requirement for emergency exit markings to be lighted or of luminous paint and for rotorcraft equipped for overwater flights to have markings which would remain adequate in a submerged cabin of a capsized helicopter.

13. By amending § 29.903 by revising paragraph (c); by removing the "[Reserved]" designation after paragraphs (d)–(e); by redesignating paragraph (f) as paragraph (d); and by adding a new paragraph (e) as follows:

§ 29.903 Engines.

* * * * *

(c) *Category A; control of engine rotation.* For each Category A rotorcraft, there must be a means for stopping the rotation of any engine individually in flight, except, that, for turbine engine installations, the means for stopping the engine need be provided only where necessary for safety. In addition—

(1) Each component of the engine stopping system that is located on the engine side of the firewall, and that might be exposed to fire, must be at least fire resistant; or

(2) Duplicate means must be available for this purpose and the controls must be where all are not likely to be damaged at the same time in case of fire.

* * * * *

(e) *Restart capability:* (1) Means to restart any engine in flight must be provided.

(2) Except for the in-flight shutdown of all engines, engine restart capability must be demonstrated throughout a flight envelope for the rotorcraft.

(3) Means independent of the engine-driven electrical power generating system must be provided to permit in-flight engine restart following the in-flight shutdown of all engines.

Explanation. Existing § 29.903(c) requires "means for stopping and restarting any engine individually in flight." It has been industry practice to provide means for restarting engines in flight which will function even when all engines are shut down. It has not been industry practice to develop and demonstrate an envelope of altitude and airspeed for restarting engines in the event of in-flight shutdown of all engines (because of obvious hazards), but it has been industry practice to develop and demonstrate an envelope of altitude and airspeed for restarting each engine after in-flight shutdown of that engine alone. In a recent helicopter project, the issue arose of whether current § 29.903(c) requires a means for restarting individual engines after the in-flight shutdown of all engines. To clarify this issue, proposed paragraph (e)(3) would make it explicit that means to permit in-flight engine restart following the in-flight shutdown of all engines are required. Further, proposed paragraph (e)(2) would make it clear that although means are required to restart each engine after in-flight shutdown of all engines, in-flight demonstration of these means is not required for certification.

The JAR group also proposed the establishment of a minimum delay period following a false start before another attempted start. The FAA agrees with the concept of a delay period; however, we will propose it as future advisory circular material.

14. By revising § 29.923 by adding a new paragraph (p) as follows:

§ 29.923 Rotor drive system and control mechanism tests.

* * * * *

(p) *Endurance tests; lubricant operating limitations.* Unless equivalent alternative testing is accomplished, lubricants to be approved for use in transmissions and gearboxes must be limited to those used during the tests prescribed by this section, and in addition—

(1) At least three 10-hour cycles required by this section must be conducted with transmission and gearbox lubricant temperatures, at the location prescribed for measurement, not lower than the maximum operating temperature for which approval is requested;

(2) For pressure lubricated systems, at least three 10-hour cycles required by this section must be conducted with the lubricant pressure, at the location prescribed for measurement, not higher than the minimum operating pressure for which approval is requested;

(3) The test conditions of paragraphs (p)(1) and (2) of this section must be applied simultaneously and must be extended to include operation at any one-engine-inoperative rating for which approval is requested; and

(4) Ten acceleration tests must be conducted with transmission and gearbox lubricants and lubrication systems at the minimum temperature selected by the applicant to be suitable for operating above ground idle speed. These tests must be accomplished as follows:

(i) Initiate an engine start (or release the rotorbrake, if installed) and accelerate the rotors and rotor drive system at the normal rate to the maximum power-on speed with the rotors in flat pitch.

(ii) Increase rotor pitch at the maximum rate to achieve maximum continuous torque and maintain for 1 minute.

(iii) Decrease rotor pitch to minimum and stop the rotor.

Explantion: This proposal would provide a standardized basis for qualification of lubricants to be used in rotorcraft drive system transmissions and gearboxes. This proposal would require that tests be conducted to verify that adequate lubrication is provided to these transmissions and gearboxes during routine operating conditions and at the limits of lubricant temperatures and pressures to expected in service.

The FAA recognizes that § 29.1305 does not require a transmission or gearbox lubricant oil temperature indicator to enable the flightcrew to determine when lubricant temperature is suitable for acceleration above idle. However, when an oil temperature indicator is not provided for a specific

BEST COPY AVAILABLE

VOL 54 ISS 78 AP 25 1989 UMI

design, a schedule of ambient temperature versus delay time can be developed and presented by placard or flight manual data to enable the crew to avoid possible transmission damage by premature acceleration during cold weather operation.

15. By adding a new § 29.929 to read as follows:

§ 29.929 Flight endurance test.

Unless otherwise accomplished under § 21.35 of this chapter or other flight conducted on a representative rotorcraft, functioning and compatibility of the rotors and rotor drive system must be demonstrated by a flight endurance test consisting of not less than 150 hours. The test must include representative rotorcraft mission profiles, including one-engine-inoperative conditions, and be conducted in accordance with a plan acceptable to the Administrator. No intervening disassembly or parts replacement of the rotors or the rotor drive system may be accomplished unless acceptable to the Administrator, and all parts of the rotor drive system must be serviceable at the completion of the test.

Explanation: This proposed test would demonstrate the overall compatibility and proper functioning of the drive system with the rotorcraft as a whole under conditions likely to be encountered in normal operation. This test is necessary because no other specific rule in Part 29 addresses the overall compatibility of the drive system with the rotorcraft. This proposal would require that tests be conducted under the type certification rules so that test procedures may be controlled and posttest inspections for serviceability may be monitored. This proposal would extend the concept of endurance testing the rotor drive system to include flight testing in addition to ground or tethered testing. This is a more realistic and comprehensive endurance test program than just ground testing.

Appendix B to Part 29—Airworthiness Criteria for Helicopter Instrument Flight

16. By amending Appendix B to Part 29 by adding a new paragraph VIII(c) to read as follows:

* * * * *

VIII * * *

(c) *Thunderstorm lights.* In addition to the instrument lights required by § 29.1361(a), thunderstorm lights which provide high intensity white flood lighting to the basic flight instruments must be provided. The thunderstorm lights must be installed to meet the requirements of § 29.1361(b).

Explanation: The AASC originally proposed to add a new § 29.1361(c) to read: "For Category A rotorcraft certificated for instrument flight, high intensity white lighting must be provided for the illumination of basic flight instruments so that pilots are not dazzled by lightning discharge when the rotorcraft is being flown solely by reference to instruments."

The FAA has determined that since this proposal pertains to a special type of instrument flight, it would more appropriately belong in Appendix B to Part 29 along with the other specific requirements for instrument flight. The lights would be designated "thunderstorm lights" to provide a qualitative differentiation from the normal "instrument lights" required by § 29.1381. The name "thunderstorm lights" also describes the intent of the proposal for these lights; i.e., to prevent the pilots from being dazzled or temporarily blinded by lightning while the rotorcraft is being operated solely by reference to instruments.

Editorial note: This appendix will not appear in the Code of Federal Regulations.

Appendix—Miscellaneous Proposals Removed From Consideration

Based on the FAA review of the discussions at the May 1–2, 1986, public meeting, in conjunction with written comments also received, the following proposals presented for review during the meeting are not considered because they did not receive full support from the JAR 29 group.

FAR section	Proposal
29.53	Add a new paragraph (c)
29.55	Add a new § 29.55
29.65	Amend paragraph (a)
29.65	Remove paragraph (c)
29.65	Add a new paragraph (e)
29.67	Amend (a)(2)(ii), (a)(3)(ii), and (b)
29.73	Amend paragraph (a)
29.141	Add a new paragraph (d)
29.143	Amend paragraph (a)(2)(v)
29.143	Add a new paragraph (a)(3)
29.143	Add a new paragraph (f) or § 29.672
29.161	Add a new § 29.162
29.171	Add a new paragraph (b)
29.235	Add a new paragraph (b)
29.305	Add a new paragraph (c) or § 29.563
29.341	Amend § 29.341
29.485	Amend § 29.485
29.497	Amend § 29.497
29.501	Amend paragraph (a)(3) and remove paragraphs (a)(3) (i) and (ii)
29.547	Amend paragraph (d)(1)
29.601	Add new paragraphs (c) and (d)
29.613	Amend paragraph (c)
29.669	Add a new paragraph (a)(3)
29.725	Amend paragraph (a)
29.727	Amend paragraph (a) and remove paragraph (c)
29.729	Amend paragraph (b)
29.771	Add a new paragraph (e)
29.773	Add a new paragraph (c)
29.777	Add a new paragraph (b)
29.801	Amend paragraphs (b), (c), (d), and (e)
29.807	Remove paragraphs (d) (1) and (2)
29.901	Add a new paragraph (f)
29.903	Amend paragraph (f)
29.907	Add new paragraphs (c) and (d)
29.908	Amend § 29.908
29.917	Amend paragraph (a)
29.917	Amend paragraph (b)(3)
29.917	Amend paragraph (b)(4)
29.917	Add a new paragraph (c)
29.917	Add new paragraphs (d) and (e)
29.917	Add a new paragraph (f)
29.917	Add a new paragraph (g)
29.917	Add a new paragraph (h)
29.923	Add a new paragraph (a)(7)
29.923	Add a new paragraph (a)(8)
29.927	Remove paragraph (e)
29.927	Add a new paragraph (f)
29.927	Add a new paragraph (h)
29.953	Add new paragraphs (c) and (d)
29.997	Add a new paragraph (e)
29.1019	Add a new paragraph (c)
29.1305	Amend paragraph (a)(6)
29.1305	Add a new paragraph (a)(20)
29.1305	Amend paragraphs (b)(3) and (c)(3)
29.1329	Amend paragraph (a)
29.1337	Add a new paragraph (e)
29.1359	Add a new paragraph (e)
29.1435	Amend paragraph (a)(3)
29.1521	Add paragraphs (b)(7) and (c)
29.1547	Add a new paragraph (e)
29.1557	Amend paragraph (c)(2)
New 29.64	Add a new § 29.64
New 29.177/.181	Add a new § 29.177/.181
New 29.178	Add a new § 29.178
New 29.1507	Add a new § 29.1507
New 29.1518	Add a new § 29.1518

The following proposals received full support from the JAR Group but are being removed from consideration for the following reasons:

Proposal for § 29.161. This proposal would add direction controls to the trim requirement section and permit control (out of trim) force of up to 5 pounds at airspeeds below V_Y or V_{MIN}. This concept was reviewed in the Rotorcraft Regulatory Review Program, specifically in Amendment No. 2 (49 FR 44422; November 6, 1984), and trimming to other than zero force was not found acceptable. Friction devices that would hold directional controls in any position are acceptable without a trim control and would meet the zero force criteria.

Proposal for § 29.561. This proposal would increase the emergency landing load factors. The FAA is already evaluating such a change in a current occupant restraint regulatory project, Notice No. 87–4 (52 FR 20938; June 3, 1987).

Proposal for § 29.563. This proposal would specify vertical speeds, forward speeds, and yaw angles for ditching entry. The FAA is already evaluating similar requirements in the Rotorcraft Regulatory Review Program Notice No. 4 (53 FR 9190; March 21, 1988) project.

Proposal for § 29.605. This proposal would add an explicit requirement to § 29.605 that strength be maintained "under all conditions anticipated in operation." Since current § 29.609(a) requires that structure "be suitably protected against deterioration or loss of strength in service" and since § 29.1529 and Appendix A to Part 29 contain explicit requirements for instructions for continued airworthiness in service, this proposal is unnecessary.

Proposal for § 29.613(d). This proposal would remove explicit references to publications containing approved design values for materials and replace these with references to more general documents which must be accepted (approved) by the cognizant authority. Since a similar proposal is being considered in Rotorcraft Regulatory Review Program Notice No. 4, no further action is warranted.

Proposal for a new § 29.631. This proposal would add a bird strike requirement to the rotorcraft design. This proposal is already under consideration in Rotorcraft Regulatory Review Program Notice No. 4.

Proposal for § 29.783 (b) and (c). This proposal would add consideration of the possible danger of engine intake and efflux proximity to persons entering or egressing the aircraft. The rule currently requires that doors not be located near rotor discs to endanger persons. The proposal would also add a requirement that passenger crowding against a door would not prevent it from being opened. This proposal is currently under consideration in Rotorcraft Regulatory Review Program Notice No. 4.

Proposal for § 29.865. This proposal would add a paragraph (b)(4) which states that external load release devices must be arranged to minimize the possibility of inadvertent operation. This is adequately covered by existing § 29.777(a) which requires that cockpit controls be located to prevent confusion and inadvertent operations.

Proposal for a new § 29.899. This proposal would add an extensive electrical bonding requirement for protection against lightning and static electricity. This requirement has already been added by Rotorcraft Regulatory Review Program Amendment No. 2, in a new § 29.610, and no futher action is necessary.

Proposal for new § 29.901(e). This proposal would require designs to minimize the risk of incorrect assembly. Proposal No. 3–42 of Rotorcraft Regulatory Review Program Amendment No. 3 (53 FR 34198; September 2, 1988) includes this same requirement.

Proposal for new § 29.955. This proposal would add a requirement for fuel systems to be designed to prevent interruption of fuel flow to the engine, without attention by the flightcrew, when fuel is depleted in the supply tank and another tank contains usable fuel. This requirement is covered by Rotorcraft Regulatory Review Program Amendment No. 3.

Proposal for new § 29.959(b). This proposal would add a new paragraph to § 29.959 which would require the flight manual to include data on the amount of unusable fuel as a result of a pump failure. This proposal is not included because of general agreement reached at the public meeting that this aspect would be more approximately covered by advisory circular material.

Proposal for new § 29.963(e). This proposal would add a new paragraph (e) which would limit the allowable temperature of components in fuel tanks to not more than 200 °C. This proposal was included in Rotorcraft Regulatory Review Program Amendment No. 3.

Proposal to revise § 29.1103(b). A proposal was presented to revise § 29.1103(b) to substitute wording to require intake ducts or systems to withstand loads resulting from cyclic engine surge and to require intake ducts to be fire resistant if located in a fire zone. This proposal is not included because no significant evidence could be found where engine surges had caused intake duct failures. Furthermore, existing § 29.1103(b) already requires structural evaluation of engine surge loads.

Proposal for § 29.1183(c). This proposal would require components, controls, ducts, etc., located in fire zones to be fireproof if fire damage to these items could be hazardous. This proposal is not included because the same fire protection is required by application of §§ 29.861, 29.901(c), and 29.1103(d).

Proposal for §§ 29.1517 and 29.1583(f). This proposal would remove the requirement that the height-speed envelope be a limit. This proposal was addressed in Rotorcraft Regulatory Review Program Amendment No. 2 and is being readdressed in Notice No. 85–19 (50 FR 42128; October 17, 1988). Transport Category Rotorcraft Performance.

Issued in Washington, DC, on April 19, 1989.

Thomas E. McSweeny,

Acting Director, Aircraft Certification Service.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 3662-6]

Intent to Form an Advisory Committee to Negotiate a New Approach for Control of Volatile Organic Chemical Equipment Leaks

SUMMARY: EPA is considering establishing an Advisory Committee under the Federal Advisory Committee Act (FACA). The Committee's purpose would be to negotiate issues leading to a new approach for regulation of equipment leaks under Sections 111 and 112 of the Clean Air Act as amended. The Committee would consist of representatives of parties that are substantially affected by the outcome of the proposed rule.

EPA requests public comment on whether:

- It should establish a Federal Advisory Committee;
- It has properly identified interests it believes are affected by the key issues listed above;
- Regulatory negotiation is appropriate for this rulemaking, and the extent to which the issues, and procedures are adequate and appropriate.

This notice also announces that an informational meeting will be held on May 15 from 10 am to 4 pm at the Hall of States, 444 N. Capitol St., room 337, Washington, DC to discuss the issues involved in the regulation of equipment leaks, and whether the Committee should be formed and negotiations proceed.

This meeting is open and any parties interested in the negotiation are encouraged to attend.

DATE: EPA must receive comments and suggestions by May 10, 1989.

ADDRESS: Comments should be submitted (in duplicate, if possible) to Air Docket (LE-131) Room M-1500, Environmental Protection Agency, Attention Docket #A89-10, 401 M Street, SW., Washington, DC 20460. A copy should also be sent to Boy Ajax, MD-13, U.S. EPA, Research Triangle Park, NC 27711. Docket #A89-10, containing materials relevant to this rulemaking may be inspected at U.S. EPA between 8 a.m. and 4 p.m. on weekdays, and a reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: For information pertaining to the establishment of the negotiation committee and associated administrative matters contact: Deborah Dalton, Deputy Director, Regulatory Negotiation Project, Information and Regulatory System Division, U.S. EPA (PM-223), 401 M Street SW., Washington, DC, 20460 (202) 382-5495.

For information pertaining to the regulation of equipment leaks and the regulatory issues to be addressed in the negotiation, contact: Bob Ajax, MD-13, U.S. EPA, Research Triangle Park, NC 27711 (919) 541-5579.

  F. Failure of the Committee to Reach Consensus
  G. Record of Meetings

I. EPA's Regulatory Negotiation Project

EPA established the Regulatory Negotiation Project in 1983 to explore and demonstrate the value of negotiation and other consensus-building techniques for developing better regulations which could be implemented in a less adversarial setting.

Negotiations are conducted through Advisory Committees chartered under the Federal Advisory Committee Act (FACA). The goal of the Committee is to reach consensus on the language or issues involved in a rule. If consensus is reached, it is used as the basis of the Agency's proposal. All procedural requirements of the Administrative Procedure Act and other applicable statutes continue to apply.

EPA has developed criteria for evaluation of potential items for negotiation. To qualify under EPA's selection criteria, an item must:

- Be planned for proposal;
- Have a relatively small number of identifiable parties, in an appropriate balance and mix, who have a good faith interest in negotiating;
- Present a limited number of related issues, for which sufficient information is available for resolution; and
- Have a time factor that lends some urgency to reaching consensus.

The seven negotiations conducted to date have aided the Agency in better defining the issues and in crafting better approaches. The seven regulatory negotiations were:

- Nonconformance Penalties under the Clean Air Act, as amended; Final rule: August 30, 1985
- Emergency Pesticide Exemptions under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA); Final rule: January 15, 1986
- Farmworker Protection Standards for Agricultural Pesticides under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA); Proposed rule: July 8, 1988
- Asbestos Containing Materials in Schools under the Asbestos Hazard Emergency Responsibility Act of 1986 (AHERA); Final rule: October 30, 1987
- New Source Performance Standards for Woodburning Stoves under the Clean Air Act; Final rule: February 26, 1988
- Underground Injection of Hazardous Waste under the Hazardous and Solid Waste Amendments of 1984. Final rule: July 26, 1988
- Minor Permit Modifications under the Resource Conservation and Recovery Act (RCRA); Final rule: September 28, 1988

In December 1986, the Program Evaluation Division of EPA's Office of Policy Planning and Evaluation completed an assessment of the regulatory negotiations program. The study confirmed that negotiation is especially appropriate in situations which involve the resolution of a limited number of related issues, none of which involve fundamental questions of value or extremely controversial national policy. The study further concluded that:

- Negotiated rulemaking can produce rules that are more pragmatic with better environmental results while still meeting statutory requirements.
- Negotiated rules are also more likely to be acceptable to the affected industries, the public interest sector, and state and local governments involved in developing them.
- Negotiation may also result in earlier implementation of a rule by reducing the time it takes to proceed from proposed to final rulemaking.

EPA believes that the benefits to all parties of regulatory negotiation are substantial, and is committed to continued use of regulatory negotiation and other consensus-based processes for rulemaking when appropriate.

II. Volatile Organic Chemical Equipment Leak Fugitive Emissions

A. Need for Rule Revision

Fugitive emissions of volatile organic compounds (VOCs) from equipment leaks (valves, etc.) contribute significantly to air quality problems. Current regulations adopted under sections 111 and 112 of the Clean Air Act and in State Implementation Plans (SIPs) have been effective in heightening awareness of the significance of this source and in stimulating control efforts. The rules basically require that equipment in place be inspected quarterly for leaks with a portable hydrocarbon detector. If concentrations in excess of 10,000 ppm are found, the component is identified as a leaker and maintenance is required. EPA studies in the early 1980s showed that typical refineries and chemical plants have an uncontrolled leak frequency of 11 to 12 percent. Maintenance studies indicate this can be reduced by about 60-70 percent with the current leak detection and repair program. However, the actual frequency rate, and associated emissions in particular, vary widely and are believed to be a function of original design (e.g., number of valves) and age of the process unit, equipment selected, quality of maintenance, standard operating procedures used by the company, training provided to employees, and motivation. Recent data for highly toxic chemicals demonstrate that frequencies in the 0.0 to 2 percent range can be achieved in some situations. However, no one is sure what combination of factors guarantees such results nor how to require them through enforceable regulations.

More importantly, regulatory approaches currently being used do not provide for quantification of emissions. Specified quantified emission estimates levels are necessary to establish a baseline and EPA needs residual emissions and risk assessments to make regulatory decisions. For example, the analyses of EPA proposed rules that would limit benzene emissions (FR Vol. 53, No. 145, July 28, 1988) are based on emission estimates from leak frequencies typical of the refinery industry. These may significantly overestimate emissions of benezene.

EPA sees the need for a new regulatory approach, based on performance and/or emissions, that will result in quantifiable emission levels, give credit for original plant design and motivate innovation. Developing such an approachusing EPA's traditional data gathering and analysis approach would be very difficult, costly, time consuming and controversial. Initial contacts suggest that the major industrial organizations, environmental groups and state government associations will be receptive, and there is good potential for identifying new approaches through negotiation that are compatible with our needs and the complexity of the problems.

The negotiation would address primarily technical issues and would not be policy oriented. The specific goal of the negotiation would be to develop a new regulatory approach that could be an alternative to or replacement for the current 40 CFR 61, Subpart V equipment leak rules. The negotiation would address the form of the approach and the relationship between it and actual emissions but would not address stringency. Depending upon the timing and degree of success, the results could be used to implement the Agency's upcoming decision on benzene equipment leaks. If this is not possible, the results would be used in the next equipment leak standard, which will probably be the hazardous organic National Emission Standards for Hazardous Air Pollutants (NESHAPs).

B. Selection as a Negotiation Item

EPA believes that the equpment leak regulations may be appropriate for development through the regulatory negotiation process. EPA has made a preliminary inquiry of potential parties and representatives of identified interests to determine if this item satisfies EPA's selection criteria for negotiated rulemaking. On the basis of this preliminary inquiry, EPA believes that this item meets its selection criteria and that negotiations can be successful. Affected interests are small in number, and EPA's initial contacts indicate that an appropriate balance and mix of groups will be willing to participate in good faith. EPA's lead program office has identified a number of basic issues for which sufficient information is in hand (or will be developed during the neogitations) for resolution.

C. Key Issues for Negotiation

EPA anticipates the key negotiation questions will focus on how to establish a regulatory approach that will:

1. Achieve predictable, quantifiable emission results
2. Result in the application of the best available technology
3. Be enforceable
4. Exhibit maximum regulatory consistency (e.g., with state permitting requirements; SARA reporting requirements)
5. Provide incentives for better designs (e.g., designs that involve fewer components that have the potential to leak)
6. Provide maximum flexibility in achieving specified results
7. Minimize administative burdens
8. Provide for predictable compliance
9. Provide time that may be needed to identify, assess, and implement work practices, equipment and designs that will meet emission goals.

EPA expects to address the following specific questions:

1. Is leak detection and repair an appropriate approach? If so, how can the results be quantified? Should the definition of a leak be lowered?
2. Should leak detection and repair be required for flanges and, if so, what frequency and leak defintion should be applied?
3. Is an emission limit (or a limit on the number of leaking components) an appropriate approach? How should such an approach be implemented?
4. Is an emission limit on a per component basis (or a limit on percent leaking components) an appropriate approach? How should such an approach be implemented?
5. Is there an effective approach that is a combination of the above?

D. Potential Interests and Participants

EPA has tentatively identified the following list of possible interests and parties:

—Chemical manufacturing industry
—Petroleum refining industry
—Industries that handle organic chemicals in equipment that includes valves, pumps, compressions, flanges or open-ended lines
—Environmental Interest Groups
—State and local air pollution control agencies
—Manufacturers of pumps and valves
—Consulting firms involved in plant design and equipment specification
—Contractors involved in construction of chemical plants and petroleum refineries
—Labor unions
—Other Federal agencies

III. Formation of the Negotiating Committee

A. Procedure for Establishing an Advisory Committee

As a general rule, an agency of the Federal government is required to comply with the requirements of FACA when it establishes or uses a group which includes non-Federal members as a source of advice. Under FACA, an Advisory Committee is established only after both consultation with GSA and receipt of a charter. EPA has prepared a

VOL
54
ISS
78
AP
25
1989
UMI

charter and has initiated the requisite consultation process. Only upon the successful completion of this process and the receipt of the approved charter will EPA form the Committee and commence negotiations.

B. Participants

The number of participants in the group is estimated to be about 15 and should not exceed 25 participants. A number larger than this could make it difficult to conduct effective negotiations. One purpose of this notice is to help determinme whether the standard that EPA is developing would substantially affect interests not adequately represented by the proposed participants. We do not believe that each potentially affected organization or individual must necessarily have its own representative. However, we firmly believe that each interest must be adequately represented. Moreover, we must be satisfied that the group as a whole reflects a proper balance and mix of interests.

C. Requests for Representation

If, in response to this Notice, an additional individual or representative of an interest requests membership or representation in the negotiating group, the Agency, in consultation with the facilitator, will determine whether that individual or representative should be added to the group. EPA will make that decision based on whether the individual or interest:

- Would be substantially affected by the rule;
- Is already adequately represented in the negotiating group.

D. Final Notice

After evaluating the results of the informational and organizational meetings, and reviewing any comments on this Notice and requests for representation, EPA will issue a final notice. That notice will announce the establishment of a Federal Advisory Committee and the date of the first meeting, unless (1) EPA decides, based on comments and other relevant considerations, that such action is inappropriate, or (2) in the event EPA's charter request is disapproved. The negotiation process will begin once the Committee is appropriately chartered and notice is published in the **Federal Register**.

E. Tentative Schedule

EPA will hold an informational meeting on *May 15, 1989 (10 am)* until completion, at The Hall of States, 444 N. Capitol St., Washington, DC. This meeting is open, and potential participants are encouraged to attend.

The purpose of this meeting is to: discuss whether negotiations should proceed, and if so, consider what issues and topics should and should not be covered, answer questions, and address any other procedural issues which may arise.

If an adequate mix and balance of parties attending the informational meeting are interested in participating in a negotiation, EPA will host an organizational meeting within two weeks to discuss how the negotiations would proceed and how the Committee would function. If the organizational meeting is successful and charter approved, EPA would hold the first meeting of the Advisory Committee within three weeks of the organizational meeting. At this meeting, participants would complete action on any procedural matters outstanding from the organizational meeting, determine how best to address the principal issues, and begin to address them.

Subsequent meetings of the Committee would be held once or twice a month either in Washington, DC, or in Research Triangle Park, NC, as determined by the Committee.

Though EPA has not set a final deadline for completion of the negotiation, it expects the negotiations may last up to six months. The Agency intends to terminate the activities of the Committee if it does not appear likely to reach consensus on a schedule that is consistent with Agency rulemaking needs.

IV. Negotiation Procedures

The following procedures and guidelines will apply to the Committee, if formed, unless they are modified as a result of comments received on this Notice or during the negotiating process.

A. Facilitator

EPA will use a neutral facilitator. The facilitator will not be involved with the substantive development or enforcement of the regulation. The facilitator's role is to:

- Chair negotiating sessions;
- Help the negotiation process run smoothly; and
- Help participants define and reach consensus.

B. Good Faith Negotiation

Since participants must be willing to negotiate in good faith and be authorized to do so, each organization must designate a senior official to represent its interests. This applies to EPA as well, and Bob Ajax, Chief, Standards Development Branch, Office of Air Quality Planning and Standards, will be EPA's representative.

C. Administrative Support and Meetings

EPA's Information and Regulatory Systems Division will supply logistical, administrative and management support. Meetings will be held in the Washington area or in Research Triangle Park, NC, at the convenience of the Committee. To support the negotiations, EPA has pledged funds to a resource pool which the National Institute for Dispute Resolution will administer. EPA expects that funds from private foundations might also be available. The parties may use the funds for such activities as training, technical support, and other assistance which the Committee deems useful. To give committee members maximum freedom, subject to any applicable legal constraints, they will determine the procedures under which requests for funds will be made and approved.

D. Committee Procedures

Under the general guidance and direction of the facilitator, and subject to any applicable legal requirements, the members will establish the detailed procedures for Committee meeting which they consider most appropriate.

E. Defining Consensus

The goal of the negotiating process is consensus. In the negotiations completed to date, consensus has meant that each interest concurs in the result. We expect the participants to fashion their own working definition of this term.

F. Failure of Advisory Committee to Reach Consensus

In the event the Committee is unable to reach consensus, EPA will proceed to develop its own approach. Parties to the negotiation may withdraw at any time. if this happens, the remaining Committee should continue.

G. Record of Meetings

In accordance with FACA's requirements, EPA will keep a record of all Advisory Committee meetings. This record will be placed in the public docket for this rulemaking. EPA will announce Committee meetings in the **Federal Register**. Such meetings will be open to the public.

Dated: April 21, 1989.

Robert H. Wayland,

Acting Assistant Administrator, Office of Policy, Planning and Evaluation.

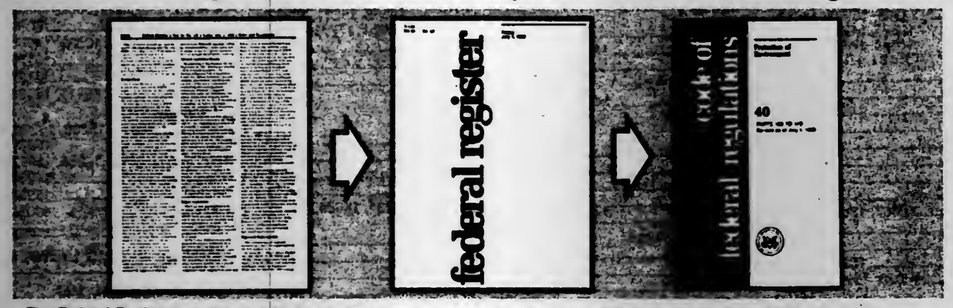
LIST OF PUBLIC LAWS

Last List: April 24, 1989

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202–275–3030).

H.R. 666/Pub. L. 101–17

To allow an obsolete Navy drydock to be transferred to the city of Jacksonville, Florida, before the expiration of the otherwise applicable 60-day congressional review period. (Apr. 20, 1989; 103 Stat. 45; 1 page) Price: $1.00



H.J. Res. 112/Pub. L. 101–18

Designating April 23, 1989, through April 29, 1989, and April 23, 1990, through April 29, 1990, as "National Organ and Tissue Donor Awareness Week". (Apr. 20, 1989; 103 Stat. 46; 1 page) Price: $1.00

The Federal Register

Regulations appear as agency documents which are published daily in the **Federal Register** and codified annually in the **Code of Federal Regulations**

The **Federal Register**, published daily, is the official publication for notifying the public of proposed and final regulations. It is the tool for you to use to participate in the rulemaking process by commenting on the proposed regulations. And it keeps you up to date on the Federal regulations currently in effect.

Mailed monthly as part of a **Federal Register** subscription are: the LSA (List of CFR Sections Affected) which leads users of the Code of Federal Regulations to amendatory actions published in the daily **Federal Register**; and the cumulative **Federal Register Index.**

The **Code of Federal Regulations** (CFR) comprising approximately 193 volumes contains the annual codification of the final regulations printed in the **Federal Register**. Each of the 50 titles is updated annually.

Individual copies are separately priced. A price list of current CFR volumes appears both in the **Federal Register** each Monday and the monthly LSA (List of CFR Sections Affected). Price inquiries may be made to the Superintendent of Documents, or the Office of the Federal Register.

Superintendent of Documents Subscription Order Form

Order Processing Code:

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 54 FR 12345.

THE FEDERAL REGISTER

WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: May 23; at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC
RESERVATIONS: 202-523-5240

ST. LOUIS, MO

WHEN: May 23; at 9:00 a.m.
WHERE: Room 1612, Federal Building, 1520 Market Street, St. Louis, MO
RESERVATIONS: Call the Federal Information Center, St. Louis: 314-425-4106 Missouri (outside St. Louis): 1-800-392-7711 Kansas: 1-800-432-2934

Rules and Regulations

Federal Register
Vol. 54, No. 79
Wednesday, April 26, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Parts 231 and 241

[Release Nos. 33-6832; 34-26745; File No. S7-1-89]

Statement of the Commission Regarding Disclosure by Issuers of Interests in Publicly Offered Commodity Pools; Extension of Comment Period

AGENCY: Securities and Exchange Commission.

ACTION: Extension of comment period.

SUMMARY: On February 6, 1989, the Securities and Exchange Commission ("Commission") published in the Federal Register an interpretive statement regarding disclosure requirements in connection with publicly offered commodity pools (54 FR 5600 (Feb. 6, 1989)). The Commission requested comment on matters relating to the disclosure of prior performance data and the presentation of fees, commissions and expenses incurred by publicly offered commodity pools. The Commission's interpretive statement was published simultaneously with an interpretive statement of the Commodity Futures Trading Commission ("CFTC") addressing substantially the same issues. The interpretive statements provided a period for public comment that ended April 7, 1989.

Several potential commentators have requested the Commission and the CFTC to extend the comment period for the agencies' interpretive statements. Such additional time has been requested in order to allow associations representing commodity pool operators and commodity trading advisers to receive and analyze the comments of their memberships and present them to the respective agencies. The CFTC has determined that an extension is appropriate to enhance the opportunity for interested parties to comment on the issues raised in its interpretive statement. The Commission believes that it is appropriate to extend its comment period consistent with the CFTC's extension.

DATE: All comments on the Commission's interpretive statement must be received by May 5, 1989.

ADDRESS: Comments should be submitted in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Comment letters should refer to File No. S7-1-89.

FOR FURTHER INFORMATION CONTACT: Daniel W. Rumsey, Attorney, at (202) 272-3246, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street, Washington, DC 20549.

By The Commission.
Jonathan G. Katz,
Secretary.
Dated: April 19, 1989.

[FR Doc. 89-9912 Filed 4-25-89; 8:45 am]
BILLING CODE 8010-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[PP 9F3732/R1020; FRL-3561-5]

Pesticide Tolerance for Hexythiazox

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for the combined residues of the acaricide hexythiazox, trans-5-(4-chlorophenyl)-*N*-cyclohexyl-4-methyl-2-oxothiazolidine-3-carboxamide (hexythiazox) and its metabolites containing the (4-chlorophenyl)-4-methyl-2-oxo-3-thiazolidine moiety (expressed as parts per million (ppm) of the parent compound) in or on the raw agricultural commodity (RAC) pears. This regulation to establish the maximum permissible level for residues of the chemical was requested pursuant to a petition by the E.I. du Pont de Nemours and Co., Inc.

EFFECTIVE DATE: April 26, 1989.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A-110), Environmental Protection Agency, Rm. 2708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: By mail: George T. LaRocca, Product Manager (PM) 15, Registration Division (H-7504C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 200, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)-557-2400.

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the Federal Register of March 23, 1989 (54 FR 12010), which announced that E.I. du Pont de Nemours and Co., Inc., Walker's Mill Building, Barley Mill Plaza, P.O. Box 80038, Wilmington, DE 19880-0038, had submitted pesticide petition (PP) 9F3732 proposing to establish a tolerance in or on the RAC pears at 0.3 ppm for the combined residues of the acaricide hexythiazox, trans-5-(4-chlorophenyl)-N-cyclohexyl-4-methyl-2-oxothiazolidine-3-carboxamide and its metabolites containing the (4-chlorophenyl)-4-methyl-2-oxo-3-thiazolidine moiety (expressed as ppm of the parent compound).

No comments were received in response to the notice of filing.

The data submitted in the petition and other relevant material have been evaluated. The toxicology data considered in support of the tolerance include a 12-month feeding study in dogs with a no-observed-effect level (NOEL) of 100 ppm (2.5 milligrams (mg)/kilogram (kg)/day); a 24-month rat feeding/oncogenicity study with dietary levels of 0, 60, 430, and 3,000 ppm with a systemic NOEL of 430 ppm (21.5 mg/kg/day) with no evidence of oncogenicity at 3,000 ppm, which was the highest dose tested (HDT); a 24-month mouse feeding/oncogenicity study with dietary levels of 0, 40, 250, and 1,500 ppm with a systemic NOEL of 250 ppm (37.5 mg/kg/day) in which there were significant increases in liver carcinomas and adenoma/carcinoma in high-dose females at 1,500 ppm (225 mg/kg/day) HDT; a two-generation rat reproduction study with a maternal toxicity NOEL of 400 ppm (20 mg/kg/day) and reproduction toxicity NOEL greater than 2,400 ppm (120 mg/kg/day) HDT; a rat teratology study with maternal and developmental toxicity NOFLs of 240 mg/kg/day; and a rabbit teratology study with a maternal

VOL 54 ISS 79 APR 26 1989 UMI

and developmental toxicity NOEL greater than 1,080 mg/kg/day (HDT). All of the genotoxicity studies submitted were negative, including a reverse mutation (Ames) assay in *Salmonella typhimurium;* a chromosome aberration study with Chinese hamster ovary (CHO) cells; an unscheduled DNA synthesis study with rat hepatocytes; and a forward mutation study involving the thymidine kinase (TK) locus in mouse lymphoma cells.

The Agency has classified hexythiazox as a Class C (possible human) oncogen based on a significantly increased incidence of hepatocellular carcinomas ($p=0.028$), and adenomas/carcinomas combined ($p=0.024$) in female mice at the HDT (1,500 ppm) when compared to the controls as well as a significantly increased ($p<0.001$) incidence of preneo-plastic hepatic nodules in both males and females at the highest dose tested (1,500 ppm).

The decision supporting a Category C classification (rather than a Category B classification) was based primarily on the fact that only one species was affected (mouse), mutagenicity assays did not support upgrading to a B classification, and the structure-activity relationship of hexythiazox to other compounds supported a C classification. In classifying hexythiazox as a Category C oncogen, the Agency concluded that a quantitative estimation of the oncogenic potential for humans should be calculated because of the increased incidence of malignant and combined benign/malignant liver tumors in the female mouse. Thus, a Q^{1*} of $3.9X10^{-2}$ $(mg/kg/day)^{-1}$ in human equivalents has been calculated.

A full review of the data indicates that although hexythiazox is an oncogen in mice, the risks would be extremely small from the proposed use on pears. Estimated dietary oncogenic risk to the general population based on the highly conservative assumption that all pears are treated with hexythiazox and would bear residues at the proposed tolerance level is estimated to be 10^{-6}. The Agency believes that actual exposure and risk would be lower. The basis for this is that the risk of 10^{-6} reflects a worst-case dietary exposure because it assumes that 100 percent of the United States pear crop is treated with hexythiazox and that all quantities of the food consumed will bear residue levels as high as the proposed tolerance. In reality, the Agency knows that all pears would not be treated with this pesticide. Based upon an analysis of the market penetration of currently registered acaricides, the Agency expects the percent of crop treated with hexythiazox in a typical year would be about 30 percent. Likewise, the Agency believes that residue levels in pear juice and nectar will not exceed the established tolerance of 0.30 ppm in or on the RAC pears. The maximum residue level in pear juice would be expected to be less than 50 percent of the residue level in whole fruit. In addition, since there are no animal feed items involved with pears and the petitioner has included the label restriction "Do not graze or feed livestock or cover crops growing in treated areas," no secondary residues in meat or milk are expected.

Based on an assessment of the risks of the proposed use of hexythiazox, the Agency believes that the proposed use of hexythiazox on pears will pose an extremely small risk to humans and that the proposed tolerance level is acceptable and should be established.

The acceptable daily intake (ADI), based on a NOEL of 2.5 mg/kg/day from a 1-year dog feeding study and a safety factor of 100 is 0.025 mg/kg body weight/day. The theoretical maximum residue contribution from the proposed tolerance is 0.000037 mg/kg body weight/day. This is equivalent to about 7.4 percent of the ADI.

The metabolism of the chemical in plants for this use on pears is adequately understood. An analytical method (gas liquid chromatography with an electron capture detector) is available for enforcement. Prior to its publication in the *Pesticide Analytical Manual*, Vol. II, the enforcement methodology is being made available in the interim to anyone who is interested in pesticide enforcement when requested from: By mail: Information Service Section (H–7504C), Program Management and Support Division, Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. Office location and telephone number: Room 200, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)–557–3262.

The tolerance established by amending 40 CFR Part 180 is adequate to cover residues in or on pears.

There are currently no actions pending against the registration of this product. This pesticide is considered useful for the purpose for which the tolerance is sought.

Based on the above information and data considered, the Agency concludes that the tolerance would protect the public health. Therefore, the tolerance is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after the date of publication in the **Federal Register**, file written objections with the Hearing Clerk (address above). Such objections should be submitted in quintuplicate and specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164 (5 U.S.C. 601–612)), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from the tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

(Sec. 408(c), 72 Stat. 1786 (21 U.S.C. 346(c)))

40 CFR Part 180

[PP 7E3556/R1018; FRL–3561–3]

Pesticide Tolerance for Aluminum Tris(O-Ethylphosphonate)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the fungicide aluminum tris(O-ethylphosphonate) in or on the raw agricultural commodity ginseng. The Interregional Research Project No. 4 (IR–4) petitioned for this tolerance.

EFFECTIVE DATE: April 26, 1989.

ADDRESS: Written objections, identified by the document control number [PP 7E3556/R1018], may be submitted to: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT:

By mail:

Hoyt Jamerson, Emergency Response and Minor Use Section Registration Division (H–7505C), Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

Office location and telephone number: Rm. 716, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202. (703) 557–2310

SUPPLEMENTARY INFORMATION: EPA issued a proposed rule, published in the **Federal Register** of February 23, 1989 (54 FR 7798), in which it was announced that the Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, had submitted pesticide petition 7E3556 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR–4 Project, and the Agricultural Experiment Station of Wisconsin.

The petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for the residues of the fungicide aluminum tris(*O*-ethylphosphonate) in or on the raw agricultural commodity fresh ginseng root at 0.1 part per million (ppm). The petitioner proposed that use of the pesticide on ginseng be limited to Wisconsin based on the geographical representation of the data submitted. Additional residue data will be required to expand the area of usage. Persons seeking geographically broader registration should contact the Agency's Registration Division at the address provided above.

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and all other relevant material have been evaluated and discussed in the proposed rule. Based on the data and information considered, the Agency concludes that the tolerance will protect the public health. Therefore, the tolerance is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

Bensulfuron Methyl Ester; Pesticide Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the herbicide bensulfuron methyl ester in or on rice and rice straw. This regulation to establish the maximum permissible level for residues of the herbicide in or on the raw agricultural commodities (RACs) was requested by the E.I. du Pont de Nemours & Co., Inc.

EFFECTIVE DATE: April 26, 1989.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Richard F. Mountfort, Product Manager (PM) 23, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 237, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703) 557–1830.

SUPPLEMENTARY INFORMATION: A notice was published in the **Federal Register** of May 13, 1987 (52 FR 18020), which announced that E.I. du Pont de Nemours & Co., Inc., Agricultural Products Department, Walker's Mill Building, Barley Mill Plaza, Wilmington, DE 19898, had filed a pesticide petition (PP7F3506) with EPA. The petition proposed amending 40 CFR Part 180 by establishing a regulation to permit the residues of the herbicide bensulfuron methyl ester [methyl-2[[[[[[4-6-

VOL 54 ISS 79 AP 26 1989 UMI

dimethoxy-pyrimidin-2-yl]amino] carbonyl]amino]sulfonyl] methyl]benzoate) in or on rice at 0.02 part per million (ppm). No comments were received in response to the notice of filing.

The petitioner subsequently amended the petition by proposing a tolerance for residues of bensulfuron methyl ester in rice straw at 0.05 ppm.

The data submitted in the petition and all other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerance is sought.

The data considered in support of the tolerance include:

1. Plant and animal metabolism studies.

2. An acute oral rat study with an LD_{50} greater than (>) 5,000 milligrams (mg)/kilogram (kg) (limit test).

3. A 90-day dog feeding study with a no-observed-effect level (NOEL) of 1,000 ppm (32.1 and 36.3 mg/kg/day male/female (M/F)).

4. A 90-day mouse feeding study with a NOEL of 1,000 ppm (132 and 133 mg/kg/day, M/F).

5. A 90-day rat feeding study with a NOEL of 1,500 ppm (93 and 111 mg/kg/day, M/F).

6. A rat teratology study with a developmental NOEL of 1,320 mg/kg/day, the highest dose tested (HDT).

7. A rabbit teratology study with a developmental NOEL of 300 mg/kg/day.

8. A two-generation rat reproduction study with a reproductive NOEL of 7,500 ppm (309 and 405 mg/kg/day, M/F) (HDT).

9. A *Salmonella*/Mammalian Activation Assay, negative with and without metoblic activation.

10. An *in vivo* bone marrow chromosome study in rats with no evidence of induced chromosome aberration in bone marrow.

11. An *in vitro* sister chromatid exchange assay in CHO cells with a slight increase in SCE frequency in nonactivated system at maximum concentration, but negative in the activated system at the same concentration.

12. A 1-year dog feeding study with a NOEL of 750 ppm (21.4 and 19.9 mg/kg/day, M/F).

13. A 2-year mouse chronic feeding/oncogenicity study with a NOEL of 2,500 ppm (226 and 227 mg/kg/day, M/F) for systemic effects and with no oncogenic potential observed under conditions of the study up to 5,000 ppm (455 and 460 mg/kg/day, M/F) (HDT).

14. A 2-year rat chronic feeding/oncogenicity study with a NOEL of 750 ppm (30 and 40 mg/kg/day, M/F) for systemic effects and with no oncogenic potential observed under conditions of the study up to 7,500 ppm (309 and 405 mg/kg/day, M/F) (HDT).

Based on a NOEL of 19.9 mg/kg/day in the 1-year dog feeding study and a hundredfold safety factor, the acceptable daily intake (ADI) has been set at 0.2 mg/kg/day. These tolerances have a theoretical maximum residue contribution of 0.000003 mg/kg/day and would utilize 0.0016 percent of the ADI.

There are no regulatory actions pending against the registration of bensulfuron methyl ester. The metabolism of bensulfuron methyl ester in plants and animals is adequately understood for purposes of the tolerances set forth below. An analytical method, high-pressure liquid chromatography using a photoconductivity detector, is available for enforcement purposes. Because of the long lead time from establishing this tolerance to publication of the enforcement methodology in the *Pesticide Analytical Manual*, Vol. II, the analytical methodology is being made available in the interim to anyone interested in pesticide enforcement when requested by mail from:

William Gross, Chief, Information Service Branch, Program Management and Support Division (TS-767C) Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. Office location and telephone number: Rm. 223, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

There is no expectation of secondary residues in meat, milk, poultry, and eggs. The Agency concludes that the pesticide is considered useful for the purposes for which the tolerances are sought and that the tolerances will protect the public health. Therefore, the tolerances are established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: April 11, 1989.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Therefore, 40 CFR Part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. New § 180.445 is added, to read as follows:

§ 180.445 Bensulfuron methyl ester; tolerances for residues.

Tolerances are established for residues of the herbicide bensulfuron methyl ester (methyl-2[[[[[[4,6-dimethoxy-pyrimidin-2-yl]amino]carbonyl]amino] sulfonyl]methyl]benzoate) in or on the following raw agricultural commodities:

Commodities	Parts per million
Rice	0.02
Rice, straw	0.05

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 580

[Docket No. 87-09: Notice 4HH]

Odometer Disclosure Requirements, Kentucky

AGENCY: National Highway Traffic Safety Administration.

ACTION: Grant of petition for extension of time (Kentucky).

SUMMARY: This is in response to a petition for an extension of time filed by the Kentucky Transportation Cabinet, Department of Vehicle Regulation, (Kentucky). Kentucky cannot issue title documents to meet the requirements of the Truth in Mileage Act and the final rule implementing the Act by April 29, 1989, the effective date of the statutory and regulatory requirements. Therefore, the petition requests that NHTSA grant Kentucky an extension of time, until September 1990, to achieve compliance. Because Kentucky has made an effort to meet the deadline, sets forth reasons why it has failed to do so, and has included a description of the steps to be taken while the extension is in effect, we have granted Kentucky's petition for an extension of time. Kentucky has until September 1, 1990 to meet the requirements of the Truth in Mileage Act and the final rule.

FOR FURTHER INFORMATION CONTACT: Judith Kaleta, Office of the Chief Counsel, Room 5219, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, DC 20590 (202-366-1834).

SUPPLEMENTARY INFORMATION:

Background

Section 2(c) of the Truth in Mileage Act of 1986 authorizes the National Highway Traffic Safety Administration (NHTSA) to provide for an extension of time in the event that any State requires additional time beyond April 29, 1989, in revising its laws to meet the requirements of the Motor Vehicle Information and Cost Savings Act and the implementing regulations set forth in 49 CFR Part 580. It provides that, in granting an extension, NHTSA "shall ensure that the State is making reasonable efforts to achieve compliance."

To implement the Truth in Mileage Act and to make some needed changes in the Federal odometer laws, the agency published final rules which provide that a State may file a petition for an extension of time. The petition should discuss the efforts the State has taken to meet the deadline, the reasons why it needs additional time, the length of time desired for extension, and a description of the steps to be taken while the extension is in effect. 53 FR 29464 (1988).

Kentucky's Petition

The Kentucky Transportation Cabinet, Department of Vehicle Regulation, (Kentucky) submitted a petition for an extension of time. In support of its petition, Kentucky states that in 1987, Kentucky attempted to comply with the requirements of the Truth in Mileage Act by contracting to have its title set forth by a secure printing process. The current Kentucky title is intaglio printed and contains latent images. However, Kentucky states that it has examined the title in light of the Federal disclosure requirements and finds that the title does not meet all the requirements. For example, Kentucky notes that the title does not include a space for the signatures and printed names of the seller and buyer. Kentucky states that it has begun to redesign and reformat its titles and that it is attempting to familiarize County Clerks, who initially review motor vehicle title applications, with the new requirements. Finally, Kentucky asserts that is has a one and one-half year supply of titles and that replacement of the titles "would create a severe financial burden". For these reasons, Kentucky requests that it be granted an extension of time until September 1990. Redesigning the title and training County Clerks would continue while the extension is in effect.

NHTSA's Response to the Petition

NHTSA finds that Kentucky has made reasonable efforts to achieve compliance with the Motor Vehicle Information and Cost Savings Act and the implementing regulations.

Immediately after the enactment of the Truth in Mileage Act, Kentucky increased the security of its title document by contracting to have the titles printed by the intaglio method and to include latent images. However, Kentucky recognizes that the title does not meet all the Federal disclosure requirements and has begun to redesign its title. The State will be notified by letter of the changes that are necessary. In addition, Kentucky has begun to train its County Clerks to ensure that the disclosure on the title is properly completed.

In light of Kentucky's past and planned actions, and in order to allow Kentucky to expend their current supply of titles, we grant Kentucky's request for an extension of time until September 1, 1990, to meet the Federal criteria.

Authority: 15 U.S.C. 1988 note; delegation of authority at 49 CFR 1.50(f) and 501.8(e).

Issued on April 19, 1989.

Kathleen C. DeMeter

Assistant Chief Counsel for General Law.

[FR Doc. 89-9949 Filed 4-25-89; 10:55 am]

BILLING CODE 4910-59-M

49 CFR Part 580

[Docket No. 87-09: Notice 4II]

Odometer Disclosure Requirements; Louisiana

AGENCY: National Highway Traffic Safety Administration.

ACTION: Grant of petition for extension of time (Louisiana).

SUMMARY: This is in response to a petition for an extension of time filed by the Louisiana Department of Public Safety and Correction, Office of Motor Vehicles, (Louisiana). Louisiana cannot issue title documents to meet the requirements of the Truth in Mileage Act and the final rule implementing the Act by April 29, 1989, the effective date of the statutory and regulatory requirements. Therefore, the petition requests that NHTSA grant Louisiana an extension of time, until January 1, 1990, to achieve compliance. Because Louisiana has made an effort to meet the deadline, sets forth reasons why it has failed to do so, and has included a description of the steps to be taken while the extension is in effect, we have granted Louisiana's petition for an extension of time. Louisiana has until January 1, 1990 to meet the requirements of the Truth in Mileage Act and the final rule.

FOR FURTHER INFORMATION CONTACT: Judith Kaleta, Office of the Chief Counsel, Room 5219, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, DC 20590 (202) 366-1834.

SUPPLEMENTARY INFORMATION:

Background

Section 2(c) of the Truth in Mileage Act of 1986 authorizes the National Highway Traffic Safety Administration (NHTSA) to provide for an extension of time in the event that any State requires additional time beyond April 29, 1989, in revising its laws to meet the requirements of the Motor Vehicle Information and Cost Savings Act and the implementing regulations set forth in 49 CFR Part 580. It provides that, in granting an extension, NHTSA "shall ensure that the State is making reasonable efforts to achieve compliance."

To implement the Truth in Mileage Act and to make some needed changes in the Federal odometer laws, the agency published final rules which provide that a State may file a petition for an extension of time. The petition should discuss the efforts the State has taken to meet the deadline, the reasons

VOL 54 ISS 79 AP 26 1989 UMI

why it needs additional time, the length of time desired for extension, and a description of the steps to be taken while the extension is in effect. 53 FR 29464 (1988).

Louisiana's Petition

The Louisiana Department of Public Safety and Corrrection, Office of Motor Vehicles, (Louisiana) submitted a petition for an extension of time. In support of its petition, Louisiana states that in October 1988, Louisiana appointed a task force to review its laws, rules, regulations, policies, and title documents for conformity with the new Federal requirements. Although its efforts have been hampered by the lack of a full-time legal counsel, Louisiana has determined that its laws conform to the basic requirements of the Federal laws and regulations. Some changes to its regulations may be necessary. Louisiana states that it revised its title in November 1987, but that the title does not appear to conform. Although Louisiana finds that the title is set forth by a secure process, Louisiana recognizes that the title does not meet all the Federal requirements concerning odometer disclosure. Louisiana states that it plans to redesign its title document and is requesting monies to purchase new titles. The fiscal year begins July 1, 1989. A four month lead time to order and receive the titles is also necessary. Louisiana explains that it has an eleven month supply of titles at a cost of approximately $32,000 and asserts that a "grave financial crisis" is facing the State. The replacement of the current supply "would create a severe financial burden." For these reasons, Louisiana requests that it be granted an extension of time until January 1, 1990.

NHTSA's Response to the Petition

NHTSA finds that Louisiana has made reasonable efforts to achieve compliance with the Motor Vehicle Information and Cost Savings Act and the implementing regulations.

After the enactment of the Truth in Mileage Act, Louisiana revised its title document. However, Louisiana recognizes that the title does not meet all the Federal disclosure requirements and plans to redesign and reformat the title. Louisiana will be advised by letter of the changes that are necessary to bring the title into conformity with the Federal requirements. Louisiana has requested funding to purchase the new titles and additional time is necessary to order the titles and have them printed. Louisiana may also amend some of its titling regulations.

In light of Louisiana's past and planned actions, and in order to allow Louisiana to expend their current supply of titles, we grant Louisiana's request for an extension of time until January 1, 1990, to meet the Federal Criteria.

Authority: 15 U.S.C. 1988 note; delegation of authority at 49 CFR 1.50(f) and 501.8(e).

Issued on April 19, 1989.

SUPPLEMENTARY INFORMATION:

Background

Section 2(c) of the Truth in Mileage Act of 1986 authorizes the National Highway Traffic Safety Administration (NHTSA) to provide for an extension of time in the event that any State requires additional time beyond April 29, 1989, in revising its laws to meet the requirements of the Motor Vehicle Information and Cost Savings Act and the implementing regulations set forth in 49 CFR Part 580. It provides that, in granting an extension, NHTSA "shall ensure that the State is making reasonable efforts to achieve compliance."

To implement the Truth in Mileage Act and to make some needed changes in the Federal odometer laws, the agency published final rules which provide that a State may file a petition for an extension of time. The petition should discuss the efforts the State has taken to meet the deadline, the reasons why it needs additional time, the length of time desired for extension, and a description of the steps to be taken while the extension is in effect. 53 FR 29464 (1988).

Michigan's Petition

The Michigan Department of State (Michigan) submitted a petition for an extension of time. In support of its petition, Michigan states that, on December 27, 1988, Governor James J. Blanchard signed into law legislation enabling Michigan to conform its title documents, recordkeeping procedures, and vehicle sales practices to the Truth in Mileage Act of 1986. Michigan notes that on April 1, 1989, it began to print the odometer reading on every title it issues, and one of the following brands: "ACTUAL MILEAGE", "NOT ACTUAL MILEAGE", or "MILEAGE EXCEEDS MECHANICAL LIMITS". Michigan states that it also began to require transferors to complete the disclosure on the reverse side of the Michigan title. Michigan states that it recognizes that its title does not meet all the Federal requirements and explains that it is currently designing a new title. In particular, Michigan notes that the disclosure statement on the reverse side of the title must be revised, additional security features must be incorporated, and a space must be provided to describe the vehicle model. Michigan will also redesign its reassignment documents or secure legislation to eliminate them. Based on its experience when it redesigned its title in 1987, Michigan states that the process—bids, funding, vendor time, and computer changes—may take as long as eighteen months. During this period, Michigan plans to educate the public of the new requirements. Finally, Michigan has approximately 2,000,000 nonconforming titles on hand. Michigan explains that replacement with conforming titles prior to exhausting this supply would be "cost prohibitive". For these reasons, Michigan requests that it be granted an extension of time until April 29, 1990.

NHTSA's Response to the Petition

NHTSA finds that Michigan has made reasonable efforts to achieve compliance with the Motor Vehicle Information and Cost Savings Act and the implementing regulations.

Since the enactment of the Truth in Mileage Act and the issuance of the implementing Federal regulations, Michigan drafted legislation to amend its odometer statutes to bring them into conformity with the Truth in Mileage Act of 1986. A bill was passed by the Michigan Legislature and was signed by the Governor. This new law permits Michigan to issue titles with the odometer reading and the appropriate brand. This new law also requires transferors to complete the disclosure on the title. In addition, Michigan has been redesigning and reformatting its title document and requested funding in order to purchase new, conforming titles.

In light of Michigan's past and planned actions, and in order to allow Michigan to expend its current supply of titles documents, we grant Michigan's request for an extension of time until April 29, 1990, to revise its title documents to meet the Federal criteria.

Authority: 15 U.S.C. 1988 note; delegation of authority at 49 CFR 1.50(f) and 501.8(e).

Issued on April 19, 1989.

49 CFR Part 580

[Docket No. 87-09: Notice 4KK]

Odometer Disclosure Requirements; Oklahoma

AGENCY: National Highway Traffic Safety Administration.

ACTION: Grant of petition for extension of time (Oklahoma).

SUMMARY: This is in response to a petition for an extension of time filed by the Oklahoma Tax Commission, Motor Vehicle Division (Oklahoma). Oklahoma cannot conform its laws and its title documents to meet the requirements of the Truth in Mileage Act and the final rule implementing the Act by April 29, 1989, the effective date of the statutory and regulatory requirements. Therefore, the petition requests that NHTSA grant Oklahoma an extension of time, until January 1, 1990, to achieve compliance. Because Oklahoma has made an effort to meet the deadline, sets forth reasons why it has failed to do so, and has included a description of the steps to be taken while the extension is in effect, we have granted Oklahoma's petition for an extension of time. Oklahoma has until January 1, 1990 to revise its laws and its title documents to meet the requirements of the Truth in Mileage Act and the final rule.

FOR FURTHER INFORMATION CONTACT: Judith Kaleta, Office of the Chief Counsel, Room 5219, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, DC 20590 (202-366-1834).

SUPPLEMENTARY INFORMATION:

Background

Section 2(c) of the Truth in Mileage Act of 1986 authorizes the National Highway Traffic Safety Administration (NHTSA) to provide for an extension of time in the event that any State requires additional time beyond April 29, 1989, in revising its laws to meet the requirements of the Motor Vehicle Information and Cost Savings Act and the implementing regulations set forth in 49 CFR Part 580. It provides that, in granting an extension, NHTSA "shall ensure that the State is making reasonable efforts to achieve compliance."

To implement the Truth in Mileage Act and to make some needed changes in the Federal odometer laws, the agency published final rules which provide that a State may file a petition for an extension of time. The petition should discuss the efforts the State has taken to meet the deadline, the reasons why it needs additional time, the length of time desired for extension, and a description of the steps to be taken while the extension is in effect. 53 FR 29464 (1988).

Oklahoma's Petition

The Oklahoma Tax Commission, Motor Vehicle Division (Oklahoma), submitted a petition for an extension of time. In support of its petition, Oklahoma states that the Oklahoma Legislature enacted legislation requiring new titles. This legislation was signed by Governor Henry Bellmon on June 10, 1988, and became effective on January 1, 1989. Oklahoma states that these titles are intaglio printed and include latent images, fluorescent inks, micro print, and void background. However, they do not meet all the Federal regulatory requirements concerning the disclosure of odometer information. Therefore, Oklahoma states that it has redesigned its title. Oklahoma explains that, in an effort to comply with the Federal odometer regulations, House Bill 1292 has been introduced before the Oklahoma Legislature. This bill would exempt a transferor of a vehicle ten years old and older from disclosing the mileage to his transferee and authorize Oklahoma to print the odometer reading on every title that it issues with a brand that would explain whether or not the odometer reading reflects the actual mileage or the mileage in excess of the mechanical limits of the odometer. Oklahoma points out that the legislation includes an emergency clause. This clause would make the bill effective immediately upon passage and signature of the Governor. Finally, Oklahoma states that it has a one year supply of titles and that replacement with "conforming titles prior to exhausting the current supply will create a severe financial burden". For these reasons, Oklahoma requests that it be granted an extension of time until January 1, 1990.

NHTSA's Response to the Petition

NHTSA finds that Oklahoma has made reasonable efforts to achieve compliance with the Motor Vehicle Information and Cost Savings Act and the implementing regulations.

Since the enactment of the Truth in Mileage Act and the issuance of the implementing Federal regulations, Oklahoma has made its title more secure. Oklahoma titles are now intaglio printed and contain several other security features. In addition, Oklahoma has redesigned its title to meet the Federal regulatory requirements concerning disclosure. The State will be advised in writing as to whether the draft title meets all requirements. In addition, Oklahoma has drafted legislation to amend its odometer statutes to bring them into conformity with the Truth in Mileage Act of 1986. This legislation has been introduced and is currently pending in the Oklahoma legislature.

In light of Oklahoma's past and planned actions, and in order to allow Oklahoma to expend its current supply of titles documents, we grant Oklahoma's request for an extension of time until January 1, 1990, to revise its laws and its title documents to meet the Federal criteria.

[Docket No. 87-06; Notice 4EE]

Odometer Disclosure Requirements; California

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Grant of Petition for Extension of Time (California).

SUMMARY: This is in response to a petition for an extension of time filed by the California Business, Transportation and Housing Agency, Department of Motor Vehicles, (California). California cannot conform its title documents to meet the requirements of the Truth in Mileage Act and the final rule implementing the Act by April 29, 1989, the effective date of the statutory and regulatory requirements. Therefore, the petition requests that NHTSA grant California an extension of time, until July 1, 1990, to achieve compliance. Because California has made an effort to meet the deadline, sets forth reasons why it has failed to do so, and has included a description of the steps to be taken while the extension is in effect, we have granted California's petition for an extension of time. California has until July 1, 1990 to revise its title documents to meet the requirements of the Truth in Mileage Act and the final rule.

FOR FURTHER INFORMATION CONTACT: Judith Kaleta, Office of the Chief Counsel, Room 5219, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, DC 20590 (202–366–1834).

SUPPLEMENTARY INFORMATION: .

Background

Section 2(c) of the Truth in Mileage Act of 1986 authorizes the National Highway Traffic Safety Administration (NHTSA) to provide for an extension of time in the event that any State requires additional time beyond April 29, 1989, in revising its laws to meet the requirements of the Motor Vehicle Information and Cost Savings Act and the implementing regulations set forth in 49 CFR Part 580. It provides that, in granting an extension, NHTSA "shall ensure that the State is making reasonable efforts to achieve compliance."

To implement the Truth in Mileage Act and to make some needed changes in the Federal odometer laws, the agency published final rules which provide that a State may file a petition for an extension of time. The petition should discuss the efforts the State has taken to meet the deadline, the reasons why it needs additional time, the length of time desired for extension, and a description of the steps to be taken while the extension is in effect. 53 FR 29464 (1988).

California's Petition

The California Business, Transportation and Housing Agency, Department of Motor Vehicles, (California) submitted a petition for an extension of time. In support of its petition, California states that it has been working to achieve compliance with the Federal requirements. California asserts that legislation to implement the requirements of the regulation and to cover implementation costs was drafted and introduced on February 18, 1988, during the 1987/1988 California legislative session. Due to the prospect of a severe budget shortfall, the proposed legislation did not pass the appropriations committee. California explains that conforming legislation, including a request for an appropriation to implement the program, has been rewritten and will be introduced during the 1988/1989 legislative session. Additionally, California states that it has developed a title that will conform, with minor changes, to the regulation and a bid has been awarded to produce the new titles. This title would be printed on security paper and California estimates that it will take between eight and nine months from the time the titles are ordered until the delivery date. To permit California to enact necessary legislation which includes funding for implementation, reprogram data processing systems, produce conforming titles and rewrite its procedures manual, California requests an extension of time until July 1, 1990.

NHTSA's Response to the Petition

NHTSA finds that California has made reasonable efforts to achieve compliance with the Motor Vehicle Information and Cost Savings Act and the implementing regulations.

In February 1988, California drafted and submitted legislation to implement the requirements of the Federal regulation, including a request for an appropriation to cover the implementation costs. Because the proposed legislation did not pass the appropriations committee, the proposed legislation was rewritten for submission to the 1988/1989 legislative session. Additionally, California has developed a title that will conform, with minor changes, to the regulation and a bid has been awarded to produce the new titles. California has submitted a sample of a proposed title and the State will be notified in a letter of the changes that are necessary to bring the title document into compliance. California will also reprogram its data processing system and rewrite its procedures manual.

In light of California's past and planned actions, we grant California's request for an extension of time until July 1, 1990, to revise its title documents to meet the Federal criteria.

Authority: 15 U.S.C. 1988 note; delegation of authority at 49 CFR 1.50(f) and 501.8(e).

Odometer Disclosure Requirements; Florida

AGENCY: National Highway Traffic Safety Administration, DoT.

ACTION: Grant of Petition for Extension of Time (Florida).

SUMMARY: This is in response to a petition for an extension of time filed by the Florida Department of Highway and Motor Vehicles, Division of Motor Vehicles (Florida). Florida cannot conform its laws and its title documents to meet the requirements of the Truth in Mileage Act and the final rule implementing the Act by April 29, 1989, the effective date of the statutory and regulatory requirements. Therefore, the petition requests that NHTSA grant Florida an extension of time, until April 29, 1990, to achieve compliance. Because Florida has made an effort to meet the deadline, sets forth reasons why it has failed to do so, and has included a description of the steps to be taken while the extension is in effect, we have granted Florida's petition for an extension of time. Florida has until April 29, 1990 to revise its laws and its title documents to meet the requirements of the Truth in Mileage Act and the final rule

FOR FURTHER INFORMATION CONTACT: Judith Kaleta, Office of the Chief Counsel, Room 5219, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, DC 20590 (202–366–1834).

SUPPLEMENTARY INFORMATION:

Background

Section 2(c) of the Truth in Mileage Act of 1986 authorizes the National Highway Traffic Safety Administration (NHTSA) to provide for an extension of time in the event that any State requires additional time beyond April 29, 1989, in revising its laws to meet the requirements of the Motor Vehicle Information and Cost Savings Act and the implementing regulations set forth in 49 CFR Part 580. It provides that, in granting an extension, NHTSA "shall ensure that the State is making reasonable efforts to achieve compliance."

To implement the Truth in Mileage Act and to make some needed changes in the Federal odometer laws, the agency published final rules which provide that a State may file a petition for an extension of time. The petition should discuss the efforts the State has taken to meet the deadline, the reasons why it needs additional time, the length of time desired for extension, and a description of the steps to be taken while the extension is in effect. 53 FR 29464 (1988).

Florida's Petition

The Florida Department of Highway Safety and Motor Vehicles, Division of Motor Vehicles (Florida), submitted a petition for an extension of time. In support of its petition, Florida states that it has been working to redesign the title document with regard to the reassignment and disclosure information on the reverse side. Florida notes that the title does not contain a space for the signature and printed name of the transferee because the current title size is not large enough. To remedy the problem, Florida states that it will propose legislation to eliminate the requirement that the signature of the seller on the title document be notarized. Furthermore, the legislation will seek additional appropriations to cover a larger title document, higher postage resulting from the larger title, and the printing of reassignment documents by a secure process. The Florida Legislature will meet from April to June 1989. Florida explains that it is also planning to redesign its data processing system so that the title includes the odometer reading and a statement as to whether or not it reflects the actual mileage or exceeds the mechanical limits of the odometer. Finally, Florida states that its current supply of titles will be exhausted by April 1990. For these reasons, Florida requests that it be granted an extension of time until April 29, 1990.

NHTSA's Response to the Petition

NHTSA finds that Florida has made reasonable efforts to achieve compliance with the Motor Vehicle Information and Cost Savings Acts and the implementing regulations.

Since the enactment of the Truth in Mileage Act and the issuance of the implementing Federal regulations, Florida has been working to redesign its title and reassignment forms to meet the statutory and regulatory requirements. The draft title which Florida included with its petition does not appear to conform with the Federal requirements. The State will be advised by letter of the necessary changes. Legislative action is being sought to amend the current State laws that require that the seller's signature on the title document be notarized and to seek appropriations necessary to print new documents. In addition, Florida is planning changes to its data processing system to ensure that the title that will be issued by the State includes an odometer reading and a notation or "brand" as to whether or not the reading reflects the actual mileage or exceeds the odometer's mechanical limits.

In light of Florida's past and planned actions, and in order to allow Florida to expend its current supply of title documents, we grant Florida's request for an extension of time until April 29, 1990, to revise its laws and its title documents to meet the Federal criteria.

Authority: 15 U.S.C. 1988 note; delegation of authority at 49 CFR 1.50(f) and 501.8(e).

Issued on April 19, 1989.

[Docket No. 87-09; Notice 4GG]

Odometer Disclosure Requirements; Illinois

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Grant of petition for extension of time (Illinois).

SUMMARY: This is in response to a petition for an extension of time filed by the State of Illinois, Office of the Secretary of State, Vehicle Services Department, (Illinois). Illinois cannot conform its laws and its title documents to meet the requirements of the Truth in Mileage Act and the final rule implementing the Act by April 29, 1989, the effective date of the statutory and regulatory requirements. Therefore, the petition requests that NHTSA grant Illinois an extension of time, until January 1, 1990, to achieve compliance. Because Illinois has made an effort to meet the deadline, sets forth reasons why it has failed to do so, and has included a description of the steps to be taken while the extension is in effect, we have granted Illinois' petition for an extension of time. Illinois has until January 1, 1990 to revise its laws and its title documents to meet the requirements of the Truth in Mileage Act and the final rule.

FOR FURTHER INFORMATION CONTACT: Judith Kaleta, Office of the Chief Counsel, Room 5219, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, DC 20590 (202–366–1834).

SUPPLEMENTARY INFORMATION:

Background

Section 2(c) of the Truth in Mileage Act of 1986 authorizes the National Highway Traffic Safety Administration (NHTSA) to provide for an extension of time in the event that any State requires additional time beyond April 29, 1989, in revising its laws to meet the requirements of the Motor Vehicle Information and Cost Savings Act and the implementing regulations set forth in 49 CFR Part 580. It provides that, in granting an extension, NHTSA "shall ensure that the State is making reasonable efforts to achieve compliance."

To implement the Truth in Mileage Act and to make some needed changes in the Federal odometer laws, the agency published final rules which provide that a State may file a petition for an extension of time. The petition should discuss the efforts the State has taken to meet the deadline, the reasons why it needs additional time, the length of time desired for extension, and a description of the steps to be taken while the extension is in effect. 53 FR 29464 (1988).

Illinois' Petition

The State of Illinois, Office of the Secretary of State, Vehicle Services Department, (Illinois), submitted a petition for an extension of time. In support of its petition, Illinois states that immediately after enactment of the Truth in Mileage Act of 1986, Illinois undertook extensive data processing changes in order to develop the capability to print the mileage disclosure required by the Act. Illinois explains that it initiated efforts to revise its titles to meet the Federal disclosure requirements in February 1988 and that revisions were finalized in August 1988. Currently, the power of attorney form is being revised. Illinois states that it needs to bring its statutes into conformity with the Truth in Mileage Act and, in order to do so, has prepared

VOL 54 ISS 79 APR 26 1989 UMI

and submitted legislation for the upcoming legislative session. Illinois expects that the legislation will pass the legislature and be signed by the Governor in the fall of this year. The effective date would be January 1, 1990. Finally, Illinois has an eleven-month supply of nonconforming titles on hand. Replacement of this supply with conforming title documents would cost in excess of $200,000. For these reasons, Illinois requests that it be granted an extension of time until January 1, 1990.

NHTSA's Response to the Petition

NHTSA finds that Illinois has made reasonable efforts to achieve compliance with the Motor Vehicle Information and Cost Savings Act and the implementing regulations.

Since the enactment of the Truth in Mileage Act and the issuance of the implementing Federal regulations, Illinois drafted legislation to amend its odometer statutes to bring them into conformity with the Truth in Mileage Act of 1986 and this legislation has been submitted for the upcoming legislative session. The Governor is expected to sign the legislation in the fall of 1989. The legislation will become effective on January 1, 1990. Illinois has also been redesigning its title documents and power of attorney forms. Finally, Illinois has begun to make extensive data processing programming changes.

In light of Illinois' past and planned actions, and in order to allow the State to expend its current supply of title documents, we grant Illinois' request for an extension of time until January 1, 1990, to revise its laws and its title documents to meet the Federal criteria.

Authority: 15 U.S.C. 1988 note; delegation of authority at 49 CFR 1.50 (f) and 501.8(e).

Issued on April 19, 1989.

49 CFR Part 580

[Docket No. 87-09; Notice 4FF]

Odometer Disclosure Requirements; Rhode Island

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Grant of petition for extension of time (Rhode Island).

SUMMARY: This is in response to a petition for an extension of time filed by the Rhode Island Department of Transportation, Division of Motor Vehicles, (Rhode Island). Rhode Island cannot conform its laws and its title documents to meet the requirements of the Truth in Mileage Act and the final rule implementing the Act by April 29, 1989, the effective date of the statutory and regulatory requirements. Therefore, the petition requests that NHTSA grant Rhode Island an extension of time, until April 29, 1990, to achieve compliance. Because Rhode Island has made an effort to meet the deadline, sets forth reasons why it has failed to do so, and has included a description of the steps to be taken while the extension is in effect, we have granted Rhode Island's petition for an extension of time. Rhode Island has until April 29, 1990 to revise its laws and its title documents to meet the requirements of the Truth in Mileage Act and the final rule.

FOR FURTHER INFORMATION CONTACT: Judith Kaleta, Office of the Chief Counsel, Room 5219, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, DC 20590 (202-366-1834).

SUPPLEMENTARY INFORMATION:

Background

Section 2(c) of the Truth in Mileage Act of 1986 authorizes the National Highway Traffic Safety Administration (NHTSA) to provide for an extension of time in the event that any State requires additional time beyond April 29, 1989, in revising its laws to meet the requirements of the Motor Vehicle Information and Cost Savings Act and the implementing regulations set forth in 49 CFR Part 580. It provides that, in granting an extension, NHTSA "shall ensure that the State is making reasonable efforts to achieve compliance."

To implement the Truth in Mileage Act and to make some needed changes in the Federal odometer laws, the agency published final rules which provide that a State may file a petition for an extension of time. The petition should discuss the efforts the State has taken to meet the deadline, the reasons why it needs additional time, the length of time desired for extension, and a description of the steps to be taken while the extension is in effect. 53 FR 29464 (1988).

Rhode Island's Petition

The Rhode Island Department of Transportation, Division of Motor Vehicles, (Rhode Island) submitted a petition for an extension of time. In support of its petition, Rhode Island states that it has reviewed its title documents and laws. Although the current title is set forth by a secure printing process and contains a space for a disclosure by a transferor, the disclosure on the title does not meet all the regulatory requirements. In addition, Rhode Island notes that the separate reassignment is not set forth by a secure printing process and the disclosure does not meet the Federal requirements. Rhode Island will draft legislation to amend its odometer tampering law in order to change the disclosures on the title and reassignment form with the Federal odometer disclosure requirements. Rather than waiting for the legislative amendment, Rhode Island states that it is in the process of redesigning its title and reassignment forms. Rhode Island is also considering computer programming changes that would permit the State to issue a title that includes an odometer reading and a notation as to whether or not the reading reflects the actual mileage or the mileage in excess of the designed mechanical limits of the odometer. However, Rhode Island has a fourteen-month supply of nonconforming titles on hand and replacement of these titles with conforming documents would create "a financial burden". For these reasons, Rhode Island requests that it be granted an extension of time until April 29, 1990. Until the current supply is depleted, Rhode Island will require that a conforming odometer disclosure statement accompany the title document.

NHTSA's Response to the Petition

NHTSA finds that Rhode Island has made reasonable efforts to achieve compliance with the Motor Vehicle Information and Cost Savings Act and the implementing regulations.

Since the enactment of the Truth in Mileage Act and the issuance of the implementing Federal regulations, Rhode Island reviewed its title and reassignment documents and its laws. Rhode Island drafted legislation to amend its odometer tampering statutes to bring them into conformity with the Truth in Mileage Act of 1986 and NHTSA's final rule. In addition, Rhode

Island has been redesigning and reformatting its title document and is contemplating computer programming changes.

In light of Rhode Island's past and planned actions, and in order to allow Rhode Island to expend its current supply of titles documents, we grant Rhode Island's request for an extension of time until April 29, 1990, to revise its laws and its title documents to meet the Federal criteria.

Authority: 15 U.S.C. 1988 note; delegation of authority at 49 CFR 1.50(f) and 501.8(e).

Issued on April 19, 1989.

Proposed Rules

Federal Register
Vol. 54, No. 79
Wednesday, April 26, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

7 CFR Parts 1944 and 1955

Sale of Inventory Property

AGENCY: Farmers Home Administration, USDA.

ACTION: Proposed rule.

SUMMARY: The Farmers Home Administration (FmHA) proposes to amend its regulations regarding the sale of Single Family Housing (SFH) inventory property to public bodies and nonprofit organizations to provide transitional housing for the homeless, provide the authority to enter into pilot projects to dispose of inventory property and make other changes consistent with the authorizing statute. This action is necessary to assist with the plight of the homeless and provide additional authorities to dispose of inventory property. The intended effect is to assist the homeless and make our regulations more responsive to the needs of the Agency and public.

DATE: Comments must be submitted on or before June 26, 1989.

ADDRESSES: Submit written comments in *duplicate* to the Chief, Directives and Forms Management Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6348, South Agriculture Building, 14th Street and Independence Avenue, SW., Washington, DC 20250. All written comments made pursuant to this publication will be available for public inspection during regular work hours at the above address.

FOR FURTHER INFORMATION CONTACT: Joyce M. Halasz, Senior Loan Specialist, Single Family Housing Servicing and Property Management Division, Farmers Home Administration, USDA, Room 5309—South Agriculture Building, Washington, DC 20250, telephone (202) 382–1452.

SUPPLEMENTARY INFORMATION:

Classification

This proposed rulemaking action has been reviewed under USDA procedures established in Departmental Regulations 1512–1, which implements Executive Order 12291 and has been determined to be "nonmajor" since the annual effect on the economy is less than $100 million and there will be no significant increase in cost or prices for consumers, individual industries, Federal, State, or local Government agencies, or geographic regions. Furthermore, there will be no adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States based enterprises to compete with foreign-based enterprises in domestic or import markets. This action is not expected to substantially affect budget outlay or affect more then one Agency or to be controversial. The net result is to provide better service to rural communities.

Background/Discussion

On September 14, 1988, FmHA published an interim rule (53 FR 35638) implementing certain provisions of the Agricultural Credit Act of 1987 which includes revisions to 7 CFR Part 1955. That rulemaking action primarily affects farmer program (CONACT) portions of Part 1955. This proposed rulemaking action affects housing programs only, except the provisions on pilot projects and sealed bid sales, and has no impact on the intent of changes to 7 CFR Part 1955 being amended as a result of the Agricultural Credit Act of 1987.

On July 25, 1988, FmHA published a proposed rule (53 FR 27863) which contained provisions for the leasing of SFH inventory property to community based organizations to provide transitional housing for the homeless. All comments surrounding this segment of the proposed rule suggested revisions to Subpart C of Part 1955 regarding the sale of SFH inventory property to public bodies and nonprofit organizations to provide transitional housing to the homeless. Based upon the comments received, FmHA is proposing changes to Subpart C to provide for the sale of SFH inventory property to provide transitional housing for the homeless. The following is a brief summary of the pertinent features:

1. Upon request, FmHA will provide a list of inventory property to public bodies and nonprofit organizations desiring to purschase property to provide transitional housing for the homeless. Upon notice of intent to purchase an SFH inventory property, FmHA will withdraw the property from the market for up to 15 days to permit sufficient time for a public body or nonprofit organization to execute a sales contract.

2. A 10 percent discount off the most recent offered price will be offered on nonprogram (NP) properties. A similar discount was considered on program properties, however, this would permit entities to purchase the property at a lower price than offered to program applicants. This would place FmHA program applicants at a disadvantage to purchase program properties thus conflicting with the intent of the Section 502 housing program.

3. If necessary, FmHA will repair any property to decent, safe, and sanitary (DSS) standards; however, the sale price will be adjusted to reflect any resulting change in value. The purchaser will be responsbile for any cosmetic repairs and meeting thermal performance standards.

4. No earnest money deposit will be required. A 2 percent downpayment will be paid at closing and financing will be available at current NP interest rates for 10 years, payments being amortized over 20 years with a balloon payment due after 10 years.

Although comments on the sale of properties may have been submitted previously, FmHA encourages additional comments on this issue from housing advocacy groups, FmHA personnel and the public.

A change is also proposed to § 1955.114(a)(1)(iv) which deals with the sale of SFH inventory property. On July 25, 1988, FmHA promulgated changes (53 FR 27819) to this section which provided for a five day waiting period to consider offers for the purchase of SFH property listed for sale under an exclusive broker contract. This five day waiting period gave all real estate brokers equal opportunity to submit offers. After publication of the regulation, several comments were received suggesting the five day waiting period be expanded to all sales of SFH property, not just those under an exclusive broker contract. This would provide potential purchasers with the opportunity to make a prudent decision about submitting an offer and

real estate brokers with sufficient time to present contracts.

The authorities contained in §§ 1955.118(f), 1955.130(f) and 1955.147 regarding 20-year amortization on NP financing, special effort sales bonuses and sealed bid sales to promote the sale of inventory property, are clarified and expanded to give the State Director authority to utilize these marketing efforts on a broader basis to assist with the timely sale of inventory and help reduce the cost of retaining property.

FmHA is also publishing a new section regarding the use of pilot projects. FmHA has successfully utilized pilot projects throughout various aspects of loan making, loan servicing and property management. To assist with the responsiveness and feasibility of pilot projects, FmHA intends to publish a notice in the **Federal Register** outlining the nature, scope and duration of the pilot project.

In addition, § 1944.17(d) of Subpart A of Part 1944 of this chapter, which authorizes a maximum loan amount in excess of the market value by one percent of the sale price, for a subsequent loan for closing costs with a credit sale, is expanded to permit the same for transfers, enhancing the availability of program properties through transfers directly from existing borrowers to low and very-low income applicants.

Programs Affected

These programs/activities are listed in the Catalog of Federal Domestic Assistance under Nos:

10.404 Emergency Loans
10.405 Farm Labor Housing Loans
10.406 Farm Operating Loans
10.407 Farm Ownership Loans
10.410 Low Income Housing Loans
10.411 Rural Housing Site Loans
10.414 Resource Conservation and Development Loans
10.415 Rural Rental Housing Loans
10.416 Soil and Water Loans
10.417 Very Low Income Housing Repair Loan and Grants
10.418 Water and Waste Disposal Systems for Rural Communities
10.419 Watershed Protection and Flood Prevention Loans
10.421 Indian Tribes and Tribal Corporation Loans
10.422 Business and Industrial Loans
10.423 Community Facility Loans
10.427 Rural Rental Assistance Payments

Intergovernmental Consultation

For the reasons set forth in the Final Rule related Notice(s) to 7 CFR Part 2015, Subpart V, the following programs are excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials: 10.404—Emergency Loans; 10.406—Farm Operating Loans; 10.407—Farm Ownership Loans; 10.410—Low Income Housing Loans; 10.416—Soil and Water Loans; 10.417—Very Low Income Housing Repair Loan and Grants. The following programs are subject to intergovernmental consultation with State and local officials: 10.405—Farm Labor Housing Loans and Grants; 10.411—Rural Housing Site Loans; 10.414—Resource Conservation and Development Loans; 10.415—Rural Rental Housing Loans; 10.418—Water and Waste Disposal Systems for Rural Communities; 10.419—Watershed Protection and Flood Prevention Loans; 10.421—Indian Tribes and Tribal Corporation Loans; 10.422—Business and Industrial Loans; 10.423—Community Facility Loans; 10.427—Rural Rental Assistance Payments.

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR Part 1940, Subpart G, "Environmental Program." It is the determination of FmHA that the proposed action does not constitute a major Federal action significantly affecting the quality of the human environment and in accordance with the National Environmental Policy Act of 1949, Pub. L. 91–90, an Environmental Impact Statement is not required.

Regulatory Flexibility Act

This proposed rule has been reviewed with regard to the requirements of the Regulatory Flexibility Act (5 U.S.C. 601–612). The undersigned has determined and certified by signature of this document that this rule will not have a significant economic impact on a substantial number of small entities since this rulemaking action does not involve a large number of small entities.

List of Subjects

7 CFR Part 1944

Home improvement, Loan programs—Housing and community development, Low and moderate income housing—Rental, Mobile homes, Mortgages, Rural Housing, Subsidies.

7 CFR Part 1955

Government acquired property, Sale of government acquired property, Surplus government property.

Therefore, as proposed, Chapter XVIII, Title 7, Code of Federal Regulations, is amended as follows:

PART 1944—HOUSING

1. The authority citation for Part 1944 continues to read as follows:

Authority: 42 U.S.C. 1480, 5 U.S.C. 301, 7 CFR 2.23, 7 CFR 2.70.

Subpart A—Section 502 Rural Housing Loan Policies, Procedures and Authorizations.

2. In § 1944. 17, paragraph (d) is revised to read as follows:

§1944.17 Maximum loan amounts.

* * * * *

(d) When a subsequent loan for closing costs only is made simultaneously with a credit sale (as provided in § 1955.117(f) of Subpart C of Part 1955 of this chapter) or a transfer, the total indebtedness may exceed the market value of the security property by no more than one percent of the sale price of the property.

* * * * *

PART 1955—PROPERTY MANAGEMENT

3. The authority citation for Part 1955 continues to read as follows:

Authority: 7 U.S.C. 1989, 42 U.S.C. 1480, 5 U.S.C. 301, 7 CFR 2.23, 7 CFR 2.70.

Subpart C—Disposal of Inventory Property

4. The title and text of § 1955.111 is revised to read as follows:

§ 1955.111 Sale or real estate for RH purposes (housing).

Sections 1955.112 through 1955.120 of this subpart pertain to the sale of acquired property pursuant to the Housing Act of 1949, as amended (RH property). Single family units (generally which secured loans made under section 502 or 504 of the Housing Act of 1949, as amended) are referred to as single family housing (SFH) property. All other property is referred to as multiple family housing (MFH) property. Notwithstanding the provisions of §§ 1955.112 through 1955.118, 1955.119 is the governing section which deals with the sale of SFH units to public bodies or nonprofit organizations with the intent to provide transitional housing for the homeless.

5. In § 1955.114, paragraph (a)(1)(iv) is revised to read as follows:

§ 1955.114 Sales steps for program property (housing).

(a) * * *

(1) * * *

(iv) Offers may be received at any time after the effective date the property

VOL 54 ISS 79 AP 26 1989 UMI

is available for sale, however will not considered or accepted until five business days after the effective date the property is available for sale or any reduction in price. Offers received during the five business day period will be considered to be received at the same time on the 6th day along with offers received on the same (6th) day.

* * * * *

6. In § 1955.118, an additional sentence is added to the end of paragraph (f)(1)(ii) to read as follows:

§ 1955.118 Processing cash sales or credit sales on NP terms (housing).

* * * * *

(f) * * *

(1) * * *

(ii) * * * If it appears prudent, to facilitate the sale of NP properties the State Director may authorize 20-year amortization on a group, county, district or state-wide basis.

* * * * *

7. § 1955.119 is redesignated as § 1955.120, and a new § 1955.119 is added to read as follows:

§ 1955.119 Sale of SFH inventory property to public bodies or nonprofit organizations.

This section contains provisions for the sale of SFH inventory property to public bodies or nonprofit organizations which intend to utilize the property for transitional housing for the homeless. Notwithstanding the provisions of § 1955.111 through § 1955.118, this section applies whenever FmHA is approached by such an entity to purchase SFH inventory property for transitional housing. A public body and nonprofit organization is a nonprogram (NP) applicant.

(a) *Method of sale.* The method of sale will follow § 1955.112. Upon request from a public body or nonprofit organization, FmHA will provide a list of inventory property, regardless of whether the property is listed for sale with real estate brokers. When the list is provided, it will clearly indicate whether the dwelling is a "program" or "nonprogram (NP)" property. If FmHA is approached by a public body or nonprofit organization desiring to purchase a specific inventory property not under a sale contract, FmHA will withdraw the property from the market, regardless of suitability classification, upon written notice from such an entity of its intent to purchase the property. The property may be held off the market for a period not to exceed 15 days to provide the public body or nonprofit organization sufficient time to execute Form FmHA 1955-45, "Standard Sales Contract—Sale of Real Property By The United States."

(b) *Price.* The sale price of the property will follow § 1955.113. However, should a public body or nonprofit organization desire to purchase a nonprogram (NP) property, a discount of 10 percent off the most recent sale price will be granted. No such discount applies to program properties.

(c) *Decent, safe and sanitary (DSS) standards.* If FmHA is approached by a public body or nonprofit organization to purchase a NP property which does not meet DSS standards. FmHA will make repairs necessary to remove any health or safety hazards, unless FmHA determines the repairs are so extensive that it is not prudent to make such repairs. The sale price will be adjusted to reflect any resulting change in value. If the cost of repairs to remove health and/or safety hazards exceeds $7,500, prior approval from the Assistant Adminstrator, Housing, is required before accepting the sales contract. Repairs necessary to remove health and/or safety hazards may include, but are not limited to providing adequate, safe and operable heating, plumbing, electrical, water, and sewage disposal systems. Cosmetic type repairs such as painting, floor covering, landscaping, etc., and meeting thermal performance standards will be the responsibility of the public body or nonprofit organization. All repairs/renovations to make the property habitable and meet DSS standards will be discussed, outlined in writing, and made part of the sale contract before execution of Form FmHA 1955-45 by the entity. The public body or nonprofit organization must demonstrate they have the resources available to perform repairs/renovations which are their responsibility. All repairs/renovations will be performed after loan closing, and those which are FmHA's responsibility will be charged directly to the Rural Housing Insurance Fund (RHIF) as a a program related expense. Applicable DSS restrictions will be placed in the deed in accordance with § 1955.116.

(d) *Approval and closing.* Processing cash sales or credit sales on NP terms will be handled in accordance with § 1955.188, except as follows:

(1) *Earnest money deposit.* No earnest money deposit is required from a public body or nonprofit organization.

(2) *Downpayment.* A downpayment of 2 percent of the purchase price will be paid at closing.

(3) *Term of note.* No more than 10 years with payments amortized using up to a 20-year factor with payment in full (balloon payment) due not later than 10 years from the date of closing.

8. In § 1955.130, a sentence is added to the end of paragraph (f)(2) to read as follows:

§ 1955.130 Real estate broker.

* * * * *

(f) * * *

(2) * * * If it appears prudent, to facilitate the sale of NP properties the State Director may authorize use of special effort sales bonuses on a group, county, district or state-wide basis.

* * * * *

9. § 1955.132 is added under the undesignated heading "General" to read as follows:

§ 1955.132 Pilot projects.

From time to time FmHA conducts pilot projects to test concepts related to the management and disposal of inventory property which may deviate from the provisions of this subpart, but will not be inconsistent with the provisions of the authorizing statute, or other applicable Acts affecting the management and disposal of inventory property. Prior to initiation of a pilot project, FmHA will publish in the **Federal Register** a Notice outlining the nature, scope, and duration of the pilot. The pilot projects may be handled by FmHA employees and/or under contract with persons, firms or other entities in the private sector.

10. In § 1955.147, the following sentence is added after the sixth sentence in the introductory text to read as follows:

§ 1955.147 Sealed bid sales.

* * *When a group of properties are to be sold at one time, advertising may indicate that FmHA will consider bids on individual properties or a group of properties and FmHA will accept the bid or bids which are in the best financial interest of the Government.* * *

* * * * *

Dated: April 12, 1989.

Neal Sox Johnson,

Acting Administrator, Farmers Home Administration.

BILLING CODE 3410-07-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 2

RIN 3150-AD17

Informal Hearing Procedures for Nuclear Reactor Operator Licensing Adjudications

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is proposing an amendment of its regulations to provide rules of procedure for the conduct of informal adjudicatory hearings in nuclear reactor operator licensing proceedings. The Atomic Energy Act of 1954 requires that the NRC, in any proceeding for the granting, suspending, revoking, or amending of an NRC license, including licensing as an operator or senior operator at a nuclear reactor, afford an interested person, upon request, a "hearing." This proposed rule would include reactor operator licensing proceedings under the informal hearing procedures already established for materials licensing procedings.

DATE: Comment period expires June 26, 1989.

Comments received after this date will be considered if it is practicable to do so, but assurance of consideration can be given only for comments filed on or before that date.

ADDRESSES: Submit written comments to: Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555, ATTN: Docketing and Service Branch. Hand deliver comments to Docketing and Service Branch, One White Flint North, 11555 Rockville Pike, Rockville, MD, between 8:15 a.m. and 5:00 p.m.

Examined comments received at: The NRC Public Document Room, 2120 L Street NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Karla Smith or Paul Bollwerk, Attorneys, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone (301) 492-1600.

SUPPLEMENTARY INFORMATION: Section 189a of the Atomic Energy Act of 1954 (AEA) (42 U.S.C. 2239(a)) provides that in any proceeding for the granting, suspending, revoking, or amending of any license, the NRC shall grant a hearing upon the request of any person whose interest may be affected by the proceeding. Among the licenses issued by the NRC are those for operators and senior operators of nuclear reactors (AEA section 107, 42 U.S.C. 2137; 10 CFR Part 55).

The Commission's rules of practice generally provide for two types of hearing procedures for licensing proceedings—formal and informal. Under 10 CFR Part 2, Subpart G, those requesting a hearing with respect to a reactor licensing action or any agency enforcement activity affecting a license generally are provided a formal, trial-type hearing conducted in accordance with the provisions of the Administrative Procedure Act, 5 U.S.C. 554-557 and 10 CFR Part 2, Subpart G. On the other hand, a request for a hearing regarding an NRC materials licensing action generally entitles an interested person to an informal, legislative-type hearing in accordance with 10 CFR Part 2, Subpart L.

NRC regulations presently do not specify the type of hearing to be afforded in the event that an interested person, including an applicant for a reactor operator license or a licensee, requests a hearing with regard to agency action concerning a reactor operator license. Previously, the Commission has declared in individual orders responding to operator hearing requests that an applicant for an operator license whose application is denied is entitled only to an informal hearing in accordance with procedures like those now embodied in Subpart L. E.g., David W. Held (Senior Operator License for Beaver Valley Nuclear Power Station, Unit 1), Docket No. 55-60402 (Comm. Aug. 7, 1987). In the wake of NRC's recent adoption of Subpart L (54 FR 8696), the Commission has decided that the Commission's rules should reflect the practice followed in the individual orders. Accordingly, the Commission proposes to amend Subpart L to include within its scope proceedings for the grant, renewal, or licensee-initiated amendment of a reactor operator's license. The proposed rule also specifies that any reactor operator licensing proceeding that was initiated by a notice of hearing issued under § 2.104, a notice of proposed action under § 2.105, or a request for hearing under Subpart B of 10 CFR Part 2 on an order to show cause, an order for modification of license, or a civil penalty is to be conducted in accordance with the procedures for formal hearings set forth in Subpart G of 10 CFR Part 2.

Environmental Impact: Categorical Exclusion

The NRC has determined that this proposed rule is the type of action described in categorical exclusion 10 CFR 51.22(c)(1). Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this proposed rule.

Paperwork Reduction Review

This proposed rule contains no information collection requirements and therefore is not subject to the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.).

Regulatory Analysis

The Atomic Energy Act affords interested persons the right to a hearing regarding a reactor operator licensing proceeding. As the Commission previously indicated in its decision in Kerr-McGee Corp. (West Chicago Rare Earths Facility), CLI-82-2, 15 NRC 232, 241 (1982), aff'd sub nom., City of West Chicago v. NRC, 701 F.2d 632 (7th Cir. 1983), the use of informal procedures generally involves less cost and delay for the parties and the Commission than the use of formal, trial-type procedures, the principal other procedural alternative. Also, procedures must be in place to allow for the orderly conduct of those adjudications. Codifying the informal hearing procedures for operator licensing proceedings is preferable to the present practice of establishing the procedures to be followed on a case-by-case basis. By codifying the procedures, the Commission will avoid the expenditure of time and resources necessary to prepare the individual orders that previously have been used to designate those procedures. This proposed rule is the preferred alternative and the cost entailed in its promulgation and application is necessary and appropriate. The foregoing discussion constitutes the regulatory anlaysis for this proposed rule.

Regulatory Flexibility Certification

As required by the Regulatory Flexibility Act, 5 U.S.C. 605(b), the NRC hereby certifies that this rule, if promulgated, will not have a significant economic impact upon a substantial number of small entities. Many operator license applicants or operator licensees fall within the definition of small businesses found in section 34 of the Small Business Act, 15 U.S.C. 632, or the Small Business Size Standards set out in regulations issued by the Small Business Administration at 13 CFR Part 121, or the NRC's size standards published December 9, 1985 (50 FR 50241). While the proposed rule would reduce the litigation cost burden upon applicants or licensees because of the informal nature of the hearing, the requirement that they submit filings and documentary

BEST COPY AVAILABLE

VOL 54 ISS 79 AP 26 1989 UMI

information detailing contested legal and factual issues is still required. Some cost reduction in comparison to the cost of participating in a formal adjudicatory hearing can be anticipated, although it is problematic whether that reduction as a whole will be significant. Certainly, the use of informal procedures will not increase significantly the burden upon applicants or licensees to engage in hearings.

Backfit Analysis

The NRC has determined that the backfit rule, 10 CFR 50.109, does not apply to this proposed rule and, therefore, that a backfit analysis is not required for this proposed rule, because these amendments do not involve any provisions which would impose backfits as defined in 10 CFR 50.109(a)(1).

List of Subjects in 10 CFR Part 2

Administrative practice and procedure, Antitrust, Byproduct material, Classified information, Environmental protection, Nuclear materials, Nuclear power plants and reactors, Penalty, Sex discrimination, Source material, Special nuclear material, Waste treatment and disposal.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 552 and 553, the NRC is adopting the following amendments to 10 CFR Part 2:

PART 2—RULES OF PRACTICE FOR DOMESTIC LICENSING PROCEEDINGS

1. The authority citation for Part 2 continues to read as follows:

Authority: Secs. 161, 181, 68 Stat. 948, 953, as amended (42 U.S.C. 2201, 2231); sec. 191, as amended, Pub. L. 87–615, 76 Stat. 409 (42 U.S.C. 2241); sec. 201, 88 Stat. 1242, as amended (42 U.S.C. 5841); 5 U.S.C. 552.

Section 2.101 also issued under secs. 53, 62, 63, 81, 103, 104, 105, 68 Stat. 930, 932, 933, 935, 936, 937, 938, as amended (42 U.S.C. 2073, 2092, 2093, 2111, 2133, 2134, 2135); sec. 102, Pub. L. 91–190, 83 Stat. 853, as amended (42 U.S.C. 4332); sec. 301, 88 Stat. 1248 (42 U.S.C. 5871). Sections 2.102, 2.103, 2.104, 2.105, 2.721 also issued under secs. 102, 103, 104, 105, 183, 189, 68 Stat. 936, 937, 938, 954, 955, as amended (42 U.S.C. 2132, 2133, 2134, 2135, 2233, 2239). Section 2.105 also issued under Pub. L. 97–415, 96 Stat. 2073 (42 U.S.C. 2239). Sections 2.200–2.206 also issued under secs. 161, 234, 68 Stat. 955, 83 Stat. 444, as amended (42 U.S.C. 2236, 2282); sec. 206, 88 Stat. 1246 (42 U.S.C. 5846). Sections 2.600–2.606 also issued under sec. 102, Pub. L. 91–190, 83 Stat. 853, as amended (42 U.S.C. 4332). Sections 2.700a, 2.719 also issued under 5 U.S.C. 554. Sections 2.754, 2.760, 2.770, 2.780 also issued under 5 U.S.C. 557. Section 2.764 and Table 1A of Appendix C also issued under secs. 135, 141, Pub. L. 97–425, 96 Stat. 2232, 2241 (42 U.S.C. 10155, 10161). Section 2.790 also issued under sec. 103, 68 Stat. 936, as amended (42 U.S.C. 2133) and 5 U.S.C. 552. Sections 2.800 and 2.808 also issued under 5 U.S.C. 553. Section 2.809 also issued under 5 U.S.C. 553 and sec. 29, Pub. L. 85–256, 71 Stat. 579, as amended (42 U.S.C. 2039). Subpart K also issued under sec. 189, 68 Stat. 955 (42 U.S.C. 2239); sec. 134, Pub. L. 97–425, 96 Stat. 2230 (42 U.S.C. 10154). Subpart L also issued under sec. 189, 68 Stat. 955 (42 U.S.C. 2239). Appendix A also issued under sec. 6, Pub. L. 91–560, 84 Stat. 1473 (42 U.S.C. 2135). Appendix B also issued under sec. 10, Pub. L. 99–240, 99 Stat. 1842 (42 U.S.C. 2021b et seq.).

2. The heading of Subpart L of Part 2 is revised to read as follows:

Subpart L—Informal Hearing Procedures for Adjudications in Materials and Operator Licensing Proceedings

3. Section 2.1201 is revised to read as follows:

§ 2.1201 Scope of subpart.

(a) The general rules of this subpart govern procedure in any adjudication initiated by a request for a hearing in a proceeding for—

(1) The grant, transfer, renewal, or licensee-initiated amendment of a materials license subject to Part 30, 32 through 35, 39, 40, or 70 of this chapter; or

(2) The grant, renewal, or licensee-initiated amendment of an operator or senior operator license subject to Part 55.

(b) Any adjudication regarding a materials license subjectd to Parts 30, 32 through 35, 39, 40, or 70, or an operator or senior operator license subject to Part 55 that is initiated by a notice of hearing issued under § 2.104, a notice of proposed action under § 2.105, or a request for hearing under Subpart B of 10 CFR Part 2 on an order to show cause, an order for modification of license, or a civil penalty, is to be conducted in accordance with the procedures set forth in Subpart G to 10 CFR Part 2.

Dated at Rockville, MD, this 20th day of April, 1989.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

[FR Doc. 89–10004 Filed 4–25–89; 8:45 am]

BILLING CODE 7590–01–M

10 CFR Part 50

[Docket No. PRM–50–48]

University of Missouri; Denial of Petition for Rulemaking

AGENCY: Nuclear Regulatory Commission.

ACTION: Denial of petition for rulemaking.

SUMMARY: The Nuclear Regulatory Commission (NRC) is denying a petition for rulemaking (PRM–50–48) filed by Mr. William F. Reilly, Manager, Reactor Upgrade Project, and endorsed by Dr. Don M. Alger, Associate Director, Research Reactor Facility of University of Missouri. The petition is being denied because: (1) The existing regulations are adequate to ensure protection to public health and safety in licensing test reactors and testing facilities; (2) the proposed amendments would not sufficiently protect the public health and safety; and (3) the need for the clarifications proposed is not otherwise demonstrated by the documentation provided by the petitioner. The petition requested that NRC amend its regulation to add a new definition for the term "research reactor" and redefine the terms "testing facility" and "testing reactor" based on the function of the facility and its power level. The petitioner stated that the current definition of "testing facility" results in excessive and unnecessary regulatory requirements being applied to research reactors which are contrary to Congressional intent in the Atomic Energy Act of 1954.

ADDRESS: Copies of the petition for rulemaking, the public comments received, and the NRC's letter to the petitioner are available for public inspection or copying in the NRC Public Document Room at 2120 L Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mark L. An, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone (301) 492–3749.

SUPPLEMENTARY INFORMATION:

I. The Petition
II. Basis for Request
III. Public Comments on the Petition
IV. Analysis of Public Comments
V. Reasons for Denial

The Petition

In a letter dated November 19, 1987, Dr. Don M. Alger, Associate Director, Research Reactor Facility, University of Missouri, filed with NRC a petition for rulemaking (PRM–50–48). The petitioner requested that NRC amend its regulations to add a new definition for the term "research reactor" and redefine the term "testing facility" based on the function of the facility and its power level. The proposed petition was published in the Federal Register on March 1, 1988 (53 FR 6159). The 60-day public comment period ended May 2, 1988.

Fifteen letters were received commenting on the petition. These letters came from universities, government agencies, industry, public interest groups, and an individual. Eleven comments favored the petition and four opposed the petition. The significant comments supporting the petition are summarized below:

1. Clarifications are necessary to specify which regulations apply to research reactors. These clarifications would eliminate the confusion associated with commingled power reactor regulations.

2. A clear distinction among the terms "research reactor," "testing facility" and "testing reactor" should be established.

3. The arbitrary designation for testing facility based on power level threshold that has little, if any, technical basis, should be eliminated; thereby allowing certain vital research to be performed in a more expeditious manner.

The significant comments opposing the petition are summarized below:

1. It is not prudent to ignore power level in the classification of research reactors used for research purposes from that of power reactors and testing facilities.

2. Protection of public health and safety should be foremost consideration when amending the regulations in 10 CFR Chapter I.

3. Recourse to seek exemption from regulation should be on a case-by-case basis.

4. The proposed definition implies that testing would be done only at "research reactors" and prevents use of a "testing facility" for other types of work for which it may be suited.

5. Research can be conducted adequately at present or lower power levels.

Basis for Request

The petitioner bases the petition on the fact that the current definition of "testing facility" in 10 CFR Part 50 results in excessive and unnecessary routine regulatory requirements being applied to research reactors which is contrary to Congressional intent in the Atomic Energy Act of 1954. The petitioner also proposed to add a definition in 10 CFR Part 50 for "research reactor" to be consistent with the definition used by the American Nuclear Society (ANS) and American National Standards Institute (ANSI). The petitioner currently operates a research reactor at a maximum power level of 10 MW(t), and plans are being developed to upgrade the power to approximately 30 MW(t). This power upgrade would result in the change of the "research reactor" designation to that of a "testing facility." The petitioner contends that such a designation would place unnecessary and burdensome regulatory requirements on research reactors similar to those required of power reactors.

The petitioner believes the petition establishes a balanced regulatory program for the University of Missouri and future research reactors to ensure the public health and safety without inhibiting the conduct of vital research in the areas of medical research, radioisotope production, material research, neutron activation analysis, radiation effects, and others. The petitioner further believes that test facilities were intended by Congress to be encompassed in section 104c of the Atomic Energy Act of 1954 (construction application of testing facility). Although this section of the Act does not mention nor define "testing facility," the Commission could issue licenses to persons applying for utilization and production facilities useful in the conduct of research and development activities.

Public Comments on the Petition

A notice of receipt of petition for rulemaking was published in the Federal Register on March 1, 1988 (53 FR 6159). Interested persons were invited to submit written comments concerning the petition during the 60-day public comment period which ended May 2, 1988.

Analysis of Public Comments

Two commenters made the comment that the proposed rule would clarify in the regulations where research reactor regulations apply and would eliminate confusion with power reactor regulations.

In response, the NRC staff recognizes that the regulatory requirements for test and research reactors appear throughout Title 10 of the Code of Federal Regulations. However, upon review of any particular part or section of the regulations, it is clear what reactor types are being addressed. This petition would change the definitions for "testing facility", "testing reactor", and "research reactor." Where these definitions appear or do not appear in the regulations would not change. Therefore, the clarity of the regulations would not be affected by the petition for rulemaking.

One commenter stated that the petition would establish clear distinction between terms "research reactor" and "testing facility."

In response, these terms are clearly and specifically defined in the existing Title 10 of the Code of Federal Regulations. To date, there have not been any instances where uncertainty about a facility has occurred. The petition, if implemented, would replace the existing definitions with no significant improvement in clarity.

Seven commenters stated that adopting this proposal would eliminate the arbitrary designation for testing facility based on a 10 MW thermal power threshold that holds little, if any, technical basis.

In response, when the current definition of testing facility was proposed in 1959, the Atomic Energy Commission (AEC) adopted a definition based on the type of facility that would involve a significant hazards consideration. The Advisory Committee on Reactor Safeguards (ACRS) reviewed and agreed on this definition. These definitions are still valid and conservative when considered in light of current technology.

One commenter indicated that the petition would allow vital research to be performed in a more expeditious manner.

In response, it is true that a higher power research reactor has a higher neutron flux and the ability to conduct research that would be difficult or very time consuming at a lower power level. However, a licensee can apply to operate a research reactor with a power level greater than 10 MW(t) if it follows the current licensing process for a testing facility. Because the existing regulations for testing facilities and testing reactors are of greater complexity than those for research reactors, it may require a longer time to complete a testing reactor licensing action. Nevertheless, ensuring the health and safety of the public takes precedence over arbitrarily relaxing licensing requirements for operation.

Two commenters stated that it is not prudent to ignore power level in the classification of reactors used for research purposes.

In response, the regulatory process used in any licensing action must be of sufficient detail to ensure protection of the health and safety of the public. The proposed changes in the definitions would change the existing regulatory process for reactors with power levels

VOL 54 ISS 79 AP 26 1989 UMI

above 10 MW(t). The NRC staff considers the power level of the facility and postulated accidents to be important safety considerations when evaluating licensing actions on research reactors and testing facilities. The present regulatory options available to the staff for research reactors (such as referring an application to the ACRS) will continue to exist and will be used by the staff if warranted.

Reasons for Denial

The decision to deny the petition was based on: (1) NRC considering the contents of the petition, (2) the public comments received, and (3) the current regulatory structure affecting the licensing of research reactors, testing reactors, and testing facilities. The discussion that follows addresses the significant points in the petitioner's proposal and NRC's response to these points.

The petitioner proposed that the Commission adopt a regulation that would add a new definition for the term "research reactor" and redefine the terms "testing facility" and "testing reactor" based on the function of the facility and its power level.

Proposed New Definition

"Research reactor" means a nuclear reactor licensed by the Commission under the authority of subsection 104c of the Act and pursuant to the provisions of § 50.21(c) of this chapter for research, developmental, educational, training, or experimental purposes, and which may have provision for production of non-fissile radioisotopes.

Proposed New Definition

"Testing facility" means a nuclear reactor of a type described in § 50.21(c) to be used for testing reactor components and designs at reduced or uncertain safety margins, and for which an application has been filed for a license authorizing operation at:

(a) A thermal power level in excess of 10 megawatts; or

(b) A thermal power level in excess of 1 megawatt; if the reactor is to contain:

(i) A circulating loop through the core in which the applicant proposes to conduct fuel experiments; or

(ii) A liquid fuel loading; or

(iii) An experimental facility in the core in excess of 16 square inches in cross-section.

The definition of research reactor appears in the existing regulations in § 107.3(h). If a non-power reactor is not a test reactor or test facility, it is a research reactor; therefore, a need for clarification does not exist. Because of power levels and postulated accident considerations, the existing regulatory process for testing facilities and testing reactors is intended to be more comprehensive than that for research reactors.

The petitioner suggests adding to the definition for testing reactor and testing facility the function of the reactor by including the testing of reactor components and designs at reduced or uncertain safety margins. The petitioner does not provide justifications as to what levels of reduction in safety margin is acceptable. The petitioner's proposal does not demonstrate why the existing regulatory process is not sufficient to protect the health and safety of the public and the environment.

In the petitioner's proposed definition, it is not clear where a research reactor (the type of reactor described in 10 CFR 170.3(h) or 10 CFR 50.21(c)), that operates at a thermal power level of 10 megawatts or less, or that does not operate at a thermal power level in excess of 1 megawatt with a circulating loop, liquid fuel loading, or an experimental facility in the core in excess of 16 square inches in cross-section that would be used for testing reactor components and designs at reduced or uncertain safety margins, would be considered under the proposed regulations. The petitioner-proposed definitions of testing facility and testing reactor involve both reactor function and power level. This is an area of uncertainty that has not been addressed by the petitioner in any of the documentation submitted.

The changes in the definition that the petitioner has proposed would result in facilities being regulated as research reactors at thermal power levels above 10 megawatts if the facility did not engage in testing reactor components and designs at reduced or uncertain safety margins. Facilities with thermal power levels above 10 megawatts are currently regulated as testing facilities. Thus, this represents a decrease in the scope of the regulatory requirements. The petitioner has not stated if a reactor thermal power level exists where the scope of the regulatory process should be increased. The petitioner has not provided any justification to show that reactor power level is independent of the potential hazard to the health and safety of the public and environment. Also, the petitioner does not justify the decrease in the scope of the regulatory process except to state that the current definitions are arbitrary. In addition to reviewing the petition and comments from the public, the petition was also examined against the existing regulatory requirements affecting test reactors. These regulations are briefly listed as follows:

1. *10 CFR 50.2* defines "testing facility" as a nuclear reactor which is of a type described in 10 CFR 50.21(c) and for which an application has been filed for a license authorizing operation at:

(a) A thermal power level in excess of 10 megawatts; or

(b) A thermal power level in excess of 1 megawatt, if the reactor is to contain:

(i) A circulating loop through the core in which the applicant proposes to conduct fuel experiments; or

(ii) A liquid fuel loading; or

(iii) An experimental facility in the core in excess of 16 square inches in cross-section.

2. *10 CFR 50.21(c)* describes a requirement for a production or utilization facility for conducting research and development activities of the types specified in section 31 of the Act, and which is not a facility of the type specified in paragraph (b) of this section or in 10 CFR 50.22.

3. *10 CFR 50.30(f)* requires an environmental report to be submitted with application for testing facility construction permit or operating license.

4. *10 CFR 50.58* requires ACRS review and report for testing facility construction permit or operating license.

5. *10 CFR 50.92(a)* requires a construction permit for a material alteration to a licensed facility and public notice according to 10 CFR 2.105 (30 days' notice and opportunity for hearing where an amendment to a license involves a significant hazard consideration).

6. *10 CFR 140.3(k)* defines "testing reactor" as a nuclear reactor of a type described in 10 CFR 50.21(c) of this chapter and for which an application has been filed for a license authorizing operation at:

(a) A thermal power level in excess of 10 megawatts; or

(b) A thermal power level in excess of 1 megawatt, if the reactor is to contain:

(i) A circulating loop through the core in which the applicant proposes to conduct fuel experiments; or

(ii) A liquid fuel loading; or

(iii) An experimental facility in the core in excess of 16 square inches in cross-section.

7. *10 CFR 170.3(h)* defines "research reactor" as a nuclear reactor licensed by the Commission under the authority of subsection 104c of the Act and pursuant to the provisions of 10 CFR 50.21(c) of this chapter for operation at a thermal power level of 10 megawatts or less, which is not a testing facility as defined by paragraph (m) of this section.

8. *10 CFR 170.3(m)* defines "testing facility" as a nuclear reactor licensed by the Commission under the authority of subsection 104c of the Act and pursuant to the provisions of 10 CFR 50.21(c) of this chapter for operation at:

(a) A thermal power level in excess of 10 megawatts; or

(b) A thermal power level in excess of 1 megawatt, if the reactor is to contain:

(i) A circulating loop through the core in which the applicant proposes to conduct fuel experiments; or

(ii) A liquid fuel loading; or

(iii) An experimental facility in the core in excess of 16 square inches in cross-section.

All the distinctions between research and test reactors cited in the above regulations have been promulgated by NRC to ensure the protection of public health and safety and the environment. These distinctions reflect the importance of reactor power level, postulated accidents, and facility function in NRC licensing decisions. The NRC, in light of this petition, has reexamined its regulations and determined that no additional action is required at this time.

Accordingly, the Commission determines that rulemaking is not necessary at this time.

Dated at Rockville, Maryland, this 5th day of April 1989.

For the Nuclear Regulatory Commission.

Victor Stello, Jr.,

Executive Director for Operations.

[FR Doc. 89-9997 Filed 4-25-89; 8:45 am]

BILLING CODE 7590-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL-3559-4]

Approval and Promulgation of Implementation Plans; Wisconsin

AGENCY: U.S. Environmental Protection Agency (USEPA).

ACTION: Proposed rulemaking.

SUMMARY: USEPA is proposing to approve a revision to the Wisconsin State Implementation Plan (SIP) for ozone. The revision allows the Continental Can Company to use internal offsets in conjunction with daily weighted emission limits at its Milwaukee and Racine can manufacturing plants. This revision to the Wisconsin SIP was submitted by the Wisconsin Department of Natural Resources (WDNR) on August 20, 1985. USEPA is approving the revision because it meets USEPA's requirements for can coating operations (December 8, 1980; 45 FR 80824), and does not interfere with the attainment of the National Ambient Air Quality Standards (NAAQS) for ozone in southeastern Wisconsin.

DATE: Comments on this revision are due by May 26, 1989.

ADDRESSES: Copies of the SIP revision and other materials relating to this rulemaking are available for inspection at the following addresses: (It is recommended that you telephone Uylaine E. McMahan, at (312) 886-6031, before visiting the Region V office.)

U.S. Environmental Protection Agency, Region V, Air and Radiation Branch (5AR-26), 230 South Dearborn Street, Chicago, Illinois 60604.

U.S. Environmental Protection Agency, Public Information Reference Unit, 401 M Street SW., Washington, DC 20460.

Wisconsin Department of Natural Resources, Bureau of Air Management (AIR/3), 101 South Webster, Madison, Wisconsin 53707.

Written comments should be sent to:

Gary Gulezian, Chief, Regulatory Analysis Section, Air and Radiation Branch (5AR-26), Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Uylaine E. McMahan, (312) 886-6031.

SUPPLEMENTARY INFORMATION: On August 20, 1985, the WDNR submitted a revision to its ozone SIP for Continental Can. This revision is in the form of a variance for six can coating lines at the Continental Can's Milwaukee plant and a variance for two can coating lines at the Continental Can Racine plant. Both plants are located in Wisconsin.

On September 9, 1986 (51 FR 32075), USEPA announced the availability of this revision to the Wisconsin SIP and took final action to approve it (51 FR 32075). In the notice, USEPA advised the public that it was deferring the effective date of its approval for 60 days, until November 10, 1986, to provide an opportunity for submittal of comments on this revision. USEPA announced that if within 30 days it received notice that someone wished to submit adverse or critical comments, we would withdraw the approval and begin a new rulemaking by proposing the action and establishing a 30-day comment period. USEPA also published a general notice announcing this special "direct final" procedure on September 4, 1981 (46 FR 44476). USEPA has received a December 3, 1986, letter from a commentor which lists some of its concerns regarding this proposed SIP revision. This also constitutes the commentor's notice of its intention to submit critical comments regarding the approval. Therefore, in accordance with the procedure described above, USEPA is today taking final action elsewhere in today's Federal Register to withdraw its September 9, 1986, approval of this revision to Wisconsin Ozone SIP and, in this notice, is proposing to approve this revision.

Background

The Continental Can Company has can manufacturing plants in two cities in Wisconsin, Milwaukee and Racine. Both facilities are subject to the requirements for can coating operations identified at NR 154.13(4)(c) of the Wisconsin Administrative Code. On November 14, 1984, Continental Can requested permission from the State to use internal offsets as a method of compliance for each of the two facilities. One internal offset would be applicable to six can coating lines at the Milwaukee plant, and another would be applicable two can coating lines at the Racine plant. The Wisconsin Department of Natural Resources (WDNR) approved the use of internal offsets for both plants, subject to certain conditions, and submitted the offsets to USEPA as a State Implementation Plan (SIP) revision on August 20, 1985. A discussion of the SIP revision is presented below.

Internal Offset

Continental Can Company has proposed the use of internal offsets at both its Milwaukee and Racine facilities, meaning that the VOC emissions from each facility would be limited to a daily weighted average emission limit from all can coating lines at that facility, as determined by the formula identified at NR 154.13(13)(b) of the Wisconsin Administrative Code. The internal offset allows Continental Can credit for those coatings and coating lines that reduce, to offset emissions from other coatings and coating lines that exceed the SIP-allowable limit. The emissions allowed by the internal offsets are equivalent to those that would occur if each coating used were at the limits specified in the SIP. The daily weighted average changes daily as production levels change. The combined emissions from all the coating lines at each facility have to meet that facility's computed daily weighted average for that day. The daily weighted average is computed using the allowable emission rate for each coating or printing line, as defined in section NR 154.13(4)(c) of the Wisconsin Administrative Code. The proposed compliance plan also specifies maximum hourly VOC emission limits

VOL
54
ISS
79
AP
26
1989
UMI

for each coating line, as required by NR 154.13(13)(b)2.a. of the Wisconsin Administrative Code. These limits cannot be exceeded regardless of changes in production.

In addition, Continental Can is required to keep records of coating and solvent characteristics, as well as daily consumption of solvent and coatings, for both plants. The daily weighted average is federally enforceable, base upon this recordkeeping requirement which specifies that these records be available for inspection, as well as the emission limits contained in NR 154.13(4)(c). Continental Can has developed a computer program to aid the calculation of actual and allowable emissions and the scheduling of production, in order to comply with the emission limits contained in NR 154.13(4)(c). This computer program was developed based on the December 8, 1980 (45 FR 80824), **Federal Register**, which contains USEPA's policy regarding compliance with VOC emission limitations for can coaters.

The proposed compliance plan is subject to the following conditions:

(1) Continental Can will perform tests to determine the efficiencies of the capture system and emission reduction requipment of the sheet coating line at the Milwaukee plant.

(2) Continental Can will maintain records of coating and solvent characteristics, as well as daily consumption of coatings and solvents, for both plants. The records will contain sufficient detail for the WDNR to determine compliance with the daily allowable emissions rate. These records will be maintained at each facility and will be available for inspection.

The internal offsets became effective in the State of Wisconsin on September 11, 1985, when a civil enforcement action filed by USEPA against Continental Can was resolved. A consent decree was lodged on that date.

Conclusion

USEPA has reviewed a compliance plan for the Continental Can Company which consists of internal offsets for two can manufacturing plants located in Milwaukee and Racine, respectively. The compliance plan incorporates the use of a daily weighted average at each plant, a computer program to aid in emission calculation and production scheduling, as well as specified testing and recordkeeping conditions. However, the variances do not explicity identify test methods to be used to determine capture and control efficiencies of control equipment and VOC content of coating. USEPA has determined that the proposed compliance plan meets USEPA's requirements for air pollution control from can coating operations. USEPA has also determined that the use of internal offsets at the two facilities will not cause an increase in VOC emissions and, consequently, will not interfere with attainment of the ozone NAAQS in southeastern Wisconsin. Therefore, USEPA is proposing approval of the internal offsets contingent upon WNDR specifying the test methods to be used in determining compliance.

It should be noted that Milwaukee and Racine are both included (as part of the Milwaukee Metropolitan Statistical Area) in Appendix A of the November 24, 1987, Proposed Post-1987 Ozone Policy (52 FR 45044). Table A–1 in Appendix A lists "Potential 1988 SIP Areas-Ozone." Milwaukee is listed as an area which will exceed the Ozone standard in the period from 1985–1987. Finally, on May 26, 1988, USEPA notified the governor of Wisconsin that Wisconsin Ozone SIP is substantial inadequate to assure attainment of the Ozone NAAQS.

Interested persons are invited to submit comments on this proposed approval. USEPA will consider all comments received within 30 days of the publication of this notice.

Under 5 U.S.C. section 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities (See 46 FR 8709).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Authority: 42 U.S.C. 7401–7642.

Valdas V. Adamkus,

Regional Administrator.

[PP 8E3619, 8E3645/P481; FRL–3561–4]

Pesticide Tolerances for Iprodione

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that tolerances established for the combined residues of the fungicide iprodione, its isomer, and its metabolite in or on the raw agricultural commodities cherries (sweet), nectarines, peaches, and plums be amended to allow residues of the pesticide in or on these commodities resulting from postharvest application. The proposed amendments to the tolerances for iprodione were requested in petitions submitted by the Interregional Research Project No. 4 (IR–4).

DATE: Comments, identified by the document control number [PP 8E3619, 8E3645/P481], must be received on or before May 26, 1989.

ADDRESS: By mail, submit written comments to:

Public Docket and Freedom of Information Section, Field Operations Division (H–7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW.,

In person, bring comments to:

Rm. 246, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 246 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT:

By Mail:

Hoyt Jamerson, Emergency Response and Minor Use Section (H–7505C), Registration Division, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 716C, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)–557–2310.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petitions to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR–4 Project, and the named Agricultural Experiment Stations. These petitions requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose amendments to tolerances established for the combined residues of the fungicide iprodione [3-(3,5-dichlorophenyl)-N-(1-methylethyl)-2,4-dioxo-1-imidazolidinecarboxamide], its isomer [3-(1-methylethyl)-N-(3,5-dichlorophenyl)-2,4-dioxo-1-imidazolidinecarboxamide], and its metabolite 3-(3,5-dichlorophenyl)-2,4-dioxo-1-imidazolidinecarboxamide in or on certain raw agricultural commodities. IR–4 requested that tolerances established for residues of iprodione in or on cherries (sweet), peaches (including nectarines), and plums be amended to allow residues resulting from postharvest application at the existing tolerance level of 20 parts per million (ppm), which is established for residues resulting from preharvest application of the fungicide to these commodities.

1. *PP 8E3619.* Petition submitted on behalf of the California Agricultural Experiment Station proposed amending the existing tolerance for residues of iprodione on sweet cherries at 20 parts per million (ppm) to allow residues resulting from postharvest use of the fungicide.

2. *PP 8E3645.* Petition submitted on behalf of the California Agricultural Experiment Station proposed amending the existing tolerance for residues of iprodione on peaches (including nectarines) and plums at 20 ppm to allow residues of the fungicide resulting from postharvest application of the herbicide.

The data submitted in the petitions and other relevant material have been evaluated. The toxicological data considered in support of the proposed amendments include:

1. A three-generation rat reporduction study with a no-observed-effect level (NOEL) of 500 ppm (25 milligrams (mg)/kilogram (kg) of body weight per day), a reproductive lowest-effect level (LEL) of 2,000 ppm (100 mg/kg/day), and a systemic NOEL equal to or greater than 2,000 ppm (100 mg/kg/day, highest dose tested).

2. A rabbit teratology study in which doses administered by gavage at 0, 20, 60, and 200 mg/kg/day indicate a maternal NOEL of 20 mg/kg/day and a NOEL for developmental toxicity at 60 mg/kg/day. Developmental toxicity (skeletal variations) was demonstrated at 200 mg/kg/day.

3. A 24-month rat feeding/oncogenicity study using dosage levels of 125, 250, and 1,000 ppm (equivalent to 6.25, 12.5, and 50 mg/kg body weight/day), which showed no oncogenic effects under the conditions of the study and resulted in a systemic NOEL equal to or greater than 1,000 ppm.

4. An 18-month oncogenicity study in mice using dosage levels of 200, 500, and 1,250 ppm (equivalent to 28.6, 71.4, and 178.6 mg/kg body weight/day), which showed no oncogenic effects under the conditions of the study.

5. A 1-year dog feeding study with a NOEL of 4.2 mg/kg body weight/day (equivalent to 160 ppm).

6. A 90-day dog feeding study using dosage levels of 800, 2,400 and 7,200 ppm (20, 60, and 180 mg/kg body weight/day) with a NOEL of 2,400 ppm and a LEL of 7,200 ppm (liver hypertrophy).

7. A mammalian cell forward mutation study, a Chinese hamster ovary (CHO) metaphase analysis study, and a sister chromatid exchange study which were negative for mutagenic effects and a DNA damage study which was positive for DNA damage at the highest dose tested, 20.6 microgram/disc.

The acceptable daily intake (ADI), based on the 1-year dog feeding study with a NOEL of 4.2 mg/kg/day and using a 100-fold safety factor, is calculated to be 0.04 mg/kg of body weight/day. The theoretical maximum residue contribution (TMRC) from existing tolerances is calculated to be 0.044028 mg/kg/day; the current action will not increase the TMRC. The current action will not utilize any additional percent of the ADI; tolerances for the commodities, which are established for pre-harvest application of iprodione, are also adequate to cover residues resulting from postharvest application.

The nature of the residues is adequately understood and an adequate analytical method, gas liquid chromatography using an electron capture detector, is available in FDA's *Pesticide Analytical Manual* (PAM), Vol. II, for enforcement purposes. There are currently no actions pending against the continued registration of this chemical.

Based on the above information considered by the Agency and the fact that cherries, peaches, nectarines, and plums are not considered animal feed commodities, the proposed amendments to 40 CFR 180.399 would protect the public health. Therefore, it is proposed that the tolerances be amended as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this document in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 8E3619, 8E3645/P481]. All written comments filed in response to these petitions will be available in the Public Docket and Freedom of Information Section, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Recording and recordkeeping requirements.

Dated: April 12, 1989.

Frank Sanders,

Acting Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR Part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. Section 180.399(a) is amended by revising the entries for cherries (sweet), nectarines, peaches, and plums, to read as follows:

§ 180.399 Iprodione; tolerances for residues.

(a) * * *

Commodities	Parts per million
* * * * *	
Cherries (sweet) (pre- and postharvest)	20.0
* * * * *	
Nectarines (pre- and postharvest)	20.0
* * * * *	
Peaches (pre- and postharvest)	20.0
* * * * *	
Plums (pre- and postharvest)	20.0
* * * * *

VOL 54 ISS 79 AP 26 1989 UMI

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Part 69

[CGD 87-015b]

RIN 2115-AC67

Tonnage Measurement of Vessels

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing a major revision of its vessel tonnage measurement regulations. The proposal would incorporate the system of measurement established under the International Convention on Tonnage Measurement of Ships, 1969, and provide a framework for phasing in the Convention Measurement System as the method of measuring ships domestically to establish uniformity in vessel measurement. The availability of the alternate domestic measurement systems would be continued for regulatory purposes so that the application of the laws of the United States would be preserved in order that vessels engaged in domestic commerce would not be adversely affected.

This revision is necessary to implement the statutory mandate calling for these changes. In the process of incorporating these changes into the regulations, the Coast Guard is proposing to rearrange and renumber the regulations in a more current and readable format.

This proposal should carry out the intent of Congress, while facilitating the use of these complex regulations by the maritime industry.

DATE: Comments must be received on or before June 26, 1989.

ADDRESSES: Comments may be mailed to the Executive Secretary, Marine Safety Council (G-LRA-2/3600) (CGD 87-015b), U.S. Coast Guard, Washington, DC 20593-0001. Comments received may be inspected or copied at the Office of the Marine Safety Council, U.S. Coast Guard, Room 3600, 2100 Second Street SW., Washington DC, 20593-0001 between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (202) 267-1477.

FOR FURTHER INFORMATION CONTACT: Mr. Dennis A. Lamont, Tonnage Survey Branch, (202) 267-2292.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, data, or arguments. Each letter should include the name and address of the person submitting the comments, reference the document number (CGD 87-015b) and the specific section of the proposal to which each comment applies, and give the reasons for each comment. If acknowledgment of receipt of comments is desired, a stamped, addressed post card or envelope should be enclosed.

All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. The proposal may be changed in view of the comments received. No public hearing is planned but one may be held at a time and place to be set in a later notice in the **Federal Register** if requested in writing and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information

The principal persons involved in drafting this proposal are Mr. Dennis A. Lamont, Project Manager, and Mr. Stephen H. Barber, Project Counsel, Office of Chief Counsel.

Scope of this Rulemaking

This rulemaking is limited in scope to—

(a) The addition of regulations necessary to implement the International Convention on Tonnage Measurement of Ships, 1969, (Convention) and to comply with other tonnage measurement requirements of Pub. L. 99-509 (Part J of 46 U.S.C. Subtitle II); and

(b) The reorganization and clarification of the regulations presently found in Part 69 of Title 46 of the Code of Federal Regulations (46 CFR Part 69) concerning the Standard, Dual, and Simplified Measurement Systems, without substantive change not called for under Pub. L. 99-509.

A great effort has been made not to omit or substantively change the existing regulations not affected by Pub. L. 99-509. However, we ask that you review this proposal carefully in light of the existing regulations and notify the Coast Guard (see **"ADDRESS"**) of any omission or addition which would vary the meaning or effect of the existing regulations. In doing so, we ask that you reference the existing provision and the corresponding proposed provision, if any. Additional changes recommended for improving the tonnage measurement regulations or process that are outside of the scope of the present rulemaking may have to be considered at a later time under a separate rulemaking.

Background

Tonnage is a measure of a vessel's volume and is used for international, customs, and regulatory purposes, such as applying international maritime agreements, setting customs duties, and determining the size and licensing of the crew. The ancient practice of measuring (admeasuring) a vessel to determine its earning capacity (i.e. the volume of its commercial cargo and passenger spaces) evolved internationally into a host of complex schemes which often produced widely varying tonnages from country to country with little relationship to the vessel's actual size. Internationally, the problem was addressed in the International Convention on Tonnage Measurement of Ships, 1969, (Convention) which established a universal system of measurement for vessels engaged on a foreign voyage. The Convention came into effect in the United States on February 10, 1983. Domestically, Congress addressed the problem in the Omnibus Budget Reconciliation Act of 1986 (Pub. L. 99-509; October 21, 1986) by authorizing the promulgation of regulations—

(a) For phasing in the Convention Measurement System as the method for measuring ships domestically in order to establish uniformity in measurement; and

(b) For retaining the existing domestic systems (i.e. the Standard, Dual, and Simplified Measurement Systems) as alternative systems for use in applying domestic laws based on tonnage, in order that the vessels engaged in domestic activities will not be adversely affected.

Changes Resulting from Pub. L. 99-509

Public Law 99-509 made major revisions to the domestic measurement laws and consolidated them into a new Part J of 46 U.S.C. Subtitle II. Part J authorizes the Secretary of the Department of Transportation (Coast Guard) to promulgate the following regulations:

(a) The Convention Measurement System would be the primary system for measuring all U.S. vessels of 79 feet or more in length. Vessels that are measured under the Convention Measurement System and that will engage on a foreign voyage are issued an International Tonnage Certificate (1969), as required by the Convention. The tonnage listed on this Certificate is used for the application of all U.S. laws based on tonnage, except as under paragraph (b) of this section.

(b) The existing Standard and Dual Measurement Systems would be retained for measuring (1) vessels under 79 feet in length, (2) vessels measured under the Convention Measurement System which the owner chooses also to have measured under the Standard or Dual Measurement Systems for the purpose of applying certain laws and regulations based on tonnage, and (3) vessels operating only on the Great Lakes.

(c) The Simplified Measurement System would be extended to all vessels of less than 79 feet in overall length. All vessels of 79 feet or more in overall length would be excluded from using this system.

Discussion of the Proposed Rule

This proposed rule completely reorganizes the existing regulations in Part 69, deletes out-of-date definitions, terms, and tables, incorporates the Convention Measurement System requirements, and renumbers each section according to current practices. (See the "Derivation and Distribution Tables" section in this preamble.) Proposed Part 69 is divided into five subparts (Subpart A—General, B—Convention Measurement System, C—Standard Measurement System, D—Dual Measurement System, and E—Simplified Measurement System) to clearly differentiate the various measurement systems and identify the general rules.

(a) *Subpart A—General.* This contains the provisions of existing Subpart 69.01 of Part 69 and other provisions applicable to measurement procedures and processes in general.

Proposed § 69.9 contains definitions of terms used in Subpart A and throughout the remaining subparts. In working with one measurement system's subpart, these definitions are used in addition to the definitions for that subpart.

Of particular interest is proposed § 69.11; which is intended to assist the individual vessel owner in identifying the specific measurement system or systems applicable to the vessel without the owner having to read Part 69 in its entirety. Proposed § 69.11 indicates that the Convention Measurement System is the required system for vessels of 79 feet or more in length unless specifically exempted, establishes the Standard and Dual Measurement Systems as those that may, at the owner's option, be used in applying certain U.S. laws and regulations based on tonnage, and limits the Simplified Measurement System to vessels under 79 feet in length that their owners choose not to have measured under the Standard or Dual Measurement Systems.

Proposed § 69.15 restates existing § 69.01-11, concerning measurement organizations authorized to measure vessels under Part 69. The delegation of the measurement function for certain vessels to the American Bureau of Shipping (ABS) was published as a final rule on May 1, 1987, (52 FR 15947).

Proposed § 69.21 on appeals of measurement decisions is similar to existing § 69.01-17, as amended on May 1, 1987, (52 FR 15947), except that appeals must be submitted to the Commandant via the measurement organization.

Proposed § 69.23 on fees charged by measurement organizations is derived from § 69.01-19, as amended on May 1, 1978, (52 FR 15947).

Proposed § 69.27 restates the recent regulation concerning the application process for organizations seeking delegation of authority to measure vessels under Part 69. The existing provision (§ 69.01-20) became effective on June 6, 1988, (53 FR 20619).

(b) *Subpart B—Convention Measurement System.* This proposed subpart implements the Convention and those provisions of Pub. L. 99-509 relating to the Convention (46 U.S.C. 14301 through 14307) and states the procedures for measuring a vessel under the Convention Measurement System.

(c) *Subpart C—Standard Measurement System.* This proposed subpart implements 46 U.S.C. 14512 and contains the regulations in existing Part 69, Subpart 69.03, which states the procedures for measuring a vessel under the Standard Measurement System. The proposed subpart incorporates the relevant definitions and figures in existing Part 69, Subparts 69.07, 69.09, 69.11, and 69.13. In the present regulations, the Standard and the Dual Measurement Systems are referred to as "formal measurement systems". The term "formal measurement systems" would be deleted as confusing and unnecessary under this proposal.

(d) *Subpart D—Dual Measurement System.* This proposed subpart implements 46 U.S.C. 14513 and incorporates the regulations in existing Part 69, Subpart 69.15, which states the procedures for measuring a vessel under the Dual Measurement System. As discussed in paragraph (c) above, this system no longer would be referred to as a "formal measurement system" under this proposal. The table and figures used in this proposed subpart have been redrafted to delete unnecessary information on vessel dimensions and to add examples, where helpful.

(e) *Subpart E—Simplified Measurement System.* This proposed subpart implements 46 U.S.C 14522 and incorporates the regulations in existing Part 69, Subpart 69.05, which states the procedures for measuring a vessel under the Simplified Measurement System.

Derivation and Distribution Tables

The material in existing Part 69 would be entirely rearranged and renumbered using the current regulatory format. The following tables should assist the reader in locating the source of or Congressional authority for the material in this proposal.

E.O. 12291 and DOT Regulatory Policies and Procedures

These proposed regulations are considered to be non-major under Executive Order 12291 and nonsignificant under Department of Transportation (DOT) regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this proposal has been found to be so minimal that further evaluation is unnecessary.

As required by Pub. L. 99-509, this proposal would change the measurement system under which some vessels are measured and is administrative in nature. This proposal would affect barges and recreational vessels of 79 feet or more in length by eliminating the option of having these vessels measured under the Simplified Measurement System. However, measurement of these vessels, if they will not engage on a foreign voyage, is and would continue to be at the owner's option. Measurement is usually a one-time expenditure that is insignificant in terms of the overall cost of owning and operating the vessel. Further, it is noted that this proposal would not affect vessels presently measured and documented under laws of the United States until those vessels are altered.

The potential impacts that this proposal might have on States and local governments with laws or regulations based on Federally-assigned tonnage would result from statutory mandate, as discussed under "Federalism Implications" in this preamble.

Regulatory Flexibility Act

Under the Regulatory Flexibility Act (5 U.S.C. 601 through 612), the Coast Guard must consider whether this proposal would have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses which are not dominant in their field and which would otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632).

The economic impact of this proposal is expected to be minimal. This proposal would affect the measurement requirements for certain larger vessels and would limit the option of measurement under the Simplified Measurement System to smaller vessels. No new application costs, burdens, or procedures would be imposed and the larger vessels presently required to be measured under two systems would be required to be measured under only one system. Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposal, if promulgated, would not have a significant economic impact on a substantial number of small entities. If, however, you feel that your business may qualify as a small entity and that the proposed rules would have a significant economic impact on your business, please notify the Coast Guard (see "ADDRESS") and explain why you feel your business qualifies and in what way and to what degree the proposed rules would affect your business economically.

Paperwork Reduction Act

This proposed rulemaking reorganizes without substantive change sections already containing information collection requirements. These items have been submitted to the Office of Management and Budget (OMB) for review under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) and have been approved by OMB. The section numbers and the corresponding OMB approval numbers are as follows: §§ 69.17, 69.19, and 69.21—OMB Control Numbers 2115-0080 and 2115-0086; § 69.27—OMB Control Number 2115-0567; §§ 69.55, 69.105, 69.121(d), 69.159, and 69.179—OMB Control Number 2115-0080; and § 69.205—OMB Control Number 2115-0086. A request has been submitted to OMB to consolidate all information collection requirements in Part 69 under one OMB Control Number.

This proposed rulemaking would impose no new paperwork burden requirements but merely changes the measurement system under which some larger vessels are measured. An estimated 10 percent of all vessels of 79 feet or more in length are presently required to acquire two tonnage certificates. This proposal would reduce that requirement to one certificate for each vessel.

As required by Pub. L. 99-509, this proposal also would eliminate the option to have barges and recreational vessels of 79 feet or more in length measured under the Simplified Measurement System. Although the existing and proposed regulations do not require these vessels to be measured under any system (unless they will engage on a foreign voyage), the proposal would permit these vessels to be measured under the Convention Measurement System or, if the vessel is to operate only on the Great Lakes, under the Standard or Dual Measurement System. This proposal might cause an estimated 34 additional vessels per year to be measured under the Convention. Standard, or Dual Measurement Systems, rather than under the Simplified Measurement System.

Federalism Implications

Based on the information available to it at the present time, the Coast Guard is unable to determine whether the proposed rule would have sufficient federalism implications to warrant the preparation of a Federalism Assessment. The information available to the Coast Guard indicates that the proposed regulations would have a minimal effect on State or local laws and regulations based on Federally-assigned tonnages by requiring or permitting vessels presently eligible to be measured under one system to be measured under another system. Measurement under another system would produce a different tonnage. However, these proposed changes and their resulting effect on the States and local governments would be due to specific statutory mandate under Pub. L. 99-509 and not to discretionary action by the Coast Guard. Any effect on State or local governments most likely would be temporary because they could amend their laws or regulations as necessary to maintain the status quo.

The Coast Guard specifically requests public comment (see "ADDRESSES") on any substantial direct effect this proposal would have on—

(a) A State or a unit of local government or other political subdivision established by the State (a "State");

(b) The relationship between the Federal government and a State; or

(c) The distribution of power and responsibilities among the various levels of government.

Environmental Assessment

The Coast Guard has considered the environmental impact of the proposed regulations and concluded that, under section 2.B.2.1. of Commandant Instruction M16475.1B, the proposed regulations are categorically excluded from further environmental documentation. This proposal is an administrative and procedural regulation concerning the procedures for measuring vessels and clearly has no environmental impact.

List of Subjects in 46 CFR Part 69

Measurement standards, Reporting and recordkeeping requirements, Vessels.

For the reasons set out in the preamble, 46 CFR Part 69 is proposed to be amended as follows:

1. By revising Part 69 to read as follows:

PART 69—MEASUREMENT OF VESSELS

Subpart A—General

Sec.
69.1 Purpose.
69.3 Applicability.
69.5 Vessels required or eligible to be measured.
69.7 Vessels transiting the Panama and Suez Canals.
69.9 Definitions.
69.11 Determining the measurement system or systems for a particular vessel.
69.13 Deviating from the provisions of a measurement system.
69.15 Organizations authorized to measure vessels.
69.17 Application for measurement services.
69.19 Remeasurement and adjustment of tonnage.
69.21 Appeals.
69.23 Fees.
69.25 Penalties.
69.27 Delegation of authority to measure vessels.
69.29 OMB control numbers assigned under the Paperwork Reduction Act.

Subpart B—Convention Measurement System

69.51 Purpose.
69.53 Definitions.
69.55 Application for measurement services.
69.57 Gross tonnage.
69.59 Enclosed spaces.
69.61 Excluded spaces.
69.63 Net tonnage.
69.65 Calculation of volumes.
69.67 Marking of cargo spaces.
69.69 Issuance of an International Tonnage Certificate (1969).
69.71 Change of net tonnage.
69.73 Variance from the prescribed method of measurement.
69.75 Figures.

Subpart C—Standard Measurement System

69.101 Purpose.
69.103 Definitions.
69.105 Application for measurement services.
69.107 Gross and net tonnages.
69.109 Under-deck tonnage.
69.111 Between-deck tonnage.
69.113 Superstructure tonnage.
69.115 Excess hatchway tonnage.
69.117 Spaces exempt from inclusion in gross tonnage.
69.119 Spaces deducted from gross tonnage.
69.121 Engine room deduction.
69.123 Figures.

VOL 54 ISS 79 AP 26 1989 UMI

Subpart D—Dual Measurement System

69.151 Purpose.
69.153 Application of other laws.
69.155 Measurement requirements.
69.157 Definitions.
69.159 Application for measurement services.
69.161 Gross and net tonnages.
69.163 Under-deck tonnage.
69.165 Between-deck tonnage.
69.167 Superstructure tonnage.
69.169 Spaces exempt from inclusion in gross tonnage.
69.171 When the tonnage mark is considered submerged.
69.173 Tonnage assignments for vessels with only one deck.
69.175 Tonnage assignments for vessels with a second deck.
69.177 Markings.
69.179 Certification of markings.
69.181 Locating the line of the second deck.
69.183 Figures.

Subpart E—Simplified Measurement System

69.201 Purpose.
69.203 Definitions.
69.205 Application for measurement services.
69.207 Measurements.
69.209 Calculation of tonnages.

Authority: 46 U.S.C. 14102, 14103; 49 CFR 1.46. Section 69.27 issued under 44 U.S.C. 3507; 49 CFR 1.45.

Subpart A—General

§ 69.1 Purpose.

This part implements legislation concerning the measurement of vessels to determine their tonnage (Part J of 46 U.S.C. Subtitle II). Tonnages are required before a vessel may be documented as a vessel of the United States. Also, tonnages are used to apply commercial vessel safety regulations based on tonnage, to meet the requirements of the International Convention on Tonnage Measurement of Ships, 1969, and to determine Federal and State regulatory fees and private operational charges based on tonnage. Tonnages are determined by the physical measurement of a vessel (Convention, Standard, and Dual Measurement Systems) or by application of a formula based on the vessel's dimensions provided by the owner (Simplified Measurement System). This part indicates the particular measurement system or systems under which the vessel is required or eligible to be measured, describes the application and measurement procedures for each system, identifies the organizations authorized to measure vessels under this part, and provides for the appeal of measurement organizations' decisions.

§ 69.3 Applicability.

This part applies to vessels of the United States over five net tons (as that tonnage is determined under this part) which are required or eligible to be measured under this part, a Federal law, or an international agreement or which are subject to a Federal law or international agreement based on the vessel's tonnage.

§ 69.5 Vessels required or eligible to be measured.

(a) The following vessels (including public vessels) are required to be measured under this part:

(1) Vessels that are to be documented as a vessel of the United States.

(2) Vessels of 79 feet or more in overall length that engage on a foreign voyage.

(3) Vessels subject to a Federal law or regulation based on vessel tonnage.

(4) Vessels determined by the Commandant to require measurement under this part.

(b) The following vessels are not required to be measured under this part but are eligible to be measured, if the owner requests:

(1) Public vessels that are not to be documented and will not engage on a foreign voyage.

(2) Vessels of war.

§ 69.7 Vessels transiting the Panama and Suez Canals.

(a) All vessels intending to transit the Panama Canal, other than vessels of war, must be measured and certificated under the system prescribed in 35 CFR Part 135.

(b) All vessels intending to transit the Suez Canal must be measured and certificated under the Arab Republic of Egypt Suez Canal Authority Rules of Navigation, Part IV.

(c) Panama Canal and Suez Canal tonnage certificates are in addition to tonnage certificates issued under this part.

(d) Tonnage measurement services for Panama Canal and Suez Canal certificates are provided by measurement organizations authorized by the respective canal authority.

§ 69.9 Definitions.

As used in this part—

"Commandant" means Commandant of the Coast Guard at the following address: Commandant (G–MVI), U.S. Coast Guard, 2100 Second Street SW., Washington, DC 20593–0001.

"Convention" means the International Convention on Tonnage Measurement of Ships, 1969.

"Convention Measurement System" means the system under Subpart B of this part.

"Dual Measurement System" means the system under Subpart D of this part.

"Great Lakes" means the Great Lakes of North America and the St. Lawrence River west of a rhumb line drawn from Cap des Rosiers to West Point, Anticosti Island, and, on the north side of Anticosti Island, the meridian of longitude 63 degrees west.

"Gross tonnage" means a vessel's approximate volume. Under the Convention Measurement System, it means the total volume of all enclosed spaces modified by a coefficient. Under the Standard and Dual Measurement Systems, it means the total volume of all enclosed spaces less certain exempt spaces. Under the Simplified Measurement System, it means the product of a vessel's length, depth, and breadth modified by a coefficient.

"Net tonnage" means a measure of a vessel's earning capacity. Under the Convention Measurement System, it means the volume of the actual cargo and passenger spaces modified by a formula based on the vessel's volume. Under the Standard and Dual Measurement Systems, it means the gross tonnage less certain deducted spaces. Under the Simplified Measurement System, it means the gross tonnage modified by a coefficient.

"Overall length" means the horizontal distance between the foremost part of a vessel's stem to the aftermost part of its stern, excluding fittings and attachments.

"Simplified Measurement System" means the system under Subpart E of this part.

"Standard Measurement System" means the system under Subpart C of this part.

"Tonnage" means the volume of a vessel's enclosed spaces as calculated under a measurement system in this part. Tonnage calculated under the Standard, Dual, or Simplified Measurement Systems is based on tons of 100 cubic feet each. Tonnage calculated under the Convention Measurement System is based on tons of 100 cubic feet modified by a logarithmic function.

"Vessel engaged on a foreign voyage" means a vessel—

(a) Arriving at a place under the jurisdiction of the United States from a place in a foreign country;

(b) Making a voyage between places outside of the United States;

(c) Departing from a place under the jurisdiction of the United States for a place in a foreign country; or

(d) Making a voyage between a place within a territory or possession of the United States and another place under the jurisdiction of the United States not within that territory or possession.

"Vessel of war" means "vessel of war" as defined in 46 U.S.C. 2101.

§ 69.11 Determining the measurement system or systems for a particular vessel.

(a) *Convention Measurement System (Subpart B).* (1) Except as otherwise provided in this section, this system applies to a vessel documented or to be documented under Part 67 of this chapter and to a vessel engaged on a foreign voyage.

(2) This system does not apply to the following vessels:

(i) A vessel of less than 79 feet in overall length.

(ii) A vessel operating only on the Great Lakes, unless the owner requests measurement under this system.

(iii) A vessel that is not engaged on a foreign voyage and that had its keel laid or was at a similar stage of construction before January 1, 1986, unless the owner requests measurement under the Convention Measurement System or unless the vessel undergoes a change that the Commandant finds substantially affects the vessel's gross tonnage.

(iv) Before July 19, 1994, an existing vessel, unless the owner requests or unless the vessel undergoes a change that the Commandant finds substantially affects the vessel's gross tonnage.

(v) A vessel of war.

(3) A vessel made subject to this system at the request of the owner may be remeasured only under this system.

(4) For the purpose of vessel documentation, a vessel measured under this system is not required to be measured under another system.

(5) After July 18, 1994, a vessel the keel of which was laid or that was at a similar stage of construction before July 18, 1982, (except a vessel measured under this system at the request of the owner or because of a change that substantially affects the vessel's gross tonnage) may retain its tonnages in effect on July 18, 1994, for the application of relevant requirements under an international agreement (except the Convention) or other laws of the United States. However, if the vessel undergoes a change after July 18, 1994, that the Commandant finds substantially affects the vessel's gross tonnage, the vessel must be remeasured only under this system.

(6) A tonnage assignment under this system does not affect the applicability to the vessel of international agreements to which the United States Government is a party that are not in conflict with the Convention or with the application of International Maritime Organization (IMO) Resolutions A.494(XII) of November 19, 1981, A.540(XIII) of November 17, 1983, and A.541(XIII) of November 17, 1983. When applicable to the vessel, these Resolutions provide interim schemes for using the vessel's existing gross tonnage, instead of the gross tonnage under the Convention Measurement System, for applying the International Convention for the Safety of Life at Sea (SOLAS), the International Convention on Standards of Training, Certification, and Watchkeeping for Seafarers, 1978, (STCW), and the International Convention for the Prevention of Pollution from Ships, 1973, (MARPOL), respectively.

(b) *Standard Measurement System (Subpart C).* This system applies to a vessel not required to be measured under the Convention Measurement System if the vessel is to be documented or if the application of a law of the United States to the vessel depends on the vessel's tonnage. Upon request of the owner, this system also applies to a documented vessel measured under the Convention Measurement System when Standard Measurement System tonnages are to be used in applying the provisions of a law under 46 U.S.C. 14305.

(c) *Dual Measurement System (Subpart D).* This system may be applied, at the owner's option, instead of the Standard Measurement System, to a vessel eligible or required to be measured under the Standard Measurement System.

(d) *Simplified Measurement System (Subpart E).* This system may be applied, at the owner's option, instead of the Standard Measurement System to a vessel under 79 feet in overall length.

§ 69.13 Deviating from the provisions of a measurement system.

(a) In measuring a vessel under a measurement system in this part, all provisions of that system applicable to the vessel must be observed.

(b) The provisions of more than one measurement system may not be applied interchangeably or combined.

§ 69.15 Organizations authorized to measure vessels.

(a) Except as under paragraphs (c) and (d) of this section, all U.S. vessels to be measured or remeasured under the Convention, Standard, or Dual Measurement Systems must be measured by the American Bureau of Shipping (ABS). Applications for measurement must be directed to the American Bureau of Shipping, P.O. Box 910 (45 Eisenhower Drive), Paramus, New Jersey 07653–0910, (201) 712–5092.

(b) All vessels to be measured or remeasured under the Simplified Measurement System must be measured by the Coast Guard. Applications for measurement under the Simplified Measurement System are obtainable from any Coast Guard documentation office.

(c) All U.S. Coast Guard vessels and all U.S. Navy vessels of war to be measured or remeasured under any measurement system must be measured by the Coast Guard.

(d) At the option of the Commandant, the Coast Guard may measure any vessel to determine its tonnage.

(e) The appropriate certificate of measurement is issued by the measuring organization as evidence of the vessel's measurement under this part.

§ 69.17 Application for measurement services.

(a) Applications for measurement are available from and, once completed, are submitted to the measurement organization listed in § 69.15 that will perform the service. The contents of the application are described in this part under the requirements for each system.

(b) Applications for measurement under more than one system may be combined.

(c) For vessels under construction, the application must be submitted before the vessel is advanced in construction. Usually, this means as soon as the decks are laid, holds cleared of encumbrances, engine and boilers installed, and accommodations partitioned.

§ 69.19 Remeasurement and adjustment of tonnage.

(a) If a vessel that is already measured is to undergo a structural alteration or if the use of a space within that vessel is to be changed, a remeasurement may be required. Vessel owners shall report immediately to a measurement organization listed in § 69.15 any intent to structurally alter the vessel or to change the use a space within the vessel. The organization advises the owner if remeasurement is necessary. Spaces not affected by the alteration or change need not be remeasured.

(b) When there is a perceived error in the application of a regulation or in the tonnage calculations, the vessel owner should contact the responsible measurement organization. If the error is verified, the tonnage is adjusted as necessary.

VOL 54 ISS 79 AP 26 1989 UMI

(c) If a remeasurement or adjustment of tonnage is required, the organization will issue a new tonnage certificate. If the vessel is documented, the vessel's owner must surrender the Certificate of Documentation as required under Part 67, Subpart 67.25, of this chapter.

(d) A vessel of less than 79 feet in overall length measured under the Standard or Dual Measurement Systems may be remeasured at the owner's request under the Simplified Measurement System.

§ 69.21 Appeals.

(a) The Commandant determines the appropriate application and interpretation of U.S. laws and regulations and international agreements as they are applied to vessels under this part.

(b) Appeals of decisions made by a measurement organization listed in § 69.15 must be submitted in writing with all supporting data to the measurement organization. The measurement organization then forwards the submittals to the Commandant for consideration of the appeal.

(c) While an appeal is in progress, the decision upon which the appeal is based remains in effect. The decision of the Commandant is final agency action.

§ 69.23 Fees.

Organizations listed in § 69.15(a) are authorized to charge a fee for measurement services. Information on fees is available directly from the organizations.

§ 69.25 Penalties.

(a) *General violation.* The owner, charterer, managing operator, agent, master, and individual in charge of a vessel in violation of a regulation in this part are each liable to the United States Government for a civil penalty of not more than $20,000. Each day of a continuing violation is a separate violation. The vessel also is liable in rem for the penalty.

(b) *False Statements.* A person knowingly making a false statement or representation in a matter in which a statement or representation is required by this part is liable to the United States Government for a civil penalty of not more than $20,000 for each false statement or representation. The vessel also is liable in rem for the penalty.

§ 69.27 Delegation of authority to measure vessels.

(a) Under 46 U.S.C. 14103 and 49 CFR 1.46, the Coast Guard is authorized to delegate to a "qualified person" the authority to measure vessels and to issue appropriate certificates of measurement for U.S. vessels that are required or eligible to be measured as vessels of the United States.

(b) Authority to measure and certify U.S. vessels under the Convention, Standard, and Dual Measurement Systems may be delegated to an organization that—

(1) Is a full member of the International Association of Classification Societies (IACS);

(2) Is incorporated under the laws of the United States, a State of the United States, or the District of Columbia;

(3) Is capable of providing all measurement services under the Convention, Standard, and Dual Measurement Systems for vessels domestically and internationally;

(4) Maintains a tonnage measurement staff that has practical experience in measuring U.S. vessels under the Convention, Standard, and Dual Measurement Systems; and

(5) Enters into a Memorandum of Agreement, as described in paragraph (d) of this section.

(c) Applications for delegation of authority under this section must be forwarded to the Commandant and include the following information on the organization:

(1) Its name and address.

(2) Its organizational rules and structure.

(3) The location of its offices that are available to provide measurement services under the Convention, Standard, and Dual Measurement Systems.

(4) The name, qualifications, experience, and job title of each full-time or part-time employee or independent contractor specifically designated by the organization to provide measurement services under the Convention, Standard, or Dual Measurement Systems.

(5) Its tonnage measurement training procedures.

(d) If, after reviewing the application, the Coast Guard determines that the organization is qualified to measure and certify U.S. vessels on behalf of the Coast Guard, the organization must enter into a Memorandum of Agreement with the Coast Guard which—

(1) Defines the procedures for administering and implementing the tonnage measurement and certification processes, including the roles and responsibilities of each party;

(2) Outlines the Coast Guard's oversight role;

(3) Prohibits the organization from using an employee or contractor of the organization to measure and certify the tonnage of a vessel if that employee or contractor is acting or has acted as a tonnage consultant for that same vessel; and

(4) Requires the organization to—

(i) Accept all requests to perform delegated services without discrimination and without regard to the vessel's location, unless prohibited from doing so under the laws of the United States or under the laws of the jurisdiction in which the vessel is located;

(ii) Physically inspect each vessel before issuing a tonnage certificate;

(iii) Provide the Coast Guard with current schedules of measurement fees and related charges;

(iv) Maintain a tonnage measurement file for each U.S. vessel that the organization measures and permit access to the file by any person authorized by the Commandant;

(v) Permit observer status representation by the Coast Guard at all formal discussions that may take place between the organization and other vessel tonnage measurement organizations pertaining to tonnage measurement of U.S. vessels or to the systems under which U.S. vessels are measured;

(vi) Comply with and apply all laws and regulations relating to tonnage measurement of U.S. vessels within the scope of authority delegated; and

(vii) Comply with all other provisions, if any, of the Memorandum of Agreement.

(e) Upon delegation of authority, the organization is listed in § 69.15(a), Organizations authorized to measure vessels.

§ 69.29 OMB control numbers assigned under the Paperwork Reduction Act.

(a) *Purpose.* This section collects and displays the control numbers assigned to information collection and record keeping requirements in this part by the Office of Management and Budget (OMB) pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). The Coast Guard intends that this part comply with 44 U.S.C. 3507(f), which requires that agencies display the current control number assigned by the Director of OMB for each approved agency information collection requirement.

(b) *Display.*

Section of 46 CFR Part 69	Currently assigned OMB control no.
69.17	2115-0060 and 2115-0066.
69.19	Do.
69.21	Do.

Section of 46 CFR Part 69	Currently assigned OMB control no.
69.27	2115-0567.
69.55	2115-0060.
69.105	Do.
69.121(d)	Do.
69.159	Do.
69.179	Do.
69.205	2115-0066.

Subpart B—Convention Measurement System

§ 69.51 Purpose.

This subpart prescribes the requirements for measuring a vessel in order to comply with the International Convention on Tonnage Measurement of Ships, 1969 (Convention), and 46 U.S.C. Chapter 143.

§ 69.53 Definitions.

As used in this subpart—

"Amidships" means the midpoint of the registered length, as "registered length" is defined in this section.

"Cargo space" means an enclosed space appropriated for the transport of cargo which is to be discharged from the vessel. The term does not include a space which qualifies as an excluded space under § 69.61.

"Enclosed space" is defined in § 69.59.

"Excluded space" is defined in § 69.61.

"Gross tonnage" or "GT" means the tonnage determined under § 69.57.

"Line of the upper deck" means a longitudinal line at the underside of the upper deck or, if that deck is stepped, the longitudinal line of the underside of the lowest portion of that deck parallel with the upper portions of that deck.

"Molded depth" means the vertical distance amidships between the following points:

(a) From the line of the upper deck at the vessel's side or, if the vessel has rounded gunwales, from the intersection of the line of the upper deck extended to the molded line of the shell plating as though the gunwales were of angular design.

(b) To the top of the flat keel, to the lower edge of the keel rabbet if the vessel is of wood or composite structure, or to the point where the line of the flat of the bottom extended inward cuts the side of the keel if the vessel's lower part is hollow or has thick garboards.

"Molded draft" means—

(a) For vessels assigned a load line under Parts 42, 44, 45, or 47 of this chapter, the draft corresponding to the Summer Load Line (other than a timber load line);

(b) For passenger vessels assigned a load line under Part 46 of this chapter, the draft corresponding to the deepest subdivision load line assigned;

(c) For vessels to which Parts 42, 44, 45, 46, or 47 of this chapter do not apply but which otherwise have been assigned a load line, the draft corresponding to the Summer Load Line so assigned;

(d) For vessels to which no load line has been assigned but the draft of which is restricted under any Coast Guard requirement, the maximum draft permitted under the restriction; and

(e) For other vessels, 75 percent of the molded depth.

"Net tonnage" or "NT" means tonnage determined under § 69.63.

"Passenger" means a person on board a vessel other than—

(a) The master, a member of the crew, or other person employed or engaged in any capacity in the business of the vessel; and

(b) A child under one year of age.

"Registered breadth" means the maximum breadth of a vessel measured amidships to the molded line of the frame in a vessel with a metal shell and to the outer surface of the hull in all other vessels.

"Registered length" means either 96 percent of the length on a waterline at 85 percent of the least molded depth measured from the top of the flat keel or the length from the fore side of the stem to the axis of the rudder stock on that waterline, whichever is greater. In vessels designed with a rake of keel, this length is measured on a waterline parallel to the design waterline.

"Upper deck" means the uppermost complete deck exposed to weather and sea, which has permanent means of weathertight closing of all openings in the weather part of the deck, and below which all openings in the sides of the vessel are fitted with permanent means of watertight closing.

"Weathertight" means secure against penetration of water into the vessel in any sea condition.

§ 69.55 Application for measurement services.

Applications for measurement under this subpart must include the following information and plans:

(a) Type of vessel.

(b) Vessel's name, official number (if assigned), and intended port of documentation.

(c) Builder's name and the vessel hull number assigned by builder.

(d) Place and year built.

(e) Date keel was laid.

(f) Overall length, breadth, and depth of vessel.

(g) Lines plan.

(h) Booklet of offsets at stations.

(i) Capacity plans for tanks and cargo compartments.

(j) Hydrostatic curves.

(k) Construction plans showing measurements and scantlings of deck structures, hatches, appendages, recesses, and other enclosed spaces.

(l) Arrangement plans.

§ 69.57 Gross tonnage.

Gross tonnage (GT) is determined by the following formula $GT=K_1V$, in which V=total volume of all enclosed spaces in cubic meters and $K_1=0.2+0.02\log_{10}V$.

§ 69.59 Enclosed spaces.

"Enclosed space" means a space which is bounded by the vessel's hull, by fixed or portable partitions or bulkheads, or by decks or coverings other than permanent or movable awnings. No break in a deck, nor any opening in the vessel's hull, in a deck or in a covering of a space, or in the partitions or bulkheads of a space, nor the absence of a partition or bulkhead precludes the space from being included in the enclosed space.

§ 69.61 Excluded spaces.

(a) "Excluded space" means an enclosed space which is excluded from volume (V) in calculating gross tonnage. Except as under paragraph (g) of this section, this section lists the excluded spaces.

(b) A space that is within a structure and that is opposite an end opening extending from deck to deck (except for a curtain plate of a height not exceeding by more than one inch the depth of the adjoining deck beams) and having a breadth equal to or greater than 90 percent of the breadth of the deck at the line of the opening is an excluded space, subject to the following:

(1) Only the space between the actual end opening and a line drawn parallel to the line or face of the opening at a distance from the opening equal to one half of the breadth of the deck at the line of the opening is excluded. (See § 69.75, Figure 1.)

(2) If, because of any arrangement (except convergence of the outside plating as shown in § 69.75, Figure 3), the breadth of the space is less than 90 percent of the breadth of the deck, only the space between the line of the opening and a parallel line drawn through the point where the athwartship breadth of the space is equal to 90 percent or less of the breadth of the deck is excluded. (See § 69.75, Figures 2 and 4.)

VOL 54 ISS 79 AP 26 1989 UMI

(3) When any two spaces, either of which is excluded under paragraph (b)(1) or (b)(2) of this section, are separated by an area that is completely open except for bulwarks or open rails, these two spaces must not be excluded if the separation between the two spaces is less than the least half breadth of the deck in way of the separation. (See § 69.75, Figures 5 and 6.)

(4) When the deck at the line of an opening has rounded gunwales, the breadth of the deck is the distance between the tangent points indicated in § 69.75, Figure 11.

(c) A space that is open to the weather and that is under an overhead deck covering with no connection on the space's exposed sides between the covering and the deck other than the stanchions necessary for the covering's support is an excluded space. An open rail or bulwark fitted at the vessel's side does not disqualify the space from being an excluded space if the height between the top of the rail or bulwark and the overhead structure or curtain plate (if fitted) is not less than 2.5 feet or one-third of the height of the space, whichever is greater. (See § 69.75, Figure 7.)

(d) A space in a side-to-side structure directly in way of opposite side openings not less than 2.5 feet in height or one-third of the height of the structure, whichever is greater, is an excluded space. If the opening is only on one side of the structure, the space to be excluded is limited inboard from the opening to a maximum of one-half of the breadth of the deck in way of the opening. (See § 69.75, Figure 8.)

(e) A space in a structure immediately below an uncovered opening in the deck overhead is an excluded space, if the opening is exposed to the weather and the space to be excluded is limited to the area of the opening. (See § 69.75, Figure 9.)

(f) A recess in the boundary bulkhead of a structure which is exposed to the weather and which has an opening that extends from deck to deck without a means of closing is an excluded space, if the interior width of the space is not greater than the width of the opening and extension of the space into the structure is not greater than twice the width of the opening. (See § 69.75, Figure 10.)

(g) Any space described in paragraphs (b) through (f) of this section which fullfills at least one of the following conditions is not an excluded space:

(1) The space is fitted with shelves or other means designed for securing cargo or stores.

(2) The opening that would otherwise permit the space to be excluded space is fitted with a means of closure.

(3) Other features of the space make it possible for the space to be closed.

§ 69.63 Net tonnage.

Net tonnage (NT) is determined by the formula:

$$NT = K_2 V_c \left(\frac{4d}{3D}\right)^2 + K_3 \left(N_1 + \frac{N_2}{10}\right)$$, in which:

V_c = total volume of cargo spaces in cubic meters.

$K_2 = 0.2 + 0.02 \log_{10} V_c$.

$$K_3 = 1.25 \left(\frac{GT + 10{,}000}{10{,}000}\right)$$

D = molded depth amidships in meters, as "olded depth" is defined in § 69.53.

d = molded draft amidships in meters, as "molded draft" is defined in § 69.53.

N_1 = number of passengers in cabins with not more than eight berths, as "passenger" is defined in § 69.53.

N_2 = number of other passengers, as "passenger" is defined in § 69.53.

GT = cross tonnage as determined under § 69.57.

N_1 plus N_2 must equal the total number of passengers the vessel is permitted to carry as indicated on the Ship's Passenger Certificate. If N_1 plus N_2 is less than 13, both N_1 and N_2 are zero.

$\left(\frac{4d}{3D}\right)^2$ must not be greater than unity.

$K_2 V_c \left(\frac{4d}{3D}\right)^2$ must not be less than 0.25 GT.

NT must not be less than 0.30 GT.

§ 69.65 Calculation of volumes.

(a) Volumes V and Vc used in calculating gross and net tonnages, respectively, must be measured and calculated according to accepted naval architectural practices for the spaces concerned.

(b) The volume of the hull below the upper deck is determined as follows:

(1) If the number and location of sections originally used in making other calculations which relate to the form of the vessel (such as displacement volumes and center of buoyancy) are reasonably available, Simpson's first rule may be applied using those sections.

(2) If the number and location of stations originally used are not reasonably available or do not exist and the hull is of conventional design with faired lines, Simpson's first rule may be applied using a number and location of stations not less than those indicated in § 69.109(g)(1).

(3) If the hull is of standard geometric shape, a simple geometric formula that yields a more accurate volume may be used.

(4) If the lines of the hull are not fair, the volume may be measured by using a combination of methods under this section.

(c) The volume of structures above the upper deck may be measured by applying the superstructure provisions in § 69.113 or by any accepted method or combinations of methods.

(d) Measurements must be taken, regardless of the fitting of insulation or the like—

(1) To the inner side of the shell or structural boundary plating, in vessels constructed of metal; and

(2) To the outer surface of the shell or to the inner side of structural boundary surfaces, in all other vessels.

(e) When determining the volume of a cargo space, measurements must be taken without consideration for insulation, sparring, or ceiling fitted within the space.

(f) Measurements must be to the nearest one-twentieth of a foot.

(g) Calculations must be made on a worksheet and must be sufficiently detailed to permit easy review. The measurement procedures used must be identified on the worksheet.

§ 69.67 Marking of cargo spaces.

Cargo spaces used in determining volume (Vc) for calculating net tonnage must be permanently marked with the letters "CC" (cargo compartment) which are at least four inches in height and positioned so as to be visible at all times.

§ 69.69 Issuance of an International Tonnage Certificate (1969).

On request of the vessel owner, an International Tonnage Certificate (1969) is issued for a vessel measured under this subpart that is 79 feet or more in registered length and that will engage on a foreign voyage. The Certificate is issued to the vessel owner or master and must be maintained on board the vessel when it is engaged on a foreign voyage.

§ 69.71 Change of net tonnage.

(a) When a vessel is altered so that the net tonnage is increased, the new net tonnage must be applied immediately.

(b) A vessel concurrently assigned load lines under both the International Convention on Load Lines (Part 42, 44, 45, or 47 of this chapter) and either the International Convention for the Safety of Life at Sea (SOLAS) (Part 46 of this chapter) or other international agreement must be assigned only one net tonnage. The net tonnage assigned must be the net tonnage applicable to the load line assigned under the International Convention on Load Lines or SOLAS for the trade in which the vessel is engaged.

(c) When a vessel is altered so that the net tonnage is decreased or the vessel's trade is changed so that the load line assigned for that trade under paragraph (b) of this section is no longer appropriate and results in a decrease in its net tonnage, a new International Tonnage Certificate (1969) incorporating that net tonnage may not be issued until twelve months after the date on which the current Certificate was issued. However, if one of the following apply, a new Certificate may be issued immediately:

(1) The vessel is transferred to the flag of another nation.

(2) The vessel undergoes alterations or modifications which the Coast Guard deems to be of a major character, such as the removal of a superstructure which requires an alteration of the assigned load line.

§ 69.73 Variance from the prescribed method of measurement.

(a) When application of this subpart to a novel type vessel produces unreasonable or impractical results, the Commandant may determine a more suitable method of measurement.

(b) Requests for a determination must be submitted to the Commandant, explain the problem, and include plans and sketches of the spaces in question.

§ 69.75 Figures.

O = excluded space.
C = enclosed space.
I = space to be considered as an enclosed space.
B = breedth of deck in way of the opening.

BILLING CODE 4910-14-C

VOL 54 ISS 79 AP 26 1989 UMI

Subpart C—Standard Measurement System

§ 69.101 Purpose.

This subpart prescribes the procedures for measuring a vessel under the Standard Measurement System described in 46 U.S.C. 14512.

§ 69.103 Definitions.

As used in this subpart—

"Between-deck" means the space above the line of the tonnage deck and below the line of the deck next above.

"Break" means the space between the line of a deck and the upper portion of that deck, in cases where that deck is stepped and continued at a higher elevation.

"Camber" means the perpendicular rise or crown of a deck at the centerline of the vessel measured above the skin of the vessel at the vessel's sides.

"Ceiling" means the permanent planking or plating fitted directly on the inboard side of frames, floors, or double bottom and includes cargo battens and refrigeration insulation but does not include false ceiling which stands off from the framing.

"Coaming" means both the vertical plating around a hatch or skylight and the sill below an opening in a bulkhead.

"Deckhouse" means a structure that is on or above the uppermost complete deck and that does not extend from side to side of the vessel. The term includes cabin trunks and closed-in spaces over the holds of vessels.

"Depth of frame" means the perpendicular depth of a bottom frame and the athwart distance between the inboard and outboard faces of a side frame.

"Double bottom" means a space at the bottom of a vessel between the inner and outer bottom plating and used solely for water ballast.

"Floor" means a vertical plate or timber extending from bilge to bilge in the bottom of a vessel. In a wooden vessel, "floor" means the lowermost timber connecting the main frames at the keel when that timber extends the full depth of the frames to which it is fastened. In a double bottom, floors usually extend from the outer to the inner bottom.

"Gross tonnage" is defined in § 69.107(a).

"Hatch" means an opening in a deck through which cargo is laden or discharged.

"Line of tonnage deck" means the line determined under § 69.109(e).

"Line of uppermost complete deck" means the line determined under § 69.111(b).

"Net tonnage" is defined in § 69.107(b).

"Registered breadth" is defined in § 69.53.

"Registered depth" means "molded depth" as defined in § 69.53.

"Registered length" is defined in § 69.53.

"Shelter deck" means the uppermost deck that would have qualified as the uppermost complete deck had it not been fitted with a middle line opening.

"Step" means a cutoff in a deck or in the bottom, top, or sides of a space resulting in varying heights of a deck or varying heights or widths of a space.

"Superstructure" means all permanent structures (such as forecastle, bridge, poop, deckhouse, and break) on or above the line of the uppermost complete deck or, if the vessel has a shelter deck, on or above the line of the shelter deck.

"Tonnage deck" is defined in § 69.109(c).

"Tonnage length" is defined in § 69.109(f).

"Uppermost complete deck" means the uppermost deck—

(a) Which extends from stem to stern and from side to side at all points of its length;

(b) The space below which is enclosed by the sides of the vessel;

(c) Through which there is no opening that would exempt the space below from being included in gross tonnage; and

(d) Below which there is no opening through the hull that would exempt the space below from being included in gross tonnage.

§ 69.105 Application for measurement services.

Applications for measurement services under this subpart must include the following information and plans:

(a) Type of vessel.

(b) Vessel name, official number, and intended port of documentation.

(c) Builder's name and the vessel hull number assigned by the builder.

(d) Place and year built.

(e) Date keel was laid.

(f) Overall length, breadth, and depth of vessel.

(g) Lines plan.

(h) Booklet of offsets.

(i) Capacity plans for tanks.

(j) Construction plans showing measurements and scantlings of hull and superstructure.

(k) Tonnage drawing showing tonnage length in profile and tonnage sections.

(l) Arrangement plans.

§ 69.107 Gross and net tonnages.

(a) Gross tonnage is the sum of the following tonnages, less certain spaces exempt under § 69.117:

(1) Under-deck tonnage (§ 69.109).

(2) Between-deck tonnage (§ 69.111).

(3) Superstructure tonnage (§ 69.113).

(4) Excess hatchway tonnage (§ 69.115(c)).

(5) Tonnage of framed-in propelling machinery spaces included in calculating gross tonnage (§ 69.121(d)(1)).

(b) Net tonnage is gross tonnage less deductions under § 69.119 and § 69.121.

§ 69.109 Under-deck tonnage.

(a) *Defined.* "Under-deck tonnage" means the tonnage of the space below the line of the tonnage deck, as that volume is calculated under this section.

(b) *Method of calculating tonnage.* Under-deck tonnage is calculated by applying Simpson's first rule using the tonnage length and the areas of the transverse sections prescribed by this section.

(c) *Identifying the tonnage deck.* In vessels with two or less decks, the tonnage deck is the uppermost complete deck. In vessels with more than two decks, the tonnage deck is the second deck from the keel as determined in paragraph (d) of this section.

(d) *Enumerating the decks to identify the second deck from the keel.* Only decks without openings that permit space below to be exempt from inclusion in under-deck tonnage are enumerated. Partial decks are not considered decks for the purpose of enumerating decks. However, the presence of engine and boiler casings, peak tanks, or cofferdams that penetrate a deck do not disqualify the deck from being enumerated.

(e) *Identifying the line of the tonnage deck.* (1) If the tonnage deck runs in a continuous line from stem to stern, the line of the tonnage deck is the longitudinal line at the underside of the tonnage deck.

(2) If the tonnage deck runs at different levels from stem to stern, the line of the tonnage deck is the longitudinal line of the underside of the lowest portion of that deck parallel with the upper portions of that deck. (See § 69.123, Figure 1 and 2.) Spaces between the line of the tonnage deck and the higher portions of that deck are not included in under-deck tonnage.

(f) *Tonnage length.* (1) "Tonnage length" means the length of a horizontal straight line measured at the centerline of the vessel from the point forward where the line of the tonnage deck intersects the line of the inboard faces of the ordinary side frames to the point aft where the line of the tonnage deck intersects the inboard face of the transom frames or cant frames. (See § 69.123, Figure 3.)

(2) For a vessel having a headblock or square end with framing which extends from the tonnage deck to the bottom of the vessel, the tonnage length terminates on the inboard face of the head block or end framing. When a headblock extends inboard past the face of the end side frames or when the headblock plates are excessive in length, the tonnage length terminates at the extreme end of the vessel less a distance equal to the thickness of an ordinary side frame and shell plating. (See § 69.123, Figure 4.)

(3) For a vessel having a square bow or stern and a tonnage deck with camber, the effect of the camber on the tonnage length must be considered. The tonnage length must be measured below the tonnage deck at a distance equal to one-third of round camber and one-half of straight pitch camber.

(g) *Division of vessel into transverse sections.* (1) Except as under paragraph (m)(1)(iii) of this section, the tonnage length is divided into an even number of equal parts as indicated in the following table:

Class	Tonnage length	Divisions
1	50 ft. or less	8
2	Over 50 ft. but not exceeding 100 ft.	8
3	Over 100 ft. but not exceeding 150 ft.	10
4	Over 150 ft. but not exceeding 200 ft.	12
5	Over 200 ft. but not exceeding 250 ft.	14
6	Over 250 ft.	16

(2) Transverse sections are cut at each end of the tonnage length and at each point of division of the tonnage length. Intervals and one-third intervals between the points of division are measured to the nearest thousandth of a foot. (See § 69.123, Figures 5 and 6.)

(h) *Depths of transverse sections.* (1) Transverse section depths are measured at each point of division of the tonnage length at the centerline of the vessel from a point below the line of the tonnage deck equal to one-third of the camber or to one-half of the pitch of the beam down to the upper side of the ordinary frames, floors, longitudinals, or tank top of a cellular double bottom, as the case may be.

(2) When a depth falls at a point where the tank top of a double bottom rises from the centerline to the wings, the depth terminates at one-half the dead rise. (See § 69.123, Figure 8.)

(3) When a depth falls at a point where the tank top of a double bottom has a straight fall from centerline to the wings, the depth terminates at one-half the height of fall. (See § 69.123, Figure 9.)

(4) The depth at the midpoint of the tonnage length or, when a vessel is measured in parts, the depth at the midpoint of each part determines the number of equal parts into which each depth is divided, as follows:

(i) If the midpoint depth is 16 feet or less, each depth is divided into four equal parts. If the midpoint depth exceeds 16 feet, each depth is divided into six equal parts. (See § 69.123, Figure 7.)

(ii) The interval between the points of division of a depth and one-third intervals are carried to the nearest hundredth of a foot.

(i) *Breadths of transverse sections.* (1) Transverse section breadths are measured horizontally at each point of division of each depth and also at the upper and lower points of each depth. Breadths are measured to the inboard face of the ordinary frames or to the line of the ordinary frames. Breadths are measured parallel to each other and at right angle to the vessel's centerline. (See § 69.123, Figure 7.)

(2) Upper breadths are not reduced by measuring to deck-beam brackets. In cases of camber where an upper breadth passes through the deck (see § 69.123, Figure 7), the breadth is measured to the line of the side frames at the under side of the deck projected vertically up to the height of the upper breadth.

(3) Bottom breadths are measured only as far as the flat of the floor extends. (See § 69.123, Figures 7 and 10.) When bottom frames rise immediately from the flat keel, bottom breadths are equal to the breadth of the flat keel. Where there is no double bottom and where there is dead rise of the bottom out to the sides of the vessel, bottom breadths are equal to the part of the bottom plating not affected by dead rise.

(4) Bottom breadths falling in way of a double bottom, the top of which rises or falls from centerline to the wings, are measured between the inboard faces of the frame brackets which connect the double bottom with the frames. (See § 69.123, Figures 8 and 9.)

(j) *Measuring spaces having ceiling.* The maximum allowance for terminating measurements on ceiling is three inches on the bottom frames or tank top and three inches on each side frame. When ceiling is less than three inches thick, only the actual thickness is allowed. When ceiling is fitted on a platform directly above the bottom frames, depths are measured down through the platform to the upper side of the frames and the allowable ceiling on the platform is then deducted.

(k) *Area of transverse sections.* (1) A transverse section at an end of the tonnage length may not yield area, except in vessels (such as barges) with an upright bow or stern.

(2) The breadths of each transverse section are numbered from above, the upper being "1", the second down being "2", and so on to the lowest.

(3) Multiply the even numbered breadths by four and the odd numbered breadths by two, except for the first and last breadths, which are multiplied by one.

(4) Add together the products from paragraph (k)(3) of this section.

(5) Multiply the sum from paragraph (k)(4) of this section by one-third of the interval between the breadths. The product is the area of the transverse section.

(l) *Tonnage.* (1) Number the transverse sections successively "1", "2", and so forth, beginning at the bow.

(2) Multiply the area of the even numbered sections by four and the area of the odd numbered sections by two, except the first and last sections, which are multiplied by one.

(3) Add together the products from paragraph (l)(2) of this section and multiply the sum by one-third of the interval between the sections. The product is the volume under-deck.

(4) The volume under-deck is divided by 100 and is, subject to exemptions, the under-deck tonnage.

(m) *Steps in double bottom.* (1) The tonnage length of a vessel having a step exceeding six inches in height in its double bottom is divided into longitudinal parts at the step. Each part is subdivided as follows to determine the number of transverse sections:

(i) Parts 20 feet or under in length are divided into two equal parts.

(ii) Parts over 20 feet and under 40 feet in length are divided into four equal parts.

(iii) Parts 40 feet or over are divided as provided in paragraph (g)(1) of this section.

(2) The tonnage of each part is calculated separately. The sum of the tonnages of the parts is the under-deck tonnage.

(n) *Outside shaft tunnel exclusion.* Any portion of an outside shaft tunnel included in tonnage through the process of measurement is subtracted from the under-deck tonnage.

(o) Open vessels. (1) An open vessel is one of any length without a deck or with one or more partial decks, the total length of which is less than one-half the tonnage length.

(2) The line of the tonnage deck for an open vessel is the upper edge of the

BEST COPY AVAILABLE

VOL 54 ISS 79 AP 26 1989 UMI

upper strake. Depths of transverse sections are taken from this line.

(3) Any vessel, other than one having a mechanically refrigerated hold, that is not an open vessel and that has a tonnage length of less than 50 feet is measured as an open vessel, if the distance between the line of its tonnage deck and the upper edge of the upper strake is more than one-sixth of the midship depth. "Midship depth" means the depth measured from the line of the upper edge of the upper strake to the point in the bottom used for measuring tonnage depths.

§ 69.111 Between-deck tonnage.

(a) *Defined.* "Between-deck tonnage" means the tonnage of the space above the line of the tonnage deck and below the line of the uppermost complete deck.

(b) *Identifying the line of the uppermost complete deck.* (1) If the uppermost complete deck runs in a continuous line from stem to stern, the line of the uppermost complete deck is the longitudinal line of the underside of the uppermost complete deck.

(2) If the uppermost complete deck runs at different levels from stem to stern, the line of the uppermost complete deck is the longitudinal line of the underside of the lowest portion of that deck parallel with the upper portions of that deck. Spaces between the line of the uppermost complete deck and the higher portions of that deck are included in superstructure tonnage.

(c) *Method for calculating tonnage.* The tonnage of each level of the between-deck space is calculated separately, as follows:

(1) The length of each level is measured at the mid-height between the line of the deck above and the line of the deck below. Measure from the point forward where the continuation of the line of the inboard face of the normal side frames intersects the center line of the vessel aft to the forward face of the normal transom framing.

(2) Divide the length under paragraph (c)(1) of this section into the same number of equal parts into which the tonnage length is divided under § 69.109(g)(1).

(3) Measure at mid-height between the faces of the normal side frames the inside breadth of the space at each end and at each point of division of the length. Number the breadths successively "1", "2", and so forth, beginning at the bow.

(4) Multiply the even numbered breadths by four and the odd numbered breadths by two, except the first and last, which are multiplied by one.

(5) Add together the products under paragraph (c)(4) of this section and multiply the sum by one-third of the interval between the points at which the breadths are taken. The product is the square foot area of the space at mid height.

(6) Multiply the area of the space at mid-height by the average of the heights taken at each point of division of the space. The product divided by 100 is the tonnage of that space.

(7) The between-deck tonnage is the sum of the tonnage of each level within the between-deck space.

§ 69.113 Superstructure tonnage.

(a) *Defined.* "Superstructure tonnage" means the tonnage of all permanent structures, such as forecastle, bridge, poop, deckhouse, and break, on or above the line of the uppermost complete deck (or line of shelter deck, if applicable).

(b) *Method of calculating tonnage.* The tonnage of all structures on each level on or above the uppermost complete deck (or shelter deck, if applicable) is calculated separately as follows:

(1) The length of each structure is measured along its centerline at mid-height between the line of the inboard face of the framing on one end to the line of the inboard face of the framing on the other end. (See § 69.123, Figure 11.)

(2) Divide the length under paragraph (b)(1) of this section into an even number of equal parts most nearly equal to those into which the tonnage length is divided under § 69.109.

(3) Measure at mid-height the inside breadth at each end and at each point of division of the length. Number the breadths successively "1", "2", and so forth, beginning at the extreme forward end of the structure. If an end of the structure is in the form of a continuous arc or curve, the breadth at that end is one-half the nearest breadth. If an end is in the form of an arc or curve having a decided flat, the breadth at that end is two-thirds of the nearest breadth.

(4) Multiply the even numbered breadths by four and the odd numbered by two, except the first and last breadth, which are multiplied by one.

(5) Add together the products under paragraph (b)(4) of this section and multiply the sum by one-third of the interval between the points at which the breadths are taken. The product is the square foot area of the structure at mid-height.

(6) Multiply this area by the average of the heights taken at each point of division of the structure between its decks or the line of its decks. The product divided by 100 is the tonnage of that structure.

(c) A structure having steps in its deck or side must be measured in parts.

(d) The superstructure tonnage is the sum of tonnages of each level above the line of the uppermost complete deck (or shelter deck, if applicable).

(e) When a structure is located over a cut-away portion of the tonnage deck, the structure's height is measured from the under side of its overhead deck to the line of the tonnage deck. If the tonnage deck has no camber, allow for camber in the overhead deck.

(f) For structures of a standard geometric shape, a simple geometric formula that yields an accurate volume may be used.

§ 69.115 Excess hatchway tonnage.

(a) Hatchways that are above the tonnage deck and are either open to the weather or within open structures are measured to determine excess hatchway tonnage. Hatchways that are in between-deck spaces, on decks within closed-in structures, or on open structures are not measured.

(b) The tonnage of a hatchway is its length times breadth times mean depth divided by 100. Mean depth is measured from the under side of the hatch cover to the top of the deck beam.

(c) From the sum of the tonnage of the hatchways under this section, subtract one-half of one percent of the vessel's gross tonnage exclusive of the hatchway tonnage. The remainder is added as excess hatchway tonnage in calculating gross tonnage.

§ 69.117 Spaces exempt from inclusion in gross tonnage.

(a) *Purpose.* This section lists spaces which are exempt from inclusion in gross tonnage.

(b) *Spaces on or above the line of the uppermost complete deck.* The following spaces or portions of spaces on or above the line of the uppermost complete deck are exempt if the spaces or portions are reasonable in extent and adapted and used exclusively for the purpose indicated:

(1) Spaces for anchor gear, including capstan, windlass, and chain locker, are exempt.

(2) Companions and booby-hatches protecting stairways or ladderways leading to spaces below are exempt, whether or not the spaces below are exempt.

(3) Galley or other spaces fitted with a range or oven for cooking food to be consumed onboard the vessel are exempt.

(4) Spaces designed to provide light or air to propelling machinery are exempt, as follows:

(i) When propelling machinery is located entirely on or above the line of the uppermost complete deck, the entire propelling machinery space and all fuel bunker spaces that are also located above that line are exempt as light or air spaces. (See exception in § 69.121(d)(1) for framed-in spaces.)

(ii) When part of the propelling machinery projects above the line of the uppermost complete deck into a space used exclusively to provide light or air to the propelling machinery, the entire space is exempt as light or air space. When any portion of this space is used for purposes other than providing light or air, only the portion of the space used for light or air, the space occupied by the propelling machinery itself, and a propelling machinery working space allowance under § 69.121 limited to two feet, if available, on each side of the propelling machinery are exempt.

(iii) Any part of an escape shaft, or a companion sheltering an escape shaft, above the line of the uppermost complete deck is exempt as light or air space.

(iv) Space that would otherwise be exempt as a light or air space is not exempt when propelling machinery is boxed-in and does not extend above the line of the uppermost complete deck. Any portion of the boxed-in space above the line of the uppermost complete deck is exempt.

(5) Skylights affording light or air to a space below, other than to propelling machinery spaces. Space immediately below the line of the deck on which a skylight is located is exempt only when there is an opening in the next lower deck directly below the skylight to permit light or air to an even lower deck.

(6) Machinery spaces, other than for propelling machinery under § 169.121.

(7) Spaces for steering gear.

(8) Water closet spaces that are fitted with at least a toilet and are intended for use by more than one person.

(9) The space in a wheelhouse necessary for controlling the vessel.

(c) *Passenger spaces.* (1) As used in this section, the term "passenger" includes officers and enlisted men on military vessels who are not assigned ship's duties and not entered on the ship's articles.

(2) As used in this section, "passenger space" means a space reserved exclusively for the use of passengers and includes, but is not limited to, berthing areas, staterooms, bathrooms, toilets, libraries, writing rooms, lounges, dining rooms, saloons, smoking rooms, and recreational rooms. The space need not be part of or adjacent to a berthing area to be considered a passenger space.

(3) A passenger space located on or above the first deck above the uppermost complete deck is exempt from gross tonnage.

(4) A passenger space located on the uppermost complete deck is exempt from gross tonnage only when it has no berthing accommodations and is an open structure under paragraph (d) of this section.

(d) *Open structures.* (1) Structures that are located on or above the line of the uppermost complete deck that are under cover (sheltered) but open to the weather are exempt from gross tonnage.

(2) A structure is considered "open to the weather" under paragraph (d)(1) of this section when an exterior end bulkhead of the structure is open and, except as provided in paragraph (d)(4) of this section, is not fitted with any means of closing. To be considered "open to the weather", the end bulkhead must not have a coaming height of more than two feet in way of any required opening and have one of the following:

(i) Two openings, each at least three feet wide and at least four feet high in the clear, one on each side of the centerline of the structure.

(ii) One opening at least four feet wide and at least five feet high in the clear.

(iii) One opening at least 20 square feet in the clear with a breadth in excess of four feet and a height of not less than three feet.

(3) A compartment within an open structure is considered open to the weather only when an interior bulkhead of that compartment has an opening or openings that meet the requirements for end bulkheads under paragraphs (d)(2)(i) through (d)(2)(iii) of this section. Other compartments within the structure are not considered open to the weather.

(4) An interior or exterior opening that is temporarily closed by shifting boards dropped into channel sections at the sides of the opening or by plates or boards held in place by hook bolts is considered open to the weather—

(i) If the hook bolts are spaced at least one foot apart and hook over a stiffener bar around the perimeter of the opening;

(ii) If the cover plates fay against the bulkhead;

(iii) If battening, caulking, or gaskets of any material are not used; and

(iv) If cleats, stud bolts, hinges, bolts through the bulkhead, or other attachments (other than hook bolts) that may be used in conjunction with the temporary cover as a means of closing the opening are not installed at the edge of opening. (See § 69.123, Figure 12.)

(5) A structure with its aft end entirely open from the under side of its overhead stiffeners down to the deck, to the line of the deck, or to a coaming not exceeding three inches in height and open athwartship between the inboard faces of the side stiffeners is considered open to the weather. The opening may be covered by a wire mesh screen or temporarily closed by canvas secured at the top and lashed or buttoned in place.

(e) *Open space between the shelter deck and the next lower deck.* (1) Space that is between the shelter deck and the next lower deck and that is under cover (sheltered) but open to the weather is exempt from gross tonnage when all openings in the uppermost complete deck are provided with a watertight means of closing.

(2) A space is considered "open to the weather" under paragraph (e)(1) of this section when the shelter deck above the space has a middle line opening which conforms to the following:

(i) The middle line opening must be at least four feet long in the clear and at least as wide as the after cargo hatch on the shelter deck, but not less than one-half the width of the vessel at the midpoint of the length of the opening. The opening may have rounded corners not exceeding a nine inch radius. When a greater radius is required by the Coast Guard or a Coast Guard recognized classification society under § 42.05-60 of this chapter, notification of that requirement must be submitted to the Commandant.

(ii) The middle line opening must be located so that the distance between the aft edge of the middle line opening and the vessel's stern is not less than one-twentieth of the tonnage length of the vessel and the distance between the fore edge of the opening and the vessel's stem is not less than one-fifth of the tonnage length of the vessel.

(iii) The middle line opening must not be within a structure of any type.

(iv) If the middle line opening is guarded by rails or stanchions, the rails and stanchions must not be used to secure or assist in securing a cover over the opening.

(v) The coaming of the middle line opening must not exceed one foot mean height above the shelter deck. Bolts must not pass through the stiffeners or flanges on the coaming, nor may there be any other attachments on the coaming for fastening a cover. Portable wood covers may be fitted over the middle line opening if held in place only by lashings fitted to the under side of the covers. Metal covers may be fitted if held in place only by hook bolts spaced not less than 18 inches apart that pass through the cover and hook over angle stiffeners or flanges fitted to the outside of the coaming.

VOL 54 ISS 79 AP 26 1989 UMI

(vi) The space below the middle line opening must have a minimum length of four feet throughout its entire breadth and height and be in the clear at all times.

(vii) A scupper having a five inch minimum inside diameter and fitted with a screw down non-return valve geared to and operated from the shelter deck must be fitted on each side of the upper deck in way of the middle line opening.

(3) When the shelter deck space forward or aft of the middle line opening is divided by interior bulkheads, only those compartments with at least two openings that progress to the middle line opening are considered "open to the weather" under paragraph (e)(1) of this section. Each required opening must be at least three feet wide and at least four feet high in the clear, must not have a coaming height of more than two feet, and must not be fitted (except as provided in paragraph (d)(4) of this section) with any means of closing. Other compartments within the shelter deck space are not considered "open to the weather" under paragraph (e)(1) of this section.

(f) *Water ballast spaces.* A space, regardless of location, adapted only for water ballast and not available for stores, supplies, fuel, or cargo (other than water to be used for underwater drilling, mining, and related purposes, including production), upon request, may be exempt from gross tonnage if the following are met:

(1) The space must be available at all times only for water ballast that is piped through a system independent of other systems (except fire fighting and bilge suction systems). Pumps, pipes, and other equipment for loading and unloading water ballast must be of a size suitable for the efficient handling of the water ballast within a reasonable time frame. All manholes providing access to a water ballast space must be oval or circular and not greater than 34 inches in diameter. Except for those on a deck exposed to the weather, the manholes may have a coaming not exceeding six inches in height. Existing hatches over spaces being converted to water ballast spaces must have a watertight cover plate welded to the hatch and a manhole, as described in this paragraph, fitted in the plating.

(2) The primary purpose of the water ballast must be to afford a means of maintaining the vessel's stability, immersion, trim, pre-loading conditions, or seakeeping capabilities.

(3) If the space is in a vessel that is subject to inspection under 46 U.S.C. 3301, the space must be considered when determining the adequacy of the vessel's stability under 46 CFR Chapter I.

(4) If the total of all water ballast spaces to be exempted from gross tonnage exceeds 30% of the vessel's gross tonnage (excluding the water ballast spaces), a justification of the operating conditions that require the water ballast must be submitted to the measuring organization. The measuring organization reviews the submittal for completeness and, when complete, forwards the submittal to the Commandant for approval. Although a single condition may justify all water ballast spaces, several conditions may be necessary in other cases. However, a particular tank is not justified by a condition if another tank already justified by another condition could be used as effectively. The justification must—

(i) Designate the vessel's service;

(ii) Explain for what purpose under paragraph (f)(2) of this section the water ballast is being used;

(iii) Provide the calculations required in paragraphs (f)(4)(vi) through (f)(4)(ix) of this section for those uses on a form similar to Coast Guard Stability Test Form CG–993–9;

(iv) Include the capacity, tank arrangement, and piping plans for the vessel;

(v) Include a statement certifying that the spaces will be used exclusively for water ballast as prescribed by this section;

(vi) If water ballast is used for stability, describe each loading condition and the resultant metacentric height (GM) and include calculations;

(vii) If water ballast is used for immersion or trim, describe those conditions and include loading and trim calculations;

(viii) If water ballast is used for pre-loading, describe how it is used and include strength and weight calculations; and

(ix) If water ballast is used for seakeeping, describe each loading condition, GM, period of roll, and, if speed is involved, speed versus trim and draft and include calculations.

(5) If the water ballast space or its use, purpose, or piping are changed, the vessel owner or operator must report the change promptly to a measurement organization listed in § 69.15 for a determination as to whether a tonnage remeasurement is required.

(g) *Methods for measuring exempt spaces.* (1) If the exempt space is located within the superstructure, the exempt space is measured using the same procedures used to measure superstructure tonnage under § 69.113.

(2) If the exempt space is located between-deck, the space is measured using the same procedures used for between-deck tonnage under § 69.111(c), except that the length of the exempt space is divided into the even number of spaces most equal to the number of spaces into which the between-deck was divided.

(3) If the exempt space is located under-deck, the space is measured using the same procedures used for under-deck tonnage under § 69.109, except that the length of the exempt space is divided into the even number of spaces most equal to the number of spaces into which the under-deck was divided.

§ 69.119 Spaces deducted from gross tonnage.

(a) *Purpose.* This section lists the requirements for spaces (other than propelling machinery spaces under § 69.121) which, though included in calculating gross tonnage (i.e., are not exempt under § 69.117), are deducted from gross tonnage in deriving net tonnage.

(b) *General.* (1) A deductible space must be used exclusively for, and be reasonable in size for, its intended purpose.

(2) When a space is larger than necessary for the safe and efficient operation of deductible equipment, only the space occupied by the equipment plus a two foot maximum working space on each side of the equipment, if available, is deductible.

(3) Space specified in this section may be located anywhere within the vessel, unless otherwise specified.

(c) *Anchor gear.* A space below the line of the uppermost complete deck occupied by the anchor gear, capstan, windlass, and chain locker is deductible. A fore peak used exclusively as chain locker is measured by the method prescribed under § 69.117(g)(3).

(d) *Boatswain's stores.* A space containing oils, blocks, hawsers, rigging, deck gear, or other boatswain's stores for daily use is deductible. The maximum deduction allowed for vessels less than 100 gross tons is one ton and, for vessels 100 gross tons or over, is one percent of the gross tonnage, not to exceed 100 tons.

(e) *Chart room.* A space for keeping charts and nautical instruments and for plotting the vessel's course is deductible. For a combined wheelhouse and chart room, that part not exempted as wheelhouse under § 69.117(b)(9) is deductible. For small vessels in which the only space for a chart room is in a cabin or saloon, one half the space not to exceed 1.5 tons is deductible as chart room.

(f) *Donkey engine and boiler.* Donkey engine and boiler space is deductible when connected with the main (non-cargo) pumps of the vessel, except as follows:

(1) If the space is within the engine room or within the casing above the engine room and if the donkey engine is an auxiliary to the main propelling machinery, the space is an engine room deduction under § 69.121(b).

(2) If the space is above the line of the uppermost complete deck and if the donkey engine is not an auxiliary to the main propelling machinery, the space is exempt under § 69.117(b).

(g) *Spaces for the exclusive use of officers or crew.* (1) The following spaces, regardless of their location (unless otherwise noted), are deductible if not used by passengers:

(i) Sleeping rooms.

(ii) Bathrooms with a bath tub or shower but without a water closet.

(iii) Water closets below the line of the uppermost complete deck serving more than one person, with or without a bath tub or shower. Water closets, regardless of location, that serve only one person or that are accessible only through a stateroom or bedroom serving one person are considered as part of the space they serve and are deductible only if that space is deductible.

(iv) Clothes drying rooms.

(v) Drinking water filtration or distilling plant below the line of the uppermost complete deck.

(vi) Hospitals.

(vii) Mess rooms.

(viii) Office of the chief engineer.

(ix) Oil skin lockers.

(x) Pantries.

(xi) Recreation rooms.

(xii) Smoking rooms.

(xiii) Galleys below the line of the uppermost complete deck.

(2) Shops for engineers, carpenters, plumbers, or butchers and offices for clerks, pursers, or postmasters are not deductible, wherever located.

(h) *Master's cabin.* The master's sleeping room, dressing room, bathroom, observation room, reception room, sitting room, water closet, and office are deductible.

(i) *Radio room.* Spaces in which radio apparatus is installed and messages are sent and received and which may provide off-duty operator accommodations are deductible.

(j) *Steering gear.* Spaces for steering gear below the line of the uppermost complete deck are deductible.

(k) *Generators.* Spaces for generators below the line of the uppermost complete deck are deductible regardless of what space the generators serve. These spaces may include other equipment necessary for the generator's operation.

(l) *Pump room.* Spaces below the line of the uppermost complete deck containing pumps that are not capable of handling cargo and that are not fuel oil transfer pumps considered part of the propelling machinery under § 69.121(b)(2)(v) are deductible.

(m) *Sail stowage.* A space for stowing sails on a vessel propelled only by sails is deductible up to two and one half percent of the vessel's gross tonnage.

(n) *Waste material space.* (1) A tank or collection space, regardless of location, used for the carriage or collection of sewage, garbage, galley waste, trash, slop-oil mixture, tank cleaning residue, bilge residue, or other waste material generated aboard the vessel is deductible.

(2) Space below the line of the uppermost complete deck used exclusively to separate, clarify, purify, or otherwise process waste material generated aboard the vessel is deductible.

(o) *Passageways.* A passageway or companionway is deductible—

(1) If it serves deductible spaces only; or

(2) If it serves deductible spaces and is also the sole means of access to one of the following non-deductible spaces:

(i) Lockers of less than two tons each, containing medicine, linen, mops, or other items for the free use of the crew.

(ii) A ship's office.

(iii) Spare rooms (not exceeding two) used by a pilot, customs officer, reserve engineer, or employee or agent of the vessel's owner or operator.

(p) *Markings for deductible spaces.* (1) Each space deducted under this section must be marked with the words "Certified_____" (inserting the space designation, such as "Seaman", "Generator", "Office of Chief Engineer", "Hospital", or "Anchor Gear"). If a deductible space berths more than one crew member, the marking must indicate the number of crew members berthed, such as "Certified_____Seamen" (inserting the number of crew).

(2) The abbreviations "Cert." for "certified" and "W.C." for "water closet" may be used.

(3) The markings must be in Roman letters and Arabic numerals at least 1/2 inch in height, must be painted in a light color on a dark background, must be embossed, center-punched, carved, or permanently cut in a bulkhead or metal plate, and must be placed in a legible location over a doorway on the inside of the space. A metal plate, if used, must be permanently fastened in place by welding, riveting, lock screws, or a Coast Guard-approved bonding agent.

(q) *Method for measuring deductible spaces.* (1) A rectangular space must be measured by taking the product of its length, breadth, and height.

(2) A space with curved sides on or above the tonnage deck is measured according to § 69.109.

(3) Spaces less than 15 feet in length may be measured by any practical method.

(4) Spaces below the tonnage deck exceeding 15 feet in length and bounded by a curved surface conforming to the side of the vessel must be measured by the formula used for measuring the superstructure under § 69.113.

(5) The height of a space located on a platform in the hull must be measured from the top of the bottom hull frames, if the platform is used only to form a flat surface at the bottom of the space, if the platform is not more than one foot above the top of the bottom frames, and if the space below the platform is not usable.

(6) The height of a space is measured through any ceiling, paneling, false overhead, or other covering, to the space's structural boundary; unless the space enclosed by the covering is available for a non-deductible use.

§ 69.121 Engine room deduction.

(a) *General.* The engine room deduction is either a percentage of the vessel's total propelling machinery spaces or a percentage of the vessel's gross tonnage.

(b) *Propelling machinery spaces.* (1) Propelling machinery spaces are the spaces occupied by the main propelling machinery and auxiliary machinery and spaces reasonably necessary for the operation and maintenance of the machinery. Propelling machinery spaces do not include spaces for fuel tanks, spaces exempt from gross tonnage under § 69.117, and spaces not used or not available for use in connection with the propelling machinery.

(2) Propelling machinery spaces are—

(i) Space below the crown. The crown is the top of the main space of the engine room to which the heights of the main space are taken. The crown is either the underside of a deck or, if the side bulkheads are sloping, the uppermost point at which the slope terminates. (See § 69.123, Figures 13 and 14.)

(ii) Framed-in space located between the crown and the uppermost complete deck and used for propelling machinery or for the admission of light or air to propelling machinery spaces. (See § 69.123, Figures 13 and 14.)

VOL 54 ISS 79 APR 26 1989 UMI

(iii) Shaft tunnel space and thrust block recess space.

(iv) Space below the uppermost complete deck used for escape shafts or trunked ladderways leading from the aft end of the shaft tunnel to the deck above.

(v) Space containing a fuel oil transfer pump located in a separate space and not used for bunkering the vessel. When the pump serves both ballast and fuel oil, only one-half of the pump's space is considered a propelling machinery space.

(vi) Spaces containing fuel oil settling tanks used solely for the main boilers. The space must not exceed one percent of the vessel's gross tonnage.

(vii) Spaces for engineers' stores and workshops located below the uppermost complete deck and either open to a propelling machinery space or separated from a propelling machinery space only by a screen bulkhead. The space must not exceed three-quarters of one percent of the vessel's gross tonnage.

(viii) Framed-in space located above the line of the uppermost complete deck and used for propelling machinery or for the admission of light or air to a propelling machinery space, when requested under paragraph (d) of this section.

(ix) If the propelling machinery is boxed-in below the tonnage deck, the boxed-in space plus the spaces outside of the boxing for the shaft, auxiliary engines, and related propelling machinery. If a portion of the boxed-in space extends above a platform or partial deck that is below the uppermost complete deck, that portion is also considered part of the propelling machinery space.

(c) *Methods for measuring propelling machinery spaces.* (1) If the propelling machinery space is bulkheaded off or is not larger than necessary for the safe operation and maintenance of the propelling machinery, the entire space, or, if bulkheaded off, the portion bulkheaded off, is measured for the engine room deduction.

(2) If the propelling machinery space is not bulkheaded off or is larger than necessary for the safe operation and maintenance of the propelling machinery only the space occupied by the propelling machinery itself plus a working space of two feet, if available, on each side of the propelling machinery is measured for the engine room deduction. If the working space overlaps another working space not related to the propelling machinery, only one-half of the overlapping working space is included in the propelling machinery space. The height of the working space is measured as provided in paragraph (c) of this section.

(3) If the propelling machinery is located in more than one space, each space must be measured separately.

(4) If the propelling machinery is located in a space with a step in the bottom or side lines, each stepped portion of the space must be measured separately.

(5) The length of a space under paragraph (c)(1) of this section is measured from the bulkhead just forward of the propelling machinery to the bulkhead just aft of the propelling machinery. The length of a space under paragraph (c)(2) of this section is measured from the forward edge of the working space to the aft edge of the working space.

(6) If the boundaries of the propelling machinery space form a rectangle, the product of the length, breadth, and height, divided by 100, is the tonnage of the space.

(7) If the boundaries of the propelling machinery space are continuous fair lines, heights are measured at the fore and aft ends and at the center of the space from the bottom frames, floors, or tank top of a double bottom up to the line of the crown. A breadth is measured at half-height of each height. The product of the length, mean breadth, and mean height, divided by 100, is the tonnage of the space.

(8) If the propelling machinery space is in the aft end of the hull, extends from side to side of the hull, and has a continuous bottom line, the length of the space is divided into the even number of equal parts most nearly equal to the number of parts that the tonnage length under § 69.109(g) was divided. The tonnage is then calculated by the same method used for calculating the under-deck tonnage in § 69.109(1).

(9) The tonnage of a framed-in space located between the crown and the uppermost complete deck and used for propelling machinery or for the admission of light or air to the propelling machinery space, is the product of its length, breadth, and height, divided by 100.

(10) The tonnage of a shaft tunnel, or a thrust block recess, having a flat top is the product of its length, breadth, and height, divided by 100. If the shaft tunnel or thrust block recess top is not flat, the space above must be calculated by using the appropriate geometrical formula. If the space aft of the shaft tunnel extends from side to side of the vessel, the tonnage of the space is found by the formula for measuring peak tanks in § 69.109(1).

(11) The length and breadth of the space for a shaft tunnel, or a thrust block recess, when not cased is that which is necessary for maintenance of the shaft. The height allowed for thrust block recess space must not exceed seven feet. The mean height allowed for the shaft tunnel space must not exceed six feet. In a multi-screw vessel where the shaft tunnel or thrust block recess space is open from side to side, measure only the space used for purposes of propelling the vessel.

(12) When the propelling machinery is on a bed at the vessel's bottom, the height of the propelling machinery space is measured from the top of the bottom frames or floors.

(d) *Request to treat certain framed-in engine room spaces as part of a propelling machinery space.* (1) Under § 69.117(b)(4), framed-in spaces located above the line of the uppermost complete deck and used for propelling machinery or for admitting light or air to a propelling machinery space are exempt from inclusion in gross tonnage. However, upon written request to a measurement organization listed in § 69.15, the vessel owner may elect to have these spaces included in calculating gross tonnage, then deducted from gross tonnage as propelling machinery spaces under paragraph (b)(2)(viii) of this section.

(2) The framed-in space must be safe, seaworthy, and used only for propelling machinery or for the admission of light or air to the propelling machinery space. The length of the space must not exceed the length of the propelling machinery space and the breadth must not exceed one half of the extreme inside midship breadth of the vessel. Portions of the framed-in space that are plated over are not included in the propelling machinery space.

(3) To exercise the option in paragraph (d)(1) of this section, all of the framed-in space need not be treated as propelling machinery space, but only that portion required to entitle the vessel to have 32 percent of its gross tonnage deducted as an engine room deduction under paragraph (e) of this section.

(e) *Calculating the engine room deduction.* (1) The engine room deduction is based on a percentage of the vessel's gross tonnage or a percentage of the totai propelling machinery space.

(2) For vessels propelled in whole or in part by screw,—

(i) If the total propelling machinery space is 13 percent or less of the vessel's gross tonnage, deduct 32/13 times the total propelling machinery space.

(ii) If the total propelling machinery space is more than 13 but less than 20 percent of the vessel's gross tonnage, deduct 32 percent of the vessel's gross tonnage; or

(iii) If the total propelling machinery space is 20 percent or more of the vessel's gross tonnage, deduct either 32 percent of the vessel's gross tonnage or 1.75 times the total propelling machinery space, whichever the vessel's owner elects.

(3) For vessels propelled in whole or in part by paddle-wheel,

(i) If the total propelling machinery space is 20 percent or less of the vessel's gross tonnage, deduct 37/20 times the total propelling machinery space.

(ii) If the total propelling machinery space is more than 20 but less than 30 percent of the vessel's gross tonnage, deduct 37 percent of the vessel's gross tonnage; or

(iii) If the total propelling machinery space is 30 percent or more of the vessel's gross tonnage, deduct either 37 percent of the vessel's gross tonnage or 1.5 times the total propelling machinery space, whichever the vessel's owner elects.

BILLING CODE 4910-14-C

Subpart D—Dual Measurement System

§ 69.151 Purpose.

This subpart prescribes measurement requirements for the assignment of either one gross and one net tonnage or two gross and two net tonnages to vessels under the Dual Measurement System.

§ 69.153 Application of other laws.

(a) If a vessel is assigned two gross tonnages under § 69.175(b), the higher gross tonnage is the tonnage used when applying inspection, manning, and load line laws and regulations to the vessel.

(b) Tonnage marks are not to be construed as additional load line marks. Whether or not a tonnage mark is submerged under § 69.171 has no effect on the applicability of load line laws and regulations.

§ 69.155 Measurement requirements.

Except as otherwise required by this subpart, the measurement requirements under the Standard Measurement System in Subpart C of this part apply to the measurement of vessels under the Dual Measurement System.

§ 69.157 Definitions.

(a) Terms used in this subpart that are defined in § 69.103 have the same meaning as in § 69.103, except as in paragraph (b) of this section.

(b) As used in this subpart—

"Gross tonnage" is defined in § 69.161(a).

"Line for fresh and tropical waters" means the line described in § 69.177(b)(2).

"Line of the second deck" means the line described in § 69.161.

"Line of the uppermost complete deck" means a longitudinal line at the underside of the uppermost complete deck or, if that deck is stepped, the longitudinal line of the underside of the lowest portion of that deck parallel with the upper portions of that deck.

"Net tonnage" is defined in § 69.161(b).

"Second deck" means the next deck below the uppermost complete deck that meets the following:

(1) Is continuous athwartships and in a fore-and-aft direction at least between peak bulkheads, even though the deck may have interruptions or openings due to propelling machinery spaces, to hatch and ventilation trunks not extending longitudinally completely between main transverse bulkheads, to ladder and stairway openings, to chain lockers, or to cofferdams.

(2) Is fitted as an integral and permanent part of the vessel.

(3) Has proper covers to all main hatchways.

(4) Does not have steps the total of which exceed 48 inches in height.

"Tonnage deck" means, for a vessel with only one deck, the uppermost complete deck and, for a vessel with a second deck, the second deck.

"Tonnage mark" means the line described in § 69.177(a)(2).

§ 69.159 Application for measurement services.

Applications for measurement services under this subpart must include the application information and plans required for the Standard Measurement System under § 69.105. The application must indicate whether a line for fresh and tropical waters is requested under § 69.177(b) and, for vessels with more than one deck, indicate whether one or two sets of tonnages are desired under § 69.175.

§ 69.161 Gross and net tonnages.

(a) "Gross tonnage" means the tonnage of a vessel, less certain spaces exempt under § 69.169, and is the sum of the following:

(1) Under-deck tonnage (§ 69.163).

(2) Between-deck tonnage (§ 69.165).

(3) Superstructure tonnage (§ 69.167).

(4) Excess hatchway tonnage (§ 69.115).

(5) Tonnage of framed-in propelling machinery spaces included in calculating gross tonnage (§ 69.121(d)(1)).

(b) "Net tonnage" means gross tonnage less deductions under §§ 69.119 and 69.121.

§ 69.163 Under-deck tonnage.

The under-deck tonnage provisions in § 69.109 apply; except that, under the Dual Measurement System, spaces between the line of the tonnage deck and the tonnage deck itself due to a stepped tonnage deck are included in under-deck tonnage.

§ 69.165 Between-deck tonnage.

The between-deck tonnage provisions in § 69.111 apply, except that, under the Dual Measurement System, between-deck space extends from the tonnage deck to the uppermost complete deck, rather than from the line of the tonnage deck to the line of the uppermost complete deck.

§ 69.167 Superstructure tonnage.

The superstructure tonnage provisions in § 69.113 apply; except that, under the Dual Measurement System, spaces between the line of the uppermost complete deck and the uppermost complete deck itself due to a stepped uppermost complete deck are not included in the superstructure tonnage.

§ 69.169 Spaces exempt from inclusion in gross tonnage.

The tonnage of the following spaces is exempt from inclusion in gross tonnage:

(a) Spaces listed in § 69.117(b) when located within the superstructure.

(b) Spaces listed in § 69.117(c) (1) through (3) when located above, but not on, the uppermost complete deck.

(c) Spaces listed in § 69.117(f), regardless of location.

(d) Spaces available for carrying dry cargo and stores when located on or above the uppermost complete deck.

(e) When a vessel is assigned a tonnage mark and the tonnage mark is not submerged—

(1) Spaces listed in § 69.117(b) when located between the uppermost complete deck and the second deck;

(2) Spaces listed in § 69.117(c) (1) through (3) when located on the uppermost complete deck; and

(3) Spaces available for carrying dry cargo and stores when located between the uppermost complete deck and the second deck.

§ 69.171 When the tonnage mark is considered submerged.

For the purpose of this subpart, a tonnage mark is considered submerged when—

(a) In salt or brackish water, the upper edge of the tonnage mark is submerged; and

(b) In fresh or tropical water, the upper edge of the line for fresh and tropical waters is submerged.

§ 69.173 Tonnage assignments for vessels with only one deck.

A vessel without a second deck is assigned only one gross and one net tonnage. In calculating the gross tonnage, only the exemptions in § 69.169 (a) through (d) are allowed. Markings under § 69.177 are not permitted on these vessels.

§ 69.175 Tonnage assignments for vessels with a second deck.

(a) At the option of the vessel owner, a vessel having a second deck is assigned either two gross and two net tonnages or one gross and one net tonnage.

(b) If two gross and two net tonnages are assigned, the higher tonnages (i.e. those based only on exemptions under § 69.169(a) through (d)) are applicable when the upper edge of the tonnage mark is submerged and the lower tonnages (i.e. those based only on all exemptions under § 69.169) are applicable when the upper edge of the tonnage mark is not submerged.

(c) If only the low gross and low net tonnages, as calculated under paragraph

VOL. 54 ISS 79 AP 26 1989 UMI

(b) of this section, are assigned, these tonnages are applicable at all times. On these vessels, the tonnage mark must be located in accordance with § 69.177(a)(6) at the level of the uppermost part of the load line grid.

§ 69.177 Markings.

(a) *Tonnage mark.* (1) All vessels with a second deck that are measured under the Dual Measurement System must have, on each side of the vessel, a tonnage mark, and an inverted triangle identifying the tonnage mark, as described and located under this section. (See the figure in § 69.183(a).) Vessels with only one deck are not assigned markings under this section.

(2) The tonnage mark is a horizontal line 15 inches long and one inch wide. The tonnage mark must be designated by a welded bead or other permanent mark 15 inches long placed along the top edge of the tonnage mark.

(3) Above the tonnage mark is placed an inverted equilateral triangle, each side of which is 12 inches long and one inch wide, with its apex touching the upper edge of the center of the tonnage mark.

(4) If the vessel has a load line mark, the longitudinal location of the center of the tonnage mark must be between 21 inches and six feet six inches aft of the vertical centerline of the load line ring. (See the 1, figures in § 69.183(b) and (c).) If the vessel does not have a load line mark, the center of the tonnage mark must be located amidships.

(5) Except as under paragraph (a)(6) of this section, the upper edge of the tonnage mark must be located below the line of the second deck at the distance indicated in Table 69.177(a)(5). (See the figure in § 69.183(b).)

Table 69.177(a)(5)— Minimum Distance in Inches Between the Tonnage Mark and the Line of the Second Deck—Continued

L (in feet)	L divided by D								
	12	13	14	15	16	17	18	19	20
800	167.5	152.1	138.9	127.4	117.4	106.6	100.8	93.8	87.4

L=the length in feet of the line of the second deck at the centerline of the vessel from the inner surface of the frames at the vessel's stem to the inner surface of the frames at the vessel's stern.

D=The vertical distance in feet from the top of the flat keel of the vessel to the line of the second deck.

Example (1) For a vessel in which L=450 feet and L/D=15 feet, read down from the L/D column "15" and to the right on the column "450" to where the two columns intersect at 39.8. The tonnage mark must be located 39.8 inches below the line of the second deck.

Example (2) If L or L/D is an intermediate number, the distance "a" between the tonnage mark and the line of the second deck must be obtained by linear interpolation. For a vessel in which L=424.80 feet and L/D= 15.17:

L	Table L/D=15	Actual Table L/D=15.17	Table L/D=18
Table 420	30.4		25.2
Actual 424.80	r	a	s
Table 430	33.3		27.9

Interpolation:
r=30.4+0.48 (33.3−30.4)=31.79
s=25.2+0.48 (27.9−25.2)=26.50
a=r−0.17 (r−s)=31.79−0.17 (31.79−26.50)=30.89 inches

(6) For the following vessels with a load line mark, the upper edge of the tonnage mark must be located at the level of the uppermost part of the load line grid:

(i) Vessels assigned only one gross and one net tonnage under § 69.175(c).

(ii) Vessels for which a load line assigning authority certifies that the vessel's load line mark was located as though the second deck were the freeboard deck.

(b) *Line for fresh and tropical waters.* (1) Except as under paragraph (b)(4) of this section, a horizontal line for fresh and tropical waters may be assigned at the vessel owner's request.

(2) The line must be nine inches long and one inch wide and located above and to the left of the tonnage mark at a distance equal to one forty-eighth of the distance from the top of the flat keel to the tonnage mark. The tonnage mark and the line for fresh and tropical waters must be connected by a vertical line one inch wide. (See the figure in § 69.183(a).)

(3) The line for fresh and tropical waters must be designated by a welded bead or other permanent mark nine inches long placed along the upper edge of the line.

(4) For vessels with a load line mark, if the load line assigning authority certifies that the load line mark was located as though the second deck were the freeboard deck, a line for fresh and tropical waters must not be placed on the vessel.

(c) *Freeboard deck mark.* A vessel assigned two gross and two net tonnages which has more than one deck and no load line mark assigned must have a mark on each side of the vessel with the same dimensions and location as the freeboard deck line mark under § 42.13–20 of this chapter, except that the mark must be located directly above the tonnage mark.

(d) *The line of the second deck.* The line of the second deck must not be marked on the side of the vessel.

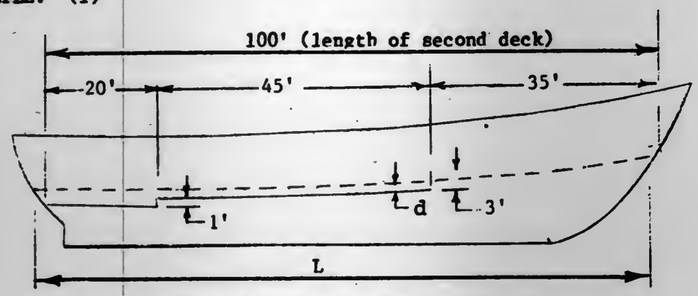
(e) *Color of markings.* All markings under this section must be maintained in either a light color on a dark background or a dark color on a light background.

§ 69.179 Certification of markings.

(a) Before a certificate of measurement is issued for a vessel requiring a tonnage mark, a certification by a measurement organization under § 69.15 that all markings meet the requirements of this subpart is required.

(b) The Coast Guard, at any time, may verify markings under this subpart.

§ 69.181 Locating the line of the second deck.

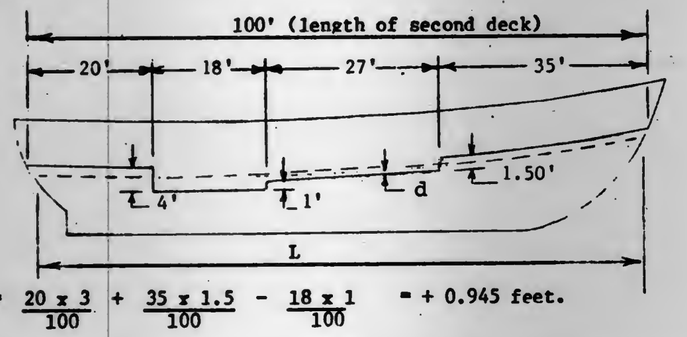


(a) If the second deck is not stepped, the line of the second deck is the longitudinal line of the underside of the second deck at the side of the hull.

(b) If the second deck is stepped (as in the examples following this paragraph), the line of the second deck is a longitudinal line extended parallel to each portion of the second deck and located at the height of the underside of the amidships portion of the second deck at the side of the hull—

(1) Plus, for each stepped portion of the second deck higher than the second deck at amidships, a distance equal to the length of the stepped portion divided by the total length of the second deck times the height that the step is above the height of the amidship portion of the second deck; and

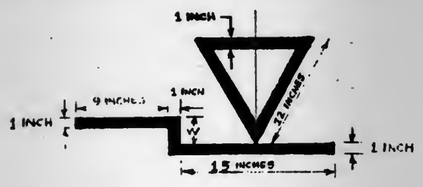
(2) Minus, for each stepped portion of the second deck lower than the second deck at amidships, a distance equal to the length of the stepped portion divided by the total length of the second deck times the height that the amidship portion of the second deck is above the height of the step.



EXAMPLE: (1)

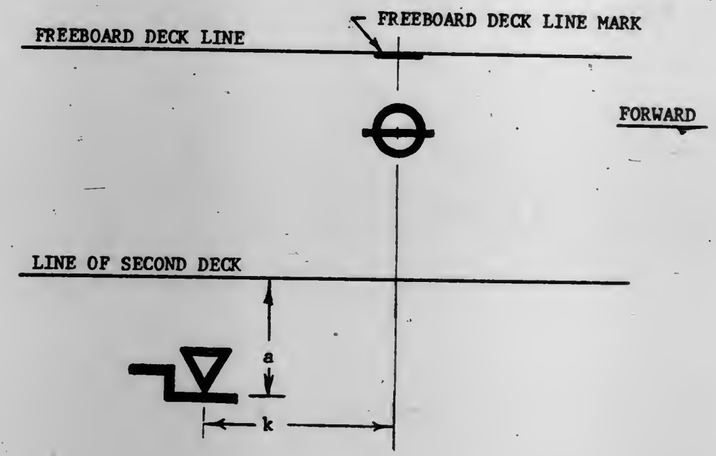
L = Length of the line of the second deck.
d = Distance from amidship portion of second deck to line of second deck.

$$d = \frac{35 \times 3}{100} - \frac{20 \times 1}{100} = +0.85 \text{ feet.}$$



EXAMPLE: (2)

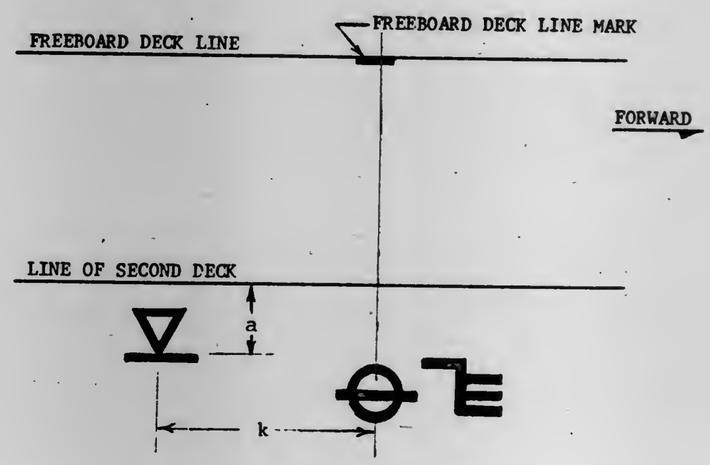
$$d = \frac{20 \times 3}{100} + \frac{35 \times 1.5}{100} - \frac{18 \times 1}{100} = +0.945 \text{ feet.}$$



§ 69.163 Figures.

(a) *Tonnage mark with an equilateral triangle and a line for fresh and tropical waters.*

W = 1/48 of the distance from the top of the flat keel to the tonnage mark. (See § 69.177(b)(2).)



(b) *Tonnage mark location if the load line mark is not placed as though the second deck were the freeboard deck.*

k = a distance between 21 inches and six feet six inches.

a = distance derived from Table 69.177(a)(5).

(c) *Tonnage mark location if the load line mark is placed as though the second deck were the freeboard deck.*

k = a distance between 21 inches and six feet six inches.

a = the distance between the line of the second deck and the uppermost part of the load line grid.

VOL 54 ISS 79 APR 26 1989 UMI

VOL 54 ISS 79 AP 26 1989 UMI

Subpart E—Simplified Measurement System

§ 69.201 Purpose.

This subpart prescribes the procedures for measuring a vessel under the Simplified Measurement System described in 46 U.S.C. Chapter 145, Subchapter III.

§ 69.203 Definitions.

As used in this subpart and in Coast Guard Form CG–5397 under § 69.205—

"Overall breadth" means the horizontal distance taken at the widest part of the hull, excluding rub rails, from the outboard side of the skin (outside planking or plating) on one side of the hull to the outboard side of the skin on the other side of the hull.

"Overall depth" means the vertical distance taken at or near midships from a line drawn horizontally through the uppermost edges of the skin (outside planking or plating) at the sides of the hull (excluding the cap rail, trunks, cabins, and deckhouses) to the outboard face of the bottom skin of the hull, excluding the keel. For a vessel that is designed for sailing and has a keel faired to the hull, the keel is included in "overall depth" if the distance to the bottom skin of the hull cannot be determined reasonably.

"Overall length" means the horizontal distance between the outboard side of the foremost part of the stem and the outboard side of the aftermost part of the stern, excluding rudders, outboard motor brackets, and other similar fittings and attachments.

"Registered breadth" means—

(a) For a single-hull vessel, the vessel's overall breadth; and

(b) For a multi-hull vessel, the horizontal distance taken at the widest part of the complete vessel between the outboard side of the skin (outside planking or plating) on the outboardmost side of one of the outboardmost hulls to the outboard side of the skin on the outboardmost side of the other outboardmost hull, excluding rubrails.

"Registered depth" means—

(a) For a single-hull vessel, the vessel's overall depth; and

(b) For a multi-hull vessel, the overall depth of the deepest hull.

"Registered length" means—

(a) For a single-hull vessel, the vessel's overall length; and

(b) For a multi-hull vessel, the horizontal distance between the outboard side of the foremost part of the stem of the foremost hull and the outboard side of the aftermost part of the stern of the aftermost hull, excluding fittings or attachments.

"Vessel designed for sailing" means a vessel which has the fine lines of a sailing craft and is capable of being propelled by sail, whether or not the vessel is equipped with an auxiliary motor, a decorative sail, or a sail designed only to steady the vessel.

§ 69.205 Application for measurement services.

To apply for measurement under the Simplified Measurement System, the owner of the vessel must complete the current issue of Coast Guard Form CG–5397 and submit the form to the Coast Guard Port of Documentation Office at the port where the vessel will be documented. (See Part 67, Appendix D, of this chapter for a list of these offices.)

§ 69.207 Measurements.

(a) All lengths and depths must be measured in a vertical plane at centerline and breadths must be measured in a line at right angles to that plane. All dimensions must be expressed in feet and inches or in feet and tenths of a foot.

(b) For a multi-hull vessel, each hull must be measured separately for overall length, breadth, and depth and the vessel as a whole must be measured for registered length, breadth, and depth.

(c) The Coast Guard may verify dimensions of vessels measured under this subpart.

§ 69.209 Calculation of tonnages.

(a) *Gross tonnage.* (1) Except as in paragraphs (a)(2) through (5) of this section, the gross tonnage of a vessel designed for sailing is one half of the product of its overall length, overall breadth, and overall depth (LBD) divided by one hundred (i.e., 0.50 LBD/100), and the gross tonnage of a vessel not designed for sailing is 0.67 LBD/100.

(2) The gross tonnage of a vessel with a hull that approximates in shape a rectangular geometric solid (barge-shape) is 0.84 LBD/100.

(3) The gross tonnage of a multi-hull vessel is the sum of all the hulls as calculated under this section.

(4) If the volume of the principal deck structure of a vessel that is indicated as a houseboat on Coast Guard Form CG–5397 is as large as, or larger than, the volume of the vessel's hull, the volume of the principal deck structure in tons of 100 cubic feet is added to the tonnage of the hull to establish the vessel's gross tonnage. The volume of the principal deck structure of a vessel is determined by the product of its average dimensions.

(5) If the overall depth of a vessel designed for sailing includes the keel, only 75 percent of that depth is used for gross tonnage calculations.

(b) *Net tonnage.* (1) For a vessel having propelling machinery in its hull—

(i) The net tonnage is 90 percent of its gross tonnage, if it is a vessel designed for sailing; or

(ii) The net tonnage is 80 percent of its gross tonnage, if it is not a vessel designed for sailing.

(2) For a vessel having no propelling machinery in its hull, the net tonnage is the same as its gross tonnage.

Dated: March 31, 1989.

Small Passenger Vessel Inspection and Certification; Extension of Comment Period and Announcement of Public Meeting and Hearings

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule; extension of comment period and notice of meeting and hearings.

SUMMARY: On January 30, 1989, the Coast Guard published in the **Federal Register** (54 FR 4412) a notice of proposed rulemaking to revise the regulations governing small passenger vessels (Title 46, Code of Federal Regulations, Subchapter T). Subchapter T contains the regulations for the inspection and certification of small passenger vessels including requirements for construction, outfitting of lifesaving and fire protection equipment, machinery and electrical installations, and operations. The term "small passenger vessel" generally includes any vessel of less than 100 gross tons carrying more than six passengers.

Because of requests for additional time to comment on the proposed rulemaking, the deadline for receipt of comments is extended to July 31, 1989.

The Coast Guard will hold one public meeting and six public hearings on this proposal on the dates and at the locations specified below.

DATES: Comments must be received on or before July 31, 1989. The dates for the public meeting and the hearings are listed in **SUPPLEMENTARY INFORMATION** below.

ADDRESSES: Written comments should be submitted to The Executive Secretary, Marine Safety Council (G–LRA–2/3600)(CGD 85–080), U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593–0001. Comments may be delivered to and will be available for inspection or copying, and the materials referenced in this notice will be available for examination and copying, at the Marine Safety Council (G–LRA–2), Room 3600, U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593–0001, (202) 267–1477, between 8 a.m. and 3 p.m., Monday through Friday, except holidays.

The locations of the public meeting and hearings are listed in **"SUPPLEMENTARY INFORMATION"** below.

FOR FURTHER INFORMATION CONTACT: LCDR William P. Cummins, Project Manager, Office of Merchant Marine Safety, Security, and Environmental Protection, (G–MVI), phone (202) 267–1181.

SUPPLEMENTARY INFORMATION:

Written Comments

The Notice of Proposed Rulemaking published on January 30, 1989, invited and encouraged interested persons to participate in this proposed rulemaking by submitting written comments, including views, data, or arguments, on the proposal by May 31, 1989. Several persons requested an extension of the comment period citing the size of the rulemaking and the difficulty in studying and providing meaningful responses within the original 120 day comment period. Because of these requests and in order to schedule additional hearings also requested by the public, the deadline for receipt of comments is extended to July 31, 1989.

Persons submitting comments should include their name and address, reference the rulemaking docket number (CGD 85–080), give the specific section of the proposed regulations to which each comment applies, and include supporting documents or sufficient detail to indicate the reason for each comment. Both comments supporting or opposing specific proposed regulations are encouraged. Persons desiring an acknowledgment that their comments were received should include a stamped, self-addressed envelope or postcard. This proposal may be changed in light of the comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal.

Public Meeting

The Coast Guard will hold a public meeting on the proposed rulemaking in Washington, DC, at 1:30 p.m. on Thursday, May 4, 1989. The location will be: U.S. Department of Transportation Headquarters, Nassif Building, Room 2230, 400 7th St. SW., Washington, DC.

The propose of the public meeting is to give the public an opportunity to ask questions on the intent of specific proposed requirements, ask questions on the methods of developing the costs associated with specific proposed requirements, and to request clarification of any of the requirements which may not be understood. The meeting will be conducted in an informal question and answer format. The questions which are raised will be addressed by a panel of Coast Guard technical personnel involved with the development of the rulemaking. Comments objecting to the proposed requirements, contesting cost estimates stated in the regulatory evaluation, or recommending alternative actions will not be accepted at the public meeting but may be made in writing before the end of the comment period or presented orally at a public hearing, the first of which will be held in Washington, DC on May 5, 1989.

Public Hearings

The Notice of Proposed Rulemaking published on January 30, 1989, stated that the Coast Guard planned to hold public hearings on this rulemaking in Washington, DC, New Orleans, LA, and San Francisco, CA. The Notice of Proposed Rulemaking also stated that hearings may be held in other locations if requested in writing by interested persons who can demonstrate that other

VOL. 54 ISS 79 AP 26 1989 UMI

opportunities to make an oral presentation will aid this rulemaking. The hearings will permit the public to orally present their views on the regulatory proposal, suggest alternative actions, and provide supportive information for their positions.

Numerous written comments were received requesting additional hearings in certain locations. As a result of those requests and in order to give the public adequate opportunity to make oral presentations on the proposed rulemaking, the Coast Guard will hold public hearings on the below listed dates at the indicated locations. Each hearing will begin at 10:00 a.m. and end at 5:00 p.m. or earlier if all the speakers have been heard.

The hearing schedule is as follows:

—Washington, District of Columbia; Friday, May 5, 1989. Department of Transportation Headquarters, Nassif Building, Room 2230, 400 7th St., SW., Washington, DC.

—St. Louis, Missouri; Tuesday, May 9, 1989. Holiday Inn Clayton Plaza, 7730 Bonhomme St., St. louis, MO; Telephone No. (314) 863–0400

—New Orleans, Louisiana; Wednesday, June 7, 1989. Hale-Boggs Federal Building, Room 1120, 500 Camp St., New Orleans, LA.

—San Francisco, California; Thursday, June 8, 1989. Travel Lodge, 250 Beach St., San Francisco, CA; Telephone No. (415) 392–6700

—Chicago, Illinois; Wednesday, June 14, 1989. Executive House Hotel, Illinois Room, 71 East Wacker Dr., Chicago, IL; Telephone No. (312) 346–7100

—Boston, Massachusetts; Friday, June 23, 1989. Boston Marine Society, National Historical Park Building #32, Charlestown Navy Yard, Charlestown, MA.

Interested persons are invited to participate in these hearings. Those wishing to make an oral statement should register at least 2 days before the date of the particular hearing at which the statement is to be made. Oral statements by individuals without prior registration will be allowed only if time permits. The Coast Guard reserves the right to impose time limits an oral presentations. To register, write or call the Executive Secretary, Marine Safety Council (G–LRA–2/3600) (CGD 85–080), U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593–0001; telephone number (202) 267–1477.

April 21, 1989.

M.J. Schiro,

Captain, U.S. Coast Guard, Acting Chief, Office of Marine Safety, Security and Environmental Protection.

BILLING CODE 4910–14–M

Notices

Federal Register

Vol. 54, No. 79

Wednesday, April 26, 1989

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Slate and Coy Compartments; Red Hill Timber Sale; Sequoia National Forest, Tulare County, California Intent To Prepare an Environmental Impact Statement

The Department of Agriculture, Forest Service will prepare an environmental impact statement (EIS) for a proposal to harvest timber in the Slate Roadless Area in the Slate and Coy Compartments of the Tule River District of the Sequoia National Forest.

The Sequoia National Forest Land and Resource Management Plan has been prepared. One of the management emphasis in the plan is to harvest timber on lands within the Slate and Coy Compartments.

The alternatives to be considered will range from no action to harvesting volumes up to eighteen million board feet. Within the context of these alternatives, alternative rotation lengths and alternative average yarding distances for standards designated as helicopter yarding will be considered.

Federal, State, and local agencies; the Tule River Indian Reservation; potential purchasers of the timber; and other individuals or organizations who may be interested in or affected by the decision will be invited to participate in the scoping process. This process will include:

1. Identification of potential issues.
2. Identification of issues to be analyzed in depth.
3. Elimination of insignificant issues or those which have been covered by a previous environmental review.

To determine the scope of issues to be addressed and for identifying significant issues related to the proposed timber sale, the Tule River District Ranger will be sending to known interested individuals, agencies, and organizations scoping letters inviting comments on the proposed timber sale. A press release for area media will be prepared to invite comments from the public. The Tule River District Ranger will also respond to requests for meetings with organizations and individuals.

James A. Crates, Forest Supervisor, Sequoia National Forest, Porterville, California, is the responsible official.

The analysis is expected to take about 17 months. The draft environmental impact statement is expected to be filed with the Environmental Protection Agency (EPA) and be available for a 45 day public review period by October 1989. At that time EPA will publish a notice of availability of the draft EIS in the Federal Register. It is very important that those interested in the management of the Slate and Coy Compartments participate at that time. To be most helpful, address adequacy of the statement or the merits of the alternatives discussed (see The Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3). In addition, Federal court decisions have established that reviewers of a draft EIS must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions, Vermont Yankee Nuclear Power Corp. v NRDC, 435 U.S. 519,553 (1978), and that environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final EIS, Wisconsin Heritages, Inc. v. Harris, 490 F Supp. 1334, 1338 (E.D. Wis. 1980). The reason for this is to ensure that substantive comments and objections are made availsble to the Forest Service at a time when it can meaningfully consider them and respond to them in the final.

After the comment period ends of the draft EIS, the comments will be analyzed and considered by the Forest Service in preparing the final EIS. The final environmental impact statement is scheduled to be completed by July 1990. In the final EIS, the Forest Service is required to respond to comments received (40 CFR 1503.4). The responsible official will consider the comments, responses, environmental consequences discussed in the EIS and applicable laws, regulations, and policies in making a decision regarding this proposal. The responsible official will document the decision and reasons for the decision in a Record of Decision. That decision will be subject to appeal.

Written comments and suggestions concerning the analysis should be sent to Del Pengilly, District Ranger, Sequoia National Forest, Tule River Ranger District, 32588 Highway 190, Springville, California 93265, by June 1, 1989. This date is necessary to provide the interdisciplinary team with public concerns prior to their field analysis.

Questions about the proposed action and environmental impact statement should be directed to John Gerritsma, Planning Forester, Tule River Ranger District, phone 209–539–2607.

Date: April 14, 1989.

James A. Crates,

Forest Supervisor.

BILLING CODE 3410–11–M

CIVIL RIGHTS COMMISSION

Rhode Island Advisory Committee; Agenda and Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a community forum sponsored by the Rhode Island Advisory Committee to the Commission will convene at 1:00 p.m. and adjourn at 4:30 p.m. on May 8, 1989, at the Senate Hearing Room, State House, Smith St., Providence, RI 02903. The forum will host four panels, dealing with (1) trends and causes of incidents of bigotry and violence; (2) collecting information on incidents of bigotry and violence; (3) incidents of bigotry and violence from the victim's perspective; and (4) incidents of bigotry and violence from the law enforcement perspective.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson David H. Sholes, (401/463–5600) or John I. Binkley, Director of the Eastern Regional Division of the Commission at 202/523–5264 or TDD 202/376–8117). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the regional division at least five (5) working days before the scheduled date of the meeting.

VOL 54 ISS 79 AP 26 1989 UMI

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, April 12, 1989.

Melvin L. Jenkins,

Acting Staff Director.

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

Minority Business Development Agency

Business Development Center Applications; Brooklyn, NY

AGENCY: Minority Business Development Agency, Commerce.

ACTION: Notice.

SUMMARY: The Minority Business Development Agency (MBDA) announces that it is soliciting competitive applications under its Minority Business Development Center (MBDC) program to operate an MBDC for approximately a 3 year period, subject to the availability of funds. The cost of performance for the first 12 months is estimated at $285,000 in Federal funds and a minimum of $50,294 in non-Federal contributions for the budget period October 1, 1989, to September 30, 1990. Cost-sharing contributions may be in the form of cash contributions, client fees for services, in-kind contributions, or combinations thereof. The MBDC will operate in the Brooklyn, NY, SMSA geographic service area.

The funding instrument for the MBDCwill be a cooperative agreement. Competition is open to individuals, non-profit and for-profit organizations, state and local governments, American Indian tribes and educational institutions.

The MBDC program is designed to provide business development services to the minority business community for the establishment and operation of viable minority businesses. To this end, MBDA funds organizations that can coordinate and broker public and private resources on behalf of minority individuals and firms; offer a full range of management and technical assistance; and serve as a conduit of information and assistance regarding minority business.

Applications will be evaluated on the following criteria: The experience and capabilities of the firm and its staff in addressing the needs of the business community in general and, specifically, the special needs of minority businesses, individuals and organizations (50 points); the resources available to the firm in providing business development services (10 points) the firm's approach (techniques and methodology) to performing the work requirements included in the application (20 points); and the firm's estimated cost for providing such assistance (20 points). An application must receive at least 70% of the points assigned to any one evaluation criteria category to be considered programmatically acceptable and responsive.

MBDCs shall be required to contribute at least 15% of the total project cost through non-Federal contributions. Client fees for billable management and technical assistance (M&TA) rendered must be charged by MBDCs. Based on a standard rate of $50 per hour, MBDCs will charge client fees at 20% of the total cost for firms with gross sales of $500,000 or less and 35% of the total cost for firms with gross sales of over $500,000.

The MBDC may continue to operate, after the initial competitive year, for up to 2 additional budget periods. Periodic reviews culminating in year-to-date quantitative and qualitative evaluations will be conducted to determine if funding for the project should continue. Continued funding will be at the discretion of MBDA based on such factors as an MBDC's satisfactory performance, the availability of funds and Agency priorities.

DATE: The closing date for applications is June 12, 1989. Applications must be postmarked on or before June 12, 1989.

ADDRESS: New York Regional Office, Minority Business Development Agency, Jacob K. Javits Federal Bldg., Room 3720, New York, New York 10278, Area Code/ Telephone Number (212) 264-3262.

FOR FURTHER INFORMATION CONTACT: Gina A. Sanchez, Regional Director, New York Regional Office. (212) 264-3262.

SUPPLEMENTARY INFORMATION: Anticipated processing time of this award is 120 days. Executive Order 12372 "Intergovernmental Review of Federal Programs" is not applicable to this program. Questions concerning the preceding information, copies of application kits and applicable regulations can be obtained at the above address. A Pre-application Conference to assist all interested applications will be held on May 15, 1989, from 10:00 a.m. until 3:00 p.m. in Manhattan, New York, at the Jacob K. Javitts Federal Building, 26 Federal Plaza, Room 305-B. For further information please contact the NYRO at (212) 264-3262.

William R. Fuller,

(Deputy) Regional Director, New York Regional Office.

Date: April 17, 1989.

BILLING CODE 3510-21-M

National Institute of Standards and Technology

[Docket No. 90401-9101]

National Voluntary Laboratory Accreditation Program

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Publication of NVLAP Directory Supplement.

SUMMARY: The National Institute of Standards and Technology (NIST) announces laboratory accreditation actions taken to date during the second quarter of 1989. The accompanying table lists 221 testing laboratories receiving initial accreditation to perform bulk asbestos analysis in accordance with 40 Code of Federal Regulations Chapter I (1-1-87 edition) Part 763, Subpart F, Appendix A pages 293-299 or the current U.S. Environmental Protection Agency method for the analysis of asbestos in building materials by polarized light microscopy.

FOR FURTHER INFORMATION CONTACT: Laboratory Accreditation, ADMIN A527, National Institute of Standards and Technology, Gaithersburg, MD 20899, (301) 975-4016. Also current information can be obtained by communicating by computer with the NVLAP computer electronic bulletin board on 301-948-2058.

SUPPLEMENTARY INFORMATION: The National Institute of Standards and Technology periodically publishes supplements to the NVLAP Directory of Accredited Laboratories. This supplement is issued at this time to announce the large number of new actions taken and is published pursuant to § 7.6(b) of the National Voluntary Laboratory Accreditation Program Procedures (Title 15, Part 7, of the Code of Federal Regulations).

Raymond G. Kammer,

Acting Director.

Date: April 20, 1989.

National Telecommunications and Information Administration

Advisory Committee on Advanced Television; Partially Closed Meeting

A meeting of the Commerce Advisory Committee on Advanced Television will be held May 10, 1989, 9:00 a.m. to 11:30 a.m., in the Secretary's Conference Room, U.S. Department of Commerce, 14th Street & Constitution Avenue, NW., Washington, DC.

The Committee advises the Secretary on the impact of advanced television on the competitiveness of U.S. industry, what policies may be pursued to heighten the development of advanced television in the public interest, and other related issues. The meeting is scheduled to consist of a discussion of the impact of advanced television on the competitiveness of U.S. industry and the development of Federal Government policies in this area.

The General Session of the meeting will be open to the public and a limited number of seats will be available on a first-come first-served basis. To the extent that time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

The Assistant Secretary for Administration, with the concurrence of the General Counsel, formally determined on November 2, 1988, pursuant to section 10(d) of the Federal Advisory Committee Act, that the agenda items covered in the closed session may be exempt from the provisions of the Act relating to open meetings and public participation therein because these items will be concerned with matters that are within the purview of 5 U.S.C. 552b(c)(4), and (c)(9)(B). The discussions are likely to disclose privileged or confidential commercial information and information for which premature disclosure would likely significantly frustrate the implementation of proposed agency actions. (A copy of the determination is available for public inspection and copying in the Public Reading Room, Central Reference and Record Inspection Facility, Room 6628, Department of Commerce.)

FOR FURTHER INFORMATION CONTACT: Richard M. Firestone, Chief Counsel, Office of the Chief Counsel, National Telecommunications and Information Administration, Room H4717, 14th Street & Constitution Avenue, NW., Washington, DC 20230; telephone 202–377–1816.

Date: April 21, 1989.

Richard M. Firestone,

Acting Assistant Secretary, National Telecommunications and Information Administration.

DEPARTMENT OF DEFENSE

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Title, Applicable Form, and Applicable OMB Control Number: Youth Attitude Tracking Study, no form required, OBM Control Number 0704–0069.

Type of Request: Extension.

Average Burden Hours/Minutes Per Response: 30 minutes.
Frequency of Response: 1.
Number of Respondents: 10,050.
Annual Burden Hours: 5,025.
Annual Responses: 10,050.
Needs and Uses: This survey determines and evaluates knowledge of and attitudes toward military service of Americans 16–24 years of age. It provides annual cross-sectional data on propensity to serve and on other key issues for trend analyses. The survey data are used by DOD components to develop recruiting strategies, incentive programs, advertising strategies, Congressional testimony, resource allocation and special studies.
Affected Public: Individuals.
Frequency: On occasion/Annually.
Respondent's Obligation: Voluntary.
OMB Desk Officer: Dr. Timothy Sprehe.

Written comments and recommendations on the proposed information collection should be sent to Dr. Timothy Sprehe at Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Ms. Pearl Rascoe-Harrison.

Written request for copies of the information collection proposal should be sent to Ms. Rascoe-Harrison, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, Virginia 22202–4302.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Office of the Secretary

Commercial Activities Inventory Report and Five Year Review Schedule for Fiscal Year 1988

AGENCY: Office of the Secretary, DoD.
ACTION: Notice.

SUMMARY: This notice announces the publication of the DoD Commercial Activities Inventory Report and Five Year Review Schedule For FY 1988 (DoD 4100.33–INV). This document may be obtained by writing to the Superintendent of Documents, United States Government Printing Office, Washington, DC 20402, referring to stock number 008–000–00520–6, and enclosing a check in the amount of $21.00, payable to the Superintendent of Documents.

FOR FURTHER INFORMATION CONTACT: Mr. Dom Miglionico, Office of the Assistant Secretary of Defense (Production and Logistics) Installations Support Division, Pentagon, Washington, DC 20301–8000, telephone (202) 325–0537.

SUPPLEMENTARY INFORMATION: This document is published under the provisions of OMB Circular A–76, which requires the Department of Defense to publish an annual inventory report of all commercial activities. The OMB also requires that the Department of Defense publish a five year schedule for reviewing all in-house method of operation should continue or whether an in-house versus contract cost comparison should be performed to determine the most cost effective method of operation.

April 20, 1989.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Defense Science Board Task Force on Follow on Forces Attack; Meeting

ACTION: Notice of Advisory Committee meetings.

SUMMARY: The Defense Science Board Task Force on Follow on Forces Attack (FOFA) will meet in closed session on May 18, 1989 in the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting the Task Force will continue to review, in detail, classified material associated with conventional military capabilities in NATO to include special targeting requirements.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92–463, as amended (5 U.S.C. App. II, (1982)), it has been determined that this DSB Task Force meeting, concerns matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly this meeting will be closed to the public.

April 20, 1989.

Linda M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Strategic Defense Initiative Advisory Committee; Meeting

ACTION: Notice of Advisory Committee meetings.

SUMMARY: The Strategic Defense Initiative (SDI) Advisory Committee will meet in closed session in Washington, DC, on May 22–23, 1989.

The mission of the SDI Advisory Committee is to advise the Secretary of Defense and the Director, Strategic Defense Initiative Organization on scientific and technical matters as they affect the perceived needs of the Department of Defense. At the meeting on May 22–23, 1989 the committee will discuss status of SDI research and management issues.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92–463, as amended (5 U.S.C., App. II, (1982)), it has been determined that this SDI Advisory Committee meeting concerns matters listed in 5 U.S.C., 552b(c)(1) (1982), and that accordingly this meeting will be closed to the public.

April 20, 1989.

Department of the Army

Availability of Draft Record of Decision for Remediation of Landfill No. 26, Hamilton Air Force Base, Novato, CA

The Department of Army will release the Draft Record of Decision for the selection of the remedial alternatives for the remediation of Landfill 26, Hamilton Air Force Base, Novato, California on April 24, 1989.

The Draft Record of Decision specifically describes and addresses the selected remedial alternatives to clean up the landfill and the associated groundwater. The landfill was identified in the 1987 remedial investigation at Hamilton AFB as a site containing soil and refuse that, in some locations, exceeds criteria developed by the State of California for identification of hazardous waste. The Feasibility Study released to the public on January 9, 1989, describes eight remedial alternatives for addressing contamination in the soil/refuse. These alternatives range from no action (requiring continued groundwater monitoring) to excavation and disposal of contaminated soil/refuse in

appropriate commercial landfills and range in costs from $2.8 million to $53.5 million.

Remediation of soil/refuse will subsequently require localized groundwater remediation at the landfill. The Draft Feasibility Study describes six groundwater remedial alternatives utilizing various processes ranging in cost from $4.7 million to $18 million.

The Draft Record of Decision selects Fixation and Class II Closure of the Landfill (Alternative 4A) and Trickling Filter-Equalization (Alternative 6B) for the soil/refuse operable unit and groundwater operable unit, respectively. Here is a brief description of the alternatives:

Landfill Soil/Refuse Operable Unit—Alternative 4A: All contaminated soil/refuse exceeding levels appropriate for Class II landfill closure will be excavated and fixed with Portland cement or similar reagents. This fixed material would be redeposited into Landfill 26. A variance from the State of California for Class II closure would be required as fixed contaminated would still exceed Class II closure level requirements. The landfill would be capped and closed as a Class II landfill. Estimated cost—$13.2 million.

Groundwater Operable Unit—Alternative 6B: Contaminated groundwater will be extracted from wells located both downgradient and within Landfill 26. Extracted water will pass through an oil/water separator to capture free hydrocarbons and then be treated in a trickling filter to remove trace organics. Treated effluent will be stored on-site in an equalization tank for pH control and time-released to a sanitary treatment facility. Estimated cost—$4.7 million.

The Corps of Engineers has been conducting environmental investigations at Hamilton AFB since May, 1985. To date, clean up actions on the property have included removal of containerized hazards (1985) and removal of 65 underground fuel structures (1986). Total cost expenditure for the Hamilton AFB clean up and investigations to date has been $13.8 million.

Copies of the Draft Record of Decision for Landfill 26 may be obtained by calling the Sacramento District Corps of Engineers, (916) 551–2254, or by writing the Sacramento District Corps of Engineers, ATTN: CESPK–ED–M (ISS), 650 Capitol Mall, Sacramento, California 95814–4794. A limited number of copies of the Draft Record of Decision will also be available at the Hamilton Army Airfield Installation Manager's Office, Building No. 501, Hamilton Army Arifield.

Copies of the document will also be available for review in the local geographic area of surrounding Hamilton at the following locations:

Marin County Library, Civic Center, San Rafael, California

Santa Rosa City Library, Main Branch, Santa Rosa, California

Building 501, Hamilton Army Airfield, Novato, California

6th Army Public Affairs Office, Bldg. 38, Presidio of San Francisco, San Francisco, California

Presidio of San Francisco Public Affairs Office, Bldg. 37, Presidio of San Francisco, San Francisco, California

All interested individuals, organizations, and agencies are invited to provide comments in writing. Written comments may be mailed to the Corps of Engineers' Sacramento address. Comments received by May 24, 1989, will become part of the official responsiveness summary in the final Record of Decision for remediation of Landfill No. 2, Hamilton Air Force Base.

Lewis D. Walker,

Deputy Assistant Secretary of the Army (Environment, Safety and Occupational Health) OASA (I&L).

BILLING CODE 3710–08–M

Science Board Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Date of Meeting: May 18, 1989.

Time of Meeting: 0800–1700 hours.

Place: The Pentagon, Washington, DC.

Agenda: The Army Science Board Ad Hoc Subgroup for Tactical Explosive System (TEXS) will meet to review information presented at previous meeting, review a trade-off analysis performed by the US Army Engineering School, and also to update and draft a final report. This meeting will be closed to the public in accordance with section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C., Appendix 2, subsection 10(d). The classified and unclassified matters and proprietary information to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. Contact the Army Science Board Administrative Officer, Sally Warner, for further information at (202) 695–3039 or 695–7046.

Sally A. Warner,

Administrative Officer, Army Science Board.

[FR Doc. 89–9962 Filed 4–25–89; 8:45 am]

BILLING CODE 3710–08–M

DEPARTMENT OF EDUCATION

[CFDA No. 84.220]

Extension of Closing Date for Transmittal of Applications for New Awards for Fiscal Year 1989 Under the Centers for International Business Education Program

AGENCY: Department of Education.

ACTION: Extension of closing date for transmittal of applications for new awards for Fiscal Year 1989 under the Centers for International Business Education Program.

The Secretary extends to May 19, 1989 the closing date by which an institution may submit an application for new awards for fiscal yar 1989 under the Centers for International Business Education Program. On March 7, 1989, the Secretary published a notice establishing a closing date of May 10, 1989 for transmittal of applications for new awards for fiscal year 1989 for the Centers for International Business Education Program (54 FR 9686). The previous closing date is being extended to allow participants additional time to prepare applications because the Secretary has determined that erroneous information regarding the nature of the competition was received by eligible applicants.

FOR FURTHER INFORMATION CONTACT: For further information, contact Susanna C. Easton, Center for International Education, U.S. Department of Education, Office of Postsecondary Education, Room 3053, ROB–3, 400 Maryland Avenue, SW., Washington, DC 20202–5332. Telephone (202) 732–3302.

(20 U.S.C. 1130a-b)

James B. Williams,

Acting Assistant Secretary for Postsecondary Education.

April 20, 1989.

[FR Doc. 89–10149 Filed 4–25–89; 8:45 am]

BILLING CODE 4001–01–M

National Board of the Fund for the Improvement of Postsecondary Education; Closed Meeting

AGENCY: National Board of the Fund for the Improvement of Postsecondary Education.

ACTION: Notice of closed meeting.

SUMMARY: This notice sets forth the proposed agenda of a forthcoming meeting of the National Board of the Fund for the Improvement of Postsecondary Education. This notice also describes the functions of the Board. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act.

DATE: On May 11, 1989 from 8:00 a.m. to 7:00 p.m., and on May 12, 1989 from 8:00 a.m. to 7:00 p.m.

ADDRESSS: The Carlyle Suites, 1731 New Hampshire Avenue, NW., Washington, DC 20009.

FOR FURTHER INFORMATION CONTACT: Charles Karelis, Director, Fund for the Improvement of Postsecondary Education, 7th & D Streets, SW., Washington, DC 20202 (202) 732–5750.

SUPPLEMENTARY INFORMATION: The National Board of the Fund for the Improvement of Postsecondary Education is established under section 1001 of the Higher Education Amendments of 1980, Title X (20 U.S.C. 1135a–1). The National Board of the Fund is authorized to recommend to the Director of the Fund and the Assistant Secretary for Postsecondary Education priorities for funding and approval or disapproval of grants of a given kind.

The meeting of the National Board is closed to the public. The meeting is for the purpose of reviewing and evaluating grant applications submitted to the Fund under the Comprehensive Program.

The meeting of the National Board will be closed to the public on May 11, from 8:00 a.m. to 7:00 p.m., and on May 12, from 8:00 a.m. to 7:00 p.m. The meeting will be closed under the authority of section 10(d) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. Appendix 2) and under exemptions (4) and (6) of 5 U.S.C. 552b(c) (Pub. L. 94–409). The review and discussions of the applications and the qualifications of proposed staff may disclose commercial or financial information obtained from a person and privileged or confidential or which would disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy if conducted in open session.

A summary of the activities at the closed session and related matters which are informative to the public consistent with the policy of Title 5 U.S.C. 552b will be available to the public within fourteen days of the meeting.

Records are kept of all Board proceedings, and are available for public inspection at the office of the Fund for the Improvement of Postsecondary Education, Room 3100, Regional Office Building #3, 7th & D Street SW., Washington, DC 20202 from the hours of 8:00 a.m. to 4:30 p.m.

James B. Williams,

Acting Assistant Secretary for Postsecondary Education.

[FR Doc. 89–9988 Filed 4–25–89; 8:45 a.m]

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Energy Information Administration

Form EIA–767, "Steam-Electric Plant Operation and Design Report"

AGENCY: Energy Information Administration, DOE.

ACTION: Notice of the Proposed Revision and Extension of the Form EIA–767, "Steam-Electric Plant Operation and Design Report," and Solicitation of Comments.

SUMMARY: The Energy Information Administration (EIA), as part of its continuing effort to reduce paperwork and respondent burden (required by the Paperwork Reduction Act of 1980, Pub. L. 96–511, 44 U.S.C. 3501 *et seq*), conducts a consultation program to provide the general public with an opportunity to comment on proposed and continuing reporting forms. This program ensures that requested data can be provided in the desired format, reporting burden is minimized, reporting forms are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, EIA is soliciting comments concerning the proposed revision and extension to the Form EIA–767, "Steam-Electric Plant Operation and Design Report."

DATE: Written comments must be submitted on or before May 26, 1989.

ADDRESS: Send written comments to Mr. Al Breuel (EI–541), Energy Information Administration, Department of Energy, Mail Stop: 2C–090, 1000 Independence Avenue, SW., Washington DC 20585, Telephone (202) 586–6541. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the DOE contact listed in this notice of your intention to do so as soon as possible.

FOR FURTHER INFORMATION CONTACT: *For further information or to obtain copies of the proposed form and instructions:* Requests for additional information, or copies of the form and instructions should be directed to Mr. Breuel at the address listed above.

SUPPLEMENTARY INFORMATION:

I. Background
II. Current Actions
III. Request for Comments

I. Background

In order to fulfill its responsibilities under the Federal Energy Administration Act of 1974 (Pub. L. 93–275) and the Department of Energy (DOE) Organization Act (Pub. L. 95–91), the Energy Information Administration is obliged to publish, and otherwise make available to the public, high-quality statistical data that reflect current and prospective electric power plant operations.

The revised Form EIA–767 remains an annual form that collects data on the operation and design of steam-electric plants. The form collects data required by the following sponsors: the Environmental Protection Agency (EPA), the DOE Office of the Assistant Secretary for Environment, Safety, and Health (EH), the DOE Office of the Assistant Secretary for Fossil Energy (FE), the Federal Energy Regulatory Commission (FERC), and the Bureau of Economic Analysis (BEA) of the Department of Commerce. Most of the data elements on this form are required by more than one sponsor. EPA uses the data to develop, assess, reform, and enforce the regulations required by the Clean Air Act, as amended (42 U.S.C. 7401 *et seq.*), the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 *et seq.*), and the Resource Conservation and Recovery Act of 1976 (42 U.S.C. 6901 and other sections). EH uses the data to assess the environmental impacts of electric energy plans and projections, and the impact of environmental regulations on the generation of electric power. EPA, FE, and EH use the data to perform emission trends and analyses required of them as participants in the Interagency Acid Precipitation Task Force established by the Energy Security Act of 1980 (42 U.S.C. 8901 *et seq.*). FE uses the data to evaluate the inventory of pollution control technology and generation technology. FERC uses the data to evaluate fuel use in utility rate-making proceedings and the use of alternate fuels. BEA uses the data to assess the impact of pollution abatement and control expenditures on the Gross National Product. EIA, in coordination

VOL
54
ISS
79
AP
26
1989
UMI

with the sponsors, designed the revised form and is responsible for collecting and processing the data. Within EIA, the data are used to develop a comprehensive electric power data base that supports EIA models. Other data users include Congress, state environmental regulatory bodies, trade associations, universities, manufacturers, electric utilities, and other Federal agencies.

II. Current Actions

In keeping with its mandated responsibilities, EIA proposes to extend the Form EIA-767 for 3 years. EIA and the sponsors propose the following revisions to the form:

Page 5—Footnotes have been added to items 4 and 5 indicating that flue gas desulfurization units that also remove particulate matter and flue gas particulate collectors that also remove sulfur dioxide, respectively, must be included.

Page 7—Item 3 has been modified for sulfur dioxide emission standards to include both an emission rate and a percent scrub if both standards are required.

Page 7—Item 3 has been clarified to indicate that the most stringent statutes or regulations that govern air emissions should be entered. A new item 4 is added that requires the identification of the type of standards under which the boiler is operating (e.g., not covered under the new source performance standards (NSPS), covered under NSPS Subpart D, or covered under NSPS Subpart Da).

III. Request for Comments

Prospective respondents and other interested parties should comment on the proposed extension and revisions within 30 days of the publication of this notice. The following general guidelines are provided to assist in the preparation of responses.

As a potential respondent:

A. Are the instructions and definitions clear and sufficient? If not, which instructions require clarification?

B. Can the data be submitted using the definitions included in the instructions?

C. Can data be submitted in accordance with the response time specified in the instructions?

D. Public reporting burden for this collection is estimated to average 84 hours per response. How much time, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information, do you estimate it will require you to complete and submit the required form?

E. What is the estimated cost of completing this form, including the direct and indirect costs associated with the data collection? Direct costs should include all costs, such as administrative costs, directly attributable to providing this information.

F. How can the form be improved?

G. Do you know of other Federal, State, or local agencies that collect similar data? If you do, specify the agency, the data elements, and the means of collection.

As a potential user:

A. Can you use data at the levels of detail indicated on the form?

B. For what purposes would you use the data? Be specific.

C. How could the form be improved to better meet your specific needs?

D. Are there alternate sources of data and do you use them? What are their deficiencies and/or strengths?

EIA is also interested in receiving comments from persons regarding their views on the need for the collection of the information contained in the electric power surveys.

Comments submitted in response to this notice will be summarized and/or included in the requests for OMB approval of these data surveys; they also will become a matter of public record.

Statutory Authority: Sections 5(a), 5(b), 13(b), and 52 of Pub. L. 93-275, Federal Energy Administration Act of 1974, as amended, 15 U.S.C. 764(a), 764(b), 772(b), and 790a.

Issued in Washington, DC April 20, 1989.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

[FR Doc. 89-9910 Filed 4-25-89; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. EC89-10-000 et al.]

Consumers Power Co., et al; Electric Rate, Small Power Production, and Interlocking Directorate Filings

April 19, 1989.

Take notice that the following filings have been made with the Commission:

1. Consumers Power Company

[Docket No. EC89-10-000]

Take notice that on April 11, 1989, Consumers Power Company (Consumers) submitted an application for Authority to sell Facilities to Palisades Generating Company (PGC).

Pursuant to the Asset Purchase Agreement dated as of December 7, 1988 between Consumers and PGC, Consumers proposes to sell to PGC certain transmission facilities located in the vicinity of Consumers Palisades Nuclear Generating Plant in Covert Township, Van Buren County, Michigan. The estimated consideration for the proposed sale is approximately $5 million.

Sale of the transmission facilities will facilitate the sale of electric energy by PGC to Consumers pursuant to the Power Purchase Agreement dated as of February 1, 1989 filed with the Federal Energy Regulatory Commission in Docket No. ER89-256-000. Consumers requests approval of its Application pursuant to section 203(a) of the Federal Power Act.

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

2. Idaho Power Company

[Docket No. ER89-336-000]

Take notice that on April 11, 1989, Idaho Power Company tendered for filing in compliance with the Federal Energy Regulatory Commission's Order of October 7, 1978, a summary of sales made under the Company's First Revised FERC Electric Tariff, Volume No. 1 (Supersedes Original Volume No. 1) during January and February 1989, along with cost justification for the rate charged. This filing includes the following supplements:

Utah Power & Light Company
Supplement No. 81
Sierra Pacific Power Company
Supplement No. 81
Pacific Power & Light Company
Supplement No. 27
Portland General Electric
Supplement No. 63
Montana Power Company
Supplement No. 60
Washington Water Power Company
Supplement No. 61
Puget Sound Power & Light Company
Supplement No. 36
Pacific Gas & Electric Company
Supplement No. 36

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

3. Central Hudson Gas & Electric Corporation

[Docket No. ER89-331-000]

Take notice that Central Hudson Gas and Electric Corporation (Cental Hudson) on April 6, 1989, tendered for filing, as a rate schedule an executed Agreement dated November 1, 1988 between Central Hudson and United Illuminating Company (United Illuminating). The proposed rate

schedule provides for the sale and purchase of capacity and related energy, supplemental power and residual energy for the period November 1, 1988 to April 30, 1989.

United Illuminating shall pay Central Hudson monthly $60MW day for the capacity and supplemental capacity made available which charge includes the use of Central Hudson's transmission facilities required to deliver and transmit energy. Energy charges will be agreed upon in advance of the purchase by United Illuminating in accordance with section 6B of the Agreement.

Central Hudson states that copies of the subject filing was served upon United Illuminating Company.

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

4. Southern Company Services, Inc.

[Docket No. ER89-334-000]

Take notice that on April 7, 1989, Southern Company Services, Inc. (Southern Companies) tendered for filing an Amended and Restated Energy Purchase and Sale Agreement between Cajun Electric Power Cooperative, Inc. and Southern Companies.

Southern Companies requests an effective date of April 1, 1989.

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

5. Consolidated Edison Company of New York

[Docket No. ER89-332-000]

Take notice that on April 6, 1989, Consolidated Edison Company of New York, Inc. (Con Edison) tendered for filing Supplements to its Rate Schedules FERC Nos. 60, 66 and 78, agreements to provide transmission service for the Power Authority of the State of New York (the Authority). The Supplements provide for an increase in the monthly transmission charge from $0.82 to $1.05 per kilowatt for transmission of power and energy sold by the Authority to Brookhaven National Laboratory, Grumman Corporation and the Long Island Municipal Distribution Agencies, thus increasing annual revenues under the Rate Schedules by a total of $126,834.54. Con Edison requests waiver of the Commission's notice requirements so that the increase can be made effective as of July 1, 1988.

Con Edison states that a copy of this filing has been served by mailed upon the Authority.

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

6. Florida Power & Light Company

[Docket No. ER89-329-000]

Take notice that on April 4, 1989, Florida Power & Light Company (FP&L) tendered for filing a Notice of Cancellation of FERC Rate Schedule No. 99 between FP&L and Seminole Electric Cooperative, Inc.

FP&L requests an effective date of April 1, 1989.

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

7. Northeast Service Utilities Company

[Docket No. ER89-330-000]

Take notice that on April 6, 1989, Northeast Utilities Service Company (NUSCO) tendered for filing a Notices of Termination of the following rate schedules:

Purchase Agreement with respect to various gas turbine unit sales between Connecticut Light & Power Company, (CL&P) Western Massachusetts Electric Company, (WMECO) and the Town of Wallingford, Connecticut, (Wallingford) dated June 1, 1986 (CL&P Rate Schedule FERC 366 and WMECO Rate Schedule FERC 291). (Agreement A)

Transmission Agreement between CL&P, WMECO, and Wallingford dated September 16, 1983 (CL&P Rate Schedule FERC 305, Supple. 1 to 305 and Supple. 1 to Supple. 2 and WMECO Rate Schedule FERC No. 243). (Agreement B)

NUSCO requests an effective date of April 26, 1989 for Agreement A and November 1, 1988 for Agreement B.

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

8. Utah Power & Light Company

[Docket No. ER89-324-000]

Take notice that on April 5, 1989, Utah Power & Light Company (Utah) tendered for filing a General Transfer Agreement between Bonneville Power Administration and Utah Power & Light Company. The Agreement supercedes the Exchange and Transfer Agreement dated April 3, 1973 (FERC Rate Schedule No. 113).

Utah requests that the notice requirements be waived, and that the Agreement be made effective retroactively as of April 12, 1988, the date service first commenced.

Copies of this filing were served on the Bonneville Power Administration and the Idaho Public Utilities Commission.

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

9. San Diego Gas & Electric Company

[Docket No. ER89-327-000]

Take notice that on April 4, 1989 San Diego Gas & Electric Company (SDG&E) tendered for filing rate schedule changes to the following agreements between SDG&E and Southern California Edison Company (Edison):

1. Short Term Firm Transmission Service Agreement, Rate Schedule FERC No. 58.
2. Interruptible Transmission Service Agreement, Rate Schedule FERC No. 59.
3. Firm Transmission Service Agreement, Rate Schedule FERC No. 60.

Under the terms of the agreements, SDG&E will make available to Edison firm and interruptible transmission service between points near the U.S.-Mexico boarder and San Onofre.

SDG&E has requested an effective date of January 1, 1989 and therefore, requests waiver of the prior notice requirements.

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

10. Florida Power & Light Company

[Docket No. ER89-348-000]

Take notice that on April 4, 1989, Florida Power & Light Company (FP&L) tendered for filing Support Schedules C and F, which have been updated to reflect current costs of providing service under Schedules A and B of the referenced contract filed in Docket No. ER80-58, and Attachment No. 2, support information as described in Article III of the Offer of Settlement in Docket no. ER80-58.

FP&L states that the revised rates are to become effective on June 1, 1989.

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

11. Northeast Utilities Service Company

[Docket ER89-333-000]

Take notice that on April 7, 1989, Northeast Utilities Company (NUSCO) tendered for filing a Letter Agreement between UNITIL and NUSCO, as agent for (CL&P) and Western Massachusetts Electric Company (WMECO), dated February 28, 1989, amended (i) a Purchase Agreement with respect to South Meadow Units 11, 12, 13, and 14 (Gas Turbine Agreement) between CL&P and UNITIL Power Corp. (UNITIL), dated August 1, 1986, and (ii) Sales Agreement with respect to Montiville

VOL 54 ISS 79 APR 26 1989 UMI

and Middletown Units between CL&P and UNITIL, dated June 1, 1986 (Fossil Unit Agreement) (both Agreements previously submiterd and filed as FERC Rate schedules Nos. CL&P 363, Supplement Nos. 1 through 4 thereto, and Supplement No. 1 to Supplement No. 4, and FERC Rate Schedule No. CL&P 358).

NUSCO states that the rate schedule changes were made by mutual agreement of the parties. The rate schedule changes provide for (i) additional unit sales under the Gas Turbine Agreement, (ii) the admission of WMECO as a party to the Gas Turbine Agreement, and (iii) additional unit sales under the Fossil Unit Agreement.

NUSCO states that copies of this rate schedule have been mailed or delivered to CL&P, WMECO, and UNITIL.

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NW., Washington, DC 20426 in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 89-9922 Filed 4-25-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ST89-2078-000 et al.]

Tennessee Gas Pipeline Co.; Self-Implementing Transactions

April 21, 1989.

Take notice that the following transactions have been reported to the Commission as being implemented pursuant to Part 284 of the Commission's Regulations, and sections 311 and 312 of the Natural Gas Policy Act of 1978 (NGPA).[1]

The "Recipient" column in the following table indicates the entity receiving or purchasing the natural gas in each transaction.

The "Part 284 Subpart" column in the following table indicates the type of transaction. A "B" indicates transportation by an interstate pipeline on behalf of an intrastate pipeline or a local distribution company pursuant to section 284.102 of the Commission's Regulations and section 311(a)(1) of the NGPA.

A "C" indicates transportation by an intrastate pipeline on behalf of an interstate pipeline or a local distribution company served by an interstate pipeline pursuant to § 284.122 of the Commission's Regulations and section 311(a)(2) of the NGPA. In those cases where Commission approval of a transportation rate is sought pursuant to § 284.123(b)(2), the table lists the proposed rate and the expiration date of the 150-day period for staff action. Any person seeking to participate in the proceeding to approve a rate listed in the table should file a motion to intervene with the Secretary of the Commission on or before May 12, 1989.

A "D" indicates a sale by an intrastate pipeline to an interstate pipeline or a local distribution company served by an interstate pipeline pursuant to § 284.142 of the Commission's Regulations and section 311(b) of the NGPA. Any interested person may file a complaint concerning such sales pursuant to § 284.147(d) of the Commission's Regulations.

An "E" indicates an assignment by an intrastate pipeline to any interstate pipeline or local distribution company pursuant to § 284.163 of the Commission's Regulations and section 312 of the NGPA.

A "G" indicates transportation by an interstate pipeline on behalf of another interstate pipeline pursuant to § 284.222 and a blanket certificate issued under § 284.221 of the Commission's Regulations.

A "G(LT)" or "G(LS)" indicates transportation, sales or assignments by a local distribution company on behalf of or to an interstate pipeline or local distribution company pursuant to a blanket certificate issued under § 284.224 of the Commission's Regulations.

A "G(HT)" or "G(HS)" indicates transportation, sales or assignments by a Hinshaw Pipeline pursuant to a blanket certificate issued under § 284.224 of the Commission's Regulations.

Lois D. Cashell,

Secretary.

[1] Notice of a transaction does not constitute a determination that the terms and conditions of the proposed service will be approved or that the noticed filing is in compliance with the Commission's Regulations.

BILLING CODE 6717-01-M

[Docket Nos. CP89-1212-000, et al.]

Williams Natural Gas Company, et al.; Natural Gas Certificate Filings

April 19, 1989.

Take notice that the following filings have been made with the Commission:

1. Williams Natural Gas Company

[Docket No. CP89-1212-000]

Take notice that on April 14, 1989, Williams Natural Gas Company (WNG), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP89-1212-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to provide transportation for National Energy Systems, Inc. (National) under WNG's blanket certificate issued in Docket No. CP86-631-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

VOL 54 ISS 79 AP 26 1989 UMI

WNG requests authorization to transport, on an interruptible basis, up to a maximum of 280 MMBtu equivalent of natural gas per day for National from various receipt points in Kansas, Missouri, Oklahoma, Texas and Wyoming to various delivery points on WNG's pipeline system located in Kansas. WNG anticipates transporting 140 MMBtu equivalent of natural gas on an average day and 51,100 MMBtu equivalent of natural gas on an annual basis. WNG states that no new facilities are required to effectuate this proposal. WNG states that it has no knowledge of any agency relationship under which a local distributing company or an affiliate of National will receive natural gas on behalf of National. WNG states that the transportation of natural gas for National commenced on February 22, 1989, as reported in Docket No. ST89-2791-000, for a 120-day period pursuant to § 284.223(a)(1) of the Commission's Regulations and the blanket certificate issued to WNG in Docket No. CP86-631-000.

Comment date: June 5, 1989, in accordance with Standard Paragraph G at the end of this notice.

2. Northern Natural Gas Company Division of Enron Corp.

[Docket No. CP89-1194-000]

Take notice that on April 11, 1989, Northern Natural Gas Company, Division of Enron Corp. (Northern), 1400 Smith Street, Houston, Texas 77002, filed in Docket No. CP89-1194-000 a request pursuant to Northern's blanket authority granted on September 1, 1982, in Docket No. CP82-401-000 and §§ 157.205 and 157.212 of the Commission's Regulations (18 CFR 157.205 and 157.212) for authority to realign certain firm sales entitlements among existing delivery points for Wisconsin Gas Company (Wisconsin Gas), all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Northern requests authority to realign certain firm sales entitlements under Rate Schedule CD-1 among existing delivery points at communities served by Wisconsin Gas. Northern indicates that the proposed realignment of entitlements would not affect the total level of certificated firm sales service provided by Northern to Wisconsin Gas. Northern states that the proposed activity is not prohibited by its existing tariff and that it has sufficient capacity to accommodate the changes proposed herein without detriment or disadvantage to its other customers.

Comment date: June 5, 1989, in accordance with Standard Paragraph G at the end of this notice.

3. Questar Pipeline Company

[Docket No. CP89-1074-000]

Take notice that on March 24, 1989, Questar Pipeline Company (Questar), 79 South State Street, Salt Lake City, Utah 84111, filed in Docket No. CP89-1074-000 a request pursuant to § 157.205 of the Commission's Regulations (18 CFR 157.205) for authorization to transport natural gas on behalf of Chevron U.S.A., Inc. (Chevron), under Questar's blanket certificate issued in Docket No. CP88-650-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Questar proposes to transport, on an interruptible basis, up to 14,000 MMBtu equivalent on a peak day, 14,000 MMBtu equivalent on an average day and 5,110,000 MMBtu equivalent on an annual basis for Chevron. It is stated that Questar would receive the gas at existing points on Questar's system in Sublette County, Wyoming, and would deliver equivalent volumes at an existing interconnection with Northwest Pipeline Corporation in Sublette County, Wyoming. It is asserted that Questar would use existing facilities for the transportation service and no construction of additional facilities would be required. It is explained that the transportation service commenced March 1, 1989, under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89-2793.

Comment date: June 5, 1989, in accordance with Standard Paragraph G at the end of this notice.

4. Questar Pipeline Company

[Docket No. CP89-1075-000]

Take notice that on March 24, 1989, Questar Pipeline Company (Questar), 79 South State Street, Salt Lake City, Utah 84111, filed in Docket No. CP89-1075-000, a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for Exxon Corporation (Exxon), under its blanket certificate issued in Docket No. CP88-650-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Questar states that pursuant to a transportation agreement dated February 24, 1989, under its Rate Schedule T-2, it would transport up to 115,000 MMBtu per day equivalent of natural gas for Exxon from various receipt points on its system in Wyoming. Questar further states that it would redeliver the natural gas to Exxon or for Exxon's account in Colorado and Wyoming. Questar indicates the average daily and estimated annual quantities would be equivalent to 50,000 MMBtu and 18,250,000 MMBtu, respectively.

Questar states that it commenced the transportation of natural gas for Exxon on March 1, 1989, as reported in Docket No. ST89-2794-000, for a 120-day period pursuant to § 284.223(a) of the Commission's Regulation (18 CFR 284.223(a)).

Comment date: June 5, 1989, in accordance with Standard Paragraph G at the end of this notice.

5. Williams Natural Gas Company

[Docket No. CP89-1228-000]

Take notice that on April 17, 1989, Williams Natural Gas Company (WNG), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP89-1228-000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to provide transportation service on behalf of the City of Neodesha, Kansas (Neodesha), a local distribution company, under WNG's blanket certificate issued in Docket No. CP86-631-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

WNG requests authorization to transport, on an interruptible basis, up to a maximum of 3,000 MMBtu of natural gas per day for Neodesha from receipt points located in Kansas, Missouri, Oklahoma, Texas and Wyoming to delivery points on WNG's pipeline located in Kansas. WNG anticipates transporting, on an average day 645 MMBtu and an annual volume of 235,425 MMBtu.

WNG states that the transportation of natural gas for Neodesha commenced March 17, 1989, as reported in Docket No. ST89-2805-000, for a 120-day period pursuant to § 284.223(a) of the Commission's Regulations and the blanket certificate issued to WNG in Docket No. CP86-631-000.

Comment date: June 5, 1989, in accordance with Standard Paragraph G at the end of this notice.

6. El Paso Natural Gas Company

[Docket No. CP89-1207-000]

Take notice that on April, 1989, El Paso Natural Gas Company (El Paso), Post Office Box 1492, El Paso, Texas, 79978, filed a request for authorization at Docket No. CP89-1207-000, pursuant to §§ 157.205 and 284.223(b) of the Federal Energy Regulatory Commission's (Commission) Regulations Under the Natural Gas Act, to provide interruptible transportation service for Phillips Natural Gas Company (Shipper), under its blanket certificate issued at Docket No. CP88-433-000, all as more fully set forth in the request for authorization on file with the Commission and open for public inspection.

El Paso requests authority to transport up to 126,000 MMBtu of natural gas per day for Shipper from any point of receipt on El Paso's system to various delivery points located in Arizona and Texas. El Paso states that the estimated daily and annual quantities would be 84,400 MMBtu and 30,806,000 MMBtu, respectively. El Paso further states that this transportation service under § 284.223(a) commenced on March 10, 1989, as reported with the Commission at Docket No. ST89-2851-000

Comment date: June 5, 1989, in accordance with Standard Paragraph G at the end of this notice.

7. Northern Natural Gas Company Division of Enron Corporation

[Docket No. CP89-1172-000]

Take notice that on April 7, 1989, Northern Natural Gas Company, Division of Enron Corporation (Northern), 1400 Smith Street, P.O. Box 1188, Houston, Texas 77251-1188, Houston, Texas 77251-1188 filed in Docket No. CP89-1172-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Transco Energy Marketing Company (Transco), under the certificate issued in Docket No. CP86-435-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Northern states that it proposes to transport up to 100,000 MMBtu of natural gas per day for Transco, on a peak day, 75,000 MMBtu on an average day, and 36,500,000 MMBtu annually, under Rate Schedule IT-1. This service was reported to the Commission in Docket No. ST89-2754-000. Northern further states that construction of facilities will not be required to provide the proposed service.

Comment date: June 5, 1989, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraph

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP89-968-000]

ANR Pipeline Co.; Request Under Blanket Authorization

March 13, 1989.

Take notice that on March 8, 1989, ANR Pipeline Company (ANR), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP89-968-000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to provide transportation service on behalf of The Fremont Company (Fremont), under ANR's blanket certificate issued in Docket No. CP88-532-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

ANR requests authorization to transport, on an interruptible basis, up to a maximum of 700 dekatherms of natural gas per day for Fremont, a marketer of natural gas, from a receipt point located in Vermilion Parish, Louisiana to a delivery point located in Van Wert County, Ohio. ANR anticipates transporting an annual volume of 255,500 dekatherms.

ANR states that the transportation of natural gas for Fremont commenced January 25, 1989, as reported in Docket No. ST89-2332-000, for a 120-day period pursuant to § 284.223(a) of the Commission's Regulations and the blanket certificate issued to ANR in Docket No. CP88-532-000.

Any person or the Commission's staff may, within 45 days issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

BILLING CODE 6717-01-M

[Docket No. RP88-45-017]

Arkla Energy Resources, a Division of Arkla, Inc.; Proposed Change in FERC Gas Tariff

April 20, 1989.

Take notice that on April 17, 1989, Arkla Energy Resources (AER), a division of Arkla, Inc. tendered for filing the following tariff sheet to its FERC Gas Tariff, Original Volume No. 1-A:

First Substitute Second Revised Sheet No. 82

and the following tariff sheet to its FERC Gas Tariff, First Revised Volume No. 1:

First Substitute Twelfth Revised Sheet No. 12D.

AER states that on February 17, 1989, it tendered for filing tariff sheets in compliance with the Commission's order approving the Stipulation and Agreement Regarding Interim Rates. Due to clerical and pagination error, the Commission Staff requested that AER make changes in its filing. This filing represents those changes.

Also, AER is withdrawing, from its February 17, 1989 filing, the following tariff sheets from its FERC Gas Tariff, Original Volume No. 1-A:

Third Revised Sheet Nos. 32 through 40.

VOL
54
ISS
79
AP
26
1989
UMI

These sheets had already been accepted by the Commission and were inadvertently added to the filing.

Any person desiring to be heard or to protest the subject filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211. All such motions or protests must be filed by April 27, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP89-75-001]

Black Marlin Pipeline Co.; Proposed Changes in FERC Gas Tariff

April 20, 1989.

Take notice that Black Marlin Pipeline Company (Black Marlin) on April 17, 1989, tendered for filing a revision in its FERC Gas Tariff in compliance with the Commission's Order dated March 31, 1989 in this proceeding. Black Marlin states that the filing reflects revisions in its FTS/OCS, ITS/OCS Transportation Rate Schedule as prescribed by the Commission in that Order. Black Marlin has requested that the proposed filing be made effective April 1, 1989.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before April 27, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

CNG Transmission Corp.; Proposed Changes in FERC Gas Tariff

April 20, 1989.

On April 14, 1989, CNG Transmission Corporation ("CNG") submitted for filing, as part of its FERC Gas Tariff Original Volume No. 1, the following tariff sheet:

Substitute Original Sheet No. 127-A.

CNG has requested that the Commission permit this filing to become effective as of April 1, 1989. This tariff sheet is being filed in compliance with Commission Order Nos. 509 and 509-A, and the letter order dated March 31, 1989.

CNG states that copies of the filing were served upon all of its Volume No. 1 customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules and Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests shall be filed on or before April 27, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Northern Natural Gas. Co., Division of Enron Corp.; Proposed Changes in FERC Gas Tariff

April 20, 1989.

Take notice that Northern Natural Gas Company, Division of Enron Corp., (Northern) on April 17, 1989, tendered for filing revised changes in its F.E.R.C. Gas Tariff in compliance with the Commission's Order dated March 31, 1989 in this proceeding.

The Company states that copies of the filing have been mailed to each of its customers purchasing gas and receiving transportation and gathering services under its F.E.R.C. Gas Tariff and to interested State Commissions. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Stret NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214 and 385.211). All such motions or protests must be filed on or before April 27, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TM89-4-29-000]

Panhandle Eastern Pipe Line Co.; Proposed Changes in FERC Gas Tariff

April 20, 1989.

Take notice that on April 17, 1989, Panhandle Eastern Pipe Line Company (Panhandle) tendered for filing the following tariff sheets to its FERC Gas Tariff Original Volume No. 1:

To Be Effective September 29, 1988

Third Substitute Original Sheet No. 3-C.7

Third Substitute Original Sheet No. 3-C.8

Third Substitute Original Sheet No. 3-C.9

To Be Effective November 28, 1988

Second Substitute Original Sheet No. 3-C.13

Second Substitute Original Sheet No. 3-C.14

Second Substitute Original Sheet No. 3-C.15

Panhandle states that the proposed tariff sheets are being filed in compliance with Ordering Paragraph (B) of the Commission's September 28, 1988 Order in Docket No. RP88-240-000 and Ordering Paragraph (D) of the Commission's November 25, 1988 Order in Docket Nos. RP89-10-000 and RP88-240-000 which required Panhandle, *inter alia*, to track any modifications to Panhandle's pipeline supplier, Trunkline Gas Company (Trunkline)'s take-or-pay charges ordered by the Commission in Docket Nos. RP88-239-000 and RP89-11-000, respectively. Specifically, the tariff sheets submitted herewith, reflect the revised take-or-pay charges filed by Trunkline on April 10, 1989 in compliance with the Commission's Order Granting Rehearing dated March 24, 1989 in Docket No. RP88-239-006.

Panhandle states that copies of the filing were sent to all of Panhandle's jurisdictional sales customers and interested state commissions, as well as the parties to the above-captioned proceedings.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). All such motions or protests should be filed on or before April 27, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP89-73-002]

Pelican Interstate Gas System; Compliance Filing

April 20, 1989.

Take notice that on April 14, 1989, Pelican Interstate Gas System (Pelican) filed certain tariff sheets to its FERC Gas Tariff, Original Volume No. 1, to be effective April 1, 1989.

Pelican states that these tariff sheets are filed in compliance with the Commission Order issued March 31, 1989. Pelican states that a new § 5.7 has been added to Rate Schedule FTS to redefine the processing fee in terms of a prepayment of a reservation charge and to provide for a refund of the prepayment. Pelican states that Section 8 of Rate Schedule FTS has also been revised to clarify that if Pelican elects to construct facilities for one shipper, Pelican will do so for other shippers on a non-discriminatory basis.

Pelican states that the March 31, 1989 order also required Pelican to set forth the method by which it will reallocate firm capacity in compliance with 18 CFR 284.305(e). Pelican points out that section § 3.2 of Rate Schedule FTS, Original Sheet No. 36, already so specifies in that it states that that section also applies to the reallocation of firm transportation rights purusant to 18 CFR 284.304(c).

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214. 385.211 (1988)). All such motions or protests should be filed on or before April 27, 1989. Protests all be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. CP89-1095-000]

United Gas Pipe Line Co.; Request Under Blanket Authorization

April 3, 1989.

Take notice that on March 28, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP89-1095-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations for authorization to provide interruptible transportation service on behalf of ARCO oil and Gas Company's, a producer of natural gas, under United's blanket certificate issued in Docket No. CP88-6-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

United states that it would transport 15,450 MMbtu on a peak and average day and 5,639,250 MMbtu on an annual basis.

United further states that it has commenced service under the 120-day automatic authorization and reported such service in Docket No. ST89-2651, pursuant to § 284.223(a) of the Regulations.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

[Docket No. RP89-67-001]

West Texas Gathering Co.; Tariff Filing

April 20, 1989.

Take notice that on April 17, 1989, West Texas Gathering Company ("West Texas") 550 Westlake Park Blvd., Suite 170, Houston, Texas 77079, submitted for filing a compliance tariff filing pursuant to the Commission's March 17, 1989, Order issued to West Texas.

West Texas states that its tariff filing is designed to bring West Texas' open-access tariff into full compliance with Part 284 of the Commission's Regulations, 18 CFR Part 284 and with the Commission's March 17, 1989, Order.

The tariff sheets provide that they are filed to be made effective on February 15, 1989. West Texas has requested such waiver of the Commission's regulations as may be required in order to permit the proposed effective date.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 N. Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.211 and 385.214 of the Commission's regulations. All such motions or protests must be filed on or before April 27, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6560-50-M

[PP 7G3551/T576; FRI-3561-6]

Triasulfuron; Establishment of Temporary Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has established temporary tolerances for residues of the herbicide triasulfuron in or on certain raw agricultural commodities. These temporary tolerances were requested by Ciba-Geigy Corp.

DATE: These temporary tolerances expire December 31, 1990.

FOR FURTHER INFORMATION CONTACT: By mail:

Robert Taylor, Product Manager (PM) 25, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

Office location and telephone number: Rm. 245, CM #2, 1921 Jefferson Davis Highway, Arlington, VA, (703) 557-1800

SUPPLEMENTARY INFORMATION: Ciba-Geigy Corp., P.O. Box 18300, Greensboro, NC 27419, has requested in pesticide petition (PP) 7G3551 the establishment of temporary tolerances for residues of the herbicide triasulfuron [2-(2-chloroethoxy)-N-[(4-methoxy-6-methyl-1,3,5-triazin-2-yl-amino)carbonyl]benezenesulfonamide] in or on the raw agricultural commodities wheat and barely grain at 0.1 part per million (ppm); wheat and barely straw at 0.5 ppm; wheat and barely forage at 5.0 ppm; wheat and barely hay (dry forage) at 15 ppm, milk at 0.1 ppm; meat, fat, and meat byproducts (excluding liver and kidney) of cattle, goats, hogs, horses, and sheep at 0.05 ppm; liver of cattle, goats, hogs, horses, and sheep at 0.1 ppm; and kidney of cattle, goats, hogs, horses, and sheep at 0.5 ppm. These temporary tolerance will permit the marketing of the above raw agricultural commodities when treated in accordance with the provisions of the experimental use permit 100-EUP-90, which is being issued under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (Pub. L. 95-396, 92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material were evaulated, and it was determined that establishment of the temporary tolerances will protect the public health. Therefore, the temporary tolerances have been established on the condition that the pesticide be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active herbicide to be used must not exceed the quantity authorized by the experimental use permit.

2. Ciba-Geigy Corp. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These tolerances expire December 31, 1990. Residues not in excess of these amounts remaining in or on the raw agricultural commodities after this expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary tolerances. These tolerances may be revoked if the experimental use permit is revoked or if any experience with or scientific data on this pesticide indicate that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirements of section of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

Authority: (21 U.S.C. 346a(j)).

Dated: April 10, 1989.

Frank Sanders,

Acting Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-M

FEDERAL HOME LOAN BANK BOARD

[No. 89-1338]

Power of Receiver and Conduct of Receiverships; Repurchase Agreements; Lincoln Savings and Loan Association, Los Angeles, CA

Date: April 18, 1989.

AGENCY: Federal Home Loan Bank Board.

ACTION: Notice.

SUMMARY: The Federal Home Loan Bank Board ("Board") is supplementing Board Resolution No. 84-572 to clarify its position concerning the protections afforded to those dealing with insured savings and loan associations in "repos" of government and mortgage backed securities. With particular reference to Lincoln Savings and Loan Association, Los Angeles, California ("Lincoln"), which has engaged in a substantial volume of such "repo" transactions, the Board wishes to make it clear that the protections given to securities dealers and others in the "repo" market by amendments to the Bankruptcy Code would also be afforded to securities dealers and others engaged in repo transactions with Lincoln.

EFFECTIVE DATE: April 18, 1989.

FOR FURTHER INFORMATION CONTACT: Lawrence W. Hayes, Deputy General Counsel for FSLIC, (202) 906-6428; or Deborah E. Siegel, Attorney, Office of General Counsel, (202) 906-6848, Federal Home Loan Bank Board, 1700 G Street NW., Washington, DC 20552.

SUPPLEMENTARY INFORMATION: The Board has adopted the following resolution:

Whereas, The Federal Home Loan Bank Board ("Board"), by Resolution No. 89-1328, dated April 14, 1989, appointed the Federal Savings and Loan Insurance Corporation ("FSLIC") as Conservator for Lincoln Savings and Loan Association, Los Angeles, California ("Lincoln"); and

Whereas, The Board has considered the particular importance of Repos (as defined below) in providing liquidity and funding for Lincoln, the accounts of which are insured by FSLIC, and the potential disruption to the markets in such Repos that could arise as a result of a receivership, conservatorship, or similar proceeding with respect to Lincoln, which disruption could have additional negative effects on the cost of the funding and liquidity of Repo Assets (as defined below) for other FSLIC insured institutions and institutions chartered by the Board; and

Whereas, The Board as operating head of the FSLIC has decided, pursuant to its powers under Section 5(d)(11) of the Home Owners Loan Act of 1933, as amended, and Section 406(c)(3) of the National Housing Act, as amended, to adopt the following resolutions.

Now, therefore, the Board resolves as follows

1. The Board commits that it shall use its powers under the National Housing Act to ensure that any receivership (and to the fullest extent permitted by law, any conservatorship or similar proceeding) with respect to Lincoln shall be conducted solely by the FSLIC (and not the Commissioner, Department of Savings and Loan for the State of California) as receiver, conservator or similar officials ("Receiver") under federal law and regulations, Board Resolution No. 84-572, and these resolutions.

2. The Receiver will perform all of Lincoln's obligations under Repos outstanding at the time of its appointment according to their then existing terms and conditions (including payment and margin maintenance terms) and will perform all obligations under any New Repos (as defined below) in accordance with their terms and conditions.

3. The Receiver shall have the power to renew, extend, or modify any Repo, and to enter into new Repos (collectively, "New Repos"), but may only exercise such power with the consent of the Repo counterparty.

4. In any termination of the receivership of Lincoln or disposition of Lincoln's liabilities under any Repo or New Repo, the Board and the Receiver shall provide for the performance of obligations and the exercise of remedies under Repos and New Repos in a manner consistent with Board Resolution No. 84-572 and these resolutions.

5. Notwithstanding any other provision of law, regulation, or these resolutions, if the Receiver does not perform all such obligations in accordance with their terms, the counterparty to such Repos or New Repos shall have the absolute right to exercise all of its rights and remedies with respect to such Repos and New Repos (including liquidation of Repo Assets).

6. In the event of a Cross-Default (as defined below), a counterparty to a Repo or New Repo shall have the absolute right to accelerate the repurchase and other obligations thereunder (without notice to the Receiver) and exercise all of its rights and remedies with respect to such Repos and New Repos (including liquidation of Repo Assets to satisfy such accelerated obligations).

7. The failure or delay of a counterparty to exercise any of its rights or remedies upon a failure to perform or a Cross-Default shall not constitute a waiver of any rights or remedies in connection therewith.

8. In connection with a Repo or New Repo counterparty's exercise of remedies upon failure to perform or a Cross-Default, neither the Board nor the Receiver shall object to or seek to oppose or stay such exercise or assert or seek to assert any adverse claims (including stop-transfer instructions) against the Repo Assets or any holder or transferee thereof in connection therewith.

9. The Receiver may enforce its claim to any excess received by a counterparty upon the exercise of such remedies over the stated repurchase price (including interest to the date of liquidation of the Repo Assets) and

BEST COPY AVAILABLE

VOL 54 ISS 79 AP 26 1989 UMI

reasonable expenses of liquidation; provided, however, that nothing herein shall be construed to limit any set-off rights that such counterparty shall have against any such excess.

10. Notwithstanding any provision of law or regulation, neither the Board nor the Receiver shall seek to avoid or recover any payment or transfer of Repo Assets or funds made in connection with any Repo or New Repo or the liquidation thereof as a preferential transfer or fraudulent conveyance (other than any fraudulent conveyance made by Lincoln, voluntarily or involuntarily, with actual intent to hinder, delay or defraud its creditors; provided, however, any transferee of such a transfer that takes for value and in good faith has a lien on or may retain any interests transferred, and shall not be subject to a fraudulent conveyance claim in respect to such transfer, in each case to the extent that such transferee gave value to Lincoln in exchange for such transfer and provided further that in no event shall the Board or the Receiver make any such fraudulent conveyance claim against any Repo Assets).

11. Nothing herein shall limit the power of the Board or the Receiver to make a claim against a counterparty (but not Repo Assets) based on such counterparty's fraud or failure to liquidate a Repo or a New Repo in a commercially reasonable manner. In light of the substantial volume of Lincoln's Repos, the Board and the FSLIC hereby confirm that liquidation of Repo Assets over a period, not in excess of 90 days from the date of termination of a Repo or New Repo, would constitute a liquidation of a Repo or New Repo in a commercially reasonable time, and that the counterparty shall be entitled (but in the case of a Repo only from the proceeds of liquidation of Repo Assets or by way of set-off) to interest, at the contract rate, accruing during such period, provided, however, that a liquidation of Repo Assets at any point during such period or after a longer period of time shall not in and of itself constitute a commercially unreasonable time.

12. In connection with any Repo or New Repos, the Board and the FSLIC, in its corporate capacity, each irrevocably waives compliance by counterparties to Repos or New Repos with the FSLIC right or notice and purchase (12 CFR 563.B–2) and the contractual language required thereby, if applicable to any Repo Assets.

13. Nothing herein shall limit the exercise by a counterparty to a Repo or New Repo of its rights and remedies thereunder in reliance on the Board's Resolution No. 84–572, which Resolution shall continue in full force and effect; provided, however, that paragraphs 2, 4, 5, 6, 7, 8, 10 and 12, the proviso to paragraph 9, and the second sentence of paragraph 11 of these resolutions shall not apply to a termination of a Repo prior to the stated repurchase or maturity date therefor based solely on the appointment of the Receiver for Lincoln.

14. In recognition of the reliance counterparties to Repos and New Repos place and will place on Resolution No. 84–572 and these resolutions in continuing to renew and enter into Repos with Lincoln, the Board intends itself, the FSLIC, in its corporate capacity, and the Receiver to be bound by Resolution No. 84–572 and these resolutions, and will not amend or rescind them without appropriate public notice of a least 45 days and any such amendment or rescission shall operate only prospectively.

"Cross Default" means, as to any counterparty to a Repo or New Repos, the failure by Lincoln or the Receiver to make any payment of funds or delivery of additional Repo Asset to any other Repo or New Repo counterparty when due, (b) the failure by Lincoln or the Receiver to make any payment of funds or delivery of securities under any "securities contract" or "commodities contract" (each as defined in the Federal Bankruptcy Code), or interest rate exchange agreement, when due, or (c) such counterparty is unable to finance or sell under repo, on reasonable terms and conditions, any Repo Assets (whether due to market insecurity, a breach by the Board of its commitments hereunder, or otherwise).

"Repo Assets" means assets that are "liquid assets" under 12 CFR 523.10 or assets that would be so "liquid" but for their remaining term to maturity, "mortgage-related securities" (as defined in section 3(a)(41) of the Securities Exchange Act of 1934).

"Repo" means an agreement, whether documented as a purchase and sale transaction or a secured loan transaction, by Lincoln (or the Receiver, in the case of New Repos) pursuant to which Lincoln or the Receiver transfers Repo Assets to a counterparty that is a registered broker-dealer (including a registered government securities broker-dealer) or an affiliate thereof, the Federal Home Loan Mortgage Corporation, or (to the extent that Repo Assets are securities that are direct obligations of or that are fully guaranteed as to principal and interest by the United States or any agency thereof, the Federal Home Loan Mortgage Corporation, or the Federal National Mortgage Association) a Federal Home Loan Bank, against the transfer of funds with a simultaneous agreement by the counterparty to retransfer such Repo Assets to Lincoln or the Receiver on a date certain or on demand against the transfer of funds.

Resolved further, That these resolutions shall be effective immediately upon their adoption by the Board.

Resolved further, That the Secretary to the Board shall forward this resolution for publication in the Federal Register.

By the Federal Home Loan Bank Board.

John F. Ghizzoni,

Assistant Secretary.

BILLING CODE 6730–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

Request for Nominations of Candidates To Serve on the Mine Health Research Advisory Committee

The National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control (CDC), is soliciting nominations for membership on the Mine Health Research Advisory Committee (MHRAC). On December 23, 1989, four vacancies will occur. The MHRAC, which is authorized by the Federal Mine Safety and Health Act of 1977, advises the Department of Health and Human Services on matters related to intramural and extramural health research for the nation's miners. The direction, scope, and scientific quality of the NIOSH mine health research program are considered by the Committee.

Nominations in the disciplines of occupational medicine, industrial hygiene engineering, plumonary medicine, epidemiology, and toxicology are sought. Mining experience is desirable, but is not necessary for every position on the Committee. Emphasis is placed on scientific credentials.

The Department of Health and Human Services gives close attention to equitable geographic distribution and to minority and female representation; therefore, nominations from these groups are encouraged.

The following information is requested: name, affiliation, address, telephone number, and a recent curriculum vitae. Nominations should be sent by May 20, 1989, to: Mr. Melvin L. Myers, Executive Secretary, MHRAC, NIOSH, CDC, D–37, 1600 Clifton Road, NE., Atlanta, Georgia 30333, telephones: FTS: 236–3901, Commercial: 404/639–3901.

Dated: April 20, 1989.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control.

BILLING CODE 4160–19–M

National Institutes of Health

Meeting of the Advisory Committee to the Director

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Advisory Committee to the Director, NIH, on May 18, 1989. The meeting will take place from 8:30 a.m. to 4:30 p.m. in Building 60, Lecture Hall, Mary Woodard Lasker Center for Health Research and Education (The Cloister), National Institutes of Health, Bethesda, Maryland 20892. The meeting will be open to the public.

The meeting will be devoted to discussions of "Biomedical Research: The Next Generation of Scientists."

The Executive Secretary, Jay Moskowitz, Ph.D., National Institutes of Health, Shannon Building, Room 103, Bethesda, Maryland 20892, (301) 496–3152, will furnish the meeting agenda, rosters of Committee members and consultants, and substantive program information upon request.

Date: April 18, 1989.

BILLING CODE 4140–01–M

John E. Fogarty International Center for Advanced Study in the Health Sciences; Meeting

Notice of Meeting of the Fogarty International Center Advisory Board Pursuant to Pub. L. 92–463, notice is hereby given by the twelfth meeting of

VOL 54 ISS 79 AP 26 1989 UMI

the Fogarty International Center (FIC) Advisory Board, May 23, 1989, in the Stone House (Building 16), at the National Institutes of Health.

The meeting will be open to the public from 10:00 a.m. to 4:00 p.m. The morning agenda will include a report by the Director of the FIC, and a report on the scientific and professional accomplishment of former International Research Fellows (supported by the FIC). The afternoon session will include a report on the meeting of the Advisory Committee to the Director, NIH, on "Biomedical Reseach: The Next Generation"; a discussion of coordination between FIC and NIH research institutes; and the report of a workship on "Pathogenesis and Prevention of Hepatocellular Carcinoma."

In accordance with the provisions set forth in section 552b(c)(9)(B), Title 5, U.S.C. the Board meeting will be closed to the public from 8:30 to 10:00 a.m. for discussion of specific long-range initiatives, the premature disclosure of might hinder the implementation of such initiatives.

In accordance with the provisions of sections 552(b)(c)(4) and 552b(c)(6), Title 5, U.S.C. and section 10(d) of Pub. L. 92-463, the meeting will also be closed to the public from 4:00 p.m. to adjournment for the review, discussion, and evaluation of research fellowship applications. The closed session will also review Scholar-in-Residence nominations, and Scholars' conference proposals, and proposals for international studies. These materials contain information of a proprietary nature, including detailed research protocols, designs, and other technical information; and personal information about individuals associated with the applications.

Myra Halem, Committee Management Officer, Fogarty International Center, Building 38A, Room 609, National Institutes of Health, Bethesda, Maryland 20892 (301-496-1491), will provide a summary of the meeting and a roster of the committee members upon request.

Dr. Coralie Farlee, Assistant Director for Planning and Evaluation, Fogarty International Center (Executive Secretary), Building 38A, Room 609, telephone 301-496-1491, will provide substantive program information.

Dated: April 4, 1989.

Betty J. Beveridge,

Committee Management Officer, NIH.

BILLING CODE 4140-01-M

National Cancer Institute; Meeting of Cancer Biology-Immunology Contracts Review Committee

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Cancer Biology-Immunology Contracts Review Committee, National Cancer Institute, National Institutes of Health, June 12-13, 1989, Building 31A, Conference Room 2, Bethesda, Maryland 20892.

This meeting will be open to the public on June 12 from 9 a.m. to 9:30 a.m. to discuss administrative details. Attendance by the public will be limited to space available.

In accordance with provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on June 12 from 9:30 a.m. to recess and on June 13 from 9 a.m. to adjournment for the review, discussion and evaluation of individual contract proposals. These proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the proposals, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Winifred Lumsden, the Committee Management Officer, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20892 (301/496-5708) will provide summaries of the meeting and rosters of committee members upon request.

Dr. Wilna A. Woods, Executive Secretary, Cancer Biology-Immunology Contracts Review Committee, 5333 Westbard Avenue, Room 807, Bethesda, Maryland 20892 (301/496-7153) will furnish substantive program information.

Dated: April 4, 1989.

BILLING CODE 4140-01-M

National Heart, Lung, and Blood Institute; Meetings of the National Heart, Lung, and Blood Advisory Council and Its Research Subcommittee and Training Subcommittee

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the National Heart, Lung, and Blood Advisory Council, National Heart, Lung, and Blood Institute, May 25-26, 1989, National Institutes of Health, 9000 Rockville Pike, Building 31, Conference Room 10, Bethesda, Maryland 20892. In addition, the Research Subcommittee and the Training Subcommittee of the above Council will meet on May 24, the Research Subcommittee at 1 p.m. in Building 31, Conference Room 9 and the Training Subcommittee at 8 p.m. in Building 31, Conference Room 9.

The Council meeting will be open to the public on May 25 from 9 a.m. to approximately 3:30 p.m. for discussion of program policies and issues. Attendance by the public is limited to space available.

In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S.C., 10(d) of Pub. L. 92-463, the Council meeting will be closed to the public from approximately 3:30 p.m. on May 25 to adjournment on May 26 for the review, discussion and evaluation of individual grant applications. The meetings of the Research Subcommittee and the Training Subcommittee of the above Council on May 24, will be closed from 1 p.m. and 8 p.m., respectively, to adjournment for the review, discussion, and evaluation of individual grant applications.

These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Terry Bellicha, Chief, Communications and Public Information Branch, National Heart, Lung, and Blood Institute, Building 31, Room 4A21, National Institutes of Health, Bethesda, Maryland 20892, (301) 496-4236, will provide a summary of the meeting and a roster of the Council members.

Ms. Arlene Zimmerman, Executive Secretary, National Heart, Lung, and Blood Advisory Council, Westwood Building, Room 7A-15, National Institutes of Health, Behesda, Maryland 20892, (301) 496-7548, will furnish substantive program information.

National Institute of Neurological Disorders and Stroke; Meeting of Board of Scientific Counselors

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Institute of Neurological Disorders and Stroke, Division of Intramural Research on June 21-23, 1989, Conference Rooms 1B07, Building 36 and 5C101, Building 10, Bethesda, Maryland.

This meeting will be open to the public from 9 a.m. to 12:30 p.m. on June 22 in Bldg. 36, Rm. 1B07, and from 1:30 p.m. to 5:00 p.m. in Bldg. 10, Rm. 54C101 to discuss program planning and program accomplishments. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in section 552(c)(6), Title 5, U.S.C. and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public from 8 p.m. to 10 p.m. on June 21 and from 9 a.m. until adjournment on June 23 in Bldg. 10, Rm. 5C101 for the review, discussions and evaluation of individual programs and projects conducted by the NINDS. The programs and discussions include consideration of personnel qualifications and performances, the competence of individual investigators and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

The Freedom of Information Coordinator, Mr. David Mineo, Federal Building, Room 1004, 7550 Wisconsin Avenue, Bethesda, MD 20892, telephone (301) 496-9231 or the Executive Secretary, Dr. Irwin J. Kopin, Director, Division of Intramural Research, NINDS, Building 10, Room 5N214, National Institutes of Health, Bethesda, MD 20892, telephone (301) 496-4297 will furnish a summary of the meeting and a roster of committee members upon request.

(Catalog of Federal Domestic Assistance Program No. 13.853, Clinical Basis Research; No. 13.854, Biological Basis Research)

Dated: April 3, 1989.

Betty J. Beveridge,

Committee Management Officer, NIH.

[FR Doc. 89-9964 Filed 4-25-89; 8:45 am]

BILLING CODE 4140-01-M

Recombinant DNA Advisory Committee; Revision of NIH Guidelines Subcommittee; Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of a meeting of the Recombinant DNA Advisory Committee—Revision of NIH Guidelines Subcommittee at the National Institutes of Health, Building 31, Conference Room 6, Bethesda, Maryland 20892, on June 5, 1989, from approximately 9:00 a.m. to adjournment at approximately 5:00 p.m. to discuss the definition of recombinant DNA. This meeting will be open to the public. Attendance by the public will be limited to space available.

Further information can be obtained from Ms. Rachel E. Levinson, Executive Secretary of the Revision of NIH Guidelines Subcommittee, Office of Recombinant DNA Activities, Office of Science Policy and Legislation, National Institutes of Health, Building 31, Room 4B11, Bethesda, Maryland 20892, telephone (301) 496-9838.

OMB's "Mandatory Information Requirements for Federal Assistance Program Announcements" (45 FR 39592) requires a statement concerning the official government programs contained in the *Catalog of Federal Domestic Assistance*. Normally NIH lists in its announcements the number and title of affected individual programs for the guidance of the public. Because the guidance in this notice covers not only virtually every NIH program but also essentially every Federal research program in which DNA recombinant molecule techniques could be used, it has been determined to be not cost effective or in the public interest to attempt to list these programs. Such a list would likely require several additional pages. In addition, NIH could not be certain that every Federal program would be included as many Federal agencies, as well as private organizations, both national and international, have elected to follow the NIH Guidelines. In lieu of the individual program listing, NIH invites readers to direct questions to the information address above about whether individual programs listed in the *Catalog of Federal Domestic Assistance* are affected.

Dated: April 18, 1989.

Betty J. Beveridge,

Committee Management Officer.

BILLING CODE 4140-01-M

DEPARTMENT OF THE INTERIOR

Geological Survey

Advisory Committee on Water Data for Public Use; Meeting

Pursuant to Pub. L. 92-463, effective January 5, 1973, notice is hereby given that an open meeting of the Advisory Committee on Water Data for Public Use (ACWDPU) will be held May 23-25, 1989, at the Grenelefe Resort and Confernce Center, 3200 State Road 546, Grenelefe, Florida 33344-9732. The ACWDPU consists of individuals and representatives of water resources-oriented groups, including national, State, and regional organizations, professional and technical societies, and the academic community. Its principal responsibility is to advise the Secretary of the Interior, through the Director of the Geological Survey, by providing the views of the non-Federal community in plans, policies, and procedures related to water-data programs. The Director of the U.S. Geological Survey (USGS) is Chairman of the Committee.

The meeting will convene at 8 a.m. on Tuesday, May 23, 1989. The meeting will commemorate the 25th anniversary of the Federal Water Data Coordinating Program, and the theme will be "Partnerships for Water-Resources Information Coordination." Topics to be considered include non-Federal water-resources priorities, agricultural water-quality information requirements, information-dissemination efforts and plans, and data-collection network operations. The meeting will adjourn at noon on Thursday, May 25, 1989.

The meeting will be open to the public, and anyone wishing to attend or desiring additional information should contact Nancy Lopez, Chief, Office of Water Data Coordination, U.S. Geological Survey, 417 National Center, Reston, Virginia 22092. Her telephone number is (703) 648-5014. A report summarizing the meeting will be available approximately 4 weeks after the meeting.

Date: April 10, 1989.

Bruce Parks,

Acting Chief, Office of Water Data Coordination.

BILLING CODE 4310-31-M

Bureau of Land Management

[AZ-050-4333-12]

Arizona; Closure to Camping

AGENCY: Bureau of Land Management, Interior.

ACTION: Close an area near Yuma, AZ, east of Avenue 9E and north of the Interstate 8 north frontage road in Yuma County to camping.

SUMMARY: The following described lands east of Avenue 9E are closed to all types of camping. The area affected by this closure contains 320.04 acres, more or less.

T. 9 S., R. 22 W., Gila and Salt River Meridian,
Sec. 1, Lot 1, S½NE¼, S½NW¼, W½SE¼, SE¼SE¼.

EFFECTIVE DATE: May 1, 1989.

FOR FURTHER INFORMATION CONTACT: Walt Tegge, Outdoor Recreation Planner, Yuma Resource Area; 3150 Winsor Avenue, Yuma, AZ 85365, 602-726-6300.

SUPPLEMENTARY INFORMATION: Authority for this action is contained in 43 CFR 8364.1. This area is being closed to protect public health and safety. This camping closure shall remain in effect until further notice and shall apply to all persons. Maps of the area are available at the Yuma BLM office.

Dated: April 17, 1989.

Herman L. Kast,

District Manager.

[FR Doc. 89-9966 Filed 4-25-89; 8:45 am]

BILLING CODE 4333-12-M

[AZ-020-4333-08]

Public Meetings and Extension of Comment Period for the Goldwater Amendment to the Lower Gila South Resource Management Plan and Environmental Assessment; Phoenix District, Arizona.

ACTION: Notice of public meetings and extension of comment period.

SUMMARY: The Bureau of Land Management, Lower Gila Resource Area, is going to hold open house public meetings to allow the public to discuss the Goldwater Amendment to the Lower Gila South Resource Management Plan (RMP). The amendment was completed to comply with Pub. L. 99-606 which was passed on November 6, 1986, and requires the BLM to assume resource management responsibilities on the Barry M. Goldwater Air Force Range. This amendment (1) proposes to adopt, with modifications, the existing Luke Air Force Range Natural Resources Management Plan; (2) includes an Environmental Assessment; and (3) guides resource management actions on approximately 1.8 million acres of withdrawn public lands within the Goldwater Range. The public is invited to review, discuss and comment on the completed amendment at the meetings in May. Written comments will be accepted at these meetings or may be sent to BLM during the extended comment period ending June 23, 1989.

Information: The planning area is located in southwestern Arizona and contains 1.8 million acres of public land withdrawn to the Air Force for military use. Public Law 99-606 and military use of the range have placed certain constraints on the planning process and issues that can be included in the process. Uses and issues that cannot occur and are not addressed in this amendment include livestock grazing, mineral exploration, leasing and entry, wilderness, and open areas for off-road vehicles. Management concerns that are addressed include but are not limited to wildlife management, cultural resource management, recreation, ACEC's, and other natural areas.

There will be two open house public meetings to obtain input on the amendment. These meetings will be held in Gila Bend and Yuma, Arizona at the following times and locations.

May 22, 1989, 7-9 p.m.

Base Theater, Gila Bend Air Force Auxiliary Field, Gila Bend, Arizona.

May 23, 1989, 7-9 p.m.

Yuma District Office, Bureau of Land Management, 3150 Winsor Avenue, Yuma, Arizona.

Completed amendments were sent to individuals and groups who had expressed an interest in the amendment. Additional copies of the amendment will be available at the open houses or may be obtained at the Lower Gila Resource Area, 2015 W. Deer Valley, Road, Phoenix, Arizona. The open houses will provide the public and BLM an opportunity to discuss the amendment in an informal setting.

ADDRESS: Send comments to: Bureau of Land Management, Phoenix District Office, Attn: Carole Hamilton, 2015 W. Deer Valley Road, Phoenix, AZ 85027.

FOR FURTHER INFORMATION CONTACT: Carole Hamilton, Area Manager, Lower Gila Resource Area, (602) 863-4464.

Date: April 20, 1989.

Charles Frost,

Associate District Manager.

BILLING CODE 4310-84-M

Minerals Management Service

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

Approval for the information collection listed below has been requested from the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the information collection requirement and supporting documentation may be obtained by contacting the Bureau Clearance Officer at the phone number listed below. Comments and suggestions on the information collection should be made directly to the Bureau Clearance Officer, Mail Stop 632, 12203 Sunrise Valley Drive, Reston, Virginia 22091, and to the Office of Management and Budget Interior Department Desk Officer, Paperwork Reduction Project (1010-0078), Washington, DC 20503, telephone (202) 395-7340; with copies to Gerald D. Rhodes; Chief, Branch of Rules, Orders, and Standards; Offshore Rules and Operations Division; Minerals Management Service; 12203 Sunrise Valley Drive; Mail Stop 646; Reston, Virginia 22091.

Title: Oil and Gas and Sulphur Operations in the Outer Continental Shelf, 30 CFR Part 250.

OMB Approval Number: 1010-0078.

Abstract: Rules governing oil, gas, and sulphur operations in the Outer Continental Shelf were consolidated into the revised and updated 30 CFR Part 250 which became effective May 31, 1988. All subparts of the revised rule contain narrative information collection requirements which have been approved by OMB. The Minerals Management Service proposes to increase the information collection requirements contained in Subpart O, Training, by the addition of 1,162 hours. That would increase the annual burden from 2,782 to 3,944 hours of Subpart O. The information is necessary to ascertain the adequacy of personnel training in order to minimize the hazards and increase the level of safety consciousness of personnel working in drilling, well-completion, well-workover, and production operations.

Bureau Form Number: None.

Frequency: On occasion.

Description of Respondents: Lessees of Outer Continental Shelf oil and gas and sulphur leases and Training Organizations.

Estimated Completion Time: 5 hours.

Annual Responses: 330.

Annual Burden Hours: 3,944.

Bureau Clearance Officer: Dorothy Christopher, telephone (703) 435-6213.

Date: February 22, 1989.

William D. Bettenberg,

Associate Director for Offshore Minerals Management.

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed collection of information and related forms and explanatory material may be obtained by contacting the Bureau Clearance Officer at the phone number listed below. Comments and suggestions on the requirement should be made directly to the Bureau Clearance Officer and to the Office of Management and Budget Interior Department Desk Officer, Paperwork Reduction Project (1010–0031), Washington, DC 20503, telephone (202) 395–7340, with copies to Gerald D. Rhodes; Chief, Branch of Rules, Orders, and Standards; Offshore Rules and Operations Division; Mail Stop 646; Room 6A110; Minerals Management Service; 12203 Sunrise Valley Drive; Reston, Virginia 22091.

Title: Reimbursement for Certain Geological and Geophysical Data and Information, 30 CFR 251.13.

OMB Approval Number: 1010–0031.

Abstract: Section 26 of the Outer Continental Shelf Lands Act requires that certain costs be reimbursed to the parties submitting required geological and geophysical (G&G) data and information requested by the Minerals Management Service (MMS). Under the law, lessees and permittees can be reimbursed for the costs of reproducing any G&G data required to be submitted. In order for the Government to determine the propriety and level of reimbursement, lessees and permittees are required to send a request for reimbursement to the Director, MMS, where it will be reviewed and evaluated. Reimbursement will be made according to appropriate criteria.

Bureau Form Number: None.

Frequency: On occasion.

Description of Respondents: Federal oil and gas lessees and permittees.

Estimated Completion Time: 7 hours.

Annual Responses: 300.

Annual Burden Hours: 2,100.

Bureau Clearance Officer: Dorothy Christopher, (703) 435–6213.

Date: March 9, 1989.

BILLING CODE 4310–MR–M

Development Operations Coordination Document; Walter Oil & Gas Corp.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the Receipt of a Proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Walter Oil & Gas Corporation has submitted a DOCD describing the activities it proposes to conduct on Leases OCS–G 7699 and 7700, Blocks 36 and 37, respectively, South Marsh Island Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an existing onshore base located at Morgan City, Louisiana.

DATE: The subject DOCD was deemed submitted on April 14, 1989. Comments must be received within 15 days of the publication date of this Notice or 15 days after the Coastal Management Section receives a copy of the plan from the Minerals Management Service.

ADDRESSES: A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). A copy of the DOCD and the accompanying Consistency Certification are also available for public review at the Coastal Management Section Office located on the 10th Floor of the State Lands and Natural Resources Building, 625 North 4th Street, Baton Rouge, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). The public may submit comments to the Coastal Management Section, Attention OCS Plans, Post Office Box 44487, Baton Rouge, Louisiana 70805.

FOR FURTHER INFORMATION CONTACT: Ms. Angie D. Gobert; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736–2876.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to § 930.61 of Title 15 of the CFR, that the Coastal Management Section/Louisiana Department of Natural Resources is reviewing the DOCD for consistency with the Louisiana Coastal Resources Program.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective May 31, 1988 (53 FR 10595).

Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Date: April 17, 1989.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

BILLING CODE 4310–MR–M

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31430 (Sub-No. 1)]

David L. Durbano and Phillip D. Scott; Continuance in Control Exemption of Arizona Central Railroad, Inc.

David L. Durbano and Phillip D. Scott, noncarrier individuals, have filed a notice of exemption under 49 CFR 1180.4(g) regarding their continuance in control of Arizona Central Railroad, Inc. (ACR), upon the commencement of rail operations by ACR. ACR, a noncarrier corporation controlled by Mr. Durbano and Mr. Scott, has filed concurrently a notice of exemption in Finance Docket No. 31430, *Arizona Central Railroad, Inc.—Acquisition and Operation Exemption—Clarkdale Branch of the Atchison, Topeka and Santa Fe Railway Company*. There, ACR seeks an exemption to acquire by purchase from The Atchison, Topeka and Santa Fe Railway Company and to operate approximately 38.74 miles of rail line located in Arizona. Mr. Durbano and Mr. Scott presently control Wyoming Colorado Railroad, Inc. (WCR). They have also filed a notice of exemption in Finance Docket No. 31440 (Sub-No. 1) relating to their control of Intermountain Western Railroad (IWRR), a noncarrier corporation, which will become a rail carrier upon approval of the notice of exemption for the acquisition and operation of the Oregon Northwestern Railroad in Finance Docket No. 31440. As a result of the above transactions, Mr. Durbano and Mr. Scott will control three rail carriers, ACR, WCR, and IWRR.

Mr. Durbano and Mr. Scott indicate that: (1) ACR, WCR, and IWRR will not connect with each other or any railroad in their corporate family; (2) the continuance in control is not part of a series of anticipated transactions that would connect the railroads with each other or any railroad in their corporate family; and (3) the transaction involves the continuance in control of a nonconnecting carrier, and is exempt from the prior review requirements of 49 U.S.C. 11343. *See* 49 CFR 1180.2(d)(2).

As a condition to the use of this exemption, any employees affected by the transaction will be protected by the conditions set forth in *New York Docket Ry.—Control—Brooklyn Eastern Dist.*, 360 I.C.C. 60 (1979).

Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction. Any comments must be filed with the Commission and served on: Douglas M. Durbano, Durbano, Smith, Reeve & Fuller, 4185 Harrison Boulevard, Suite 320, Ogden, UT 84403.

Decided: April 19, 1989.

By the Commission, Jane Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

[FR Doc. 89–9897 Filed 4–25–89; 8:45 am]

BILLING CODE 7035–01–M

DEPARTMENT OF LABOR

Office of the Secretary

Survey of Substance Abuse Programs in the Mining Industry

AGENCY: Office of the Secretary, Labor.

ACTION: Submission of onetime survey for clearance under the Paperwork Reduction Act.

SUMMARY: The Mine Safety and Health Administration, Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C., Chapter 35, 5 CFR Part 1320 (53 FR 16618 to 16632, May 10, 1988)), is submitting a onetime survey on substance abuse programs in the mining industry to the Office of Management and Budget for that Agency's approval. The information is to be collected under the authority of Pub. L. 99–570, The Drug Abuse Act of 1986.

DATE: MSHA has requested an expedited review of this submission under the Paperwork Reduction Act, to be completed on or before May 11, 1989.

FOR FURTHER INFORMATION CONTACT: Comments and questions regarding the survey should be directed to Paul E. Larson, Departmental Clearance Officer, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue NW., Room N–1301, Washington, DC 20210 (telephone (202) 523–6331). Comments should also be sent to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for MSHA, Office of Management and Budget, Room 3208, Washington, DC (telephone (202) 395–5880).

Any member of the public who wants to comment on the information collection clearance package which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

SUPPLEMENTARY INFORMATION: As part of a study on substance abuse in the mining industry, MSHA plans to conduct a survey of randomly selected mining companies to obtain information about the extent and effects of substance abuse, the substances being abused, and policies and programs being used to detect and treat substance abuse. The Agency estimates that approximately 3,600 respondents will be contacted and the burden will be 10 minutes per response for a total of 600 burden hours. The information collected through this study will be used to develop policies, procedures, and training initiatives on substance abuse. The study results will be included in a report to Congress. Copies of the study results will also be given to the Committee representatives from the National Institute on Drug Abuse, the National Institute on Alcohol Abuse and Alcoholism, the Bureau of Mines, and mining industry management and union representatives for their use in the development and evaluation of substance abuse programs.

The following submission for approval of the survey has been submitted to OMB with a request for expedited approval under the Paperwork Reduction Act.

Signed at Washington, DC this 20th day of April 1989.

Paul E. Larson,

Departmental Clearance Officer.

BILLING CODE 4510–43–M

Standard Form 83 (Rev. September 1983)

Request for OMB Review

Important

Read instructions before completing form. Do not use the same SF 83 to request both an Executive Order 12291 review and approval under the Paperwork Reduction Act.

Answer all questions in Part I. If this request is for review under E.O. 12291, complete Part II and sign the regulatory certification. If this request is for approval under the Paperwork Reduction Act and 5 CFR 1320, skip Part II, complete Part III and sign the paperwork certification.

Send three copies of this form, the material to be reviewed, and for paperwork—three copies of the supporting statement, to:

Office of Information and Regulatory Affairs
Office of Management and Budget
Attention: Docket Library, Room 3201
Washington, DC 20503

PART I.—Complete This Part for All Requests.

1. Department/agency and Bureau/office originating request
U.S. Department of Labor
Mine Safety and Health Administration
Office of Information and Public Affairs

2. Agency code: 1219

3. Name of person who can best answer questions regarding this request: Thomas A. Brown
Telephone number: (703)235-1452

4. Title of information collection or rulemaking
Substance Abuse Programs in the Mining Industry

5. Legal authority for information collection or rule (cite United States Code, Public Law, or Executive Order)
30 CFR Part 50 or P.L. 99-570, The Drug Abuse Act of 1986

6. Affected public (check all that apply)
1 ☐ Individuals or households
2 ☐ State or local governments
3 ☐ Farms
4 ☒ Businesses or other for-profit
5 ☐ Federal agencies or employees
6 ☐ Non-profit institutions
7 ☐ Small businesses or organizations

PART II.—Complete This Part Only If the Request is for OMB Review Under Executive Order 12291

7. Regulation Identifier Number (RIN)
___ ___ ___ ___ ___ ___ ___ ___ ___, or, None assigned ☐

8. Type of submission (check one in each category)

Classification	Stage of development	Type of review requested
1 ☐ Major	1 ☐ Proposed or draft	1 ☐ Standard
2 ☐ Nonmajor	2 ☐ Final or interim final, with prior proposal	2 ☐ Pending
	3 ☐ Final or interim final, without prior proposal	3 ☐ Emergency
		4 ☐ Statutory or judicial deadline

9. CFR section affected
_____CFR _____

10. Does this regulation contain reporting or recordkeeping requirements that require OMB approval under the Paperwork Reduction Act and 5 CFR 1320? ☐ Yes ☐ No

11. If a major rule, is there a regulatory impact analysis attached? 1 ☐ Yes 2 ☐ No
If "No," did OMB waive the analysis? 3 ☐ Yes 4 ☐ No

Certification for Regulatory Submissions

In submitting this request for OMB review, the authorized regulatory contact and the program official certify that the requirements of E.O. 12291 and any applicable policy directives have been complied with

Signature of program official — Date

Signature of authorized regulatory contact — Date

12. *(OMB use only)*

Standard Form 83 (Rev 9-83)
Prescribed by OMB
5 CFR 1320 and E.O. 12291

PART III.—Complete This Part Only If the Request is for Approval of a Collection of Information Under the Paperwork Reduction Act and 5 CFR 1320.

13. Abstract—Describe needs, uses and affected public in 50 words or less
'Alcohol and drug abuse problems; drug treatment; rehabilitation programs.' As part of a study on substance abuse in the mining industry, MSHA plans to conduct a survey of randomly selected mining companies to obtain information about the extent and effects of substance abuse, the substances being abused, and policies and programs being used to detect and treat substance abuse.

14. Type of information collection (check only one)
Information collections not contained in rules
1 ☒ Regular submission
2 ☐ Emergency submission (certification attached)
Information collections contained in rules
3 ☐ Existing regulation (no change proposed)
4 ☐ Notice of proposed rulemaking (NPRM)
5 ☐ Final, NPRM was previously published
6 Final or interim final without prior NPRM
A ☐ Regular submission
B ☐ Emergency submission (certification attached)
7. Enter date of expected or actual Federal Register publication at this stage of rulemaking (month, day, year): _____

15. Type of review requested (check only one)
1 ☒ New collection
2 ☐ Revision of a currently approved collection
3 ☐ Extension of the expiration date of a currently approved collection without any change in the substance or in the method of collection
4 ☐ Reinstatement of a previously approved collection for which approval has expired
5 ☐ Existing collection in use without an OMB control number

16. Agency report form number(s) (include standard/optional form number(s))
Questionnaire - Mining Industry
Committee on Substance Abuse

17. Annual reporting or disclosure burden

1 Number of respondents	2,880
2 Number of responses per respondent	1
3 Total annual responses (line 1 times line 2)	2,880
4 Hours per response	0.1667
5 Total hours (line 3 times line 4)	480

18. Annual recordkeeping burden

1 Number of recordkeepers	
2 Annual hours per recordkeeper	
3 Total recordkeeping hours (line 1 times line 2)	
4 Recordkeeping retention period	years

19. Total annual burden

1 Requested (line 17-5 plus line 18-3)	480
2 In current OMB inventory	0
3 Difference (line 1 less line 2)	+ 480
Explanation of difference	
4 Program change	+ 480
5 Adjustment	

20. Current (most recent) OMB control number or comment number
None.

21. Requested expiration date
September 30, 1989

22. Purpose of information collection (check as many as apply)
1 ☐ Application for benefits
2 ☒ Program evaluation
3 ☒ General purpose statistics
4 ☐ Regulatory or compliance
5 ☒ Program planning or management
6 ☐ Research
7 ☐ Audit

23. Frequency of recordkeeping or reporting (check all that apply)
1 ☐ Recordkeeping
Reporting
2 ☐ On occasion
3 ☐ Weekly
4 ☐ Monthly
5 ☐ Quarterly
6 ☐ Semi-annually
7 ☒ Annually
8 ☐ Biennially
9 ☐ Other (describe): Onetime survey.

24. Respondents' obligation to comply (check the strongest obligation that applies)
1 ☒ Voluntary
2 ☐ Required to obtain or retain a benefit
3 ☐ Mandatory

25. Are the respondents primarily educational agencies or institutions or is the primary purpose of the collection related to Federal education programs? ☐ Yes ☒ No

26. Does the agency use sampling to select respondents or does the agency recommend or prescribe the use of sampling or statistical analysis by respondents? ☐ Yes ☒ No

27. Regulatory authority for the information collection
_____ CFR _____; or _____ FR _____; or, Other (specify): P.L. 99-570

Paperwork Certification

In submitting this request for OMB approval, the agency head, the senior official or an authorized representative, certifies that the requirements of 5 CFR 1320, the Privacy Act, statistical standards or directives, and any other applicable information policy directives have been complied with.

Signature of program official — Date: 4/6/89

A. Justification

1. Circumstances That Make the Collection of Information Necessary

The objective of the Mine Safety and Health Administration (MSHA), Department of Labor, is to improve safety and health conditions in the mining industry. Mining traditionally has been, and remains, one of the most hazardous occupations in the United States; the rate of fatal accidents in mining in 1986 (50 per 100,000 workes) was five times the average rate (10 per 100,000) for all industries [1]. Any condition that increases the potential for accidents is a matter of concern.

It has long been recognized that the use and abuse of alcohol and drugs is a serious safety hazard at the work site, contributes to loss of production, and leads to increased absenteeism. Studies have shown that a worker who uses alcohol or drugs is three to four times more likely to have an accident, two and one-half times more likely to be absent, and 25 to 33 percent less productive than one who does not. Estimates of the loss to American industry and the economy due to alcohol and drug abuse range as high as $100 billion per year. Some experts estimate that as many as 20 to 25 percent of the American workforce may be substance abusers. Substance abuse poses a particular safety hazard in mining. The potential danger created by substance abuse in the mining industry is so great that Federal law specifically prohibits the possession or use of alcohol or drugs at mine sites.

Unfortunately, there is little doubt that substance abuse continues to occur in American mines; the extent to which it occurs is not only unknown, it tends to be hidden precisely because it is illegal. Even less is known about the efforts made by the mining industry to detect or treat substance abuse. Previous studies of the question of substance abuse have been either generic studies of all industries (e.g., the Gallup survey for Hoffmann-LaRoche [2]), limited to specific substances (e.g., the recent Bureau of Labor Statistics survey on illicit drugs), or limited to a specific segment of the industry (e.g., the Carnegie-Mellon study of underground bituminous coal mines). In short, we have little direct knowledge of either the extent of substance abuse in the mining industry or the efforts that mining companies and unions may be taking to counteract and treat alcohol and drug abuse.

The problem does exist. In 1985, the interest in and reaction to a series of articles in an MSHA journal led concerned managers and union representatives in the mining industry to form a voluntary committee, The Mining Industry Committee on Substance Abuse, with a charter to assist owners, operators, and employees in the industry in their efforts to deal with the problem. In addition to management and union members, the Committee includes representatives from MSHA, the Bureau of Mines, and the National Institutes on Drug Abuse (NIDA) and Alcoholism and Alcohol Abuse (NIAAA).

This Committee, in cooperation with MSHA, has produced a video tape on substance abuse, published a manual on employee assistance programs, designed and distributed posters and warning stickers, and sponsored seminars and training sessions on the subject. Reaction in the industry to these efforts has been quite positive. At this time, however, Committee members believe that their efforts could be more beneficial and more productive if they were more specifically targeted to actual conditions in the industry. Aside from the personal knowledge of the Committee members, and a variety of anecdotal information, there is no way to obtain specific information other than through this proposed study.

In addition to collecting information for MSHA and the Mining Industry Committee on Substance Abuse, the results of this study will be reported to the Secretary of Labor for inclusion in the report to Congress mandated by the Drug Abuse Act of 1986 (Pub. L. 99–570). This information should supplement the date on illegal drug detection and treatment collected by BLS in their survey of ten industries, including mining.

2. Uses of Information

This study is intended to provide the Mining Industry Committee on Substance Abuse and MSHA with more specific information about the number of mine sites conducting substance abuse programs and training. The information collected through this study will be used to develop policies, procedures, and training initiatives regarding substance abuse in the mining industry. The study results will be reported to the Secretary of Labor for inclusion in the report to Congress. Copies of the study results will be given to the Committee representatives from the National Institute on Drug Abuse, The National Institute on Alcohol Abuse and Alcoholism, the Mine Safety and Health Administration, the Bureau of Mines, and mining industry management and union representatives for their use in the development and evaluation of substance abuse programs.

Failure to conduct the proposed survey will result in the continued absence of accurate information for the development of substance abuse programs, policies, and training programs for the mining industry.

3. Uses of Improved Information Technology

The present state of automation in the mining industry precludes the use of improved information technology to reduce the burden on respondents. We have explored other possible applications of improved information technology and have been unable to identify any feasible alternatives to the methods to be used in this study. Respondents will be offered the option of replying by telephone or facsimile (FAX) transmission rather than in writing.

4. Efforts to Identify Duplication

We have been unable to identify any other sources of information which include the scope of data needed for this study. Various studies are ongoing but too limited in scope for our purposes. The most noteworthy of these is the Bureau of Labor Statistics nationwide survey of employer anti-drug programs (see discussion below, in paragraph 5). In addition to surveying the literature on this topic, we have contacted the U.S. Bureau of Mines, the Mine Health and Safety Academy, the AFL–CIO Occupational Alcohol Program, the Association of Labor-Management Administrators & Consultants on Alcoholism (ALMACA), the National Association of State Alcohol and Drug Abuse Directors (NASADAD), the National Clearinghouse for Alcohol Information, the National Institute on Drug Abuse (NIDA), and the National Institute on Alcohol Abuse and Alcoholism (NIAAA), as well as knowledgeable researchers on the subject. These contacts indicate that no comparable federal or private survey or other source for this information exists. Therefore, there is no duplication of requested information.

5. Reasons Existing Information Cannot Be Used

Previous studies of the question of substance abuse have been either generic studies of all industries, limited to a specific substance, or limited to a specific segment of the industry. The Bureau of Labor Statistics recently completed a survey of employer anti-drug programs, which provides data on the prevalence of drug testing and rehabilitation programs and the number of employees directly affected across the private sector of the U.S. economy. One of the ten industries included in that study is the mining industry, including oil and gas producers; the proposed MSHA study includes coal, metal, and non-metal mines, but not oil and gas producers. The BLS survey does provide some data similar to the data we are requesting, but it does not include data concerning abuse of alcohol or prescription drugs. Private efforts to obtain information on employer drug abuse policies and programs tend to be very limited, involving either case studies or surveys of Fortune 500 firms, none of which can produce representative data for the mining industry as a whole.

6. Minimizing the Burden to Small Establishments

The survey is directed toward a statistical sample of all active mining establishments in the portion of the mining industry for which MSHA is responsible (see Part B for a description of the sample and survey methodology). The BLS survey results indicated that over 75% of the mining industry, 95.9% of establishments with 1 to 9 employees, and 86.6% of establishments with 10 to 49 employees had neither a drug-testing nor an employee assistance program.[3] On that basis, we anticipate that most small mining establishments will not have substance abuse programs, which will allow them to skip up to 33 of the 44 questions. To further minimize the response burden, respondents will be offered the option of replying by telephone or FAX transmission.

The survey questionnaire has been pre-tested on eight (8) selected mining companies that volunteered to assist us. These companies answered all of the questions on the questionnaire, and reported that total time required to read all materials and answer all questions ranged from 10 minutes to 25 minutes, with an average time of about 15 minutes. The total time required to complete the questionnaire by a mining company not having a substance abuse program should be less than 10 minutes.

7. Consequences of Less Frequent Data Collection

The study will be conducted only once.

8. Guidelines of 5 CFR 1320.6

The study will not violate any of the provisions of these guidelines.

9. Consultation With Outside Agencies Regarding the Availability of Data

In addition to the contracts mentioned in paragraph 4 above, we have discussed our study plans with the members of the Mining Industry Committee on Substance Abuse. They have offered some useful suggestions and have expressed interest in the results since the study is unique. We have also pre-tested the survey instrument, and modified those questions that could not be answered without further research.

10. Confidentiality Assurances

Assuring the confidentiality of the data obtained has been a primary concern in developing the methods to be used in this study, and has directly affected the design of the questionnaire. Mine operators believe there may be legal and regulatory implications to revealing specific information about substance abuse in their operations, particularly if their corrective actions may be considered inadequate. In addition to the sensitivity of the subject matter (substance abuse), some concerns have been raised about revealing information concerning union representation (or the lack of representation) to a committee containing union members.

To protect the respondents, the statistics will be compiled by an independent outside contractor and will be reported in summary form only. The returned questionnaires will be destroyed (shredded) after data entry and individual respondent company names will not be entered to the data base or directly associated with the data.

11. Sensitive Questions

Within the mining industry, there is sensitivity and resistance to any kind of government data collection and to questions concerning unionization of the industry. We have attempted to address these questions by conducting the survey through an independent outside contractor, and preventing the data in summary form only.

12. Estimated Cost of the Mail Survey

a. Estimated cost to the Federal Government:

Personnel services	$65,000
Equipment, supplies, postage, and telephone	2,500
ADP charges	9,000
Total	$76,500

b. Estimated cost to respondents:

Burden hours	480
Median hourly wage of respondents	× $21.50
Total cost to respondents	$10,320.00

13. Estimated Reporting Burden

The survey will be mailed to a sample of 3,600 mining companies. The average response time will be 10 minutes. If all 3,600 companies respond, the total reporting burden will be about 600 hours. An anticipated response rate of 80% would result in a reporting burden of only 480 hours.

14. Change in Burden

There are 12,600 hours in the Information Collection Budget for this research project. This estimate was based on the use of two questionnaires, with 100% of the 18,000 mining operations responding to the first questionnaire and 20%, or 3600, being asked to answer a second more detailed questionnaire. Since the time the Information Collection Budget was prepared, the agency decided to use the approach described in this submission, involving a statistical survey of a scientifically selected sample of mining companies, to collect the information. Thus the anticipated burden has been reduced to 480 hours.

15. Plans for Tabulation, Statistical Use, and Publication

The study based on the questionnaire attached as Appendix A will be conducted as soon as possible following OMB clearance. Data will be tabulated and analyzed, and report submitted to MSHA management by June 26, 1989. The survey results will be tabulated by mine type, commodity mined, and mine employment size class, and presented as statistical summaries, counts, and percentages. Separate tabulations will be made for these categories, along with national totals. While the final report will be available upon request, it is intended primarily for internal agency use, and will not be published as a public document.

B. Collection of Information Employing Statistical Methods

1 a. Universe

The universe for this survey will consist of all the approximately 17,000 active mining establishments reporting employment to MSHA in 1988. Contractors are not included. These establishments comprise all those with 1977 Standard Industrial Classification 111 or 121 (coal); 101–106, 109, or 281 (metal); 131, 145, 147, 149, 289, or 299 (non-metal); 141, 142, 324, or 327 (stone); and 144 (sand & gravel).

[3] *Survey of Employer Anti-drug Programs*, U.S. Department of Labor, Bureau of Labor Statistics, January 1989, Report 760; Tables 1 and 2, pp. 6–7.

VOL 54 ISS 79 AP 26 1989 UMI

b. Sample Size

The probability sampling plan to be used in the survey is designed to produce reliable estimates of the proportion of establishments falling into a given category delineated on the questionnaire and of the proportion of employees working at such establishments. Separate estimates are needed for each of the mining groups listed above, as well as for establishments roughly comparable in size. The total number of establishments required to achieve a reasonable level of reliability is calculated to be 3,600. This allows for an overall non-response rate of 20 percent and non-response of about 50 percent.

2 a. Sample Design

The sampling frame will be stratified into 16 strata, comprising four employment size categories for coal, metal, and non-metal, and two size categories for stone and for sand and gravel. Within these strata, geographic location will be randomly allocated but a state code will be recorded as a potentially significant covariate and to enable comparisons among broad regions. To maximize efficiency in estimating the number and proportion of employees at establishments falling into categories specified on the questionnaire, larger establishments will have a greater probability of being included in the sample than smaller ones. Sampling ratios will range from near certainty for mines in the largest employment-size category to approximately ten percent in the smallest. Within each stratum, sampling will be random.

b. Estimation Procedure

For each stratum, a probability design based estimator—in which each unit of the sample is weighted by the inverse of the sampling ratio for its stratum—will be used to estimate totals of establishments for various characteristics of interest. Using total employment reported to MSHA for each stratum, *ratio estimators* will be used to estimate employee totals at these establishments. Estimates of totals at higher tabulation levels will be the sum of the subsumed stratum estimates. At each level of tabulation, proportions will be calculated as the ratio of the appropriate totals. Standard errors will be calculated for all estimates of totals and proportions.

c. Accuracy

Sample sizes for the individual industry strata were calculated to meet a criterion of +/− three percentage points at 95-percent confidence in estimating a proportion of 25 percent. Precision for estimates of proportions of establishments and employees for selected aggregations is anticipated to be roughly as follows:

Aggregation level	Relative standard error of—	
	Proportion of employees (percent)	Proportion of establishments (percent)
Employment-size	5	3
Industry	9	6
Industry X size	14	9
Total	3	2

d. Problems

There are no unusual problems requiring specialized sampling procedures.

e. Frequency

This is a one-time survey.

3 a. Response

To maximize the response rate for this survey, employers will be given a pledge of confidentiality and an explanation of the importance of the survey. A follow-up mailing will be made to the non-respondents of the initial mailing.

b. Nonresponse Adjustment

Within each of the 16 primary strata, supplemented by geographic strata defined by state codes if necessary, a non-response adjustment factor will be calculated and used, along with the stratum's sampling ratio, to weight the results for that stratum.

c. Reliability

Probability sampling methodology will be used in the design and analysis of the survey to control and estimate sampling errors.

d. Tests

A limited pre-test of the survey instrument was completed by eight voluntary mining companies. Modifications were made to the survey instrument, based on their responses and suggestions.

e. Statistical Responsibility

This survey is directed and managed by Tom Brown, Public Affairs Specialist, Office of Information and Public Affairs, MSHA (235–1452). The statistical aspects of this survey are the responsibility of Jon Kogut, Mathematical Statistician, Mine Safety and Health Administration (FTS: 776–2760).

Mining Industry Committee on Substance Abuse

Dear Mine Superintendent: The Mining Industry Committee on Substance Abuse needs your help. The Committee is studying policies and practices in the mining industry concerning job-related alcohol and drug use. This study will help us determine what actions we should take in the future to assist with efforts in dealing with the problems of substance abuse in our industry.

Part of our study is a survey of randomly selected companies in the industry, to obtain information about the extent and effects of substance abuse in our industry; the substance(s) being abused; and the policies and programs you are using to detect and threat substance abuse. Your company has been chosen to participate in this survey.

Your participation is entirely voluntary, but your cooperation is important to our entire industry since your responses will represent many other mining companies. The information you provide will be held in confidence. The data will be compiled and analyzed by an independent management consulting firm, Technical Assistance and Tranining Corporation (TATC). TATC will present their findings in summary form to the Mine Safety and Health Administration (MSHA) and the Committee. Your company will not be identified in any way in the final report. All answers to the questionnaries will be tabulated without identifying the respondent companies, and the questionnaries will be destroyed as soon as the responses are entered to the computer database.

If at all possible, we would appreciate receiving your response within 7 days. Completing the questionnarie should require only a few minutes of your time. If you prefer, you may provide your answers by telephone, by calling the contractor (Technical Assistance and Training Corporation) collect on (202) 333–4282, between 9:00 a.m. and 5:00 p.m., EDT, or you may FAX your completed questionnaire to the contractor on (202) 232–7822. Thank you for your cooperation.

Sincerely,

James Wilcox,

Co-Chairman, Mining Industry Committee on Substance Abuse, International Minerals & Chemical Corporation.

Frank Fantauzzo,

Co-Chairman, Mining Industry Committee on Substance Abuse, Appalachian Council, AFL–CIO.

Burden notice to accompany letter and questionnaire.

MSHA estimates that it will take an average of 10 minutes per respondent to complete this survey. If you have any comments regarding this estimate or any other aspect of the survey, you may send them to the Office of Information Management, Department of Labor, Room N–1301, 200 Constitution Avenue NW., Washington, DC 20210; and to the Office of Management and Budget, Paperwork Reduction Project 1219–xxxx, Washington, DC 20503.

Questions and Definitions

1. *Who should answer this questionnaire?* The questionnaire should be completed by the highest ranking company official at the mine site knowledgeable of that site's policies, programs and practices.

2. *What employees are included?* Substance abuse is not limited to one category of employee, and neither is this survey. All company employees, from the board room to the tool room, are included.

3. *What is "Substance Abuse"?* As used in this survey, it is the use of alcohol or any legal or illegal drug, including prescription and over-the-counter drugs, in such a way as to affect or potentially affect an individual's performance or threaten the safety of others on the job. This survey does *not* include use of tobacco or tobacco products.

4. *What drugs are included?* Any substance ingested, inhaled, injected, or absorbed that causes or may cause a change in behavior, either as a stimulant, depressant, or hallucinogen. It includes, but is not limited to, alcohol, over-the-counter or prescription pain medication (codeine, Demerol), tranquilizers (Valium), diet pills, heart or diabetes medication (Enderal), amphetamines, barbiturarates (Nembutal, Seconal, phenobarbitol), or illicit drugs such as heroin (smack), cocaine (crack or coke), marijuana, hashish, methamphetamines, or hallucinogens (PCP, LSD, peyote).

5. *What is an "Employee Assistance Program"?* Any workplace policy, procedure, or program intended to provide counselling, advise, or assistance to employees who experience personal situations or problems that directly or indirectly affect their work performance. The program may be sponsored and administered by the company, the union, or another party, may be conducted on-site or off-site, may include inpatient or outpatient services, or may be provided by contractual agreement with outside private or community sources. The program may provide assistance in a variety of personal (financial, martial, mental health, legal) problems, or be directed at more limited situations such as alcohol or drug abuse. Dependents may be included in some programs. Some programs may be known by other names, such as Help Programs or Wellness Programs. This survey is directed specifically at identifying programs, regardless of name, that include some form of attention to substance abuse problems, whether alcohol abuse, drug abuse, or both.

6. *Will my response be kept confidential?* Yes. The data will be compiled and analyzed by an independent management consulting firm, Technical Assistance and Training Corporation (TATC). All answers to the questionnaries will be tabulated without identifying the respondent companies, and the questionnaires will be destroyed as soon as the responses are entered to the computer database. TATC will present their findings in summary form to the Mine Safety and Health Administration and the Mining Industry Committee on Substance Abuse. Your company will not be identified in any way in the final report.

7. *My mine site is owned by a parent company, and uses the same personnel policies. Should I respond to the questionnaire?* Yes. Your mine site has been selected in a random selection process, which may or may not include your parent company or other mine sites owned by the same company. Your answers represent all other mining companies/mines that are about the same size, in the same general geographical area, and have operations similar to your. We want to try to determine whether practices and experiences are affected by local conditions, such as the availability of counselling or treatment programs.

8. *Is there a difference between a "drug testing" and a "drug screening" program?* Technically, there is a distinction between testing and screening. For the purposes of this survey, however, we are only interested in determining whether your company uses any systematic methods for determining whether an individual is under the influence of alcohol or drugs, or for detecting the presence of drug byproducts in the blood, urine, saliva, hair or other bodily substance of an individual. Drug testing programs normally require collection of samples in a controlled environment, for subsequent laboratory analysis; drug screening programs my include non-intrusive methods, such as breathalyzers, observation of eye movement and reactions, or unusual behaviour patterns.

9. *How can I get copies of the survey results?* The final survey report should be available by the middle of 1989. Address your requests for copies to the Office of Information and Public Affairs, Mine Safety and Health Administration, U.S. Department of Labor, 4015 Wilson Boulevard, Room 601, Arlington, VA 22203.

10. *How can I find out more about the Mining Industry Committee on Substance Abuse?* The Mining Industry Committee on Substance Abuse is a voluntary association of representatives from mining management, labor unions, and involved Federal government agencies, formed in 1985 to assist the owners, operators, and employees in the mining industry in their efforts to deal with the issues of alcohol and drug abuse. While our activities have been supported by the Mine Safety and Health Administration (MSHA), of the Department of Labor, we are not an official government committee.

In the past three years, the Committee, in cooperation with MSHA, has taken several positive actions aimed at educating mining industry managers and employees about substance abuse. Together, we have produced and distributed a video tape on the dangers of alcohol and drug abuse, a manual on establishing and managing Employee Assistance Programs (EAP), and anti-abuse posters and stickers, and conducted regional seminars on substance abuse.

If you would like more information about our activities, please contact either of the Committee Co-Chairman, Mr. James Wilcox, IMC Corporation (telephone 505–887–2871), or Mr. Frank Fantauzzo, Appalachian Council, AFL–CIO (telephone 304–345–5811). You may also contact Mr. Tom Brown in the MSHA Office of Information and Public Affairs (telephone 703–235–1452), or use the comments section of our questionnaire to ask someone to contact you.

BILLING CODE 4510-43-M

VOL 54 ISS 79 AP 26 1989 UMI

MINING INDUSTRY COMMITTEE ON SUBSTANCE ABUSE

This report is authorized by_____. Its purpose is to gather information about the policies concerning substance abuse treatment programs of employers in the mining industry. Your voluntary cooperation is needed to make the results of this survey complete, accurate and timely. The information collected on this form will be used for statistical purposes only and the form will be destroyed immediately after tabulation of statistical summaries. Your response will not be identified with your company in the tabulated results.

1. Is your facility:
   a. A single-site independent business [ ] a.
   b. Part of a multisite, mining only company [ ] b.
   c. Part of a company that also has non-mining businesses [ ] c.

2. What is the highest number of employees you have had at your mine during the past 12 months?
   a. Salaried [ ][ ][ ][ ]
   b. Hourly [ ][ ][ ][ ]

3. Do you have a written company policy on the possession or use of alcohol or drugs at the work site? Yes [ ] No [ ]

4. If yes, has this written policy been communicated to your employees within the past year? Yes [ ] No [ ]

5. If your employees are represented by a union, what type of agreement on your policy do you have with your employee union(s)?
   a. Formal [ ] a.
   b. Informal [ ] b.
   c. None [ ] c.
   d. Non-union [ ] d.

6. What action(s) do your policies permit the first time an employee is determined to be in possession or under the influence of alcohol or drugs at the mine work site?
   (Check all that may apply, even if appropriate actions are determined on a case-by-case basis, or different actions apply to different situations.)
   a. Immediate dismissal [ ] a.
   b. Suspension [ ] b.
   c. Warning or probation [ ] c.
   d. Referral to company, union, or community program [ ] d.

VOL 54 ISS 79 AP 26 1989 UMI

7. Do you have a drug testing/screening program? (If yes, answer questions 8 through 16; if no, go directly to question 17) — Yes ☐ No ☐

8. Do you test for alcohol? — Yes ☐ No ☐

9. Do you perform drug tests/screenings in any of the following situations? (Check all that apply)

a.	Preemployment	a. ☐
b.	Just cause	b. ☐
c.	Random announced	c. ☐
d.	Random unannounced	d. ☐
e.	Periodic	e. ☐
f.	After accidents	f. ☐
g.	All employees in a specific job category	g. ☐
h.	Part of "last chance" agreement or treatment follow-up	h. ☐
i.	Other: _____	

(Please answer questions 10,11 and 12 only if you conduct preemployment drug tests/screenings.)

10. How many applicants for employment did you have in the last 12 months? ☐☐☐☐

11. What percent of these applicants for employment were tested/screened for drugs or alcohol in the past 12 months? ☐☐☐ percent

12. Of those applicants for employment who were tested/screened in the past 12 months, approximately what percent tested positive? ☐☐☐ percent

(Please answer questions 13, 14, 15 and 16 only if you conduct employee drug tests/screenings.)

13. What percent of employees did you test/screen for drugs/alcohol in the past 12 months? ☐☐☐ percent

14. Of those employees who were tested/screened in the past 12 months, what percent tested positive? ☐☐☐ percent

15. From the test/screening results, what substances were found to be used by the employees you tested? (Check all that apply)

a.	Alcohol	a. ☐
b.	Marijuana	b. ☐
c.	Cocaine	c. ☐
d.	Other illegal drugs	d. ☐
e.	Prescription Drugs	e. ☐

16. From the test/screening results, which one of the substances listed in Question 14, above, was found to be most commonly used by the employees you tested? (Check only one)

a.	Alcohol	a. ☐
b.	Marijuana	b. ☐
c.	Cocaine	c. ☐
d.	Other illegal drugs	d. ☐
e.	Prescription Drugs	e. ☐

VOL 54 ISS 79 APR 26 1989 UMI

17. Do your training programs include information on alcohol or drug abuse? Yes ☐ No ☐
(If yes, answer questions 18 through 21; if no, go directly to question 22)

18. To whom is alcohol and drug abuse training provided? (Check all that apply)
- a. Management ☐
- b. Supervisors ☐
- c. Salaried employees ☐
- d. Hourly employees ☐

19. Who conducts your alcohol and drug abuse training? (Check all that apply)
- a. Safety staff ☐
- b. Human resources staff ☐
- c. Counseling service ☐
- d. Training consultant ☐
- e. Medical Department ☐
- f. MSHA Grantee/State Contractor ☐
- g. Other _____

20. How many times per year is alcohol and drug abuse training provided?
- a. More than one time ☐
- b. One time ☐
- c. Less than one time ☐

21. What is your source of training materials for alcohol and drug abuse training? (Check all that apply)
- a. Develop own ☐
- b. Parent company ☐
- c. Commercial source ☐
- d. Outside counselor ☐
- e. Material developed by another company ☐
- f. Community agency ☐
- g. State or local government ☐
- h. MSHA ☐
- i. Other Federal agency ☐

22. Do you have a program to provide employee assistance counseling or treatment to employees with substance abuse problems? Yes ☐ No ☐
(If yes, answer questions 23 through 41; if no, go directly to question 42)

23. Is your program:
- a. A formal program ☐
- b. An informal program ☐

24. How many years have you had your substance abuse program?
- a. Less than one year ☐
- b. 1 - 2 years ☐
- c. 3 - 4 years ☐
- d. 5 years or more ☐

25. Who administers your program? (Check all that apply)
- a. Local management ☐
- b. Parent company management ☐
- c. Outside contractor ☐
- d. Consortium ☐
- e. Union ☐
- f. Non-union employee representative ☐

26. Which employees does your program cover?
- a. All employees ☐
- b. Salaried only ☐
- c. Hourly only ☐

27. Does your program offer assistance to dependents? Yes ☐ No ☐

28. Does your program offer assistance in areas other than substance abuse (such as family, financial, or legal counseling)? Yes ☐ No ☐

29. Does your program have a telephone hotline? Yes ☐ No ☐

30. Who provides counseling services?
- a. Supervisor ☐
- b. Human Resources or personnel staff ☐
- c. Company medical staff ☐
- d. Company EAP staff ☐
- e. Parent company staff ☐
- f. Personal physician ☐
- g. Outside contractor/resource ☐
- h. State/local service ☐

VOL 54 ISS 79 APR 26 1989 UMI

31. What percent of your employees (excluding dependents) made use of your employee assistance program within the past 12 months? (If unknown, check here___) ☐☐☐ percent

32. What percent of employees in your employee assistance program were self referred? (If unknown, check here___) ☐☐☐ percent

33. Of the employees who used your employee assistance program within the past year, what percent have involved counseling for substance abuse or dependency problems? (If unknown, check here___) ☐☐☐ percent

34. Of employees participating in the employee assistance program for alcohol or drug use, which substance was found to be most commonly used?
- a. Alcohol ☐ a.
- b. Illegal drugs ☐ b.
- c. Prescription drugs ☐ c.
- d. Unknown ☐ d.

35. Who provides alcohol/drug abuse or dependency treatment (detoxification) services?
- a. Company facility ☐ a.
- b. Local hospital or clinic ☐ b.
- c. Specialized treatment facility ☐ c.

36. How are alcohol/drug abuse or dependency treatment (detoxification) services provided?
- a. Inpatient ☐ a.
- b. Outpatient ☐ b.
- c. Either, as appropriate ☐ c.

37. Are the treatment facilities convenient to your work site or most employees' residences? Yes☐ No☐

38. Who provides aftercare services for employees who have completed detoxification treatment? (Check all that apply)
- a. Treatment facility ☐ a.
- b. Counseling service ☐ b.
- c. AA or NA chapter ☐ c.
- d. Company staff ☐ d.
- e. No aftercare services ☐ e.

39 How are costs of treatment paid? (Check all that apply)
- a. Medical insurance ☐ a.
- b. Company funded ☐ b.
- c. Individual ☐ c.
- d. Union benefits ☐ d.

Mine Safety and Health Administration

[Docket No. M-89-43-C]

Consolidation Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Consolidation Coal Company, Consol Plaza, Pittsburgh, Pennsylvania 15241 has filed a petition to modify the application of 30 CFR 75.1403-9(a) (shelter holes) to its Blacksville No. 1 Mine (I.D. No. 46-01867) located in Monongalia County, West Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that shelter holes be provided on track haulage roads at intervals of not more than 105 feet unless otherwise approved by MSHA's District Manager for the mine.

2. In order to rehabilitate the shelter holes to meet this requirement, miners would be exposed to unncessary hazards associated with building canopies behind the arches or cribbing to the roof behind the arches. If shelter holes are required to be established, miners will be allowed to travel on foot in the affected areas in numbers 10 and 11 headings while track equipment is present and constantly moving through the rotary dump causing greater chances for injury.

3. As an alternate method, petitioner proposes the following:

(a) Luminous signs designating "Close Clearance" would be posted at the track entrances to affected areas;

(b) No person would be allowed to enter the areas on foot without permission from the dispatcher and dumper;

(c) Telephones would be provided at the entrances to the affected areas;

(d) The dispatcher would notify all locomotive operators or other haulage vehicle operators of the location of work crews in the affected areas; and

(e) The dispatcher and dumper would be notified when the persons leave the affected areas.

4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before May 26, 1989.

Copies of the petition are available for inspection at that address.

Date: April 19, 1989.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

BILLING CODE 4510-43-M

Pension and Welfare Benefits Administration

[Application No. D-7596 et al.]

Proposed Exemptions; Separate Mortgage and Real Estate Account of New England Mutual Life Insurance Co. et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Notice of proposed exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemptions, unless otherwise stated in the Notice of Pendency, within 45 days from the date of publication of this Federal Register Notice. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Pension and Welfare Benefits Administration, Office of Regulations and Interpretations, Room N-5671, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210. Attention: Application No. stated in each Notice of Pendency. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefits Programs, U.S. Department of Labor, Room N-5507, 200 Constitution Avenue NW., Washington, DC 20210.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the Federal Register. Such notice shall include a copy of the notice of pendency of the exemption as published in the Federal Register and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type required to the Secretary of Labor. Therefore, these notices of pendency are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

Separate Mortgage and Real Estate Account (the Separate Account) of New England Mutual Life Insurance Company Located in Boston, MA

[Application No. D-7596]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of sections 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the sale of certain mortgage and real estate investments by the Separate Account to the general account of New England Mutual Life Insurance Company (the Company), a party in interest with respect to the plans participating in the Separate Account (the Plans), provided that the terms of sale are not less favorable to the Separate Account than those terms obtainable in an arm's-length transaction with an unrelated party at the time the transaction is executed.

Effective Date: If granted, this exemption will be effective for a 12-month period from the date of grant.

Summary of Facts and Representations

1. The Company's Separate Account was established in 1969 by vote of the Company's Board of Directors. The Separate Account is a pooled separate account maintained in accordance with the insurance laws of the Commonwealth of Massachusetts. There are eight Plans currently participating in the Separate Account. As of December 31, 1987, the assets of the Separate Account were valued at approximately $6.3 million.

2. The Separate Account is composed of seventeen commercial mortgage investments and two ground leases. The seventeen mortgages encumber sixteen real estate properties in sixteen separate locations. The Separate Account has varying interests in each of the mortgages ranging 1.544% to 66.667%. The partial interest in each mortgage gives the respective owner the right to receive a proportionate share of the contracted monthly debt service payment as well as a proportionate share of the loan proceeds at the loan call date. The two ground leases cover a 277,040 square foot warehouse facility located in Bellwood, Illinois and a 511 space mobile home park located in Dominguez, California.

3. The group annuity contracts issued with respect to the Separate Account provide the Plans with the right to request the distribution of all or part of their interests in the Separate Account. At the time the Separate Account was established, the Company planned that any needed liquidity would be provided by cash contributions from other plans, by maturing investments, and in the instance of large withdrawal requests, by transferring a sufficient number of mortgage interests or other investments from the Separate Account to the Company's general account in exchange for cash. The passage of the Act, however, rendered this last alternative originally contemplated for guaranteeing Separate Account liquidity illegal absent administrative relief.

4. One of the Plans participating in the Separate Account, Retirement Plans of Alumax, Inc. (Alumax), whose interest in the Separate Account represent 41% of the total assets of the Separate Account, has requested distribution of its interest in the Separate Account. Both the Company and Alumax would like a cash payment of its interest in the Separate Account to be made as soon as possible.

5. It is represented that none of the other Plans participating in the Separate Account have any desire to purchase Alumax's interest. In addition, in the Company's opinion, it would not be in the best interests of the Plans to sell the Separate Account's investments to unrelated third parties. The transaction costs to the Separate Account in finding such purchasers would be high, involving such items as updated title coverage, underwriting, physical inspections and possible guarantees from the Separate Account or the Company.

6. In order to meet its obligations to Alumax and to the other Plans that are expected to request withdrawal from the Separate Account, the Company requests that it be allowed to sell the assets of the Separate Account to its general account on an ongoing basis over a twelve month period, until the Separate Account assets are liquidated.

7. In connection with its proposal to sell the Separate Account assets to the general account, the Company has retained American Appraisal Associates, Inc. (American Appraisal), to act as an Independent Fiduciary for the Separate Account with respect to the proposed sale of the investments. American Appraisal is the world's largest evaluation consulting firm with clients that include banks, insurance companies, pension funds, savings and loan associations, investment bankers, and developers. American Appraisal is not affiliated with the Company and at no time has more than 1% of its annual billings been received from the Company. Each Plan participating in the Separate Account will be informed of the appointment of American Appraisal and its role in the transactions.

Before any sale from the Separate Account to the Company's general account is consummated, American Appraisal will review the sale transaction and submit a written report summarizing its investigation, both with respect to the specific investment to be sold by the Separate Account and to the price to be paid by the Company's general account. No sale will be made until the Independent Fiduciary has concluded that the valuation of the investment is consistent with current market values, and that the proposed sale is equitable to the Plans participating in the Separate Account.

The valuation process for commercial loans will involve an analysis by American Appraisal of each asset, taking into account, loan amount, remaining loan term, likely holding period, property type, and the interest rate. Due to the differences in interest rates of various assets and current market rates, the pricing analysis will compare loan yields with the most recent average yield of commercial mortgages priced with comparable holding periods. The value of the ground leases was determined by American Appraisal after completing a personal inspection of the two properties.

American Appraisal further represents that as part of its function as independent fiduciary, it has determined the order in which investments will be sold from the Separate Account to the Company's general account. The order of disposition has been developed to maintain the current portfolio characteristics for the remaining contract holders, specifically, the average yield of approximately 10%.

8. In summary, the applicant represents that the transaction will satisfy the statutory criteria of section 408(a) of the Act because:

a. The sale of the Separate Account investments, including the consideration paid, will be reviewed and approved by American Appraisal acting on behalf of the Plans participating in the Separate Account;

b. These sales will provide the Separate Account with the liquidity to satisfy the withdrawal requests of the Plans; and

c. There will be no sales commission or similar consideration paid by the Separate Account to the general account.

Joseph K. Newsom, M.D., P.A. Money Purchase Pension Plan and Trust (the Plan) Located in Cheraw, South Carolina

[Application No. D-7844]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of sections 406(a) and 406(b)(1) and (2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the sale of a parcel of real property (the Property) from the Plan to Joseph K. Newsom (Newsom), a party in interest with respect to the Plan, provided the Plan receives no less than the greater of

VOL 54 ISS 79 APR 26 1989 UMI

$203,000 or fair market value for the Property at the time of sale.

Summary of Facts and Representations

1. Joseph K. Newsom, M.D., P.A., (the Employer) is a South Carolina professional association engaged in the practice of family medicine. The Plan is a money purchase plan for the benefit of the employees of the Employer. As of September 30, 1987, the Plan had approximately 14 participants and total assets of $1,474,830. Newsom is the sole owner of the Employer as well as the Plan trustee and a participant in the Plan.

2. The assets of the Plan include a parcel of real property (the Property) located in Cheraw, South Carolina. The Property consists of approximately 6.7 acres of undeveloped land. The Property is located in an area that is designated as commercial and is situated between two major shopping centers. The Property was bought from an unrelated party for cash in two tracts (in 1981 and 1984) for a total purchase price of $133,000. A small portion (0.23) of the original purchase, which is not part of the subject transaction, was developed into a dental office and is now rented to another party. The Property has not been used by any party in interest with respect to the Plan since the time of purchase.

3. The Plan obtained an appraisal on the Property from C. Lock McKinnon (McKinnon), a real estate appraiser in Lancaster, South Carolina. The applicant represents that McKinnon is independent of the Plan and the Employer. Placing emphasis on the comparable sales approach to value, McKinnon estimated that as of November 7, 1988, the fair market value of the Property was $203,000.

4. The Plan originally purchased the Property for investment purposes. However, the ages and length of service of several of the participants are now such that greater liquidity with respect to Plan investment is needed. The Plan trustee believes that a sale of the Property would provide more liquidity to the Plan and would enhance the diversification of Plan assets. Accordingly, the Plan proposes to sell the Property to Newsom. Newsom will pay no less than fair market value for the Property at the time of sale, based on an updated independent appraisal. The transaction will be entirely for cash and the Plan will pay no fees or commissions in regard to the sale.

5. In summary, the applicant represents that the proposed transaction will satisfy the statutory criteria of section 408(a) of the Act because: (1) The fair market value of the Property will be established by a real estate appraiser who is independent of the Employer; (2) Newsom will pay no less than fair market value for the Property at the time of sale; (3) the sale of the Property will be entirely for cash; and (4) the transaction will provide greater liquidity to the Plan and will enhance the diversification of the investments of the Plan.

For Further Information Contact: Paul Kelty of the Department, telephone (202) 523-8883. (This is not a toll-free number.)

Dr. Sam W. McCalla, P.A. Profit Sharing Plan (the Profit Sharing Plan) and the Dr. Sam W. McCalla, P.A. Pension Plan (the Pension Plan; collectively, the Plans) Located in Greenville, SC

[Application No. D-7869]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 4975(c)(2) of the Code. If the exemption is granted, the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed sale by the Plans of certain real property (Parcel A and Parcel B), for the total cash consideration of $170,200, to Sam W. McCalla, M.D. (Dr. McCalla), a disqualified person with respect to the Plans, provided the amount paid for Parcel A and Parcel B is not less than fair market value on the date the transaction is consummated.

Summary of Facts and Representations

1. The Plans, which are not disqualified persons with respect to each other, consist of the Profit Sharing Plan and the Pension Plan. Dr. McCalla, an orthopedic surgeon, is the sole participant in each Plan. As of August 31, 1988, the Profit Sharing Plan and the Pension Plan had total assets having fair market values of $196,436 and $118,615, respectively. The trustee of the Plans and the decisionmaker with respect to the Plans' investment is Dr. McCalla.

2. In July 1985, the Plans became inactive. At that time, Dr. McCalla, the sole shareholder of Sam W. McCalla, P.A. (the Employer), decided to dissolve his professional association due to a change in his personal goals. The Employer had been engaged in the practice of medicine in Greenville, South Carolina. As a result of the dissolution of the Employer, two vested employees who participated in the Plans elected to roll their benefits into individual retirement accounts. Although the Employer no longer exists as a legal entity, Dr. McCalla remains in the Plans as their sole participant.[1]

3. Among the assets of the Plans are two parcels of mostly unimproved, contiguous real property that are located on McConnell Road in Greenville County near the City of Greer, South Carolina. Parcel A is owned by the Profit Sharing Plan. It consists of 51.48 acres of land that have been improved with a 1200 square foot framed house, a horse stable and a small storage barn. Since 1979, the house and stable on Parcel A have been leased, on a month-to-month basis, to Ms. Jennifer Jones, an unrelated party, for $500 per month. Parcel B is owned by the Pension Plan. It consists of 53.8 acres of unimproved land. Both Parcel A and Parcel B are adjacent to other real property owned by Dr. McCalla. The applicant represents that neither Parcel A nor Parcel B have been used by or leased to disqualified persons with respect to the Plans.

4. The Plans purchased Parcel A and Parcel B as cotenants of a single tract of land (the Property) in December 1973. The seller of the Property was the Loftis Estate, an unrelated party. The Plans paid $106,162 for the Property. To acquire the Property, the Plans made a total downpayment to the seller of $27,150. Of this amount, $15,280 was paid by the Profit Sharing Plan and $11,890 was paid by the Pension Plan. The Plans financed the remainder of the acquisition price by obtaining a first mortgage loan in the original principal amount of $79,012 from the Bank of Greer located in Greer, South Carolina. The lender was also an unrelated party. The loan was for a duration of five years and it carried interest at the rate of six percent per annum.

5. Between December 1977 and October 1979, the Profit Sharing Plan obtained, in connection with its interest in the Property, three additional loans having an aggregate principal amount of $62,000 from two unrelated banks. No such financing was obtained by the Pension Plan. The applicant represents that all payments due under the original mortgage loan and the three subsequent loans were made by the Plan in a timely manner and there were never any defaults or delinquencies. At present, the Property is unencumbered by outstanding loan obligations of either Plan.

[1] Because Dr. McCalla is the only participant in the Plans and the Employer is wholly-owned by Dr. McCalla, there is no jurisdiction under Title I of the Act pursuant to 29 CFR 2510.3-3(b). However, there is jurisdiction under Title II of the Act pursuant to section 4975 of the Code.

6. Although it was originally intended that the Profit Sharing Plan own an undivided 60 percent interest in the Property and the Pension Plan, an undivided 40 percent interest, the deed to the Property failed to reflect the Plans' respective holdings. In 1979, the Property was partitioned into Parcel A and Parcel B to correct the error in the deed. The value of acreage then attributed to Parcel A and to Parcel B corresponded with the proportionate interests of the Plans in the Property. A new deed evidencing the partitioning of the Property was duly recorded. The applicant states that the Property was also partitioned to facilitate its future development and to enable Dr. McCalla to keep more accurate records.

7. Dr. McCalla believes it would be in the best interests of the Profit Sharing Plan and the Pension Plan to dispose of Parcel A and Parcel B. Dr. McCalla cites the following reasons for recommending this action: (a) The high percentage of the Plans' assets that are represented by Parcel A and Parcel B; (b) the possibility that the Plans' continued retention of Parcel A and Parcel B could pose liquidity problems at the time of Dr. McCalla's retirement; and (c) the fact that Parcel A and Parcel B have not appreciated greatly in value since 1973. Accordingly, Dr. McCalla requests an administrative exemption from the Department in order to purchase Parcel A and Parcel B from the Plans. Dr. McCalla proposes to pay the Profit Sharing Plan and the Pension Plan a sales price that will reflect the fair market values of Parcel A and Parcel B as such values are determined by a qualified independent appraiser. Neither Plan will be required to pay any real estate fees or commissions or incur any other expenses in connection with the proposed sale.

8. Parcel A and Parcel B have been appraised by Mr. John C. Kulze (Mr. Kulze), M.A.I., Executive Vice President of Wilkins Norwood and Company of Greenville, South Carolina and an independent appraiser. In appraisal reports dated December 28, 1988, Mr. Kulze placed the fair market value of Parcel A at $104,800 and the fair market value of Parcel B at $65,400. Mr. Kulze was also of the opinion that Parcel A and Parcel B were of no unique or special value to Dr. McCalla by reason of their proximity to other real property owned by Dr. McCalla and, as such, would not warrant Dr. McCalla paying a higher purchase price. Thus, in accordance with Mr. Kulze's determinations, Dr. McCalla will pay the Plans the fair market value of Parcel A and Parcel B on the date of sale.

9. In summary, it is represented that the proposed transaction will satisfy the statutory criteria for an exemption under section 4975(c)(2) of the Code because: (a) The sale will be a one-time transaction for cash; (b) the sales prices for Parcel A and Parcel B have been determined by a qualified, independent appraiser; (c) the Plans will not be required to pay any real estate fees or commissions or other expenses in connection with the proposed sale; and (d) Dr. McCalla is the only participant in the Plans who will be affected by the proposed sale and he desires that such transaction be consummated.

Notice to Interested Persons

Because Dr. McCalla is the only participant in the Plans who will be affected by the proposed transaction, it has been determined that there is no need to distribute the notice of proposed exemption to interested persons. Written comments and requests for a public hearing are due thirty days following the date of publication of the notice of proposed exemption in the **Federal Register**.

For Further Information Contact: Ms. Jan D. Broady of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

Merrill, Lynch, Pierce, Fenner & Smith Inc. Prototype Individual Self-Employment Retirement Plan (the Plan) Located in Greensboro, North Carolina

[Application No. D-7899]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 4975(c)(2) of the Code and in accordance with the procedures set forth in Rev. Proc. 75-26 (1975-1 C.B. 722). If the exemption is granted the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed cash sale to the Plan of 125 shares of stock (the Shares) in Precision Fabrics Group Inc. (the Company) by Charles H. Flynt, Jr. (Mr. Flynt), the sole participant in the Plan; provided that the sale price for the Shares is no greater than the fair market value of the Shares on the date of the sale.[2]

[2] Because Mr. Flynt is the sole participant in the Plan, there is no jurisdiction under Title I of the Employee Retirement Income Security Act of 1974 (the Act) pursuant to 29 CFR 2510.3-3(b). However, there is jurisdiction under Title II of the Act pursuant to section 4975 of the Code.

Summary of Facts and Representations

1. The Plan is a defined contribution Keogh plan which qualifies as a profit sharing plan for self-employed individuals under the Internal Revenue Code (I.R.C.) section 401(a) and 401(c). Merrill, Lynch, Pierce, Fenner, and Smith, Inc. (Merrill Lynch) established the Plan and is the custodian of the Plan. On October 7, 1983, Mr. Flynt adopted the Plan, which has assets of $865,655.71, as of December 30, 1988. The bulk of the assets in the Plan is attributable to a roll-over contribution from a distribution Mr. Flynt received upon termination of the profit sharing plan of Flynt, Inc., a plan qualified under I.R.C. section 401(a).

2. The Company, a North Carolina corporation, was formed early in 1988 to acquire substantially all of the assets and business of the Precision Fabrics Division of Burlington Industries, Inc. On February 16, 1988, Mr. Flynt acquired 125 Shares of common stock of the Company at a price of $1,000 per share for a total price of $125,000. The Shares are not publicly traded. According to the shareholder's agreement with respect to the purchase of Shares in the Company, dated April 15, 1988, sales, assignments and other transfers or encumbrances of the Shares are restricted, except that transfers to members of the shareholder's immediate family and to other shareholders are permitted; provided certain conditions are met. In addition, the Company (and thereafter each of the other shareholders) has a right of first refusal with respect to any Shares for which a shareholder receives a bona fide offer to purchase such Shares.

3. Brian T. Napier (Mr. Napier), President, A.S.A. of Capital Analysts Inc. Business Appraisals, located in Greensboro, North Carolina, performed an appraisal of the fair market value of the Shares. In a letter dated November 10, 1988, Mr. Napier originally established that the fair market value of the Shares, as of September 30, 1988, fell within the range of from $940 to $1,040 per share. Subsequently, Mr. Napier revised his November 10 letter and established the value of the Shares to be $1,040 per share based upon approximately 10,639 shares of common stock issued and outstanding, as of September 30, 1988, on a fully-diluted basis. Mr. Napier represents that he is independent in that he has no past, present, or intended ownership or financial interest in the Company and that his fee was not contingent upon the conclusions of value stated in the appraisal. Mr. Napier is qualified in that

VOL 54 ISS 79 AP 26 1989 UMI

he is a senior member of the American Society of Appraisers and has nearly twenty (20) years experience in establishing opinions of value of closely-held companies.

4. An exemption is requested to allow the Plan to purchase the Shares from Mr. Flynt for $130,000 in cash; provided that such price is no greater than the fair market value of the Shares on the date of the sale. It is represented that certificates representing the Shares will be transferred to Merrill Lynch who will hold them as assets of the Plan. It is represented that Merrill Lynch will not act as broker dealer in this matter and will receive no compensation with respect to the transaction. After the exclusion of the sale, the Company will record the transfer of the Shares to the Plan on its stock transfer book and thereafter will recognize the Plan as the legal owner of the Shares.

It is estimated that the value of the Shares after the sale will constitute 16.3% of the total assets of the Plan. The Plan will incur no transfer costs of any kind as a result of the sale.

Mr. Flynt represents that based on his knowledge and experience and familiarity with the operation and financial condition of the Company that the Shares will be an ideal investment for the Plan in that the value of the Shares will grow significantly over the long term and will provide him, as the sole participant, a retirement income greater than that which could be provided by other investments. Mr. Flynt argues that the Company, while functioning as a division of Burlington Industries for many years, was a consistently superior performer. It is represented that because the management team of the Company, under its new ownership consists of the former president and other key executives of Burlington Industries, and because operations of the Company have continued to the present without material change, that there is no reason to believe the Company will not continue to be profitable. Although the Shares are not publicly traded, Mr. Flynt represents that the Shares are nevertheless readily marketable, and that the restrictions on transferability of the Shares would not significantly reduce marketability.

5. In summary, the applicant represents that the proposed transaction meets the statutory criteria of section 4975 of the Code because:

(a) The Plan will pay the fair market value of the Shares of the Company as determined by an independent qualified appraiser;

(b) The Plan will incur no transfer costs of any kind in connection with the acquisition of the Shares of the Company;

(c) The sale is a one-time transaction for cash; and

(d) Mr. Flynt is the only participant in the Plan, such that the transaction will only affect Mr. Flynt.

Notice to Interested Persons: Because Mr. Flynt is the only participant in the Plan, it has been determined by the Department that there is no need to distribute the notice of pendency to interested persons. Comments and requests for a hearing must be received by the Department within 30 days of the date of publication of this notice of proposed exemption in the Federal Register.

For Further Information Contact: Angelena C. Le Blanc of the Department, telephone (202) 523-8883. (This is not a toll-free number.)

Green Mountain Radiology, Inc. Profit Sharing Plan (the Plan) Located in Montpelier, Vermont

[Application No. D-7904]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to a proposed cash sale by the Plan of a certain parcel of unimproved land (the Property) to Dr. James R. Chandler (Dr. Chandler), a party in interest with respect to the Plan, provided that the Plan receives the greater of $16,000 or the fair market value at the time of the sale.

Summary of Facts and Representations

1. The Plan, established on October 1, 1979, is a profit sharing plan with 4 participants. As of September 30, 1988, the Plan had $1,304,409 in assets. As of the same date, Dr. Chandler's assets in his separate account (the Account) in the Plan were $253,711. The Plan permits participants to direct the investments of their separate accounts. The current trustees are Dr. Chandler, Dr. J. Lorimer Holm, Dr. Robert Johnson, and Dr. Barnum Royal (the Trustees). All of the Trustees are participants in the Plan, as well as employees, stockholders, and officers of Green Mountain Radiology, Inc. (the Employer). The employer is a medical corporation engaged in the practice of radiology.

2. On July 23, 1986, the Account purchased the Property from an unrelated third party for $10,042.50. The Property consists of 4 acres of unimproved vacant land located in Berlin, Vermont. The applicant represents that the Property was acquired with the intent to plant 1500 Christmas trees on the property and thereby produce income, but the trees were destroyed within the following two years by a "Bedstraw" weed. The applicant maintains that the cost of weed eradication would be prohibitive and environmentally unsound. The applicant further maintains that the Property is currently unproductive, vacant and unused.

3. The applicant proposes to sell the Property to Dr. Chandler, a party in interest with respect to the Plan. An appraisal of the Property was prepared by Bruce C. Ellison, SRA (Mr. Ellison), a real estate appraiser and consultant with Ellison Appraisal Associates. The appraisal dated October 27, 1988 estimates the fair market value of the Property to be $16,000. Mr. Ellison is independent of the Plan and the Employer. Mr. Ellison is a member of the Society of Real Estate Appraisers, and was twice President of its Vermont chapter. He also represents that he is qualified because he has appraised approximately 200 parcels of land in the central Vermont area. Mr. Ellison, in his appraisal, also addresses the question of whether the ownership of property adjacent to the Property by Dr. Chandler creates a special premium value to Dr. Chandler above a value which may be paid by third parties for the Property. Mr. Ellison maintains that because Dr. Chandler already owns 35 acres, the acquisition of an additional four is not a highly motivating factor for the purchase. However, because his ownership of adjacent land allows Dr. Chandler legal access to the otherwise landlocked Property, Mr. Ellison concludes that some premium should be placed on the value of the Property. The appraisal incorporates such a premium.

4. The applicant represents that the transaction is desirable for the Plan. The transaction would involve 1.2% of the total Plan's assets and 6.2% of Dr. Chandler's separate account. The applicant further represents that the transaction is administratively feasible because the purchase price will be paid completely in cash at the time of the sale and the plan will pay no costs associated with the sale. Also, the transaction is in the Plan's interest as the proposed sale will provide cash for productive reinvestment. It is also protective of the Plan as the fair market value of the Property has been determined by an independent appraiser. There are no outstanding debts or mortgages on the Property. The Property is completely free of liens. The applicant represents that economic hardship will result if the proposed transaction is denied. The Plan will continue to hold an unproductive and illiquid asset that does not yield income. There has been no attempt of sale to another party. The applicant believes that because the Property is landlocked with no right of access it is unmarketable to a third party. The applicant maintains that there is no other purchaser presently available who is ready, willing and able to purchase the Property for its fair market value.

5. In summary, the applicant represents that the transaction satisfies the statutory criteria of section 408(a) of the Act and section 4975(c)(2) of the Code because:

(a) The proposed sale will be a one-time cash transaction;

(b) The price paid to the plan will be the greater of $16,000 as established by an independent appraisal or the fair market value of the Property at the time of the sale;

(c) The Plan will pay no expenses associated with the sale;

(d) The sale will allow the Plan to liquidate its investment portfolio and will provide cash for income yielding investment.

For Further Information Contact: Ekaterina A. Uzlyan of the Department at (202) 523-8194 (this is not a toll-free number).

White River Diagnostic Clinic, P.A. Retirement Plan (the Plan) Located in Batesville, Arkansas

[Application No. D-7907]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975).[3] If the exemption is granted the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed sale for cash by the Plan of certain real property (the Real Property) to Paul Baxley, M.D., (Dr. Baxley) a disqualified person with respect to the Plan, provided that the price paid be no less than the fair market value of the Real Property as of the date of sale as determined by an independent and qualified appraiser.

[3] The applicant represents that Paul Baxley, M.D., is the sole shareholder, officer and director of White River Diagnostic Clinic, P.A., the Plan sponsor, and that Paul Baxley, M.D. and his wife, Sheila Baxley, are the sole participants in the Plan. Accordingly, there is no jurisdiction under Title I of the Act pursuant to 29 CFR 2510.3-3(b); However, there is jurisdiction under Title II of the Act pursuant to section 4975 of the Code.

Summary of Facts and Representations

1. The Plan is a money purchase pension plan sponsored by White River Diagnostic Clinic, P.A. (the Clinic). Dr. Baxley is the sole shareholder, officer and director of the Clinic. Dr. Baxley and his wife, Sheila Baxley, are the only participants in the Plan. As of June 30, 1988 the Plan had $206,746.09 in assets.

2. On April 20, 1982 the Plan acquired the Real Property, a detached frame two-bedroom residence located at 1301 Sidney Street in Batesville, Arkansas, from Dale E. Anderson and his wife, Fionnula Anderson, and Paul T. Wayland and his wife, Vivien Wayland, unrelated third parties, for $26,000 in cash. The applicant represents that the Real Property was acquired as an investment and to produce rental income, but that since 1982 local property values have declined considerably, that the Real Property is currently unrented, and that the Real Property has remained on the market for over thirty-six months without attracting a buyer. The applicant represents that the Real Property has never been rented to or otherwise used by any disqualified person with respect to the Plan.

3. On August 11, 1988, R.L. Carpenter, Jr., an independent and qualified real estate appraiser practicing in Batesville, Arkansas, stated that the fair market value of the Real Property was $22,000.

4. Accordingly, the Plan proposes to sell the Real Property to Dr. Baxley for cash at its fair market value at the date of sale as determined by an independent and qualified appraiser. No commissions, fees, or taxes in connection with the sale will be paid by the Plan.

5. In summary, the applicant represents that the proposed transaction will satisfy the criteria of section 4975(c)(2) of the Code because: (a) the Real Property will be sold for its fair market value as of the date of the sale as determined by an independent and qualified appraiser; (b) the sale represents a one-time transaction for cash which can be easily verified; (c) the sale will not require the payment by the Plan of any commissions, fees, or taxes; (d) the Plan will be able to divest itself of property which is declining in value; and (e) Dr. Baxley, the trustee of the Plan, and his wife, the only participants in the Plan, and the only persons affected by the proposed transaction, desire that the transaction be consummated.

Notice to Interest Persons: Because Dr. Baxley and his wife are the only participants in the Plan, it has been determined that there is no need to distribute the notice of pendency to interested persons. Comments and requests for a hearing must be received by the Department within 30 days of the date of publication of this notice of proposed exemption in the Federal Register.

For Further Information Contact: Joseph L. Roberts III of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

Pennfield Precision, Inc. Profit Sharing Plan (the Plan) Located in Sellersville, PA

[Application No. D-7917]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions section 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to the proposed sale by the Plan of certain unimproved real property (the Property), for the total cash consideration of $70,000, to the John F. Matczak and Carl F. Tate General Partnership (the Partnership), a party in interest with respect to the Plan, provided the amount paid by the Partnership for the Property is not less than fair market value at the time the transaction is consummated.

Summary of Facts and Representations

1. The Plan is a profit sharing plan with 58 participants and total assets of approximately $591,177 as of October 12, 1988. The Plan is sponsored by Pennfield Precision, Inc. (the Employer), a Pennsylvania corporation which operates a precision machine shop in Sellersville, Pennsylvania. The trustees of the Plan are Messrs. John F. Matczak and Carl F. Tate (Messrs. Matczak and Tate), both of whom are officers and shareholders of the Employer. Mr. Matczak makes investment decisions for the Plan.

2. The Partnership is a general partnership in which Mr. Matczak holds a 60 percent interest and Mr. Tate, a 40 percent interest. The Partnership was formed in June 1974 for the purpose of

VOL 54 ISS 79 AP 26 1989 UMI

real estate development. The Partnership is located in Sellersville, Pennsylvania.

3. Among the assets of the Plan is the Property, a parcel containing 59.4 acres of unimproved and unencumbered land located in rural Charleston Township, Tioga County, Pennsylvania. The Property adjoins several parcels of land that are owned by Messrs. Masczak and Tate. The Plan purchased the Property on December 20, 1973 for investment purposes from Mr. and Mrs. Robert J. Patierno, Jr., who were unrelated parties. The Plan paid $29,000 for the Property. The purchase was not financed by any indebtedness. In addition to paying the purchase price, the Plan's only expenditures incurred in connection with its ownership of the Property have been expenses related to the 1973 purchase totaling $469 and real estate taxes of approximately $2,000. The applicant represents that since the time of acquisition by the Plan, the Property has not been used by or leased to parties in interest with respect to the Plan.

4. To provide the Plan with liquidity and the ability to invest in higher income-producing assets, the Partnership requests an administrative exemption from the Department in order that it may purchase the Property from the Plan. The Plan proposes to sell the Property to the Partnership for a total sales price of $70,000. The consideration for the Property will be paid by the Partnership in cash. In addition, all fees and other expenses coincident with the sale will be borne entirely by the Partnership.

5. The Property was valued by Mr. Al Stoltzfus (Mr. Stoltzfus), a licensed real estate broker and an independent appraiser affiliated with Stoltzfus Appraisal Service of Wellsboro, Pennsylvania. As of November 16, 1988, Mr. Stoltzfus placed the fair market value of the Property at $64,000. Mr. Stoltzfus opined that the value placed on the Property took into account its potential for future development. In addition, by letter dated March 7, 1989, Mr. Stoltzfus stated that, as neighboring owners, Messrs. Matczak and Tate would be expected to pay an additional premium that would not exceed $5,000. Thus, the proposed purchase price of $70,000 is in excess of the fair market value of the Property and the premium that would be paid by an adjacent property owner.

6. In summary, it is represented that the proposed transaction will satisfy the statutory criteria for an exemption under section 408(a) of the Act because: (a) The proposed sale of the Property will be a one-time transaction for cash; (b) the sales price for the Property, which will be greater than its fair market value as determined by an independent appraiser and will more than compensate the Plan for all expenses it has incurred in connection with the acquisition and holding of the Property; (c) the Plan will not incur any real estate fees or other expenses in connection therewith; and (d) the proposed sale will allow the Plan to invest the cash proceeds from the Property in higher income-yielding investments.

For Further Information Contact: Ms. Jan D. Broady of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

Ralph Wilson Plastics Employees Retiremeot Plan (the Plan) Located in Temple, TX

[Application No. D-7921]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to the proposed cash sale by the Plan of a certain parcel of unimproved real property (the Property) to Ralph Wilson Plastics Company (the Company), a party in interest, provided the sales price for the Property is not less than the greater of: (a) the the fair market value of such Property on the date of sale; or (b) the Plan's total acquisition and holding costs with respect to the Property.

Summary of Facts and Representations

1. Premark International, Inc. (Premark), the sponsor of the Plan is a Delaware corporation engaged in the manufacture and marketing of consumer and commercial products under widely-recognized brand names including Tupperware, Wilsonart, Hobart, West Bend, Vulcan and Precor. Premark maintains its principal place of business in Deerfield, Illinois. The Company, a wholly-owned subsidiary of Premark, is engaged in the manufacture of decorative laminate remodeling products for residential and commercial use. The Company is located at 600 Bruce Drive, Temple, Texas.

2. The Plan is a defined contribution plan that was established by the Company in 1959. Since March 31, 1976, the assets of the Plan hve been frozen and the Company has made no further contributions. The Plan, however, continues to qualify as a tax-exempt plan. Employees of the Company who were participants in the Plan at the time it was frozen, still participate in the Plan. As of the plan year ended December 31, 1987, the Plan had total assets of approximately $6,938,541. As of the plan year ended December 31, 1988, the Plan had 388 participants. The Plan presently has twelve trustees (the Trustees), six of whom are permanent and six of whom rotate. The rotating Trustees are appointed by Premark's Management Committee for Employee Benefits for a one year term. The Trustees are officers and employees of Premark and the Company and they have discretionary control over the investment of the Plan's assets.

3. On July 17, 1985, the Trustees met to discuss the possibility of purchasing, on behalf of the Plan, 37.786 acres of unimproved real property that was adjacent to the Company's plant and located directly north of the Temple, Texas Industrial Park on the east of Wendland Road. In accordance with the terms of the Trust Agreement, which authorized the Trustees to make such investments, the Trustees purchased the Property on August 15, 1985 from the Michelin Tire and Rubber Company, an unrelated party, for $340,131. The Trustees believed the Property would be a good investment for the Plan and that it would appreciate in value.

4. The Property is the only real property ever owned by the Plan. Since the date of its acquisition, the Plan has paid a total of $6,351 in real estate taxes, levies and assessments. In addition, the Plan has not leased the Property to Premark, the Company or any party in interest nor has the Plan, Premark, or the Company utilized the Property. Currently, the Property remains unimproved and it is not subject to any lease. Through the 1987 growing season, the Property was leased on an unrelated third party as farmland.

5. On December 4, 1985, the Plan granted a 10 foot right of way easement to the Texas Power and Light Company (Texas Power), an unrelated party. The purpose of the easement was to enable Texas Power to install multiple poles and guy-wire anchorages located along the southeast border of the Property. On April 29, 1988, the Plan deeded a 15 foot public utility easement, a 20 foot right of way easement along the Property's western boundary and a 15 foot right of way easement along the Property's northern boundary to the City of Temple, Texas) the City). These additional easements were granted by the Plan to enable the City to contruct sewer, water, gas and telephone lines on the Property. The Plan was paid $16,000 as consideration for the granting of the easements to the City.

6. Due to a slowing of the economy in central Texas and the availability to prospective purchasers of less expensive property located in the industrial park directly south of the Property, the investment return for the Property that was expected has not been realized. Although the Trustees have considered various options that are available to the Plan with respect to the Property, including practicality of advertising it for sale to the general public, they believe the most appropriate course of action to take is to sell the Property to the Company. In this way, the Trustees believe the sale proceeds can be placed in higher-yielding investment vehicles for the Plan. Therefore, an administrative exemption is requested from the Department.

7. The Company proposes to purchase the Property from the Plan for cash for a sales price that will be no less than the higher of: (a) The fair market value of the Property on the date of the sale; or (b) the Plan's original acquisition cost for the Property, plus all fees, taxes, levies and assessments on the Property and other expenses incurred by and paid by the Plan since August 15, 1985. The Company will pay all costs incurred with respect to the sale of the Property including any fees, commissions or expenses incident to such sale.

8. The Property was appraised by Messrs. Clemo L. Ray, Jr., M.A.I. and Curtis E. Ginnow, Associate (Messrs. Ray and Ginnow), independent appraises affiliated with the appraisal firm of Central Texas Appraisal Company of Temple, Texas. In an appraisal report dated December 15, 1988, Messrs. Ray and Ginnow placed the fair market value of the Property at $342,000 as of December 9, 1988. The appraisal report did not include approximately .853 acres of land that were subject to two of the easements because Messrs. Ray and Ginnow determined that these tracts were not part of the unsable parcel.

By letter dated February 27, 1989, Mr. Ray acknowledged that the excluded acreage could still be considered part of the Plan's fee simple estate. As such, he concluded that the fair market value of the Property would be increased to $348,000. Mr. Ray further certified that the Property would have no unique or special value to the Company warranting the payment of a higher purchase price by reason of its proximity to other property owned by the Company. Messrs. Ray and Ginnow will provide the Company with an updated valuation of the Property that will be effective as of the date of the proposed sale.

9. In summary, it is represented that the proposed transaction will satisfy the statutory criteria for an exemption under section 408(a) of the Act because: (a) The sale will be a one-time transaction by the Plan for cash; (b) the Plan will sell the Property at the greater of its fair market value as determined by qualified independent appraisers or its total acquisition and holding costs; (c) the Plan will not pay any real estate fees or commissions or other expenses in connection with the sale; (d) the sale will allow the Trustees to invest, on behalf of the Plan, the sale proceeds in higher-yielding investment vehicles; and (e) the Trustees have determined that the sale of the Property is in the best interests of the Plan and is protective of the Plan's participants and beneficieries.

For Further Information Contact: Ms. Jan D. Broady of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 21st day of April, 1989.

Robert J. Doyle,

Director of Regulations and Interpretations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

[FR Doc. 89-9998 Filed 4-25-89; 8:45 am]

BILLING CODE 4510-29-M

[Application No. T-7492]

Proposed Exemption; Wells Fargo Bank, N.A.

AGENCY: Pension and Welfare Benefits Administration, Labor

ACTION: Notice of proposed exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Federal Employees' Retirement System Act of 1986 (FERSA).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption, within 45 days from the date of publication of this **Federal Register** Notice. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Pension and Welfare Benefits Administration, Office of Regulations and Interpretations, Room, N-5671, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210. Attention: Application No. T-7492. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and

VOL 54 ISS 79 AP 26 1989 UMI

Welfare Benefit Programs, U.S. Department of Labor, Room N–5510, 200 Constitution Avenue, NW., Washington, DC 20210.

Notice to Interested Persons

Notice of the proposed exemption will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the Federal Register. Such notice shall include a copy of the notice of pendency of the exemption as published in the Federal Register and shall inform interested persons of their right to comment and to request a hearing.

SUPPLEMENTARY INFORMATION: The proposed exemption was requested in an application filed pursuant to section 8477(c)(3) of FERSA, and in accordance with procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975), as amended to apply to FERSA.

The application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for a complete statement of the facts and representations.

Wells Fargo Bank, N.A., (the Bank) Located in San Francisco, California

[Exemption Application No. TR–7492]

Proposed Exemption

The Department of Labor is considering granting an exemption under section 8477(c)(3) of the Federal Employees' Retirement System Act of 1986 (FERSA) and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975), as amended to apply to FERSA. If the exemption is granted the restrictions of section 8477(c)(2) of FERSA shall not apply to the purchase and sale of stocks between the Equity Index Fund sponsored by the Bank and other investment funds advised and/or managed by the Bank or its affiliates, nor to the acquisition, holding and disposition of the common stock of Wells Fargo by the Equity Index Fund under the terms and conditions set forth in this notice of proposed exemption.

Effective Date: February 5, 1988.

Summary of Facts and Representations

1. The Bank is a national banking association regulated by the Comptroller of the Currency. The Bank was appointed as a manager with respect to the Thrift Savings Plan established pursuant to the provisions of FERSA (the Plan) on December 21, 1987. The Bank also provides investment advisory and trustee services to many qualified pension and profit sharing plans qualified under section 401(a) of the Internal Revenue Code (the Code), governmental pension plans as defined under section 414(d) of the Code and other institutional accounts and individuals.

2. Section 8438(b) of FERSA requires that the Federal Retirement Thrift Investment Board (the Board) establish a Common Stock Index Investment Fund (the "C" Fund) to be invested in a portfolio designed to replicate the performance of an index which is a commonly recognized index comprised of common stocks, the aggregate market value of which is a reasonably complete representation of the United States equity markets. The agreement between the Bank and the Board provides that the "C" Fund shall be invested with the objective of replicating the Standard & Poor's 500 Composite Stock Price Index (the S&P 500). Pursuant to this agreement, the Bank currently intends to invest the assets of the "C" Fund in its Equity Index Fund which also has the investment objective of replicating the return of the S&P 500. While this agreement would permit the Board to have the assets of the Plan invested in an individual, "stand-alone" portfolio that satisifes the statutory objective, the Bank currently intends to invest the assets of the "C" Fund in its Equity Index Fund. The Bank will not charge the Plan any additional fees for investing in the Equity Index Fund. The Bank's compensation is derived solely from management fees which it receives from the Plan and which are no more than the fees that would be charged for individual management of a "stand-alone portfolio".

3. The Equity Index Fund is passively managed in that the choice of stocks purchased and sold, and the volume purchased and sold are made according to an independent third party index, the S&P 500, rather than according to active evaluation of investments. Also, the Bank has no direct or indirect beneficial interest in the assets of the Equity Index Fund, and the Bank as trustee of the Equity Index Fund is prohibited from acquiring such an interest by regulations promulgated by the Comptroller of the Currency.

4. Cash contributions which are directed by Plan participants to be invested in the "C" Fund are invested by the Plan in the Equity Index Fund. In exchange for such cash contributions, the Plan receives investment units (Units) evidencing the investment. When a participant is to receive a distribution or wishes to reallocate all or a portion of his or her investent in the "C" Fund to a different investment fund, the Bank may be instructed to liquidate Units and transfer the resulting cash from the Equity Index Fund to the Plan. Transaction costs for investments or withdrawals are allocated among the participants in the Equity Index Fund (which includes the Plan and other employee benefit plans).

5. Investments or wtihdrawals normally occur on "opening" dates. On these openings, which occur at least 4 times a month, the Bank nets the investments (including cash dividends received on stocks held by the Equity Index Fund) and withdrawals from the Equity Index Fund against each other and makes sales and purchases of stocks as the aggregate amount invested in the Equity Index Fund rises or falls. In addition, the S&P 500 will occasionally add or delete a stock or change the relative capitalization weighting of a stock. The criteria for such changes are established and maintained by the Standard & Poor's Corporation. If a stock is deleted from the S&P 500, the Equity Index Fund must sell the stock. These changes in the S&P 500 are infrequent, although radical shifts in the availability of equity stocks occasioned by corporate "takeover" activity have increased the frequency of changes in the S&P 500. With respect to the timing of the above transactions, the Bank states that it attempts to replicate any changes to the Equity Index Fund as quickly as possible, generally within three days of the event.

6. the applicant represents that if the Equity Index Fund is required to engage in a stock transaction because of one of the events described above and must do so in the open market, the Equity Index Fund would incur substantial transaction costs including brokerage commissions, the "marketmakers spread" (the amount charged by the exchange specialists for accepting market risk in the stock price during the transactions) and the possible negative market impact of large block trades. These costs, it is represented, can be substantially reduced if cross-trading is done among the Equity Index Fund and investment funds sponsored by the Bank and or managed by the Bank or its affiliates.

7. The applicant represents that the average brokerage commission paid by the Bank for regular market transactions is 3–4 cents per share. The commission paid for the cross-trades is only 1 cent per share or less, which reflects the record keeping costs charged by brokers. In this regard, the applicant represents that the brokers are able to provide record keeping services more economically than the Bank. Cross-trades will avoid the marketmakers spread and the negative market impact caused by large block transactions.

8. The Bank was previously granted an exemption by the Department under section 408(a) of the Employee Retirement Income Security Act of 1974 and section 4975(c)(2) of the Internal Revenue Code allowing cross-trading between certain plans for which the Bank provides advisory and trust services. See Prohibited Transaction Exemption 87–51, 52 FR 22557, June 17, 1987 (PTE 87–51). The applicant is now requesting that a similar exemption be granted under FERSA. The applicant represents that a large proportion of Equity Index Fund stock transactions are eligible for such cross-trades and that these cross-trades can generate substantial transaction cost savings for the Equity Index Fund and therefore for its participants, including the Plan. The applicant represents that all the brokers used in cross-trades will be unrelated to and independent of the Bank. The applicant further represents that from July 1, 1987 through December 31, 1987, the Equity Index Fund utilizing PTE 87–51 saved approximately $700,000 in brokerage commissions. The Bank uses the closing price on the date of the trade for shares listed on a national exchange or NASDAQ to set the share price for all cross-trades except in situations where a particular stock is added or deleted from the S&P 500, in which case the Bank will use the opening price on the next trading day. The Bank represents that it is necessary to use the opening price on the next trading day, because additions or deletions to the S&P 500 are not typically announced until after the market has closed for the day. By using the opening price on the next day of trading, the Bank states that the transaction price will be more representative of the probable price of a market trade and as a result investment performance-tracking errors may be avoided.

9. Additionally, the applicant represents that on April 29, 1987, Standard and Poor's added Wells Fargo Stock (the Stock) to the S&P 500. Because of concerns over the propriety of acquiring the Stock, the Equity Index Fund has not acquired any of the Stock to date. Although the Stock constitutes only a small fraction of the S&P 500, the Applicant represents that failure to acquire the Stock has led to tracking errors. Further, as stated previously, the Equity Index Fund is passively managed and stocks purchased and sold, including the Stock are made pursuant to an independent third party index. Accordingly, the Bank proposes to acquire and hold the Stock in the Equity Index Fund as required by the S&P 500.

10. In summary, the applicant represents that the proposed transactions satisfy the statutory criteria of section 8477(c)(3) of FERSA because: (a) the Equity Index Fund will buy or sell stocks only when changes are made to the portfolio of stocks held in the S&P 500 and when a participant in the Plan invests in or withdraws from the "C" Fund, (b) the Equity Index Fund will save significant amounts of money on brokerage commissions, (c) the Bank will receive no additional fees as a result of the proposed cross-trades, and (d) the acquisition and holding of Wells Fargo stock will allow the Board to carry out its statutorily mandated investment directive of replicating an index which is a reasonably complete representation of the United States equity markets.

For Further Information Contact: Alan Levitas of the Department, telephone (202) 523–8194. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 8477(c)(3) of FERSA does not relieve a fiduciary or other party in interest from certain other provisions of FERSA, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 8477(b)(1), which among other things require a fiduciary to discharge his duties respecting the Plan solely in the interest of the participants and beneficiaries of the Plan, for the exclusive purpose of providing benefits to participants and beneficiaries.

(2) Before an exemption may be granted under section 8477(c)(3) of FERSA, the Department must find that the exemption is administratively feasible, in the interests of the Plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the Plan.

(3) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of FERSA. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(4) The proposed exemption, if granted, will be subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 21st day of April 1989.

Robert J. Doyle,

Director of Regulations and Interpretations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

Multidisciplinary Arts Curriculum Development; Grants and Cooperative Agreements; Availability

AGENCY: National Endowment for the Arts.

ACTION: Notification of availability.

SUMMARY: The National Endowment for the Arts is requesting proposals leading to the award of a Cooperative Agreement that will suport the development and piloting by schools or school districts of up to three examples of a multidisciplinary arts curriculum equivalent to one Carnegie unit of high school work. The content will be a course which could be considered fulfilling high school graduation requirements in the arts for all students in grades 9–12. Eligibility to submit proposals is limited to schools or school districts containing grades 9 through 12 or 10 through 12. Schools or school districts are encouraged to collaborate with other institutions, agencies, and associations serving students in grades 9–12 or with institutions of higher education in applying to the Endowment. In all cases, however, a school or school district must be the principal applicant. Those interested in receiving the Solicitation package should reference Program Solicitation PS 89–07 in their request and include two (2) self-addressed labels. No verbal requests for the Solicitation will be honored.

DATES: Program Solicitation PS 89–07 will be available approximately May 1, 1989 with proposals due on June 30, 1989.

ADDRESS: Requests for the Solicitation should be addressed to National Endowment for the Arts, Contracts Division, Room 217, 1100 Pennsylvania Avenue NW., Washington, DC 20506.

FOR FURTHER INFORMATION CONTACT: William I. Hummel, Contracts Division, National Endowment for the Arts, 1100

VOL 54 ISS 79 AP 26 1989 UMI

Pennsylvania Avenue NW., Washington, DC 20506 (202/682-5452).

Peter J. Basso,

Deputy Chairman for Management, National Endowment for the Arts.

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

Abnormal Occurrences for Fourth Quarter CY 1988; Dissemination of Information

Section 208 of the Energy Reorganization Act of 1974, as amended requires the NRC to disseminate information on abnormal occurrences (i.e., unscheduled incidents or events which the Commission determines are significant from the standpoint of public health and safety). The following incident under an NRC-issued license was determined to be an abnormal occurrence (AO) using the criteria published in the Federal Register on February 24, 1977 (42 FR 10950). The AO is described below, together with the remedial actions taken. The event is also being included in NUREG-0090, Vol. 11, No. 4 ("Report to Congress on Abnormal Occurrences: October-December 1988"). This report will be available in the NRC's Public Document Room, 2120 L Street, NW., (Lower Level), Washington, DC about three weeks after the publication date of this Federal Register Notice.

88-14 Medical Therapy Misadministration

The general AO criterion notes that an event involving a moderate or more severe impact on public health or safety can be considered a abnormal occurrence.

Date and Place—November 17, 1988; Wilkes-Barre General Hospital; Wilkes-Barre, Pennsylvania.

Nature and Probable Consequences—On November 18, 1988, the licensee notified NRC Region I by telephone that a therapeutic misadministration had occurred involving a patient receiving treatment for an endo-bronchial tumor.

A radiotherapy physican had prescribed a therapeutic dose of 750 rads to the right bronchus at a distance of 0.5 centimeters from an iridium-192 source in a remote afterloading brachytherapy device. However, the staff radiotherapy physicist mistakenly developed a treatment plan that delivered 750 rads at 1.0 centimeter from the source. This resulted in a dose of 1800 rads at 0.5 centimeters from the source, rather than the prescribed 750 rads.

The licensee stated that the dose received by the endo-bronchial tumor is within standard treatment protocols for that type of tumor and that no adverse effects are anticipated as a result of the misadministration.

However, the event was of concern because of the large magnitude of error. NRC Region I conducted a special inspection of the license on November 29, 1988, to review the circumstances associated with the event and the corrective actions planned by the licensee to prevent recurrence. In addition, NRC Region I requested an NRC medical consultant to review the event.

Cause or Causes—The cause was attributed to human error. The licensee's staff radiotherapy physicist used the wrong table of the manual used to develop a treatment plan.

Actions Taken to Prevent Recurrence

Licensee—Corrective actions include independent verifications of treatment calculations (one by a dosimetrist and one by a radiotherapist), providing additional the training on a therapy equipment, and providing an additional chart for determining maximum treatment times for each treatment plan.

NRC—On December 16, 1988, NRC Region I sent a Confirmatory Action Letter to the licensee confirming the licensee's corrective action plans. The NRC's consultant confirmed the licensee's statement that the dose received was within standard treatment protocols and that no adverse effects to the patient was anticipated. The report for the November 29, 1988 NRC inspection was issued on February 8, 1989. NRC Region I has scheduled a management meeting with the licensee to review the licensee's corrective actions.

Dated at Rockville, MD this 20th day of April 1989.

For the Nuclear Regulatory Commission.

Samuel J. Chilk

Secretary of the Commission.

BILLING CODE 7590-01-M

[Docket No. 40-2061]

Kerr-McGee Chemical Corp.; Availability of Supplement to the Final Environmental Statement for the Rare Earths Facility, West Chicago, DuPage County, IL

Pursuant to the National Environmental Policy Act of 1969 and the U.S. Nuclear Regulatory Commission's regulations in 10 CFR Part 51, notice is hereby given that a Supplement to the Final Environmental Statement (SFES) prepared by the Commission's Office of Nuclear Material Safety and Safeguards, related to the decommissioning of the Kerr-McGee Chemical Corporation's Rare Earths Facility located in West Chicago, Illinois, is available for inspection by the public in the Commission's Public Document Room at the Gelman Bulding, 2120 L Street, NW., Washington, DC 20555. The SFES is also available for inspection at the Commission's Local Public Document Room in the West Chicago Public Library, 332 E. Washington Street, West Chicago, Illinois 60185. The SFES is being provided to the State Clearinghouse, Bureau of the Budget, Lincoln Town Plaza, 524 S. Second Street, Springfield, Illinois 62706. The SFES is also being sent to the Metropolitan Clearinghouse, Northeastern Illinois Planning Commission, 400 West Madison Street, Chicago, Illinois 60606. Requests for copies of the SFES (identified as NUREG-0904, Supplement No. 1) should be addressed to the Superintendent of Documents, U.S. Government Printing Office, P.O. Box 37082, Washington, DC 20013-7082.

The SFES was prepared in response to an order of the Atomic Safety and Licensing Board presiding over this proceeding that the NRC staff should prepare a supplemental environmental impact statement that evaluates permanent disposal of the mill tailings from operation of the Rare Earths Facility. *Kerr-McGee Chemical Corp.* (West Chicago Rare Earths Facility), LBP-85-3, 21 NRC 244 at 286 (1985).

The licensee's engineering report and related documents are also available for public inspection at the above designated locations. The notice of availability of the Draft Supplement to the Final Environmental Statement (DSFES) for the Kerr-McGee Rare Earths Facility and request for comments for interested persons was published in the Federal Register on June 29, 1987 (52 FR 24229). The comments received from federal, state, and local agencies and interested members of the public and the NRC staff's responses to these comments have been included as an appendix to the SFES and are contained in Volume 2.

Kerr-McGee's proposal decommissioning and stabilization plan involves demotion of the existing buildings, removal of building rubble and contaminated soil to an adjacent disposal site, and stabilization of the materials on the adjacent disposal site in an engineered cell. The Kerr-McGee proposed plan and alternatives to the plan are discussed in the SFES. The NRC staff is recommending approval of Kerr-McGee's proposal for onsite stabilization in an engineered disposal cell. The NRC staff believes that disposal of the wastes onsite can be accomplished in a safe and environmentally sound manner.

Dated at Rockville, Maryland, this 19th day of April 1989.

For the Nuclear Regulatory Commission.

Leland C. Rouse,

Chief, Fuel Cycle Safety Branch, Division of Industrial and Medical Nuclear Safety, NMSS.

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards, Subcommittee on General Electric Reactor Plants (ABWR); Meeting

The ACRS Subcommittee on General Electric Reactor Plants (ABWR) will hold a meeting on May 10-11, 1989, Room P-110, 7920 Norfolk Avenue, Bethesda, MD.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows: *Wednesday, May 10, 1989—8:30 a.m. until the conclusion of business. Thursday, May 11, 1989—8:30 a.m. until the conclusion of business*

The Subcommittee will continue its review of the GE ABWR. The Subcommittee will also preview Chapters 7, 8, 9, 11, 12, 13, 14 and 17 of the Safety Analysis Report related to GE ABWR.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, its consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr. Herman Alderman (telephone 301/492-7750) between 7:30 a.m. and 4:15 p.m. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Date: April 20, 1989.

Gary R. Quittschreiber,

Chief, Project Review Branch No. 2.

BILLING CODE 7590-01-M

[Docket No. 50-395]

South Carolina Electric & Gas Co. and South Carolina Public Service Authority; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards; Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-12, issued to South Carolina Electric & Gas Company and South Carolina Public Service Authority (the licensees) for operation of the Virgil C. Summer Nuclear Station, Unit 1, located in Fairfield County, South Carolina.

The proposed amendment to the Virgil C. Summer Nuclear Station Technical Specifications (TS) would reduce the number and severity of starts of the emergency diesel generators, thereby decreasing engine wear and increasing reliability. This proposed change was originally noticed as a proposed no significant hazards consideration on July 17, 1985 at 50 FR 29016 and renoticed on June 4, 1986 at 50 FR 20373, and August 24, 1988 at 53 FR 32295.

By letter dated November 9, 1987, the NRC requested additional information on the proposed changes. The licensee responded with a submittal dated May 16, 1988 that was modified in a July 14, 1988 submittal. These two submittals were referenced in the August 24, 1988 proposed no significant hazards consideration.

The November 18, 1988 submittal modified the note to Table 4.8-1 to indicate that loading the diesel generator was part of the ten tests identified in the note. Therefore, Surveillance Requirement 4.8.1.1.2.a.4 was added to the note. Surveillance Requirement 4.8.1.2 was also modified to indicate that loading the diesel generator (4.8.1.1.2.a.4) was unnecessary in the demonstration of the operability of the A.C. electrical power sources. Finally, Surveillance Requirement 4.8.1.1.3 was modified to indicate that a Special Report is required to be filed with the Nuclear Regulatory Commission for all failures of the diesel generators, valid or non-valid.

The April 5, 1989 submittal modified Surveillance Requirement 4.8.1.2 to delete the term "or verification" from it. In addiiton, the note to TS 3.8.1.2.b was modified to indicate that the ESF Load Sequencer may be deenergized in Modes 5 and 6 provided that the loss of voltage and the degraded voltage relays are disabled.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination is provided below.

The licensee has determined the proposed amendment involves no significant hazards consideration as follows:

(1) The proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated because a reduction in frequency and severity of diesel generator test starts will result in less wear and stress on engine parts. This will decrease the probability of an accident due to failure of engine parts, and the consequences of an accident will not change.

The present Technical Specifications do not require the various sequencer actuation signals to be operable in Modes 5 and 6. The defeat of the loss of voltage and degraded voltage relays in conjunction with the sequencer being inoperable will prevent a potential inadvertent overload of the unit and

VOL 54 ISS 79 AP 26 1989 UMI

require the operator to manually control loading of the unit. A conservative engineering evaluation has shown that there is adequate time for manual operator action. This change will decrease probability of a diesel failure and enhance the operators' capability to respond to a loss of power in Modes 5 and 6.

(2) The proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated because the design and function of the diesel generator will not change. Starting and loading of the diesel generator will be manually controlled to reduce the possibility of overloading the unit.

(3) The proposed amendment does not involve a significant reduction in the margin of safety because there will be no change in response times or emergency loads assumed in the accident analysis for Modes 5 and 6.

The NRC Staff has made a preliminary review of the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Accordingly, the Commission proposes to determine that the requested amendment does not involve a significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration and Resources Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555 and should cite the publication date and page number of the **Federal Register** notice. Written comments may also be delivered to 7920 Norfolk Avenue, Room P–216, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m.

Copies of written comments received may be examined at the Nuclear Regulatory Commission Public Document Room, 2120 L Street NW., Washington, DC. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By May 26, 1989, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reason why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceedign, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 2120 L Street NW. Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1 (800) 325–6000 (in Missouri 1 (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Elinor G. Adensam: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Randolph R. Mahan, South Carolina Electric & Gas Company, P.O. Box 764, Columbia, South Carolina 29218, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated June 10, 1985, as supplemented December 6, 1985 and May 16, July 14, July 28, and November 18, 1988 and April 5, 1989, which is available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC 20555, and at the Fairfield County Library, Garden and Washington Streets, Winnsboro, South Carolina 29180.

Dated at Rockville, Maryland, this 20th day of April 1989.

For the Nuclear Regulatory Commission.

Elinor G. Adensam,

Director, Project Directorate II–1, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 89–9996 Filed 4–25–89; 8:45 am]

BILLING CODE 7590–01–M

PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL

Northwest Conservation and Electric Power Plan; Final Amendments, 1989 Supplement

AGENCY: Pacific Northwest Electric Power and Conservation Planning Council (Northwest Power Planning Council, Council).

ACTION: Notice of final amendments.

SUMMARY: Pursuant to the Pacific Northwest Electric Power Planning and Conservation Act of 1980 (16 U.S.C. 839 *et seq.*), the Council, in April 1983, adopted a Northwest Conservation and Electric Power Plan (Plan) including model conservation standards (MCS). The most recent complete amendment of the Plan was adopted in 1986. Although the Act requires the Council to review the Plan at least every five years, the Council has taken up certain parts of the Plan more frequently, to respond to ongoing changes in the regional energy picture and to incorporate the most recent technology and analysis. The Council has now amended the Plan by updating the technical data on which portions of the Plan depend. The Council has also adopted a response to the public comments received on the Supplement. This notice describes the amendments contained in the 1989 Supplement and explains how to receive copies of the Supplement, its appendices and/or response to comments.

SUPPLEMENTARY INFORMATION: As directed by the Northwest Power Act (16 U.S.C. 839 *et seq.*, the Act), the Council developed and adopted a regional conservation and electric power plan shortly after its formation. The Plan includes an energy conservation program, including, but not limited to, model conservation standards; a recommendation for research and development, a methodology for determining quantifiable environmental costs and benefits; a twenty-year demand forecast; a forecast of power resources that the Bonneville Power Administration will need to meet its obligations; an analysis of reserve and reserve reliability requirements; and a surcharge methodology. The Plan also includes the Fish and Wildlife Program, developed pursuant to other procedural requirements under the Act.

In otder to keep the Plan as up to date as possible, the Council entered a public involvement process in January 1988 by publishing a staff issue paper entitled "Plans for a Technical Update to the 1986 Power Plan." The Council followed this paper with several issue papers on key planning areas, including economic, demographic and fuel price assumptions; demand forecasts; and analyses of the cost and availability of conservation and generating resources. In November 1988, after considerable public comment, the Council published a Staff Draft Update, which covered all the subjects treated in the issue papers. The Draft Update also generated extensive public comment. Most commentors said that while certain technical features of the Plan ought to be updated in the near term, the Draft Update as a whole proposed more fundamental changes in the Plan, some of which touched on basic policy issues, than could be addressed in the relatively short time proposed for the Update process. In particular, commentors, believed that several resources in the draft resource portfolio needed more deliberate consideration. These include cogeneration, and its cost and performance data, transmission and distribution system efficiency improvements, voltage regulation, as well as strategies to back up nonfirm power. Many commentors suggested that the Council identify the more basic policy issues now, but taken them up on a more extended schedule.

Following these comments, the Council revised the Draft Update. In this revision, which was called the Draft Supplement, the Council reduced the more controversial resource portfolio estimates to the values found in the 1986 Power Plan.

Amendments

The amendments to the Supplement highlight the Council's power planning process, including, in particular, its philosophy of and strategies for implementing least cost planning. The Supplement also identifies certain major policy issues proposed for future, more detailed consideration.

The Supplement is chiefly aimed at bringing up to date the demand forecasts contained in the Plan, the estimates of resources available to meet future demand, both conservation and generating resources, and, within the limits noted above, an updated resource portfolio. The Supplement also contains several appendices, which document the revised forecasts of economic, demographic and fuel price assumptions, revised demand forecasts; revised estimates of the cost availability of conservation resources; revised estimates of the cost and availability of new generation (hydroelectric, cogeneration, strategies to improve the use of the existing hydro system by using combustion turbines, and coal, along with a listing of the cost components considered) in the Northwest; and a description of the region's hydroelectric power system.

The Supplement amends the Council's Power Plan, affecting portions of Chapters 1–8 of the 1986 Plan. It does not modify Chapter 9 (the Action Plan). In case of conflict between the Supplement and the 1986 Power Plan, the Supplement supersedes the Plan. In all other instances, the Supplement is an addition to the 1986 Power Plan.

FOR FURTHER INFORMATION CONTACT. If you would like a copy of the 1989 Supplement to the 1986 Power Plan, the Supplement Appendices, and/or the Response to Comments, please contact Judi Hertz in the Council's Office of Public Information and Involvement. The Council's address is: 851 SW. 6th Avenue, Suite 1100, Portland, Oregon 97204. The Council's telephone numbers are: (503) 222–5161 and (toll free) (800)

BILLING CODE 0000–00–M

Northwest Conservation and Electric Power Plan; Draft Amendments to the Commercial Model Conservation Standards

AGENCY: Pacific Northwest Electric Power and Conservation Planning Council (Northwest Power Planning Council).

ACTION: Notice of proposed amendment to the 1986 Northwest Power Plan model conservation standards for new commercial buildings.

SUMMARY: At its April 12, 1989 meeting the Council voted to distribute for public comment a draft revision of the Model Conservation Standards (MCS) for new commercial buildings. Approximately one year ago, the Council received public comment on proposed revisions, but decided to delay entering rulemaking until new national standards for commercial buildings were completed. The Secretary of the U.S. Department of Energy recently authorized final standards for new federally owned commercial buildings, and the Council believes that the process for updating its standards for new commercial buildings can now proceed.

SUPPLEMENTARY INFORMATION: As directed by the Northwest Power Act (16 U.S.C. 839 *et seq.*, the Act), the Council developed and adopted a regional conservation and electric power plan shortly after its formation. The Plan includes an energy conservation program, including, but not limited to, Model Conservation Standards for new commercial buildings.

Through its experience in implementing the Power Plan, the Council has developed a practice by which it continually reviews and updates, in orderly fashion, elements of the Plan. The frequency with which an element is updated often depends on the availability of new information or changed circumstances. While some proposed amendments are taken up on the Council's own initiative, others are the result of informal suggestions or recommendations from outside parties. In addition, the Council has adopted specific procedures that allow any person to petition for an amendment to the Plan at any time. In this case, the Council granted a petition filed by the Northwest Conservation Act Coalition (NCAC) and the Natural Resources Defense Council (NRDC) that had argued that potentially economically feasible and reigonally cost-effective savings remained beyond the Council's current MCS. The Council, based on its own analysis, on public comments received and on information obtained from consultations with interested parties, has prepared proposed revisions to the MCS for new commercial buildings.

DATES AND ADDRESSES: The Council will accept public comment on the proposed amendments through July 14, 1989. Public hearings will be held in Idaho, Montana, Oregon and Washington. The exact time and location of these hearings will be published in the next issue of the Council's newsletter, *Update!* and can also be obtained by calling the Council's Office of Public Information and Involvement.

INSTRUCTIONS FOR WRITTEN COMMENT: Comments should be sent to the Council's central office, 851 SW. Sixth Suite 1100, Portland, Oregon 97204. Written comments should be clearly marked "COMMERCIAL MCS."

FOR FURTHER INFORMATION CONTACT: If you would like a copy of these proposed amendments, please contact Judi Hertz in the Council's Office of Public Information and Involvement. The Council's address is: 851 SW. 6th Avenue, Suite 1100, Portland, Oregon 97204. The Council's telephone numbers are: (503) 222–5161 and (toll free) (800) 222–3355 in Idaho, Montana, and Washington or (800) 452–2324 in Oregon.

Edward Sheets,

Executive Director.

BILLING CODE 0000–00–M

SECURITIES AND EXCHANGE COMMISSION

[34–26741; AMEX–89–5]

Self-Regulatory Organizations; Proposed Rule Change by American Stock Exchange, Inc., Relating to Acceleration of Trade Comparison

April 18, 1989.

Pursuant to section 19(b)(1) of the 78s(b)(1), notice is hereby given that on March 8, 1989, the American Stock Exchange, Inc. ("Amex") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Amex. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The text of the proposed rule change is available at the Office of the Secretary, Amex and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Amex included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Amex has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

(1) Purpose

The Exchange is proposing that transactions effected on the Exchange be compared or otherwise closed out within one business day from the date of trade, rather than within five business days, as is the current practice. Adoption of new Rule 719 will not affect the settlement of equity transactions, most of which are currently compared and settled within five business days from the date of trade.

Shortening the comparison time frame will improve the efficiency of equity comparisons and clearance and reduce the exposure of members and member organizations to risk due to market fluctuations on uncompared or questioned trades.

For the past year the Exchange and the New York Stock Exchange ("NYSE") have been working with the member firm community and the National Securities Clearing Corporation ("NSCC") to establish operational parameters, systems and rules which will implement next-day comparison. The NYSE has filed a proposed rule change (SR–NYSE–88–36) requiring next-day resolution of open trades and has proposed implementation within 18 months of Commission approval. As in the case of the NYSE, we seek approval of new Rule 719 by the Commission, but would allow up to 18 months to fully implement the rule requirements. This delayed implementation would enable the Exchange to coordinate with the NYSE, NSCC and member firm community the details of additional rules and procedures, and to assure operational readiness when the rule becomes effective.

(2) Basis

The proposed rule change is consistent with section 6(b) of the Act in general and furthers the objectives of section 6(b)(5) in particular in that it fosters cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change will impose no burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Amex consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Amex.

Exhibit A—American Stock Exchange, Inc.

Proposed Rule Change

Next Day Comparison of Exchange Transactions Rule 719. (a) Notwithstanding any other rule to the contrary, on and after [date], each transaction effected on the Exchange shall be compared or otherwise closed out by the close of business on the Exchange on the business day following the day of the contract.

(b) The provisions of paragraph (a) above shall apply regardless of whether the transaction has been submitted to the National Securities Clearing Corporation ("NSCC") for comparison or settlement, but such provisions shall apply only to contracts for "regular way" settlement in stocks, rights and warrants unless (i) the Exchange determines to apply the provisions to contracts in other securities or contracts for other settlement terms or (ii) the terms of the contract (i.e., "next day settlement") require comparison to be effected on or before the business day following the day of the contract.

(c) To facilitate next day comparison of transactions effected on the Exchange as provide for in paragraph (a) above, by such time following any such transaction as the Exchange may prescribe, each member or member organization which is a party to the contract shall submit, or cause to be submitted, such trade data as may be required by the Exchange or the NSCC in such form as the Exchange or the NSCC shall prescribe, to:

(i) The NSCC; or

(ii) Such facility as the Exchange may develop and implement to facilitate comparison of transactions effected on the Exchange; and,

(iii) In the case where the NSCC will not be used to compare or setttle the transactions, to the party or parties on the other side of the trade.

(d) Members and member organizations shall comply with such other rules and procedures as may be adopted by the Exchange or the NSCC for the comparison or settlement of transactions, for the resolution of uncompared or questioned trades, and for the collection and submission of audit trail data.

All submissions should refer to File No. SR–Amex–89–5 and should be submitted by May 17, 1989.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[34–26740; MCC–89–01]

Self-Regulatory Organizations; Proposed Rule Change by Midwest Clearing Corporation Relating to the Acceleration of the Processing of Over-the-Counter ("OTC") Trades

April 18, 1989.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on April 4, 1989, the Midwest Clearing Corporation filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

This filing is a proposed rule change by Midwest Clearing Corporation ("MCC") which accelerates the processing of Over-the-Counter ("OTC") trades.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B) and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule

VOL 54 ISS 79 AP 26 1989 UMI

change is to accelerate by one business day the processing of OTC trades. The enhancement will also provide for the accommodation of the Automated Confirmation Transaction System (ACT) currently under development with the National Association of Securities Dealers ("NASD").

The OTC acceleration is expected to significantly reduce Participant exposure on potential problem trades by accelerating the trade resolution and reporting process by approximately one day. In addition, acceleration of such trade resolution will better enable Participants to reduce potential financial exposure.

Currently, Participants are generally required to submit OTC trade data to MCC (input) by 3:00 p.m. on the next business day following trade date (T+1). Trade reports (output) reflecting trade data submitted by the Participants and the results of the comparison process are reported by MCC generally by 7:00 a.m. on T+2. (The required cut-off time for submission of trade input is dependent upon the particular method of input, e.g., manual submission, magnetic tape, terminal, etc.)

Under the proposed new procedures, Participants must generally submit trade data by 4:45 p.m. (CST) (manual submission) on Trade Date for comparison and clearance on Settlement Date (Trades submitted on T+1 or later must be submitted as "As-of" trades). MCC will report trade data to Participants by 7:00 a.m. on the morning of T+1. Participants may submit adjustments until 3:00 p.m. on T+1. MCC will issue corresponding output by 7:00 a.m. on T+2.

Finally, the revised procedures accommodate NASD's ACT System (ACT will lock-in transactions as close as possible to the time of trade execution). All ACT locked-in trades will be identified with the acronym "ACT". All ACT trades will be reported to Participants in the form of T+1 Locked-In Contracts by 7:00 a.m. of T+1.

The proposed rule change is consistent with the Securities Exchange Act of 1934 (the "Act") in that it facilitates the prompt and accurate clearance and settlement of securities transactions by a SEC-registered clearing corporation.

(B) Self-Regulatory Organization's Statement on Burden on Competition

MCC does not believe that any burdens will be placed on competition as a result of the proposed rule change.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Participants were advised of the proposed rule change in an Administrative Bulletin dated February 15, 1989. No comments have been received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-referenced self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by May 17, 1989.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[34-26744; MSTC-89-01]

Self-Regulatory Organizations; Proposed Rule Change by Midwest Securities Trust Company Relating to a New Limited Category of Participation

April 18, 1989.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s (b)(1), notice is hereby given that on April 11, 1989, the Midwest Securities Trust Company filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Midwest Securities Trust Company's ("MSTC") proposal establishes a new limited participant category.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B) and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

During the past several months, management of MSTC has accelerated its efforts to enhance and improve efficiencies in the reconciliation process of Regional Interface Organization ("RIO") or "flipped" trades. ("Flipped" trades are those that are submitted or otherwise "flipped" for ultimate settlement from MSTC to another clearing agency whose clearance and settlement facilities are linked with MSTC). To facilitate this process, MSTC has established a new limited category of MSTC Participant entitled "RIO Participants.".

As proposed in the rule change, a RIO Participant's sole purpose for membership in MSTC is the facilitation of settlement at another clearing agency through RIO. A RIO Participant will not be required to accept book-entry deliveries from another Participant, unless expressly authorized by the RIO Participant or unless such delivery is required by MSTC because, among other things, settlement can not occur at another clearing agency (for example, the security is non-RIO eligible or the other clearing agency ceases to act for the RIO Participant prior to settlement at such clearing agency).

In all other respects, RIO Participants will be subject to MSTC's normal rules and procedures, including those relating to MSTC Article V (Participants) and Article VI (Property Held for Participants).

MSTC believes that the proposed rule change is consistent with the purposes and requirement's of section 17A of the Securities Exchange Act of 1934, as amended, in that it provides for the efficient, prompt and accurate settlement of securities transactions through linked clearing agencies.

(B) Self-Regulatory Organization's Statement on Burden on Competition

MSTC does not believe that any burdens will be placed on competition as a result of the proposed rule change.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Comments have not generally been solicited or received regarding the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities & Exchange Commission, 450 Fifth Street NW. Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-referenced self-regulatory organization. All submissions should refer to SR-MSTC-89-01 and should be submitted by May 17, 1989.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 89-9916 Filed 4-25-89; 8:45 am]

BILLING CODE 8010-01-M

[34-26739; NASD-89-21]

Self-Regulatory Organizations; Notice of Filing and Order Granting Temporary Accelerated Approval to Proposed Rule Change by National Association of Securities Dealers Relating to Limit Order Capabilities for the Association's Small Order Execution System

April 18, 1989.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on April 14, 1989, the National Association of Securities Dealers, Inc. ("NASD") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Item I, II, and III below, which Items have been prepared by the NASD. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change would extend until September 30, 1989 the Securities and Exchange Commission's temporary approval of the limit order capabilities of the Association's Small Order Execution System which were approved for a ninety day period on January 19, 1989.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in section (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of this filing is to extend the Commission's temporary approval of the SOES limit order system until September 30, 1989. This extension will allow the NASD to continue to monitor utilization of the system and will provide an opportunity for the NASD to address concerns as to the operation of the system raised by the Commission in the temporary approval order.[1] To date, the system has been functioning as anticipated. As of March 20, 1989, the NASD completed the phase in of all securities and the system is currently carrying approximately 680 open limit orders. The NASD has experienced no system related problems and no capacity problems during the implementation phase of the SOES limit order file.

The statutory basis for the further development and implementation of SOES is found in section 11A(a)(1)(B) and (C)(i), 15A(b)(6) and 17A(a)(1)(B) and (C) of the Securities Exchange Act of 1934. Section 11A(a)(1)(B) and (C)(i) set forth the Congressional goal of achieving more efficient and effective market operations and the economically efficient execution of transaction through new data processing and communication techniques. Section 15A(b)(6) requires that the rules of the Association be designed to "foster cooperation and coordination with persons engaged in regulations, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market". Section 17A(a)(1)(B) and (C) set forth the Congressional goal of reducing costs involved in the clearance

[1] *See* Securities Exchange Act Release No. 26476 (1/19/89); 54 FR 3081 (1/26/89).

BEST COPY AVAILABLE

VOL. 54 ISS 79 AP 26 1989 UMI

and settlement process through new data processing and communication techniques. The NASD believes that the modifications to SOES will further these ends by providing enhanced mechanisms for the efficient and economic execution and clearance of limit orders in over-the-counter securities.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Association does not anticipate that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

Comments were neither solicited nor received with respect to the proposed rule changes contained in this filing.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The NASD has requested that the Commission find good cause pursuant to section 19(b)(2) of the Act for approving the proposed rule change on a temporary basis prior to the thirtieth day after publication in the **Federal Register** and in any event before April 19, 1989 the date the Commission's temporary approval of the Limit Order File expires. The Association believes that the enhancement to the SOES system is benefitting members and their public customers by providing an automated method of processing limit orders for all SOES participants. The NASD believes that the extension will provide the NASD with the opportunity to consider concerns relating to matching of orders at prices between the spread which were raised in the Commission's temporary approval order.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the NASD, and, in particular, the requirements of sections 11A(a)(1)(B), 15A(b)(5) and 17A(a)(1)(B) and (C) and the rules and regulations thereunder. The Commission finds good cause for approving the proposed rule change prior to the 30th day after the date of publication of notice of the filing thereof in that accelerated approval will benefit public investors by continuing to provide limit order storage and execution capabilities which can result in more efficient handling of customer orders. The Commission believes that the benefit of extending of the temporary rule change until September 30, 1989 outweigh any potential adverse effects during the period of the rule change's effectiveness.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submission should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Steet, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communication relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by May 17, 1989.

It is therefore ordered. Pursuant to section 19(b)(2) of the Act, that the proposed rule change, SR–NASD–89–21, be, and hereby is, approved until September 30, 1989. For the Commission, by the Division of Market Regulation, pursuant to delegate authority, 17 CFR 200.30–3(a)(12).

Jonathan G. Katz

Secretary.

[FR Doc. 89-9917 Filed 4-25-89; 8:45 am]

BILLING CODE 8010-01-M

[Rel. No. 34-26736; File No. SR-NSCC-89-04]

Self-Regulatory Organizations; Notice of Proposed Rule Change by National Securities Clearing Corporation Relating to Acceleration of Trade Comparison Process

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on March 31, 1989, NSCC filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by NSCC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change.

The proposed rule change would amend NSCC's Rules and Procedures.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NSCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. NSCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(a) The primary purpose of the proposed rule change is to redesign the Listed Equity Comparison System to accelerate the comparison process, thus allowing Members to resolve uncompared trades earlier. This change is being made in conjunction with the New York Stock Exchange and American Stock Exchange's proposed automated correction systems and proposed T+1 close out rules.

The T+1 close out rules, as set forth in NYSE proposed rule filing 88–36 and AMEX rule filing 89–5, require that transactions effected on these exchanges be compared or otherwise closed out within one business day from the date of trade, rather than within five business days. NSCC and the exchanges' purpose for this accelerated comparison is to increase the efficiency of post trade comparison and reduce the risk of loss due to market fluctuations on uncompared trades.

As part of this change, the exchanges have developed their own automated correction systems (see NYSE 89–03) which will eliminate the need for the adjustment processing currently performed by NSCC. Exchange Members will be required to input trade adjustments through these systems.

Under NSCC's proposed rule change, Members will be required to input trade data by 2:00 a.m. on T+1 rather than the afternoon of T+1. Members may also input data throughout the trading day. Members will be able to delete, through NSCC, uncompared transactions prior to 2:00 a.m. on T+1. As data is received, NSCC will perform a series of matches using expanded audit trail data, the results of which will be reflected on the Regular Way T+1 Contract List, available by 4:00 a.m. the morning of T+1 for automated output and 7:00 a.m. for print output. NSCC will route the results of the comparison process to the exchanges, where resolution of uncompared trades will occur. The NYSE and AMEX will transmit to NSCC by 5:00 p.m. on T+1, the results of their adjustment processing. These results will be reflected by NSCC on Adjustment Contracts, available to Members by 8:00 p.m. on the evening of T+1.

While it is expected that the exchanges will be able to perform all adjustments once acceleration of input and comparison occurs, NSCC will retain the ability, in the event that the automated adjustment systems are not ready, to process, under accelerated time frames, Advisory Listings, deletes of suggested name, As-Of trades, and will also continue to generate as necessary, pre-printed QT's and DK's. (NSCC may still generate DK's and QT's upon request even after the exchanges' systems are in place.)

Currently, the procedures for comparison of equity and debt transactions executed OTC, as well as debt transactions executed on the NYSE and AMEX, refer to the procedures for comparison of listed equities. The proposed rule change modifies these sections to reflect the fact that the procedures for input, comparison, adjustment and output for each of these transactions are, due to acceleration and redesign of the listed system, different from the listed equity procedures. The proposed rule change also makes certain technical clarifications. The NYSE and AMEX anticipate implementing their automated adjustment processing by June 30, 1989. Due to the interrelationship of NSCC's listed redesign and the exchange correction processing, NSCC's acceleration of input and comparison must coincide with the implementation of the exchanges' correction systems.

(b) The proposed rule change promotes the prompt and accurate clearance and settlement of securities transactions and fosters the cooperation and coordination with persons engaged in the clearance and settlement of securities transactions. Therefore, it is consistent with the requirements of the Securities Exchange Act of 1934 (the "Act") and the rules and regulations thereunder applicable to NSCC.

B. Self-Regulatory Organization's Statement on Burden on Competition

NSCC does not perceive that the proposed rule change will have an impact on or impose a burden on competition.

c. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

Members have been advised by Important Notices dated August 19, 1988 (which includes NSCC notice and NYSE notice) February 23, 1989, March 8, 1989 and March 22, 1989. No written comments have been received. NSCC will notify the Commission of any written comments received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and published its reason for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be approved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, and all written communications relating to the proposed rule change that are filed with Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to File No. SR–NSCC–89–04 and should be submitted May 17, 1989.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Dated: April 17, 1989.

BILLING CODE 8010-01-M

[34-26742; NSCC-89-04]

Self-Regulatory Organizations; Notice of Proposed Rule Change by National Securities Clearing Corporation Relating to Acceleration of the Trade Comparison Process

April 18, 1989.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on March 31, 1989, NSCC filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by NSCC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change would amend NSCC's Rules and Procedures.

II. Self-Regulatory Organization's Statement of, the Purpose of and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NSCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. NSCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of and Statutory Basis for, the Proposed Rule Change.

(a) The primary purpose of the proposed rule change is to redesign the Listed Equity Comparison System to accelerate the comparison process, thus allowing Members to resolve uncompared trades earlier. This change is being made in conjunction with the New York Stock Exchange and American Stock Exchange's proposed

VOL 54 ISS 79 AP 26 1989 UMI

automated correction systems and proposed T+1 close out rules.

The T+1 close out rules, as set forth in NYSE proposed rule filing 88-36 and AMEX rule filing 89-5, require that transactions effected on these exchanges be compared or otherwise closed out within one business day from the date of trade, rather than within five business days. NSCC and the exchanges' purpose for this accelerated comparison is to increase the efficiency of post trade comparsion and reduce the risk of loss due to market fluctuations on uncompared trades.

As part of this change, the exchanges have developed their own automated correction systems (see NYSE 89-03) which will eliminate the need for the adjustment processing currently performed by NSCC. Exchange Members will be required to input trade adjustments through these systems.

Under NSCC's proposed rule change, Members will be required to input trade data by 2:00 a.m. on T+1 rather than the afternoon of T+1. Members may also input data throughout the trading day. Members will be able to delete, through NSCC, uncompared transactions prior to 2:00 a.m. on T+1. As data is received, NSCC will perform a series of matches using expanded audit trail data, the results of which will be reflected on the Regular Way T+1 Contract List, available by 4:00 a.m. the morning of T+1 for automated output and 7:00 a.m. for print output. NSCC will route the results of the comparison process to the exchanges, where resolution of uncompared trades will occur. The NYSE and AMEX will transmit to NSCC by 5:00 p.m. on T+1, the results of their adjustment processing. These results will be reflected by NSCC on Adjustment Contracts, available to Members by 8:00 p.m. on the evening of T+1.

While it is expected that the exchanges will be able to perform all adjustments once acceleration of input and comparison occurs, NSCC will retain the ability, in the event that the automated adjustment systems are not ready, to process, under accelerated time frames, Advisory Listings, deletes of suggested name, As-Of trades, and will also continue to generate as necessary, pre-printed QT's and DK's. (NSCC may still generate DK's and QT's upon request even after the exchanges' systems are in place.)

Currently, the procedures for comparison of equity and debt transactions executed OTC, as well as debt transactions executed on the NYSE and AMEX, refer to the procedures for comparison of listed equities. The proposed rule change modifies these sections to reflect the fact that the procedures for input, comparison, adjustment and output for each of these transactions are, due to acceleration and redesign of the listed system, different from the listed equity procedures. The proposed rule change also makes certain technical clarifications. The NYSE and AMEX anticipate implementing their automated adjustment processing by June 30, 1989. Due to the interrelationship of NSCC's listed redesign and the exchange correction processing, NSCC's acceleration of input and comparison must coincide with the implementation of the exchanges' correction systems.

(b) The proposed rule change promotes the prompt and accurate clearance and settlement of securities transactions and fosters the cooperation and coordination with persons engaged in the clearance and settlement of securities transactions. Therefore, it is consistent with the requirements of the Securities Exchange Act of 1934 (the "Act") and the rules and regulations thereunder applicable to NSCC.

B. Self-Regulatory Organization's Statement on Burden on Competition

NSCC does not perceive that the proposed rule change will have an impact on or impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

Members have been advised by Important Notices dated August 19, 1988 (which includes NSCC notice and NYSE notice) February 23, 1989, March 8, 1989 and March 22, 1989. No written comments have been received. NSCC will notify the Commission of any written comments received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and published its reason for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be approved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, and all written communications relating to the proposed rule change that are filed with Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5. U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to File No. SR-NSCC-89-04 and should be submitted by May 17, 1989.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,
Secretary.

BILLING CODE 8010-01-M

[Rel. No. 34-26738; File No. SR-PSE-88-26]

Self-Regulatory Organizations; Pacific Stock Exchange, Inc.; Order Approving Proposed Rule Change Relating to Adoption of a Rule Concerning the Authority of the PSE's Examination's Department

On November 23, 1988, the Pacific Stock Exchange, Inc. ("PSE" or "Exchange") filed with the Commission, pursuant to Section 19(b) of the Securities and Exchange Act of 1934 ("Act") and Rule 19b-4 thereunder,[1] a proposed rule change that would clarify the PSE's authority to examine the financial responsibility and/or operational conditions of any member or member organization.[2] The proposal gives the PSE specific authority to require compliance by its members with Exchange requests for information in connection with those examinations.

[1] 15 U.S.C. 78s(b) and 17 CFR 240.19b-4 (1988).

[2] The proposed rule change was noticed in Securities and Exchange Act Release No. 26379, December 20, 1988, 53 FR 52540. No comments were received on the proposed rule change.

The proposed rule change would amend PSE Rule VII, Section 7, by adding paragraph (C). Proposed paragraph (C) states that the PSE shall have the authority to examine the financial responsibility and/or operational conditions of any member or member organization. In conducting such examinations, the proposed rule provides that the PSE may require a member or member organization to furnish requested information. In addition, under the proposed rule if the PSE deems it necessary, members shall make available their books and records as well as provide sworn or unsworn testimony. The proposal also states that all such investigations shall be conducted in a manner consistent with the rules and regulations governing the duty of the Exchange.

The Commission has closely examined the provisions of the proposed rule change and has determined that it is consistent with the requirements of the Act and, accordingly, that it should be approved. In particular, the Commission believes that the proposal is consistent with the requirements under section 6(b)(1) of the Act which provides that an exchange must be so organized and have the capacity to enforce compliance by its members, and persons associated with its members, with the provisions of the Act, the rules and regulations thereunder, and the rules of the exchange, and with section 19(g)(1) of the Act which requires that every exchange shall, absent reasonable justification or excuse, enforce compliance with such provisions by its members and persons associated with its members.

As noted above, the proposed rule change will clarify the authority of the PSE to examine the financial responsibility and/or operational conditions of members or member organizations. In particular, it provides the Exchange with specific authority to require members, where necessary, to comply with requests for books and records, and to provide testimony. The authority of the PSE, under the proposed rule, to require a member to provide requested information, make available books and records, and provide sworn or unsworn testimony, is like the examinations authority of other exchanges, such as the New York Stock Exchange ("NYSE") and the Chicago Board Options Exchange ("CBOE"). For example, NYSE Rule 476 provides that if a member is found to have failed to comply with a request from the NYSE or other self-regulatory organization for books and records, or to furnish information, or to provide testimony, the member will be subject to disciplinary sanctions. CBOE Rule 15.3 provides that no member shall refuse to make available to the CBOE such books, records or other information as may be called for under the rules or as may be requested in connection with an investigation by the CBOE. Similarly, CBOE Rule 17.2(b) provides that no member or person associated with a member shall refuse to furnish testimony, documentary materials or other information requested by the CBOE during the course of an investigation. The Commission believes that the proposed rule furthers the objectives of sections 6(b)(1) and 19(g)(1) of the Act in that it will strengthen the PSE's ability to execute its responsibilities to ensure compliance by its members and their associated persons with the Act, the regulations thereunder, and PSE rules.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: April 17, 1989.

Jonathan G. Katz,
Secretary.

[Rel. No. IC-16929; 811-3579]

Oxford Cash Management Fund; Application for Deregistration

April 19, 1989.

AGENCY: Securities and Exchange Commission ("SEC")

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 (the "1940 Act").

Applicant: Oxford Cash Management Fund ("Applicant").

Relevant 1940 Act Section: Section 8(f).

Summary of Applications: Applicant seeks an order declaring that it has ceased to be an investment company under the 1940 Act.

Filing Dates: The application on Form N-8F was filed on February 13, 1989.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m. on May 12, 1989. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESS: Secretary, SEC, 450 5th Street, NW., Washington, DC. 20549. Applicant, 200 Park Avenue, Suite 4515, New York, New York, 10017.

FOR FURTHER INFORMATION CONTACT: Patricia L. Copeland, Legal Technician (202) 272-3009, or Stephanie M. Monaco, Branch Chief (202) 272-3030 (Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier (800) 231-3281 (in Maryland (301) 258-4300).

Applicant's Representations

1. Applicant is an open-end diversified management company organized as a Massachusetts business trust and in good standing with the Commonwealth of Massachusetts. Apicant registered as an investment company under the 1940 Act and filed a registration statement under the Securities Act of 1933 on October 7, 1982. Applicant's registration statement became effective on February 14, 1983, and the initial public offering commended on that date.

2. On December 13, 1988, Applicant's Board of Directors adopted a plan of liquidation. All shareholders of the Applicant redeemed their entire investments at net asset value prior to the adoption of a plan of dissolution. Disposition of the assets of Applicants was made upon maturity of short-term investments in connection with the redemption by shareholders prior to liqudation.

3. Applicant's Sub-Adviser and Administrator, Aquila Management Corporation, will pay all expenses incurred in connection with the liquidation.

4. Applicant states that it currently has no shareholders, has retained no assets, and does not propose to engage in any business activities, other than those necessary for the winding up of its affairs.

BILLING CODE 8010-01-M

[Rel. No. IC-16936; 812-7208]

The Rodney Square International Securities Fund, Inc., et al.; Application

April 20, 1989.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 ("1940 Act").

Applicants: The Rodney Square International Securities Fund, Inc. ("Fund"), Wilmington Trust Company ("TrustCo"), and Edinburgh Fund Managers, plc ("Edinburgh") (collectively, "Applicants").

Relevant 1940 Act Sections: Exemption requested under section 6(c) from the provisions of section 15(a).

Summary of Application: Applicants seek an order to permit Edinburgh to receive retroactively its advisory fee for services rendered to the Fund under an interim advisory agreement from January 11, 1989, the date the Fund's Board of Directors approved the agreement in person, until March 1, 1989, the date the Fund shareholders ratified the agreement.

Filing Dates: This application was filed on December 30, 1988, and amended on March 10, 1989, and April 11, 1989.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on May 15, 1989. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. The Fund and TrustCo, Rodney Square North, Wilmington, Delaware 19890. Edinburgh, 4 Melville Crescent, Edinburgh, Scotland, EH3 7JB.

FOR FURTHER INFORMATION CONTACT: Victor R. Siclari, Staff Attorney, at (202) 272-3028 or Stephanie M. Monaco, Branch Chief, at (202) 272-3030 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier which can be contacted at (800) 231-3282 (in Maryland (301) 258-4300).

Applicants' Representations

1. The Fund, registered under the 1940 Act as an open-end, diversified management investment company, currently consists of one series, the Rodney Square International Equity Fund ("Equity Series"). TrustCo is the Fund's investment adviser and is primarily responsible for investing the Fund's assets. Edinburgh, a registered investment adviser, was organized in 1969 and provides investment management services to a variety of individual and institutional clients.

2. On October 9, 1987, Applicants entered into a consulting agreement ("Former Agreement") whereby Edinburgh would recommend to TrustCo the purchase and sale of securities for the Equity Series, and would place orders for the execution of portfolio transactions. Consistent with section 15(a)(4) of the 1940 Act, the Former Agreement provided for its automatic termination upon its "assignment," as defined in the 1940 Act.

3. On December 8, 1988, Edinburgh announced an agreement with British Investment Trust PLC ("BIT") under which BIT would acquire no less than 50.1 percent but no more than a 55 percent equity interest in Edinburgh. In addition, the boards of directors of Edinburgh and BIT announced an agreement to terms for a cash offer by BIT for all of the common shares of Edinburgh. BIT agreed to grant to Edinburgh its contracts relating to management of approximately 600 million pounds in assets. On December 30, 1988, BIT acquired a controlling interest in Edinburgh, the Former Agreement automatically terminated, and Applicants filed this application.

4. At a telephonic meeting held on December 19, 1988, the Fund's Board of Directors unanimously approved an Interim Consulting Agreement ("Interim Agreement") between and among the Fund, TrustCo, and Edinburgh. On January 11, 1989, the Fund's Board of Directors unanimously approved the Interim Agreement in person. On March 1, 1989, sixty days after the Former Agreement terminated, shareholders of the Equity Series ratified the Interim Agreement and approved a new consulting agreement with Edinburgh.

5. The terms of the Interim Agreement were identical to those of the Former Agreement except that, under the Interim Agreement, Edinburgh agreed to bear all costs and fees associated with the preparation and filing of the exemptive application up to the amount of fees it was to receive under the Interim Agreement. Now, Edinburgh has agreed to bear, without limitation, all costs and expenses of the application and any incremental costs incurred by the Fund in securing shareholder approval of the Interim Agreement.

6. All fees earned by Edinburgh under the Interim Agreement have been placed into escrow to be released to Edinburgh only upon ratification of the Interim Agreement by Fund shareholders and issuance of an order by the SEC on the application. Thus, if an order is not granted, all funds in escrow will revert immediately to the Fund and Edinburgh will relinquish all claims to those fees.

Applicants' Legal Conclusions

The requested order is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act for the following reasons.

1. Although Applicants cannot rely on the limited exemption provided by Rule 15a-4 under the 1940 Act, Applicants claim the concerns of section 15(a) and Rule 15a-4 of preventing trafficking in investment advisory contracts are not present here because Edinburgh's income from its services to the Fund accounted for less than five percent of its management fees prior to its acquisition by BIT, and even less thereafter.

2. Applicants submit that the Interim Agreement is identical in all material respects to the Former Agreement, except for the modifications concerning payment of fees into escrow and Edinburgh's obligations to pay expenses associated with this application. During the period of the Interim Agreement, the Fund received the same investment advisory services, provided in the same manner by the same personnel, as it received prior to the sale of Edinburgh. The change of control of Edinburgh did not result in any change in the officers or employees of Edinburgh, except insofar as its capital and advisory staff may be augmented under the new arrangements. Therefore, according to the Applicants, any consequence to the Fund from the change of control of Edinburgh will be beneficial, since additional personnel and financial resources are likely to be devoted to, or available for the benefit of, the Fund.

3. Applicants state that the Fund's Board of Directors unanimously approved the Interim Agreement in person. Also, the Fund's Board of Directors unanimously determined that retention of Edinburgh as an interim investment adviser, together with the personnel to be retained by Edinburgh, is in the best interest of the Equity Series and its shareholders.

4. Applicants argue that it was not possible for the Equity Series to obtain shareholder approval of a new consulting agreement prior to the sale of Edinburgh. The timing of the sale transaction was governed largely by considerations pertinent to BIT. Edinburgh's negotiations with BIT occurred over a very brief time period and required a high degree of confidentiality. In view of British secrecy laws, the parties to the transaction did not consider it appropriate to give the Fund or Trust Company notice of the negotiations at an early stage.

5. Applicants believe that, due to the escrow arrangement, the Fund shareholders will enjoy the full benefit of the protections afforded by section 15(a) and are not likely to suffer any detriment under the Interim Agreement. However, Applicants state that denial of the requested order would inequitably deprive Edinburgh of its just earnings for a period when it served the Fund with its same high degree of diligence.

Applicants' Conditions

If the requested order is granted, Applicants agree to the following conditions:

1. The Interim Agreement contains the same terms and conditions as the Former Agreement and the new agreement, except for the escrow arrangement and Edinburgh's agreement to bear certain expenses, as described herein.

2. Under the Interim Agreement, all fees payable to Edinburgh during the interim period have been held in escrow and will be paid to Edinburgh only upon the issuance of an order of the SEC granting an exemption from Section 15(a). If that condition is not met, the monies in the escrow account will revert to the Equity Series.

3. Edinburgh has agreed to bear without limitation all costs and expenses of the application and any incremental costs incurred by the Fund in securing shareholder approval of the Interim Agreement.

4. Applicants scheduled and have now held a meeting of the shareholders of the Equity Series on March 1, 1989, or sixty days after the termination of the Former Agreement, at which the shareholders approved the Interim Agreement as well as a new consulting agreement with Edinburgh.

5. The fund will not compensate Edinburgh for its services from December 30, 1988, the date the Former Consulting Agreement was assigned, to January 11, 1989.

For the Commission, by the Division of Investment Management, under delegated authority.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 89-9969 Filed 4-25-89; 8:45 am]

BILLING CODE 8010-01-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement; Virginia and Maryland

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that a Tier 1 environmental impact statement will be prepared for a proposed highway project bypassing Washington, DC in Stafford, Fauquier, Prince William, Fairfax, Loudoun, Caroline and King George Counties, Virginia and Charles, Prince Georges, Anne Arundel, Montgomery, Howard and Frederick Counties, Maryland.

FOR FURTHER INFORMATION CONTACT:

In Maryland:

Mr. Herman Rodrigo, Planning, Research, Environmental and Safety Engineer, Federal Highway Administration, The Rotunda—Suite 220, 711 West 40th Street, Baltimore, Maryland 21211, Telephone: (301) 962-4267

or

Mr. Louis H. Ege, Jr., Chief, Project Development Division, State Highway Administration, Room 310, 707 North Calvert Street, Baltimore, Maryland 21202, Telephone: (301) 333-1130

In Virginia:

Mr. George Kirk, District Engineer, Federal Highway Administration, 400 N. Eighth Street, Richmond, Virginia 23240, Telephone: (804) 771-2380

or

Mr. Richard C. Lockwood Transportation Planning Engineer, Virginia Department of Transportation, 1401 E. Broad St., Annex 107, Richmond, Virginia 23219, Telephone: (804) 786-2964

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Maryland State Highway Administration (SHA) and the Virginia Department of Transportation (VDOT) will prepare a first tier Environmental Impact Statement (EIS) to evaluate alternative corridors in which a limited access, high speed bypass of the Washington, DC, metropolitan area is proposed. Potential corridors will be studied for an eastern bypass, a western bypass, and combinations of both. Length of the proposed corridors will vary between 60-120 miles.

Alternatives under consideration for the Washington Bypass project include (1) do-nothing (including transportation system management (TSM) improvements to existing highways in the study area and mass transit options) (2) western corridors beginning at I-95 in Stafford County or Prince William County Virginia and continuing north across the Potomac River north of Washington, DC into Maryland, ending at I-70, either south of Frederick or near Mt. Airy, (3) eastern corridors beginning at I-95 in Caroline County or Prince William County Virginia, crossing the Potomac River south of Washington DC into Maryland and continuing generally along existing U.S. 301 to U.S. 50 in Anne Arundel County, then along MD 3/I-97 Corridor to I-695, the Baltimore Beltway. At U.S. 50 one eastern corridor alternative would include a spur along U.S. 50 to the Bay Bridge.

Because of the rapid rate of development in the metropolitan area, the project location should be established in a timely manner. The development of the traditional environmental impact study (as known in the highway community) for a facility of this scale, would be a lengthy process and would result in a voluminous and unwieldy environmental impact statement. Consequently, the FHWA after consultation with the Council on Environmental Quality, is using a tiered EIS concept to focus on issues which are ripe for decision at this time. The first tier document will examine alternative corridors on a broad scale. The first tier EIS will consider the purpose, need and transportation demand for the project and will provide the basis for FHWA to grant corridor location approval for either or both corridors. However, the approved corridor could vary from a narrow band in some specific areas to a wider, more flexible band in other areas. Upon conclusion of this document, the

VOL 54 ISS 79 AP 26 1989 UMI

alternatives analyses would be completed and would provide a basis for acquiring or otherwise reserving right-of-way. This approach will benefit the public by avoiding project delays as well as benefit the affected environment and the local communities by minimizing impacts. The first tier EIS will also establish the process for examining the subsequent site-specific impacts and proposed mitigation in more detail. Second tier documents would be prepared for individual project sections. Depending on the magnitude of impacts, the second tier document could be either a second EIS or an environmental assessment.

The basis for establishing the cooridors will be existing information regarding land use, traffic, social and environmental factors and engineering features as well as the location of major public facilities. Typical data being collected to assess the impacts of the proposed corridors includes but is not limited to the following: socia-economic, land use, cultural resources, parkland, wetlands, water quality, traffic paterns, farmland, business and residential relocations, endangered species and hazardous waste sites.

Letters describing the proposed action and soliciting comments will be sent to appropriate federal, state and local agencies, and to private organizations and citizens who express interest in the proposal. The tiered EIS concept has been discussed with many Federal agencies, and a scoping meeting was held with the concerned Federal agencies on February 27, 1989. Public meetings began in September 1988 and will continue throughout the study process. Public notices of the time and place of these meetings and required public hearings will be provided. The draft EIS will be available for public and agency review and comment prior to the public hearings. Public involvement and inter-agency coordination will be maintained throughout the development of the EIS.

To insure that the full range of issues related to this proposed action are addressed and that all significant issues are identified, comments or questions concerning this action and the EIS should be directed to FHWA or the State at the addresses provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Issued on: April 19, 1989.

A. Porter Barrows,

Division, Administrator, Baltimore, Maryland.

BILLING CODE 4910-22-M

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to the Office of Management and Budget for Review

Date: April 20, 1989.

The Department of Treasury has submitted the following public information collection requirement(s) to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue, NW., Washington, DC 20220.

Internal Revenue Service

OMB Number: 1545-0982.

Form Number: None.

Type of Review: Extension.

Title: Safeguard Procedures and Safeguard Activities Reports.

Description: Internal Revenue Code section 6103(p) requires that IRS provide periodic reports to Congress describing safeguard procedures, utilized by agencies which receive information from IRS, to protect the confidentiality of the information. This section also requires that these agencies furnish reports to IRS describing their safeguards.

Respondents: State or local governments, Businesses or other for-profit, Federal agencies or employees, Non-profit institutions.

Estimated Number of Respondents: 5,100.

Estimated Burdens Hours Per Response: 5 hours.

Frequency of Response: Annually.

Estimated Total Reporting Burden: 25,5000 hours.

Clearance Officer: Garrick Shear (202) 535-4297, Internal Revenue Service, Room 5571, 1111 Constitution Avenue NW., Washington, DC 20224.

Public Information Collection Requirements Submitted to the Office of Management and Budget for Review

Date: April 20, 1989.

The Department of Treasury has submitted the following public information collection requirement(s) to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue NW., Washington, DC 20220.

Comptroller of the Currency

OMB Number: 1557-0142.

Form Number: None.

Type of Review: Extension.

Title: Recordkeeping and Confirmation Requirements for Security Transactions.

Description: Requirement provides record of information relevant to purchase or sale of security by national bank or national bank trust department for a customer.

Respondents: Businesses or other for-profit, Small businesses or organizations.

Estimated Number of Recordkeepers: 4,714.

Estimated Burden Hours Per Recordkeeper: 5 hours.

Frequency of Response: Recordkeeping.

Estimated Total Reporting Burden: 165,001 hours.

Clearance Officer: John Ference (202) 447-1177, Comptroller of the Currency, 5th Floor, L'Enfant Plaza, Washington, DC 20219.

OMB Reviewer: Gary Waxman (202) 395-7340, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports Management Officer.

BILLING CODE 4810-25-M

Office of the Secretary

[Department Circular—Public Debt Series—No. 11-89]

Treasury Notes of April 30, 1991, Series Y-1991

Washington, April 20, 1989.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $9,250,000,000 of United States securities, designated Treasury Notes of April 30, 1991, Series Y-1991 (CUSIP No. 912827 XL 1), hereafter referred to as Notes. The Notes will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the yield of each accepted bid. The interest rate on the Notes and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of the Notes may be issued to Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts of the Notes may also be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1 The Notes will be dated May 1, 1989, and will accrue interest from that date, payable on a semiannual basis on October 31, 1989, and each subsequent 6 months on April 30 and October 31 through the date that the principal becomes payable. They will mature April 30, 1991, and will not be subject to call for redemption prior to maturity. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next business day.

2.2. The Notes are subject to all taxes imposed under the Internal Revenue Code of 1954. The Notes are exempt from all taxation now or hereafter imposed on the obligation or interest thereof by any State, any possession of the United States, or any local taxing authority, except as provided in 31 U.S.C. 3124.

2.3. The Notes will be acceptable to secure deposits of Federal public monies. They will not be acceptable in payment of Federal taxes.

2.4. The Notes will be issued only in book-entry form in denominations of $5,000, $10,000, $100,000, and $1,000,000, and in multiples of those amounts. They will not be issued in registered definitive or in bearer form.

2.5. The Department of the Treasury's general regulations governing United States securities, i.e., Department of the Treasury Circular No. 300, current revision (31 CFR Part 306), as to the extent applicable to marketable securities issued in book-entry form, and the regulations governing book-entry Treasury Bonds, Notes, and Bills, as adopted and published as a final rule to govern securities held in the TREASURY DIRECT Book-Entry Securities System in 51 FR 18260, *et seq.* (May 16, 1986), apply to the Notes offered in this circular.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, DC. 20239-1500, prior to 1:00 p.m., Eastern Daylight Saving time, Wednesday, April 26, 1989. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Tuesday, April 25, 1989, and received no later than Monday, May 1, 1989.

3.2. The par value of Notes bid for must be stated on each tender. The minimum bid is $5,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield.

3.3. A single bidder, as defined in Treasury's single bidder guidelines, shall not submit noncompetitive tenders totaling more than $1,000,000. A noncompetitive bidder may not have entered into an agreement, nor make an agreement to purchase or sell or otherwise dispose of any noncompetitive awards of this issue prior to the deadline for receipt of tenders.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and are on the list of reporting dealers published by the Federal Reserve Bank of New York, may submit tenders for accounts of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.5. Tenders for their own account will be received without deposit from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; and Federal Reserve Banks. Tenders from all others must be accompanied by full payment for the amount of Notes applied for, or by a guarantee from a commercial bank or a primary dealer of 5 percent of the par amount applied for.

3.6. Immediately after the deadline for receipt of tenders, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, at a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.750. That stated rate of interest will be paid on all of the Notes. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance of their bids. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price at the average yield if over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or

VOL
54
ISS
79
AP
26
1989
UMI

reject any or all tenders in whole or in part, to allot more or less than the amount of Notes specified in section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for the Notes allotted must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on Notes allotted to institutional investors and to others whose tenders are accompanied by a guarantee as provided in section 3.5. must be made or completed on or before Monday, May 1, 1989. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Thursday, April 27, 1989. In addition, Treasury Tax and Loan Note Option Depositaries may make payment for the Notes allotted for their own accounts and for accounts of customers by credit to their Treasury Tax and Loan Note Accounts on or before Monday, May 1, 1989. When payment has been submitted with the tender and the purchase price of the Notes allotted is over par, settlement for the premium must be completed timely, as specified above. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the par amount of Notes allotted shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered definitive securities tendered in payment for the Notes allotted and to be held in TREASURY DIRECT are not required to be assigned if the inscription on the registered definitive security is identical to the registration of the note being purchased. In any such case, the tender form used to place the Notes allotted in TREASURY DIRECT must be completed to show all the information required thereon, or the TREASURY DIRECT account number previously obtained.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized, as directed by the Secretary of the Treasury, to receive tenders, to make allotments, to issue such notices as may be necessary, to receive payment for, and to issue, maintain, service, and make payment on the Notes.

6.2. The Secretary of the Treasury may, at any time, supplement or amend provisions of this circular if such supplements or amendments do not adversely affect existing rights of holders of the Notes. Public announcement of such changes will be promptly provided.

6.3. The Notes issued under this circular shall be obligations of the United States, and, therefore, the faith of the United States Government is pledged to pay, in legal tender, principal and interest on the Notes.

Gerald Murphy,

Fiscal Assistant Secretary.

BILLING CODE 4810-40-M

DEPARTMENT OF VETERANS AFFAIRS

Privacy Act of 1974; Report of New Matching Program

AGENCY: Department of Veterans Affairs.

ACTION: Notice of matching program—Defense Manpower Data Center records and the Beneficiary Identification and Records Locator Subsystem of the Department of Veterans Affairs.

SUMMARY: The Defense Manpower Data Center (DMDC) will send the Department of Veterans Affairs (VA) a magnetic media file containing identifying information pertaining to U.S. armed forces personnel who were on active duty October 19, 1984. The VA will compare the DMDC file with the Beneficiary Identification and Records Location Subsystem (BIRLS). Results of the computer match will be returned to the DMDC where the data will be used to create two additional magnetic files which, in turn, will be compared with and utilized to update VA educational benefit payment systems.

The goal of this and succeeding computer matches will be to determine which veterans, on active duty October 19, 1984, may have remaining 38 U.S.C. Ch. 34 education benefit entitlement and may be able to convert remaining eligibility from this soon-to-expire program to the 38 U.S.C. Ch. 30, Montgomery G.I. Bill. These matches will also assist in determining which veterans are likely not to be eligible for the aforementioned conversion by virtue of their dates of active duty service. Final eligibility determinations, however, will be made during the adjudication of individual benefit applications.

DATES: Computer matches may commence February 1989. Additional matches of this kind are not anticipated.

ADDRESS: Interested individuals may comment on the proposed match in writing to the Director, Administrative Services Staff (203C3), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420.

FOR FURTHER INFORMATION CONTACT: Mr. Alan Behall, Chief, Administrative Systems Division (203C3), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, telehphone number (202) 233-3461/5723.

SUPPLEMENTARY INFORMATION: Further information regarding the matching program is provided below. This information is required by paragraph 5.f(1) of the Revised Supplemental Guidance for Conducting Matching Programs, issued by the Office of Management and Budget (47 FR 21656, May 19, 1982). A copy of this notice has been provided, in duplicate, to the Committee on Government Operations for the U.S. House of Representatives, to the U.S. Senate Committee on Governmental Affairs, and to the Office of Management and Budget.

Approved: April 14, 1989.

Edward J. Derwinski,

Secretary of Veterans Affairs.

Report of Matching Program

The Department of Veterans' Affairs (VA) is planning a computer match using a Defense Manpower Data Center (DMDC) magnetic media file containing information on all individuals serving on active duty in the U.S. armed forces on October 19, 1984, and the VA system of records known as the Beneficiary Identification and Records Location Subsystem (BIRLS).

a. *Authority:* Title 38, United States Code, sections 210, 1661, 1411 and 1412.

b. *Program Description*—(1) *Purpose.* To identify those veterans, serving on active duty in the U.S. armed forces on October 19, 1984, who may have remaining 38 U.S.C. Ch. 34 education entitlement and may be able to convert remaining eligibility from this soon-to-expire program to the 38 U.S.C. Ch. 30, Montgomery G.I. Bill. This process will also identify those veterans who are unlikely to be eligible for the

aforementioned conversion because of their active duty service dates. The VA will eventually use this data to update education benefit payment systems.

(2) *Procedures.* (a) The DMDC will provide a magnetic media file containing the names and other identifying information of individuals who were serving on active duty October 19, 1984. The VA will compare that file with BIRLS. The results of this computer match will be returned to the DMDC where the data will be used to create two additional magnetic files. One will contain those who may be able to have their remaining 38 U.S.C. Ch. 34 eligibility converted to chapter 30 benefits of the same title. It will also include veterans who have no matching BIRLS records as well as those having conflicting or incomplete service data. The other file will consist of veterans who appear ineligible for the aforementioned conversion because of their service dates.

(b) The two above-mentioned files will eventually be used to conduct a comparison with and to update VA education benefit payment systems.

c. *Records to be Matched.* The VA will perform a computerized matching program using the magnetic file from DMDC and the following VA system of records:

Veterans and Beneficiaries Identification and Records Location Subsystem—(VA) (38VA23).

d. *Period of Match.* Computer matches may commence February 1989. Additional matches of this kind are not anticipated.

e. *Safeguards.* Access to the BIRLS file which is located at the VA Data Processing Center, Austin, Texas, is restricted to authorized VA employees and vendors. Access to the computer room where the magnetic tape is located within the data processing center is further restricted to specifically authorized employees and is protected by an alarm system, the Federal Protective Service, and other VA security personnel. Records used in the matches and data generated as a result will be safeguarded from unauthorized disclosure. Access will be limited to those persons who have a need for the information in order to conduct the matches or follow-up actions. All of the material will be stored in locked containers when not in use. The matching files to be used in this project will remain under the control of the Veterans Benefits Administration. The matching file will be used and accessed only to match files in accordance with this notice and will not be duplicated or disseminated within or outside the VA unless authorized by the Chief Benefits Director.

f. *Retention and Disposal.* The magnetic tapes provided by DMDC will be returned to DMDC. They will be disposed of in accordance with approved authority from the Archivist of the United States.

Sunshine Act Meetings

Federal Register
Vol. 54, No. 79
Wednesday, April 26, 1989

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL RESERVE SYSTEM BOARD OF GOVERNORS

TIME AND DATE: 11:00 a.m., Monday, May 1, 1989.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204. You may call (202) 452-3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Date: April 21, 1989.

Jennifer J. Johnson,
Associate Secretary of the Board.

SECURITIES AND EXCHANGE COMMISSION

Agency Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meeting during the week of April 24, 1989.

A closed meeting will be held on Wednesday, April 26, 1989, at 2:30 p.m.

The Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendar matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A) and (10) and 17 CFR 200.402(a) (4), (8), (9)(i) and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Grundfest, as duty officer, voted to consider the items listed for the closed meeting in closed session.

The subject matter of the closed meeting scheduled for Wednesday, April 26, 1989, at 2:30 p.m., will be:

Institution of administrative proceedings of an enforcement nature.
Settlement of administrative proceedings of an enforcement nature.
Settlement of injunctive actions.
Institution of injunctive actions.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Kevin Fogarty at (202) 272-2300.

Jonathan G. Katz,
Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[OPP-34000; FRL-3562-2]

Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1988; Schedule of Implementation

AGENCY: Environmental Protection Agency (EPA or Agency).

ACTION: Notice.

SUMMARY: On October 25, 1988, the President signed into law the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Amendments of 1988 (FIFRA '88). This notice summarizes the provisions of FIFRA '88 and sets forth EPA's general plan and schedule for implementing them. EPA invites comments on its general approach for implementation.

DATES: Comments on this notice must be submitted by July 25, 1989.

ADDRESS: Comments on this notice should reference the document control number "OPP-34000" and be mailed to: Public Docket and Freedom of Information Section, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, bring comments to: Rm. 246, CM #2, 1921 Jefferson Davis Highway, Arlington, VA.

FOR FURTHER INFORMATION CONTACT: By mail: Deborah J. Sisco, FIFRA '88 Task Force (H7501C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 1101, CM #2, 1921 Jefferson Davis Highway, Arlington, VA. Telephone (703) 557-7372.

SUPPLEMENTARY INFORMATION:

I. Background

A. Regulation of Pesticides Under FIFRA

Under FIFRA, pesticides must be registered (licensed by EPA before they may be sold or distributed in commerce in the United States. Pesticides include insecticides, herbicides, fungicides, rodenticides, disinfectants, plant growth regulators, and other substances intended to control pests. Approximately 35,000 to 40,000 pesticide products are currently registered in the United States. FIFRA requires that pesticides used according to labeling directions perform their intended functions without causing unreasonable adverse effects on people or the environment. In assessing the potential to cause unreasonable risks for pesticide registration decisions, EPA is required by law to take into account the economic, social, and environmental costs and benefits of pesticide uses.

FIFRA was first enacted in 1947. Thousands of pesticide products have since been registered. However, Congress has amended FIFRA several times since 1947, and the standards for pesticide registration have evolved in tandem with advances in science and public policy. In particular, test data requirements for pesticides have become increasingly more stringent in light of advances in such areas as toxicology and analytical chemistry.

Under FIFRA, the registrant or applicant for registration has the responsibility for demonstrating that a pesticide meets all the criteria for registration. The Agency bases registration decisions for new pesticides on its evaluation of test data provided primarily by applicants for registration (usually the companies that produce the pesticide products). Required studies include testing to show whether a pesticide has the potential to cause adverse effects in humans and wildlife, including endangered species. Potential human effects include acute reactions such as toxic poisoning and skin and eye irritation, as well as other effects such as cancer, birth defects, or reproductive system disorders. In addition, EPA must have data to estimate exposure to pesticides, such as data on residues in food and potential worker exposure. Data on environmental fate, or how a pesticide behaves in the environment, are also required so that EPA can determine, among other things, whether a pesticide poses a threat to ground or surface water. Testing to acquire such data must be conducted in accordance with Good Laboratory Practice Regulations and may be subject to audit by the Agency.

In addition to registering new pesticides, EPA is charged with protecting human health and the environment from any unreasonable adverse effects associated with pesticides already registered and in use. FIFRA authorizes EPA to cancel the registration of an existing pesticide if data show that it causes unreasonable adverse effects on human health or the environment. The cancellation process can take 2 years or more to complete. Under certain circumstances, EPA may take action to suspend the registration of a pesticide to prevent an imminent hazard during the cancellation review.

Until the 1988 amendments, EPA was required under FIFRA to accept pesticides suspended and cancelled due to their potential for imminent hazard for disposal at government expense. In addition, an indemnification provision required EPA to reimburse holders of such suspended and cancelled pesticides for financial losses suffered, up to the fair market value of the pesticide.

To ensure that previously registered pesticides meet current scientific standards, FIFRA requires that pesticides originally registered a number of years ago be "reregistered" under current scientific standards. This is a massive undertaking. In the interest of efficiently identifying needed data, obtaining and reviewing those data, and reaching regulatory conclusions regarding the continued registrability of pesticides, EPA initiated its Registration Standards and Data Call-In programs. Through these programs, EPA has been reexamining by current standards the health and environmental safety of pesticides.

Pesticide products are normally formulations of one or more pesticidally active chemicals (the active ingredients) combined with one or more pesticidally inert ingredients. Products are regulated primarily on the basis of their pesticidally active ingredients. There are approximately 1,300 individual active ingredients, which the Agency has combined into basic active ingredient groups that may be regulated together as active ingredient "cases" (e.g., salts and esters of the same chemical). A review of the available data on each active-ingredient case and its use culminates in the issuance of a Registration Standard for the group of individual active ingredients which constitute a case.

A Registration Standard describes the Agency's evaluation of the available data and the conditions registrants must meet in order to reregister pesticide products containing the active ingredient. These conditions typically include requirements for submission of needed additional data; compliance with requirements for product composition and labeling and packaging. Certain changes in application methods or other label directions may also be required, and some uses may be restricted for use by or under the direct supervision of certified applicators as a condition of continued use.

EPA has established priorities for conducting its Registration Standard reviews on the basis of clusters of pesticides registered for similar uses, such as grain fumigants and fungicides. High-volume and food-use pesticides have been among the highest priority clusters. Thus far, 194 Registration Standards have been completed. Because certain active ingredients of the same "chemical family" are grouped into one Registration Standard "case", these 194 Registration Standards represent 350 individual active ingredients. An example of such a grouping is the Registration Standard for 2,4-D, which includes 35 individual active ingredients. Because of the factors considered by EPA in setting priorities for review of registered pesticides, the 194 Registration Standards issued to date represent approximately 85 to 90 percent of the total volume of pesticides used in the United States.

Following receipt of the data called in at the time the Registration Standard is issued, the Agency must complete a comprehensive review of those data and the pesticide's uses before a final decision on whether to reregister the active ingredient and products containing it can be made. This review of data submitted after issuance of the Registration Standard is called a "second round review." In many instances, this second round review shows that additional data are needed before a reregistration decision can be made. Further, once the active ingredient is found to be eligible for reregistration, data on the formulated product (including other ingredients), called product-specific data, must be reviewed before the pesticide product can be reregistered.

B. Legislative History

EPA has not been able to review and reregister existing pesticides as quickly as Congress originally envisioned. Consequently, legislation to revamp the reregistration process has been considered since 1985. In 1986, the House of Representatives and Senate passed similar bills (both of which included provisions on many more subjects than the 1988 amendments as passed), but the differences were not reconciled by the end of the legislative year. Similar bills were reintroduced in the new Congress in 1987. On May 13, 1988, the Senate Committee on Agriculture, Nutrition, and Forestry reported a bill (S. 1516, Senate Report 100-346) that contained essentially all the provisions ultimately enacted, as well as a number of others; the full Senate never voted on S. 1516. On September 16, 1988, the House Committee on Agriculture reported a bill (S. 659) that was essentially identical to the amendments later enacted; it was adopted by the full House in late September and by the Senate shortly thereafter, and signed by the President on October 25, 1988.

C. FIFRA '88

The major provisions of FIFRA '88 became effective on December 24, 1988. FIFRA '88 provides for the following:

1. The acceleration of the process of reregistration by providing deadlines and new procedures.
2. Expedited processing of applications for certain types of registration or amendments to existing registrations.
3. The establishment of a fee system to help pay for accelerated reregistration and expedited processing.
4. The promulgation of regulations for the handling of pesticides, including their storage, transportation, and disposal.
5. An indemnity program to cover certain private-sector costs resulting from suspension or cancellation of pesticides, and requiring specific Congressional appropriations for certain indemnifications.

In addition to these 5 major provisions, FIFRA '88 amends the compliance provisions and criminal penalties under FIFRA and contains a provision relative to the Scientific Advisory Panel. The remainder of this Notice discusses each provision, EPA's schedule for implementation of the major provisions, and the Agency's communication plans to promote effective implementation.

II. Accelerated Reregistration

The reregistration provisions of FIFRA '88 establish mandatory timeframes and duties, applicable to EPA and pesticide registrants, for the reregistration of pesticides. FIFRA '88 requires EPA to complete, over approximately a 9-year period, the reregistration review of each registered product containing any active ingredient first registered before November 1, 1984. Only pesticides for which EPA has determined, between November 1, 1984, and December 24, 1988, that there are no outstanding data requirements, and for which the requirements of FIFRA section 3(c)(5) have been satisfied, are excepted from this requirement. Section 3(c)(5) is the section which provides generally that EPA shall register a pesticide if it can perform its intended function without causing unreasonable adverse effects on people or the environment.

The charge to complete the reregistration review of exiting pesticides in 9 years represents a tremendous challenge to the Agency. Registrants too will be expected to accept part of the burden for the acceleration of reregistration. They will be expected to review their previously submitted data and to supply the remaining required data within prescribed time periods. Pesticide users are also encouraged to work with registrants to assist in the generation of data, where appropriate.

Reregistration of pesticides under FIFRA '88 will be carried out in five phases. These phases establish deadlines for pesticide registrants to identify and supply the test data necessary for EPA to make pesticide reregistration decisions, as well as for EPA to analyze submissions and to determine whether to reregister currently registered pesticides. The phases are described below.

A. Phase 1—Reregistration Lists

In Phase 1 of the reregistration process, the Agency is required to list the names of pesticide active ingredients subject to reregistration in four installments over a 10-month period following December 24, 1988, and to ask registrants of pesticide products containing those active ingredients whether they intend to seek reregistration. The content of these lists is not subject to judicial review. A description of the four lists and the dates by which they are required to be listed appear below.

List A—Pesticide active ingredients for which Registration Standards were issued before 12/24/88.	March 4, 1989
List B—Next 150 active ingredients subject to reregistration.	April 24, 1989
List C—Next 150 active ingredients subject to reregistration.	July 24, 1989
List D—Remainder of active ingredients subject to reregistration.	October 24, 1989

For reregistration purposes, EPA will continue to group chemically-related active ingredients into active-ingredient cases. Lists B and C will each contain 150 active-ingredient cases. In determining which active-ingredient cases to include on Lists B, C, and D, FIFRA '88 requires that, among other criteria, priority be given to those that meet the following criteria:

—Used on or in food or feed and may result in postharvest residues.

—Result in residues of potential toxicological concern in portable ground water, edible fish, or shellfish.

—Determined to have significant outstanding data requirements prior to December 24, 1988.

—Used on sites where worker exposure is most likely to occur, including greenhouses and nurseries.

The Agency will implement Phase 1 of the reregistration process as follows:

1. *List A.* List A, which was published on February 22, 1989 (54 FR 7740),

VOL. 54 ISS 79 AP 26 1989 UMI

contains the names of the pesticide active ingredients for which Registration Standards were issued prior to December 24, 1988. This list includes the Registration Standard case name and the individual pesticide active ingredients covered in each specific Registration Standard. (See Unit I. A for explanation of Registration Standard cases.) Reregistration Phases 2 through 4 do not apply directly to List A. Reregistration of List A active ingredients will be discussed in paragraph E.1. of this unit.

2. *Lists B, C, and D.* Lists B and C will each consist of 150 active-ingredient cases of currently registered pesticides. In developing these lists, the Agency must first determine which chemical substances should be grouped as a single active-ingredient case. The criteria for setting priorities described above (as well as other pertinent factors) will then be used to place active-ingredient cases on List B, C, or D. Because the due dates for several subsequent actions are based on the date each list is published, the Agency intends to issue Lists B, C, and D, as nearly as possible on the exact dates indicated in this unit. Each of the lists will be published in the **Federal Register** with a brief discussion of the following: A description of the various lists; criteria for placement of active ingredients on Lists B, C, and D; time frames for registrant responses; and Agency contacts.

Each list will be sent by certified mail to the registrants holding registrations for products containing the pesticide active ingredients included on the specific lists. EPA will also send instructions to registrants of List B, C, and D pesticides on how to respond in Phase 2.

B. Phase 2—Registrants' Intent to Seek Reregistration

1. *Lists B, C, and D.* In Phase 2 of the reregistration process, the registrants of each pesticide active ingredient identified on Lists B, C, and D are required to respond to the Agency concerning their intent to seek reregistration. If a registrant intends to seek reregistration, the submission must include:

(a) Identification of data required by regulations to support the registration of the pesticide active ingredient.

(b) Identification of data that were previously submitted to support the registration but are inadequate to meet such regulations.

(c) Identification of required data that have not previously been submitted to the Agency.

(d) A commitment to replace or submit any required data or an offer to share in the cost of generating such data within specified periods of time.

For the purpose of a registrant's Phase 2 response, data are to be considered inadequate if the registrant cannot certify the availability of raw data from the study, or if the data were first submitted to EPA before January 1, 1970 (unless the registrant demonstrates to the Agency that such data should be considered).

Registrants of listed active ingredients are required to submit their Phase 2 responses to the Agency within 3 months after publication of the list in the **Federal Register**. If publication occurs on the precise dates indicated in Unit II.A. of this Notice, the Phase 2 responses would be due as follows:

List B Response—July 24, 1989
List C Response—October 24, 1989
List D Response—January 24, 1990

The Agency is given limited discretion to extend these deadlines under extraordinary circumstances beyond the control of the registrant.

If a registrant commits to produce data in its Phase 2 response, the data must be submitted within a reasonable period of time as determined by the Agency but not more than 48 months after the date of the registrant's commitment. Time periods for submission of data will be provided to registrants when the Agency mails each list, as directed by FIFRA '88. EPA is required to suspend the registration of a pesticide if progress is insufficient to ensure the submission of the required data in a timely manner or if the data are not submitted by the date specified. Again, EPA is given limited discretion to extend deadlines under extraordinary circumstances beyond the control of the registrant. The Report of the Senate Committee on Agriculture cites as examples of such circumstances the unintentional loss of laboratory results, the unintentional destruction of laboratory equipment or facilities, major animal loss, or similarly serious unanticipated occurrences.

2. *Cancellation and removal.* If a registrant submits a notice of intention not to seek reregistration of a pesticide, a notice to that effect will be published in the **Federal Register**, and the registrant's response will be treated as a request for cancellation. If a registrant fails to submit the required Phase 2 response within the prescribed time, the Agency is required to issue a notice of intent to cancel the registration. After a 60-day comment period, the Agency may cancel the registration or take other appropriate action without a hearing.

If no registrant satisfies the Phase 2 response requirements for a particular active ingredient, EPA must publish in the **Federal Register** a notice of intent to remove the active ingredient from the list and a notice of intent to cancel the registrations of all products containing the active ingredient. After a 60-day comment period, the Agency may cancel those registrations unless, during that period, another person acquires the rights of a registrant and files a notice of intent to reregister the pesticide and, within 120 days of the **Federal Register** notice, completes the Phase 2 requirements.

C. Phase 3—Registrants' Submission of Information

1. *Lists B, C, and D.* In Phase 3 of the reregistration process, each registrant who is seeking reregistration of a pesticide active ingredient on List B, C, or D shall submit the following information on the specific active ingredient to the Agency:

(a) A summary of each previously submitted study considered by the registrant to be adequate to support registration.

(b) A summary of each previously submitted study that may not comply with the requirements of section 3 of FIFRA and the regulations issued thereunder, but which the registrant asserts should be deemed adequate to support continued registration.

(c) Reformatted data from each summarized study submitted to the Agency prior to January 1, 1982, which concerns chronic dosing, oncogenicity, reproductive effects, mutagenicity, neurotoxicity, teratogenicity, or residue chemistry (including metabolism studies) or, where these studies are not required, reformatted of acute and subchronic dosing data.

(d) Identification of data indicating adverse effects.

(e) Identificiaton of additional data that the registrant believes will support registration.

(f) Certification of access to raw data.

(g) A commitment to submit data to fill outstanding data requirements or an offer to share in the cost of developing such data.

Registrants are required to submit the information outlined above within 12 months after publication of the list on which the active ingredient is identified. If publication occurs on the precise dates indicated in Unit II. A. of this Notice, the Phase 3 responses would be due as follows:

List B Response—April 24, 1990
List C Response—July 24, 1990
List D Response—October 24, 1990

To assist registrants in complying with the requirements of Phase 3, EPA will develop guidance and send it to those who have declared their intent to seek reregistration. Guidelines are discussed in detail in paragraph G of this unit.

2. *Cancellations.* If a registrant of a pesticide fails to submit the information required in Phase 3 within the prescribed time period, the Agency is required to cancel the registration without hearing. If the registrant submits the required information but it does not conform to guidelines established by EPA, the Agency must determine whether the registrant made a good faith attempt to conform its submission to the guidelines, and if so, a reasonable time will be allowed to make necessary changes or corrections. If the Agency finds that a good faith attempt was not made, the Agency may issue a notice of intent to cancel and, unless the registrant requests a hearing within 30 days, cancel the registration. The only matter for resolution at such a hearing shall be whether the registrant made a good faith attempt to conform its submission to the guidelines.

D. Phase 4—EPA Review of Submissions and Identification of Data Gaps

In Phase 4, EPA is required to review the data and information submitted by registrants during Phases 2 and 3, and to identify data gaps independently. To assist in this review, the Agency may require registrants to submit completed copies of studies which have been summarized, but in general, the Phase 4 review will identify data requirements for which already submitted studies are adequate and those which warrant more detailed review. It is possible that a detailed review of the data in Phase 5 will reveal that a study, which appeared adequate based on the Phase 3 submission, needs to be replaced or supplemented.

The Agency is then required to publish in the **Federal Register** the outstanding data requirements for each active ingredient and Lists B, C, and D. Concurrently, a notice under section 3(c)(2)(B) of FIFRA will be issued to registrants requiring the submission of the identified data.

The Agency is required to complete its Phase 4 review of registrant submissions and publish the notice of the data gaps within the time periods specified in FIFRA '88 (assuming the planned list-publication dates, by the dates shown below.

List B Notice—October 24, 1990 (18 months after publication of List)
List C Notice—July 24, 1991 (24 months after publication of List)
List D Notice—July 24, 1992 (33 months after publication of List)

The Phase 4 review process will resemble the process used to review data under the former Registration Standards program. EPA expects, however, that the review will proceed more rapidly and efficiently since the Agency will be reviewing summaries and reformatted data to determine which are good candidates for more detailed review.

E. Phase 5—Final Review and Reregistration

Phase 5 culminates the reregistration process under FIFRA '88. It requires the Agency to conduct a thorough, comprehensive examination of all data submitted in support of reregistration. Based on this review, EPA will either reregister a pesticide or take other appropriate regulatory action.

Once all the required data on an active ingredient have been received, the Agency has 1 year to complete its review and determine whether the pesticides containing the active ingredient are eligible for reregistration. If they are eligible, the Agency must obtain any needed product-specific data prior to reregistering individual pesticide products. Registrants are required to submit these data no later than 8 months after a determination of eligibility for reregistration, unless the Agency finds that a longer period of time is required to generate the data.

Once all the product-specific data have been received, the Agency is required to review those data within 90 days and to reregister the product or take other appropriate action within 6 months after receipt of the required product-specific data.

1. *Phase 5 review of List A chemicals.* The Phase 5 review of List A chemicals highlights some issues which will also arise with the other lists. Of the 194 Registration Standards issued to date, 13 second round reviews of the active-ingredient cases have been issued and three more are in draft. While theoretically the data base for a pesticide active ingredient undergoing a second round review should be complete, or at least nearly so, experience shows that most of these second round reviews identify a number of new data gaps, and a reregistration decision must be postponed until these data are submitted and reviewed. This situation results from several factors, including tier testing (in which the results of one study indicate the need for additional testing); revised guidelines; new data requirements; and inadequate studies submitted by registrants.

For the active ingredients on List A (active ingredients for which Registration Standards have been issued), the Agency will identify chemicals whose data bases are complete enough to conduct a thorough evaluation and make a reregistration decision and those chemicals for which more data are needed before reregistration decision can be made. For active ingredients with essentially complete data bases, the Agency will schedule and conduct second round reviews and issue data call-in notices for product-specific data. For chemicals with less complete data bases, the Agency will develop an efficient process for promptly requiring the additional data needed to evaluate the active ingredients, conducting second round reviews when data are received, and then calling in product-specific data. A system and schedule are being developed for completing reregistration of the List A chemicals as soon as possible within the 9 years provided.

2. *Definition of reregistration.* Registration of a pesticide under FIFRA requires that EPA find that its use will not result in unreasonable adverse effects on people or the environment. In light of the continuing evolution of scientific knowledge, and therefore changing data needs for the evaluation of a pesticide's risks, it will be necessary for the Agency to define a specific set of conditions that, when met, will allow the Agency to make the reregistration decision within the deadlines established in FIFRA '88. Although additional studies not now anticipated may be needed in the future, a reregistration decision can then be made once those conditions have been met. A definition of reregistration might include, for example, completion and satisfactory review of specific categories of studies to provide scientifically valid data which are essential for the Agency to determine that use of a pesticide will not cause unreasonable adverse effects and can be reregistered. However, even after reregistration, the Agency's obligation to consider new data about pesticide's effects continues, and data received after reregistration may serve as the basis for further regulatory action by the Agency.

3. *Form of decision.* The Agency must also decide how to present its decision on reregistration and the procedures and process to be followed in issuing those decisions. Currently, EPA's reregistration review of a pesticide active ingredient is prevented in the

VOL
54
ISS
79
AP

1989
UMI

form of the Registration Standard document. The Registration Standard summarizes EPA's evaluation of data available for each scientific discipline and describes the conditions that must be met before the Agency will consider the active ingredient eligible for reregistration. However, reregistration is not granted through issuance of the Registration Standard for either the active ingredient or individual products.

F. Addressing Impacts on Pesticide Minor Uses

EPA recognizes the potential impact of FIFRA '88 on minor use pesticides. Frequently, there is insufficient economic incentive for pesticide product manufacturers to justify the timely development of data needed to support pesticide registrations for many small scale, infrequently needed, or specialty pesticide uses. As discussed in its Policy Statement on Minor Uses of Pesticides (51 FR 11341, April 2, 1986), EPA recognizes that the continued availability of pesticides registered for minor uses is important for the production of a diverse food supply and has taken an active role in addressing the problem by giving minor uses special attention in its regulatory activities. FIFRA directs EPA to make data requirements for minor uses commensurate with the anticipated extent and pattern of use and degree of exposure of man and the environment to the pesticide. FIFRA '88 also contains provisions for reregistration fee waivers for active ingredients used solely for minor uses, which indicate Congressional intent that minor uses should be accommodated.

Even pior to the enactment of FIFRA '88, reregistration has had an impact on the availability of pesticides for minor uses. Because EPA has given priority to the review of high-volume and food use pesticides, most of the 194 active-ingredient cases for which the Agency has already issued Registration Standards are food use pesticides which had both major and minor uses. Minor uses often lack sufficient market potential to offset the cost of generating data to meet statutory requirements for reregistration. As a result of the Agency's issuing these Registration Standards, for a number of minor uses associated with the old pesticides, registrations have been voluntarily withdrawn by registrants or suspended and cancelled by the Agency for failure to meet data call-in requirements. Many people believe the loss of existing pesticides for minor uses as a result of decisions by registrants not to support reregistration will be accelerated under FIFRA '88.

Low-volume pesticides and low-volume uses of a major pesticides are at risk when the data requirements make the generation of new data economically unacceptable to the registrant. When there is no alternative pest control method for a low-volume use, loss of the registered pesticide is likely to impact users adversely.

In the past, the Agency has pursued policies designed to allow flexibility for minor uses to the extent possible within the context of FIFRA and the Federal Food, Drug and Cosmetic Act (FFDCA). One approach to this problem has been to encourage third party organizations, such as user groups and IR-4 (Interregional Research Project Number 4, a nationwide cooperative effort including EPA, the U.S. Department of Agriculture, state agricultural experiment stations, and industry), to gather data needed to support continued registration of minor uses which are not supported by a registrant.

The Agency is aware that FIFRA '88 may place additional burdens on minor uses, and will consider what can be done to alleviate that burden. The Agency is working with State lead agencies to help ensure that user groups and others are aware of the potential impact of reregistration and of actions that can be taken by users to aid registrants in maintaining registrations. In addition, the Agency is developing guidance for registrants and others on how to determine data requirements for minor uses and how to make the most effective use of the Agency's existing policies.

G. Guidance for Reregistration Under FIFRA '88

FIFRA '88 shifts a substantial portion of the burden for the early review of previously submitted data from EPA to the registrants. In order for the Agency to review the data bases of more chemicals in a shorter time, registrants of List B, C, and D active ingredients are required to make the initial evaluation of their data and to submit the results of their review in the form prescribed in Phase 3. To assist registrants in complying with the Phase 3 requirements, FIFRA '88 requires EPA to issue the following four sets of guidelines. Although the law requires that the four mandated guidelines be issued by December 24, 1989, the Agency wishes to make them available as soon as possible so that registrants will be able to begin preparing their Phase 3 responses.

1. *Guidelines for summarizing studies.* In Phase 3, all previously submitted studies on which a registrant wishes to rely must be summarized in accordance with guidelines to be issued by EPA. This includes both data which the registrant believes to comply with regulatory requirements and data which, although they may not fully comply with requirements, the registrant believes should be relied upon.

2. *Reformatting guidelines.* All studies submitted to the Agency prior to January 1, 1982, which will be relied upon for reregistration and which concern chronic dosing, oncogenicity, reproductive effects, mutagenicity, neurotoxicity, teratogenicity, or residue chemistry of the active ingredient must be reformatted in accordance with guidelines to be issued by EPA. For chemicals whose uses do not require the data listed above, the registrants must reformat acute and subchronic dosing data submitted prior to January 1, 1982, on which they intend to rely.

3. *Guidelines for identifying adverse data.* Guidance must be given for registrants to identify adverse data (required to be reported by FIFRA section 6(a)(2)). An Interpretive Rule specifying what information must be submitted under section 6(a)(2) is expected to be published this year. A brief guidance document will be prepared explaining how to identify adverse data, but the interpretive rule will determine what data must be identified.

4. *Identifying data that may not meet guidelines.* Even though a study may not comply in all respects with EPA's Pesticide Assessment Guidelines, its shortcomings may be sufficiently minor that the data are still of some use to support reregistration. In such a case, the Agency might not reject the data outright. The registrants must be given guidance as to when EPA might accept such data. The Agency is preparing checklists to make it easier for registrants to screen their data for acceptability.

H. 40 CFR Part 158 Data Requirements

In addition to the guidelines specifically required by FIFRA '88 to assist registrants in preparing their Phase 3 responses, the Agency plans to provide guidance for interpreting the data requirements. At the time the lists are sent to registrants, EPA will provide information on how to identify the data required through the regulations pertaining to data requirements (40 CFR Part 158) to support specific use categories, and clarify current data requirements in terms of the conditions under which certain studies are required. For example, while Part 158 indicates that certain studies are "conditionally required" on a case-by-case basis, experience allows the Agency to identify more specifically when the study is necessary. In addition, the Agency will identify for registrants, data routinely required to support registration of a pesticide for specific uses.

The Agency plans to propose an amendment to 40 CFR Part 158 this year, which will include an update of Part 158 to include routinely required data which to date have not been identified specifically in the data tables of Part 158. EPA also expects to propose other amendments to add new data requirements. For example, new storage, transportation, and disposal data requirements provided for in FIFRA '88 will be added. In addition, many of the Pesticide Assessment Guidelines may be updated and new ones developed. For example, the Agency intends to add neurotoxicity and immunotoxicity testing guidelines. (The Senate Committee on Agriculture, on reporting this bill, requested that EPA intensify the degree of testing for neurotoxic and behavioral effects, including testing related to chronic exposure, prenatal, and neonatal effects.) Also, the Agency expects to have in place amended Good Laboratory Practice regulations (GLPs; current regulations are at 40 CFR Part 160) which expand the scope of the testing required to be performed under GLPs.

Revisions to Part 158 to add new requirements will take place over the next few years. While registrants are not required to identify in their Phase 2 response data gaps that result from these anticipated new requirements, such future requirements represent an additional expense which must be taken into consideration when they decide whether they wish to support the reregistration of the pesiticide. Therefore, the Agency intends to provide registrants with a description of the changes in data requirements which it anticipates.

I. Other Guidance

In addition, FIFRA '88 may require changes to some existing regulations and policies. For example, the Agency's prior policy which made voluntary cancellations effective upon receipt (published in the **Federal Register** on March 27, 1987, 52 FR 9937) has been superceded by FIFRA '88. Under FIFRA '88, the Agency must publish in the **Federal Register** a notice of receipt of a request for cancellation or for an amendment to delete one or more uses before approving it. The Agency is evaluating its policies and procedures and will amend them as appropriate to implement the new requirements.

There may also be other guidance which will be appropriate to issue as implementation continues. In some cases regulations must be amended. In others, a **Federal Register** Notice of Policy Statement, new PR (Pesticide Registration) Notice, or Standard Operating Procedure may be appropriate. The Agency is currently evaluating its existing guidance and policies to establish priorities for revising and creating new guidance.

J. Enhancement of Automated Data Processing Systems

Effective management of the process of accelerated reregistration requires that the progress of each active ingredient toward reregistration be monitored from the initial mailing of the chemical lists to registrants to the final reregistration of end use products. Significant modifications to EPA's existing data processing systems, several new systems, and information integration will be required to support this process.

To facilitate the submission and processing of study summaries, reformatted old studies, and new data, EPA will assess the utility of the electronic submission of data to improve efficiency. Systems may also be developed to support the assessment of data and the development and documentation of scientific and regulatory determinations about each active ingredient. In addition, increased automation of EPA laboratory facilities may be required to support the efficient validation of residue methods and other activities related to tolerance reassessment.

III. Expedited Registration

Because of budgetary constraints in 1986 through 1988, EPA was forced to choose among competing priorities. The Agency chose to concentrate its resources on processing applications for new pesticide active ingredients and new uses and on reregistration activities. Processing of applications for registration of pesticide products that are identical or substantially similar to another registered pesticide product (referred to as "me-too" applications) and minor amendments to existing registrations were given a lower priority. This redirection of resources resulted in a predictable backlog of "me-too" applications and amendments.

FIFRA '88 requires that EPA expedite processing of these two classes of applications and authorizes up to $2 million to be allocated from the fees to be collected under the Act for that purpose. Expedited consideration must be given to applications for initial or amended registration of products which are similar to pesticides already registered with EPA. In addition, the Agency is required to expedite certain minor amendments (amendments not requiring scientific review of data).

Under the expedited review provisions, an applicant must be notified, within 45 days after the Agency receives an eligible application, whether the application is complete. Within 90 days after the Agency has received a complete application, the registrant must be notified in writing whether the request is granted or denied. If it is denied, the specific reasons for denial must be given.

As of the effective date of FIFRA '88, the Agency had over 3500 "me-too" applications and over 4500 amendments pending. Based on past years' receipts, the Agency estimates that approximately 6000 to 6500 more applications will have been received by the end of the fiscal year (September 30, 1989).

The short-term approaches to implementing the expedited registration requirements focus on attaining two goals: to handle applications received after December 24, 1988, within the statutory time frames (45 days to determine if the application is complete; 90 days to decide whether to grant or deny the application); and to process as quickly as possible applications that were pending with the Agency prior to the effective date of FIFRA '88 (referred to as backlog applications).

One action already taken which will reduce the number of applications received each year is the promulgation of the regulatory amendments to Pesticide Registration Procedures published in the **Federal Register** on May 4, 1988, and effective in August 1988 (53 FR 15952). These regulatory revisions, often referred to as the "maxi-package", define categories of amendments to registration that do not require review or approval by the Agency prior to implementation by registrants. Such amendments fall into two categories: notifications to a registration that require the registrant to notify the Agency before the modified product is distributed or sold (referred to as "notifications") and modifications not needing Agency approval or notification. Although portions of the maxi-package may have to be revised (e.g., voluntary cancellations, described in Unit II.H. of this notice certain types of amendments that previously required Agency approval now do not need to be reviewed, thereby reducing some demand on Agency resources and

BEST COPY AVAILABLE

VOL 54 ISS 79 AP 26 1989 UMI

permitting immediate implementation of some registrant marketing decisions.

The Agency has already taken the first steps necessary to reduce the backlog. The pending applications have been sorted first into broad categories of those requiring either minimal or no administrative review (notifications) and those requiring administrative review (e.g., product chemistry, precautionary labeling, use directions). The Agency intends to reduce substantially the backlog of applicants by the end of September 1989.

To improve the efficiency of processing applications, a front-end processing operation to screen all applications is being developed and will be in place this spring. This centralized processing unit will send only complete applications on for review by the product management teams. If an application is found to be incomplete, the unit will generate a letter within the statutory 45-day time frame enumerating the application's deficiencies and send the application package back to the applicant.

In addition, the Agency is developing guidance for registrants' use in preparing applications for registration of pesticide products. The Agency spends a significant amount of time reviewing applications that are poorly done or that require several resubmissions. Improved guidance will aid applicants in correctly completing the required forms and documents, thereby reducing the Agency's review time and the number of resubmissions necessary. A new instruction booklet will also serve as a training guide for Agency staff and contractors. The agency has sent a draft of the booklet to trade associations and others for comment.

Longer-term plans focus on evaluating the current registration program and identifying areas for improved efficiency. The Agency will focus on the daily operations of the product management teams and identify measures that can be adopted to increase efficiency and productivity. As part of the Office of Management and Budget's (OMB) Productivity Improvement Program, a productivity study is being conducted of the registration process. Results from this study could serve as a basis for potential changes in areas of the registration process to increase productivity.

The evaluation of the registration program will identify operational areas that consume time and resources unnecessarily, and therefore need to be streamlined and improved. This approach will focus on measures to reduce the daily activities on the product management teams so that resources can be used more effectively to processes actions under the expedited processing provisions of FIFRA '88, as well as other program activities (e.g., new chemical and significant new use registrations). In evaluating potential process changes, the Agency will consult with the regulated industry and the public to obtain insights and to identify areas where cooperative activities can lead to improved efficiency, (e.g., automated data submission).

As the Agency seeks to simplify the registration process, additional systems may be needed. The primary data processing support required in the short-term is improvement in and integration of internal application tracking systems and product inventory systems. These improvements will facilitate the handling of the increased information necessary to eliminate the application backlog and to monitor compliance with the new statutory processing times. In addition, a study of the feasibility of providing direct registrant access to tracking information will be conducted.

IV. Fees

Accelerated reregistration and expedited processing of certain registration actions will be resource intensive regulatory processes expected to cost at least $200 million over the 8-year period provided by Congress. Approximately $130 to $150 million of these costs are expected to be met from a continuation of the current service level of EPA's budget for reregistration. The remaining money is to be obtained from two new fees, (1) a reregistration fee for each active ingredient subject to reregistration, and (2) an annual registration maintenance fee for each pesticide registration.

The registration maintenance fees are intended to generate about $64 million per year for each of the next 8 years, and should thus generate about $525 million in total. The reregistration fees have various provisions for exemptions and waivers. Overall, the reregistration fee should generate about $25 to $50 million in revenues. EPA's current budget for reregistration, along with the registration maintenance fees and the reregistration fees, will provide approximately the resources required.

A. Maintenance Fees

FIFRA '88 provides for a yearly registration maintenance fee for each pesticide registration to be paid to EPA. The maintenance fees are applicable to all pesticide registrations. Current EPA records indicate that there are about 35,000 to 40,000 products registered under FIFRA. Congress calculated the initial fee levels to generate $14 million per year based on the number of registrations in EPA records at the time. Initial fees established in the law are $425 per registration for up to 50 registrations held by the same registrant plus $100 per registration for each additional registration up to 200 held by the same registrant.

Although there is no provision for waivers or reductions in maintenance fees, maximum fees per registrant were established. The maximum amount to be paid by a registrant each year with up to 50 registrations is $20,000; for those having more than 50 registrations, the maximum is $35,000.

The authority to levy the registration maintenance fee extends for 8 years. During this time period, the Agency is prohibited from levying any other fee for the registration of a pesticide product. A Federal Register Notice published on March 22, 1988 [54 FR 11922], suspended the registration fees established by regulation on May 26, 1988 [53 FR 19166].

The Agency expects that imposition of annual maintenance fees, as well as the other requirements of FIFRA '88 will result in a number of voluntary cancellations of economically marginal or inactive product registrations. While for many registrants the fees envisioned are not significant, there are some registrations for products which have been out of production for some time or whose sales are not sufficiently large to justify even a modest fee. Therefore, the number of registrations subject to fees, is expected to be smaller than the number in existence when Congress established the initial fee levels. EPA is required by FIFRA '88 to adjust the annual fee levels to generate the $14 million specified in FIFRA '88.

For this first year of registration maintenance fees, the Agency will collect the original fees of $425 and $100. The total to be collected in 1989 is therefore expected to fall short of the target. However, the Agency expects to have enough resources to accomplish what is required the first year.

To collect the first year's maintenance fees, the Agency has updated its product records based on the best information available and has sent a form to over 4500 registrants to complete and to return payment of fees, which were due to EPA by March 1, 1989. The registrant of record on March 1 is responsible for payment of the maintenance fee. If a registrant is in the process of transferring a registration to another registrant, but the transfer is not yet complete, the transferee is the registrant of record. If the fee for a product is not paid by the time prescribed, the Agency, by order and without hearing, may cancel the registration. The filing form also gives registrants the opportunity to request cancellation of a registration in order to avoid payment of fees on a registration the registrant may no longer wish to support.

In future years, the fees will be adjusted to comply with the intent of Congress that, as nearly as possible, $14 million per year be generated. Maintenance fees will be due on March 1 of each year.

B. Reregistration Fees

Additional money will be collected from fees levied on the registrants of each active ingredient which is subject to reregistration, including those active ingredients for which Registration Standards have already been issued by the Agency. The size of the reregistration fees prescribed by FIFRA '88 is related to the amount of Agency review required for reregistration. Active ingredients with major food or feed uses are to be charged $150,000. Active ingredients with no major food or feed uses for which Registration Standards have been issued (those on List A) will be charged $50,000 to $100,000; those for which a Registration Standard has not been issued (those on Lists B, C, and D) will be charged $75,000 to $150,000.

1. *Calculation of the fee.* Consistent with the fee structure described above, all the individual active ingredients which would be included in an active-ingredient case (see Unit I.A.) will be considered to be one "active ingredient" for the purpose of the calculation of reregistration fees.

The reregistration fee is to be paid for each active ingredient subject to reregistration with the exception of the active ingredients eligible for waivers, discussed in Unit IV.B.2. Registrants who are eligible for a Generic Data Exemption because they purchase registered pesticides in order to formulate another registered product are exempt from contribution to the reregistration fee.

When there are two or more sources of the same active ingredient, the fee will be apportioned among all of the nonexempt registrants by market share for the past 3 calendar years. When a registrant chooses to withdraw support for a registered active ingredient and therefore does not contribute to the fee, the fee to be paid shall be reapportioned among the remaining registrants.

Although the reregistration fee is a one-time-only fee, the law provides for Lists B, C, and D fees to be paid in two installments (the first in Phase 2 and the second in Phase 3). The schedule for payment of List A fees is left to the discretion of the Agency but will depend, in large part, on the time required to obtain and process the required information on exempt or nonexempt status and market shares.

Before billing registrants of products containing a particular active ingredient for their proportional share (if any) of the required reregistration fee, the Agency will obtain through Phase 2 responses specific information on whether or not a registrant's source of the active ingredient is another registered product. This will enable the Agency to identify accurately those products which are exempt from the reregistration fee. For those products which are not formulated from a registered source of active ingredient, each registrant will also be required to furnish market share information to be used in calculating the proportional contribution required. Each non-exempt registrant will also be afforded an opportunity to claim eligibility for and submit data supporting a small business waiver. The required contribution by each non-exempt registrant will be generally proportional to that registrant's market share on an active ingredient basis for the preceding 3 years. Nevertheless, a minimum contribution will apply for those non-exempt registrants who have no market share, and the contribution may be reduced for those registrants who are eligible for a small business waiver.

2. *Fee waivers and reductions.* FIFRA '88 contains several provisions for exemptions and reductions, or partial waivers, of the reregistration fees. Small businesses, defined as those firms having 150 or fewer employees and average annual gross sales of chemicals in the prior 3 years not exceeding $40 million will receive a partial waiver of fees depending on their average annual sales of pesticides containing the particular active ingredient.

Antimicrobial pesticide active ingredients having no registered food or feed uses and with production under 1 million pounds of that active ingredient are exempt from the reregistration fee. Antimicrobial pesticides with production levels larger than 1 million pounds of active ingredient or having uses on food or feed sites are subject to the same fees as other types of pesticides.

FIFRA '88 also provides for exemptions from fees for active ingredients which are contained only in pesticides registered solely for agricultural or nonagricultural minor uses. If, for a single active ingredient, regardless of use pattern, the value or volume of use is small, an exemption will be given for that pesticide from the reregistration fee.

C. Management of Funds

FIFRA '88 states that there shall be established in the Treasury of the United States a reregistration and expedited processing fund. All fees collected shall be deposited into the fund and shall be available to the Agency without fiscal year limitation to carry out reregistration and expedited processing of eligible applications.

The fund will be a "Revolving Fund". The formal definition of a revolving fund, as published by the Government Accounting Office (GAO), is a "Public Enterprise Revolving Fund Account: Expenditure account authorized by Congress to be credited with collections, primarily from the public that are generated by, and earmarked to finance, a continuing cycle of business-type operations."

The revolving fund will receive funds from fees paid by registrants. EPA will receive an apportionment (approval to spend funds) from the Office of Management and Budget (OMB) after submission and approval of an apportionment request. However, the Agency is allowed to spend only the amount that is in the revolving fund. Money in the fund not currently needed shall be maintained on deposit or on hand, invested in obligations of the United States or those guaranteed thereby. The investments are made by the Department of the Treasury with input by EPA if requested.

The funds received in the Revolving Fund will be available to EPA for use only for reregistration and expedited processing and will be "No Year" funds. This means that the budget authority remains available for obligation for an indefinite period of time, usually until the objectives for which the authority was made available are attained.

FIFRA '88 requires the Agency to provide Congress with an annual accounting of the fees collected and disbursed from the fund. The revolving fund has been established, and the budget process is underway. The Agency is developing an accounting system to track all funds received and disbursed to meet annual reporting requirements.

V. Storage, Transportation, and Disposal of Pesticides

The 1988 amendments significantly expand EPA's authority to regulate the storage, transportation, and disposal of pesticides. FIFRA '88 provides that EPA may, by regulation or as part of an order

VOL. 54 ISS 79 AP 26 1989 UMI

issued under section 6 of FIFRA (the section dealing with cancellation and suspension of pesticides), issue requirements for storage, transportation, or disposal of pesticides, their containers, rinsates, or other materials which may be contaminated with such pesticides. The Agency may exercise this authority through the imposition of data and labeling requirements for pesticide registration, and through other regulations governing the handling of excess pesticides, containers, rinsates (such as the rinsings from containers), and other materials contaminated by pesticide residues, as well as the institution of recall plans for suspended and cancelled products, which is discussed in Unit VI of this notice.

The authority to regulate storage, transportation, and disposal of pesticides must be exercised in a carefully planned, step-by-step approach, not only because of the resources it will require, but also because the Agency needs more information before priorities can be established and effective procedures, guidance, and regulations can be developed.

Although this regulatory effort will require 3 years or more for full implementation, the Agency will begin in 1989 to facilitate better disposal practices and waste minimization. EPA will explore opportunities for improved disposal, transportation, and storage through its outreach efforts, certification and training program, information exchange, and policy pronouncements. These efforts will help reduce environmental harm and assure the success of the Agency's regulatory efforts when fully implemented.

A. Storage, Transportation, and Disposal

The Agency plans to establish requirements for storage, transportation and disposal of pesticides through revisions to existing regulations (currently in 40 CFR Part 165). In developing regulations, the Agency will take into consideration the regulatory intent of the Resource Conservation and Recovery Act (RCRA), as well as the Agency's experience in that program.

Although EPA will continue to gather information on methods of disposal of excess stocks, which may alter our current knowledge of disposal technology, the Agency plans to begin immediate development of pesticide disposal criteria and procedures to be followed under a section 6 suspension or cancellation order. The revisions to existing regulations are scheduled for completion in December 1991.

B. Labeling

The Agency is also authorized to require pesticide product labeling to include requirements and procedures for the storage, transportation, and disposal of the pesticide, containers, rinsates, or other materials which may contain residues of the pesticide.

The Agency believes that it may be appropriate to require significant labeling changes. However, until procedures and guidance are developed and prescribed by regulations, and until transportation, storage, and disposal data are received from registrants or other sources, major changes in labeling requirements may be premature.

C. Containers and Container Rinsates

To reduce problems associated with pesticide containers, EPA is required to conduct a study to examine the feasibility of returnable/refillable containers, formulations that facilitate the removal of pesticide residues from packaging, and the use of bulk storage facilities. EPA must promulgate regulations for the design of containers which will ensure that pesticide containers will facilitate residue removal, safe use, disposal, and reuse of containers. In addition, EPA must issue regulations prescribing methods of removing pesticides from containers prior to disposal. FIFRA '88 also authorizes EPA to require labeling as described in paragraph B of this unit and to adopt regulations for the storage, transportation, and disposal of containers, rinsates, or other materials used to contain or collect excess or spilled pesticides which have been suspended or cancelled.

1. *Container and rinsate study.* The Agency is required to conduct a study of ways to encourage or require (1) the return, refill, and reuse of pesticide containers; (2) the development of pesticide formulations that facilitate removal; and (3) the use of bulk storage systems to reduce the number of containers for disposal. The Agency must consult with a wide range of affected and interested parties and must determine the feasibility and costs of the alternatives. A report of these findings must be submitted to Congress by December 1990. From Committee testimony and other Congressional guidance, the Agency interprets the container study mandate in broad terms, not limiting scrutiny to agricultural and commercial formulations and associated packaging. The Agency recognizes that certain formulations or packaging may promote the introduction of pesticide residues into the environment (such as leakage into ground water). The Agency believes that such configurations should be identified and eliminated, and that safer designs should also be identified and required.

The Agency will fulfill this requirement using contract support. Interested Federal and State agencies, environmental groups, and private industry met on December 7, 1988, to provide comments on the proposed contract. The contractor's findings will be used in support of planned regulatory changes affecting disposal, transportation, and storage.

2. *Pesticide container design.* By December 1991 the Agency must promulgate final regulations for the design of pesticide containers that will promote safe storage and disposal. The regulations must ensure that the container design facilitate (1) residue removal; (2) safe use (e.g., no "splash-back" or leakage); (3) disposal of containers; and (4) safe refill and reuse of containers.

The results of the container study described in this unit will be used in the formation of these regulations. Full compliance with the provisions of these regulations is required beginning December 1993. A Compliance Strategy will be developed and issued along with the regulations.

3. *Pesticide container residue removal.* By December 1991 the Agency must promulgate regulations prescribing procedures and standards for removal of pesticides from containers. The regulations may provide for: (1) Triple rinsing or the equivalent residue removal standards for pesticide removal; (2) procedures that can be implemented promptly for residue removal; (3) reuse/disposal of rinse water and residue; and (4) coordination of requirements under FIFRA with applicable provisions of the Resource Conservation and Recovery Act of 1976. Using the information gained from the container study, the Agency will promulgate Part 165 regulatory procedures that provide for the minimization or disposal of rinsates.

4. *State primacy.* Under section 26 of FIFRA, States which have approved compliance programs and enforcement procedures have primary enforcement responsibility for pesticide use violations, and under section 4, States with an approved certification plan are responsible for certifying pesticide applicators with respect to that State. Beginning in December 1988, States may not exercise primary enforcement responsibility under section 26 or certify applicators under section 4, unless the Agency finds that the State is carrying out an adequate program to ensure compliance with the new regulations pertaining to pesticide residue removal. A means of reviewing State compliance programs will be developed along with other regulatory revisions.

C. Data Requirements

FIFRA '88 further provides that EPA may require registrants to submit data regarding methods of safe storage and disposal of pesticides. The Agency intends to investigate what data requirements would be appropriate to effect safe storage for excess quantities of pesticide formulations. The Agency has also noted a lack of formulation-specific data on the best methods for disposal and the environmental fate of products that have been disposed of by various methods. The Agency is investigating what data requirement would be most useful and will amend the Part 158 registration data requirements as necessary.

VI. Recall, Storage, and Indemnification of Suspended and Cancelled Pesticides

Under FIFRA '88, if the Agency finds that recall of a pesticide which has been suspended and cancelled under section 6 is necessary to protect health or the environment, a recall must be ordered. The 1988 amendments also deleted from the law the requirement that EPA, upon request, must accept and dispose of suspended and cancelled pesticides at government expense. The costs of storage are now to be shared by the registrant and EPA according to a formula detailed by the Act. In addition, indemnification provisions are altered so that only end users and, under limited circumstances, certain dealers and distributors are automatically entitled to indemnification payments from EPA, and the cost is not to be borne by the Agency budget.

A. Recall Provisions

In general, if the registration of a pesticide has been suspended and cancelled and EPA finds that a recall is necessary, the Agency can initiate either a voluntary or a mandatory recall.

If EPA finds that a voluntary recall may be as safe and effective as a mandatory recall, the Agency must request the registrant to submit, within 60 days, a plan to recall the pesticide. EPA must order the registrant to conduct a recall in accordance with the plan unless the Agency determines after an informal hearing that the plan will not protect health or the environment.

The mandatory recall procedure, issued as a regulation, may require that registrants, distributors, or sellers of the pesticide (a) make storage facilities available to receive pesticides being recalled and inform the EPA Administrator of the location of each facility; (b) accept and store existing stocks of pesticides; (c) on request of persons holding such pesticides, provide transportation of the pesticide to a storage facility; and (d) take reasonable steps to inform holders of the pesticide of the recall regulations, provisions, and transportation arrangements. EPA will define the criteria for acceptable recall plans and all requirements that must be fulfilled through the adoption of regulations.

1. *Financial resources to conduct a recall.* EPA also is authorized to require registrants to give evidence of their financial and other resources demonstrating capability to carry out a prescribed recall and provide for the disposition of the pesticide in the event of suspension and cancellation. The Agency will examine this authority and propose the format and the circumstances where this authority can best be used.

B. Storage Cost Reimbursement

A registrant who wishes to become eligible for reimbursement of storage costs incurred as a result of a recall must submit a plan for storage and disposal of the pesticide that meets criteria established by EPA. The plan must be reviewed and approved by EPA. Through the formula for reimbursement set forth in FIFRA '88, both the Agency and the registrant are given an incentive to complete this process as expeditiously as possible. EPA is required to reimburse registrants for storage costs as follows:

(1) None of the costs incurred before the date of the submission of the plans to EPA.

(2) One hundred percent of the costs incurred after the date of the submission of an acceptable plan or the date of cancellation of the pesticide, whichever is later, but before the approval of the plan by EPA.

(3) Fifty percent of the costs incurred during the 1-year period beginning on the date of approval of the plan or the date of cancellation of the pesticide, whichever is later.

(4) None of the costs incurred during the 3-year period beginning 1 year after the approval of the plan or the date of cancellation, whichever is later.

(5) Twenty-five percent of the costs incurred during the period beginning with the 5th year following the approval of the plan or the date of cancellation, whichever is later, and ending on the date that a disposal plan for the pesticide can be implemented.

Although the provisions for storage reimbursement are generally self-executing, FIFRA '88 does state that any plan for storage and disposal must meet criteria established by EPA by regulation. These criteria will be established through regulations scheduled for completion in December 1991.

C. Indemnification Provisions

The new indemnification provisions require EPA to indemnify end users of pesticides that have been both suspended and cancelled by making payments from a general appropriation called the Judgement Fund (31 U.S.C. 1304), which is used to pay claims against the government. A buyer who is not an end user may obtain reimbursement from the seller of the pesticide for losses caused by either suspension or cancellation, of the registration. The seller must reimburse that buyer unless the seller gave written notice at the time of sale that reimbursement would not be provided. Pesticide dealers and distributors who own a quantity of pesticide which has been both suspended and cancelled are also entitled to reimbursement from the Judgement Fund if they suffer losses because the person who sold to them is insolvent (and that person had not previously given notice that reimbursement would not be provided). These provisions for payment from the Judgement Fund should result in less delay in payment of those entitled to indemnification than has been the case in the past.

Anyone else who suffers losses due to the suspension and cancellation of a pesticide may be reimbursed only if Congress provides a line-item appropriation for that purpose. This new provision was not intended to change EPA's existing obligation to indemnify owners of pesticides that were suspended and cancelled before FIFRA '88 went into effect. The Indemnification provisions of FIFRA '88 are effective on April 24, 1989.

D. Notice Requirements

Section 6 of FIFRA pertains to administrative review, suspension, and cancellation of pesticide registration. Under the new section 6(g) of FIFRA, various registrants, producers, sellers, distributors, and commercial applicators of pesticides which have been cancelled or suspended under FIFRA section 6 must notify the Agency and appropriate State and local governments of such possession, quantities, and the place held.

The Agency, working with the States, will explain how such notification should take place. A Federal Register

VOL 54 ISS 79 AP 26 1989 UMI

Notice will be published to communicate the notice requirements to the public.

VII. Compliance Provisions

FIFRA previously gave EPA the authority to require producers of pesticides to keep certain records regarding their products, including sale and distribution records, and the data that supported the registrations. Under FIFRA '88, EPA can extend these requirements for recordkeeping to registrants and applicants for registration as well.

FIFRA '88 also gives the Agency clear authority to issue regulations that limit the sale, distribution, and use of unregistered pesticides if necessary to prevent unreasonable adverse effects on the environment, and explicitly provides that violation of any such regulation is an unlawful act. Under the former law, the Agency's authority in this area and ability to take action against violators were not always clearly defined.

A. Books and Records

The Agency may prescribe regulations which require producers, registrants, and applicants for registration to keep records concerning their operations and the pesticides and devices produced, as necessary for effective enforcement of the Act. The current regulations at 40 CFR Part 169 will be revised (scheduled for completion in August 1991) to include registrants and applicants for registration.

B. Unregistered Pesticides

The Agency may, by regulation, limit the sale, distribution, and use of pesticides that are unregistered, or not covered by the provisions of an Experimental Use Permit (section 5) or Emergency Exemption (section 18), if necessary to prevent such activities from causing unreasonable adverse effects on the environment. The Agency, in consultation with States, will determine the need for regulations to address specific situations where the sale, distribution, or use of unregistered pesticides could result in environmental risk.

C. FIFRA Enforcement Response Policy

There are a number of other changes or additions to section 12 or FIFRA, Unlawful Acts. For example, it is now unlawful to:

(a) Refuse to prepare, maintain, or submit records or reports required by various sections of the Act. The current regulations at 40 CFR Part 169 will be revised (scheduled for completion in August 1991) to include registrants and applicants for registration.

(b) Violate suspension orders issued under sections 3(c)(2), 4, or 6.

(c) Fail to notify the Agency or appropriate state if in the possession of a cancelled or suspended pesticide.

(d) Submit false information to the Agency in support of a registration or relating to tests on a pesticide.

(e) Violate a regulation under section 3(a) or 19. A revised FIFRA Enforcement Response Policy will be produced to insure uniform enforcement of these provisions across all EPA regions. The revised policy is scheduled for completion in December 1989.

D. Criminal Penalties

Criminal penalties for knowingly violating any provision of FIFRA by a registrant, applicant for registration, or producer now include a fine of not more than $50,000 or imprisonment for not more than 1 year, or both.

Commercial applicators of restricted use pesticides or other pesticide sellers who knowingly violate the provisions of FIFRA are subject to fines of up to $25,000 or imprisonment for up to a year or both.

VIII. Scientific Advisory Panel

The Administrator's Scientific Advisory Panel (SAP), is a group of independent, non-government experts who convene to advise the Agency on major scientific issues under FIFRA. In the past the SAP was required to be reauthorized by Congress every 5 years. FIFRA '88 makes the SAP permanent.

IX. Communications

Successful implementation of FIFRA '88 will require effective communications on many levels. The Agency plans to communicate major decisions and significant activities according to individual Communication Strategies which will be developed for each action as it occurs. For example, some of the activities for which communications are already being planned are: the issuance of each list in Phase 1, establishment of front-end processing for expediting eligible applications, cancellations (both voluntary and for failure to comply), issuance of guidelines and regulations, major fee announcements, resolution of major issues, and individual active ingredient decisions.

In many cases, actions and decisions will be published in the **Federal Register**. FIFRA '88 requires publication in the **Federal Register** of the chemical lists, all regulations, and certain other notices. In addition, there may be other actions and notices that the Agency will publish in the **Federal Register** to increase their availability.

Communication strategies generally include announcements to the press, mailing information to interested parties, and telephone contact with key affected groups. The pesticide industry (chemical manufacturers, formulators, distributors, and retailers) and their support industries (such as laboratories); pesticide users (farmers, commercial applicators, institutions, and household users); the food industry (growers, processors, and retailers); and environmental and public interest groups, as well as individual concerned citizens—each has an interest in EPA's implementation of this new law. The Congress, EPA Regions, State and local governments, other Federal agencies, and international interests also must be kept informed.

The Agency has compiled an extensive mailing list of organizations known to be interested in various pesticide-related issues. Persons who have a particular interest in one or more planned activities and wish to have their names added to the mailing list may contact the Field Operations Division, Program Communications Branch at the address listed at the beginning of this notice under "**ADDRESS**" (telephone (703) 557–5017). The Agency also is interested in learning what specific types of information various groups would like to receive and suggestions on ways to improve communications among all interested parties.

A number of other activities are planned to help inform various interested groups and individuals. A fact sheet and informational charts describing the law have been distributed to EPA's regional offices, States, and other interested parties. The fact sheet has also been mailed to every pesticide registrant. The Agency plans to participate in seminars, conferences and meetings around the country where the subject of FIFRA '88 and related issues will be covered.

Dated: April 20, 1989.

Victor J. Kimm,

Acting Assistant Administrator for Pesticides and Toxic Substances.

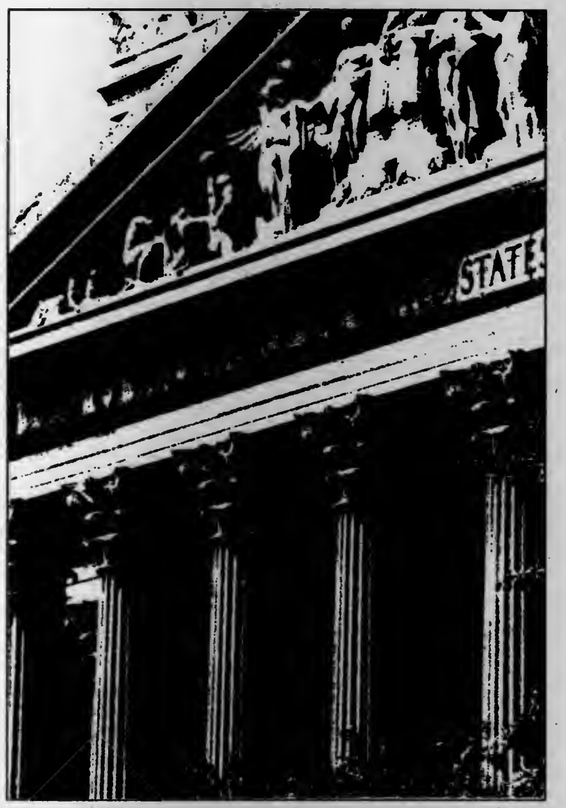
Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected



The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$21.00 per year

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$19.00 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers:
FR Indexes and the LSA (List of CFR Sections Affected) are mailed automatically to regular FR subscribers.

Briefings on How To Use the Federal Register—
For information on briefings in Washington, DC, and St. Louis, MO, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

VOL 54 ISS 80 AP 27 1989 UMI

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 54 FR 12345.

THE FEDERAL REGISTER

WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: May 23; at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC
RESERVATIONS: 202-523-5240

ST. LOUIS, MO

WHEN: May 23; at 9:00 a.m.
WHERE: Room 1612, Federal Building, 1520 Market Street, St. Louis, MO
RESERVATIONS: Call the Federal Information Center, St. Louis: 314-425-4106 Missouri (outside St. Louis): 1-800-392-7711 Kansas: 1-800-432-2934

Rules and Regulations

Federal Register
Vol. 54, No. 80
Thursday, April 27, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Food And Nutrition Service

7 CFR Part 246

Special Supplemental Food Program for Women, Infants and Children (WIC); Funds Use Flexibility for States Implementing Food-Cost-Cutting Systems

AGENCY: Food and Nutrition Service, USDA.

ACTION: Interim rule.

SUMMARY: This interim rule amends regulations governing the Special Supplemental Food Program for Women, Infants and Children (WIC) to comply with the mandates of Pub. L. 100–356, enacted June 28, 1988. First, the rulemaking allows State agencies entering the first fiscal year after implementing or significantly changing a competitive bidding, rebate, home delivery, or direct distribution system to carry forward into that fiscal year up to 5 percent of their food grants for the prior fiscal year, net of any food funds backspent or administrative and program services funds carried forward from that year. This authority incorporates, and is not in addition to, the previously established authority to carry forward a maximum of 1 percent of a State's total grant in any combination of food and administrative and program services funds. In the second fiscal year following the year of implementation or significant change to any of the specified food-cost-cutting systems, FNS may exercise discretion to permit a State agency to carry forward up to 5 percent of the State agency's food grant for the previous fiscal year, net of any funds carried forward or backspent under the 1-percent authority. Second, in addition to the authority to convert food funds to administrative and program services funds established by Pub. L. 100–237 and § 246.16(g) of the regulations, a State agency implementing or significantly changing any of the four specified food-cost-cutting systems may convert the amount of food funds necessary to limit to 2 percent any decrease in the State agency's administrative grant per person from one fiscal year to the next resulting from increased program participation due to the State agency's food-cost-cutting system. This additional conversion authority may be exercised beginning with the fiscal year immediately following the fiscal year in which the State last chose to exercise conversion authority established by § 246.16(g). Annual decreases are measured from the formulaic Administrative grant per person (AGP) for the fiscal year during which the State agency implemented or significantly changed its approved food-cost-cutting system. These funding assurances are intended to protect State agencies against the destablizing effects which may accompany implementation of a competitive bidding, rebate, home delivery, or direct distribution system.

DATES: This rulemaking is effective October 1, 1988. Eligible State agencies shall be able to exercise the expanded funds carry-over and conversion authority established by this rulemaking beginning with Fiscal Year 1989, based on the implementation of approved competitive bidding, rebate, home delivery, or direct distribution systems in Fiscal Years 1987 and 1988. Comments on this rulemaking must be received on or before June 26, 1989.

ADDRESS: Comments may be mailed to Ronald J. Vogel, Director, Supplemental Food Programs Division, Food and Nutrition Service, USDA, 3101 Park Center Drive, Room 1017, Alexandria, Virginia 22302. All written submissions will be available for public inspection at this address during regular business hours (8:30 a.m. to 5:00 p.m.) Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Ronald J. Vogel at the above address or at (703) 756–3746.

SUPPLEMENTARY INFORMATION:

Classification

This interim rule has been reviewed under Executive Order 12291, and has been determined not to be major. The Department does not anticipate that this rule will have an impact on the economy of $100 million or more. This rule will not result in a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions. Nor will this rule have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rule has been reviewed with regard to the requirements of the Regulatory Flexibility Act (5 U.S.C. 601–612). Pursuant to that review, the Administrator of the Food and Nutrition Service has certified that this interim rule does not have a significant economic impact on a substantial number of small entities. The reporting requirements established by this rulemaking are under review by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Pub. L. 100–356 became effective on June 28, 1988, the date of enactment. Both the funds carry-over mandate and the funds conversion mandate operate on a fiscal year basis, and both are funding mechanisms triggered by State agency behavior in the two immediately proceding fiscal years. Therefore, approved State food-cost-cutting efforts during Fiscal Years 1987 and 1988 must activate the new carry-over and conversion authorities beginning with Fiscal Year 1989. For this reason, the Administrator of FNS has certified that public comment on this rule and post-publication waiting period prior to implementation are impracticable and contrary to the public interest and that, therefore, good cause exists for making this rule effective immediately upon promulgation.

The provisions contained in this rule are all pursuant to legislative mandates and made effective in accordance with legislatively mandated effective dates. For these reasons, prior public comment and publication of this rulemaking not less than 30 days prior to the effective date is not required under 5 U.S.C. 553. However, the Department believes the administration of the rule may be improved by public comment. Therefore, comments are solicited on this rule for 60 days. All comments received will be

VOL
54

1989
UMI

analyzed, and any appropriate changes in the rule will be promulgated in a subsequent final rule.

This program is listed in the Catalog of Federal Domestic Assistance Programs under No. 10.557 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials (7 CFR Part 3015, Subpart V, and final rule-related notice published June 24, 1983 (48 FR 29114)).

1. Carrying Funds Forward From One Fiscal Year to the Next (Section 246.16(b)(3))

a. Reason for Legislative Increase in Carry-over Authority.—Encouraged in part by Pub. L. 100–237, significant numbers of State agencies have recently begun to implement food-cost-cutting systems. This legislation authorized State agencies to convert from food funds to administrative and program services funds a portion of the savings resulting from approved competitive bidding, rebate, home delivery, and direct distribution systems. This conversion process takes place to the extent that such State agencies increase participation with the savings generated by their systems and incur additional administrative costs in serving more participants. Beginning immediately upon implementation, these food-cost-cutting systems can generate large amounts of savings to be transformed into participation increases. The process of program expansion, however, is a gradual one which must be preceded by adequate planning and staffing adjustments, and which must take place in a controlled manner consistent with sound program management. State agencies may not be able to utilize all of the savings resulting from their food-cost-cutting systems as fast as such savings accrue. Therefore, they may have to return unspent food funds for reallocation.

Past program regulations have provided some protection to State agencies unable to utilize their food grants fully. FNS may reduce the base to which the 95-percent funds utilization test of § 246.16(e)(2) is applied, thus increasing the amount of food funds a State agency can leave unspent in one fiscal year without having its food grant reduced for the following fiscal year. FNS routinely affords this advantage to State agencies in the first year of implementation of their food-cost-cutting systems. In addition to this protection, State agencies have been able to backspend up to 1 percent of their food grants and carry forward up to 1 percent of their total grants in any combination of food and administrative and program services funding. The total amount transferred from any fiscal year cannot exceed 1 percent of the State agency's total WIC grant for that year. However, given the large amounts of savings State agencies can achieve through food-cost-cutting systems listed in Pub. L. 100–237, especially infant formula rebate systems, and the administrative complexities of using these savings to increase participation, Congress determined that the existent protections were insufficient.

b. Nature of Increased Carry-over Authority.—Therefore, section 3(b) of Pub. L. 100–356 increases the amount of unspent *food* funds a State agency can carry forward from one fiscal year to the next. This provision applies only to State agencies which have implemented or significantly changed any of the food-cost-cutting systems specified in Pub. L. 100–237, and only to funds carried forward from the first and second fiscal years following the fiscal year of implementation or significant change to such systems. Food-cost-cutting initiatives not referenced in Pub. L. 100–237, for example, price-based vendor selection systems or breast-feeding promotions, are not covered by the expanded carry-over provision of Pub. L. 100–356. This legislation provides, first, that the State agency may carry forward into the *first* fiscal year following the fiscal year of implementation of its system up to 5 percent of its food grant for the year of implementation. Within this limit, each State agency independently determines how much food funding it will carry forward. Into the second fiscal year following the fiscal year of implementation of its system, the State agency may request the permission of FNS to carry forward food funds beyond the 1 percent of its total grant which it is entitled by Pub. L. 100–237 to carry forward. In response to such a request, FNS may, at its discretion, permit the State agency to carry forward up to an amount equal to 5 percent of its food grant for the first year following the year of implementation.

c. Relationships between Increased Carry-over Authority and Previously Established Funds Transfer Authority.—Before discussing how FNS will respond to such requests, several features of the new 5-percent provision must be stressed and explained. First, this 5-percent limit *incorporates, and is not in addition to*, the previously established 1-percent limit. Under that limit, the State agency could backspend up to 1 percent of its food grant and carry forward in any combination of food and administrative and program services funds up to 1 percent of its total grant, provided that not more than 1 percent of its total grant could be transferred from any fiscal year. The following example includes carryover of administrative funds in order to illustrate all possible combinations of carryover even though, for reasons explained in section 1.d. of this preamble, State agencies which have converted food cost savings to administrative funds will not be able to carry administrative funds forward. Of the State agencies which have implemented any of the specified food-cost-cutting systems, only those which have not converted any part of the resultant savings during a fiscal year will be allowed to carry forward administrative and program services funds from that fiscal year.

Consider the State agency which receives a total WIC grant—including funds allocated for food costs and for administrative and program services costs—of $100. Of this total, $80 is allocated for food and $20 for administration. Under previously established regulatory authority, the State agency can carry forward up to 1 percent, or $1, of its total grant in any combination of food and administrative funds. Since only this 1-percent provision, and not the 5-percent provision, covers administrative funding, the State agency can carry forward a maximum of $1 in administrative and program services funds. Under the newly established 5-percent authority, the State agency can carry forward a maximum of 5 percent of its food grant, or $4. This maximum carry-over of food funds is reduced by any administrative funding the State agency elects to carry over and any funds it elected to backspend. If a State agency carries forward the maximum of $1 in administrative funding, its food funds carry-over is reduced to $3 ($4.00—$1.00=$3.00). If it decides to bring $.50 of its administrative monies into the following fiscal year, it cannot carry forward more than $3.50 in food funds ($4.00—$.5=3.50). If the State backspent $.50 in food funds and opts to carry forward $.25 in administrative and program services funds, it can carry forward a maximum of $3.25 in food funds ($4.00—$.50—$.25=$3.25).

In referring to "not more than 5 percent of the funds allocated under this section to such a State agency for supplemental foods," Congress in Pub. L. 100–356 makes it unequivocally clear that the expanded carry-over authorized by the 5-percent provision applies only to funds allocated to the State agency

for food costs and does not increase the percentage of administrative and program services funds which can be carried over into the succeeding fiscal year. The maximum amount of administrative funds that can be carried forward remains unchanged, as previously established by the 1-percent provision of Pub. L. 99–500 and 99–591. As indicated in the above example, even though the State agency is covered by the new 5-percent provision, it still cannot carry forward more than 1 percent of its total grant, or $1, in administrative and program services funds.

d. Clarification of Authority to Carry Forward Administrative and Program Services Funds.—Pub. L. 100–237 established a restriction on the carry-over of administrative funding that is clarified in this interim rulemaking. In 1986, when Pub. L. 99–500 and 99–591 established the 1-percent carry-over authority, *all* State agencies could be expected from time to time to end a fiscal year with unspent administrative funds. Therefore, the 1-percent carry-over provision applied without restriction to any combination of administrative and program services and food funds. Subsequently, in January 1988, section 8(a) of Pub. L. 100–237 provided that State agencies instituting specified food-cost-cutting systems could convert part of the savings achieved through such systems to administrative funding "for the cost of the State and local agencies associated with increases in the number of persons served." Thus such funds conversion can take place only to the extent that, in the process of increasing participation, the State agency incurs administrative and program services costs in excess of its administrative grant and any administrative funds it may have carried forward into the fiscal year. (This limitation is stated in a new § 246.16(i), which is discussed later in the preamble.) A State agency which converts funds during a fiscal year could not possibly have unspent administrative and program services funds at the end of that fiscal year since funds can only be converted to cover actual costs incurred. Therefore, § 246.16(b)(3)(ii) of this interim rule clarifies that a State agency cannot carry forward administrative and program services funds from a fiscal year during which it engaged in funds conversion under the authority of Pub. L. 100–237 and § 246.16(g) of program regulations. (As will be explained later in this preamble, the same prohibition applies to carry-over of administrative funding from a fiscal year during which a State agency exercises conversion authority under Pub. L. 100–356 and § 246.16(h) of program regulations.)

e. Increased Carry-over Authority in the *Second* Year Following the Year of Food-cost-cutting System Implementation.—As indicated above, expanding the maximum amount of food funds that a State agency can carry forward into the *second* year following the year of implementation of a food-cost-cutting system is an option available to FNS under Pub. L. 100–356. At their own discretion, State agencies can carry forward up to 1 percent of their total program grants. Entering the second year after the year of implementation, FNS decides how much beyond this 1 percent the State agency can bring forward in food funds, the maximum possible carry-over being the difference between 5 percent of the State agency's food grant and any amount of food funds backspent and administrative funds to be carried over. In making this determination, FNS will consider the following four factors:

(1) The number of months the approved food-cost-cutting system operated prior to the fiscal year for which the conversion request is being made. A State agency which has had fewer total months of operation will be more susceptible to the effects of the lag between generation and utilization of food cost savings. Thus it may have greater need to carry forward unspent food funds.

(2) The combined level of penetration of WIC and the Commodity Supplemental Food Program (CSFP) into the State's WIC-eligible population during the fiscal year from which funds would be carried forward. State agencies with a lower penetration can be expected to expand participation faster, and thus to have less need to carry forward food funds than States with higher penetration levels.

(3) The cost reduction achieved by the State agency, net of any funds conversion, during the fiscal year from which the State requests to carry funds forward. A State agency achieving a net savings per can of infant formula of $.98, for example, will be more likely to need expanded carry-over authority than a State agency saving only $.60 per can.

(4) The combined net increase in the participation of women, infants and children in WIC and CSFP in the State during the fiscal year from which the State agency requests to carry funds forward. A State agency which achieved all, or almost all, of the potential for program expansion due to its food-cost-cutting system in the first year of implementation should have less need to carry forward extra food funds from the year following the year of implementation. Regarding States which operate CSFP as well as WIC, FNS will consider the combined net increase in the participation of women, infants and children in the two programs. States in which increased WIC participation has been offset by decreases in the number of women, infants and children participating in CSFP have not established a record of effort which would justify a request for expanded carry-over authority.

f. Timeframes for Increased Carry-over Authority in *Second* Year Following Year of Implementation of Food-cost-cutting System.—State agencies requesting this 5-percent carry-over authority must file written requests, including such information as FNS may require, by January 15 of the fiscal year into which funds would be carried forward. FNS will notify the State agency of its decision concerning the request within 30 days of receipt. These timeframes provide the State agency with adequate time and data upon which to assess its need to carry funds forward. FNS is also assured of adequate time to consider complete data for the previous fiscal year in making its determination. Once notified of this decision, the State agency will, in turn, be able to file its final expenditure report (FNS–269) by the March 1 deadline.

g. Timeframes for Increased Carry-Over Authority in *First* Year Following Implementation of Food-Cost-Cutting Systems, and for Previously Established Funds Transfer Authority.—State agencies which have elected to exercise their right to carry forward and backspend up to 1 percent of their total grants are required to inform FNS in writing of their decision not later than March 1 of the fiscal year following the fiscal year from which funds will be transferred. State agencies exercising their discretion to carry over up to 5 percent of their food grants from the year of implementation of their food-cost-cutting system are also required to inform FNS by this same date. Since these carry-over authorities are exercised unilaterally by State agencies, without FNS involvement, the time available to them to assess their needs should be bounded only by the deadline for submission of the final expenditure report (FNS–269) for the preceding fiscal year.

2. Conversion of Food Funds to Limit Reduction in Administrative Grant Per Participant (Section 246.16(h))

a. Reason for, and Nature of, Legislative Change.—As increasing numbers of State agencies implement food-cost-cutting systems, an unchanging percentage of the WIC appropriation allocated for administrative and program services costs will have to meet the administrative needs of a program in which food funds are spent more efficiently each year, resulting in the need to spread administrative resources over a continually expanding program participation. Thus the administrative grant per participant (AGP) provided after the administrative funding formula begins to account for participants added as a result of food-cost-cutting systems may be less than the conversion rate which had up to that time generated administrative funding for the new participants. For this reason, a State agency may experience significant reductions in its administrative grant per participant in the years after it ceases to exercise conversion authority under Pub. L. 100–237 and § 246.16(g) of regulations.

In order to compensate for this phenomenon, section 3(a) of Pub. L. 100–356 permits a State agency to convert whatever amount of food funds is necessary to limit to 2 percent any decrease in the State agency's AGP if a larger decrease would otherwise result from increased program participation due to implementation of, or significant change to, an approved competitive bidding, rebate, home delivery, or direct distribution system. This provision confers a second funds conversion authority in addition to that established in Pub. L. 100–237 and § 246.16(g), to be activated when it becomes more advantageous than the first authority in connection with a given system or significant change.

b. Activating 2-Percent Authority.—It is clear that the 2-percent conversion authority was not meant to operate concurrently with the previously established authority in response to a single State initiative or significant change to an initiative. The original conversion authority reduced the number of participants that can be added as the result of a food-cost-cutting system. Concurrent implementation of 2-percent conversion would cause an additional drain on the same source of food funds savings and a consequent further retardation of program expansion. Furthermore, the two conversion authorities would partially offset each other. Funds withdrawn from food savings to limit the reduction in AGP would reduce the State agency's program expansion potential and thus its conversion earnings under § 246.16(g).

If a State agency has not exercised 2-percent conversion authority in a previous fiscal year, the State agency's maximum conversion authority for the current fiscal year will be the greater of: (1) The amount generated through participation increases under § 246.16(g), and (2) the amount of 2-percent authority available under § 246.16(h).

As stated earlier, conversion authorities in §§ 246.16 (g) and (h) do not operate concurrently with respect to *the same* food-cost-cutting initiative or change to a food-cost-cutting initiative. However, the two types of conversion can take place in the same fiscal year, each in connection with *a different* initiative or change. Consider, for example, a State agency which implemented its infant formula rebate system in Fiscal Year 1987 and last exercised conversion authority under § 246.16(g) in Fiscal Year 1988. It begins to convert funds under the 2-percent protection provision of § 246.16(h) in Fiscal Year 1989, yet in that same fiscal year it also makes a significant change to its infant formula rebate system, thus triggering conversion privileges under § 246.16(g) again. In this situation, the two conversion authorities are additive rather than mutually exclusive. FNS will, for accounting purposes, consider the 2-percent authority to have been exhausted before attributing any funds conversion to § 246.16(g) activity.

It should also be noted that 2-percent authorities stemming from separate food-cost-cutting initiatives implemented in *different* fiscal years can be applicable in *the same* fiscal year. For example, consider the State agency which implemented an infant formula rebate system in Fiscal Year 1987 and significantly changed the system in Fiscal Year 1988. Fiscal Year 1989 could be its second year of 2-percent authority based on implementation of the rebate system and its first year of implementation based on system changes. In this event, FNS will apply whichever base year is most advantageous to the State agency in the comparsion of AGP's.

As with funds converted under Pub. L. 100–237, 2-percent conversions under Pub. L. 100–356 are permissible only to the extent that administrative costs are incurred in excess of the State agency's administrative grant and any administrative funds the State agency may have carried forward into the fiscal year. Therefore, there cannot be any unspent administrative funds available for carry-over from a fiscal year in which 2-percent authority has been exercised.

c. Computation of 2-Percent Conversion Authority.—Within 30 days of establishment of an eligible State agency's administrative grant under § 246.16(c)(3) (i)–(iii), if the State agency has experienced a decrease in its formulaic AGP of greater than 2 percent, FNS will provisionally notify the State agency of the maximum amount it can convert. This amount will be determined by comparing the State agency's formulaic AGP for the current fiscal year with its adjusted formulaic AGP for the year it implemented or significantly changed its food-cost-cutting system (i.e., the base year). The base year AGP has been selected as the reference for calculating the 2 percent authority because it represents an AGP unaffected by the significant participation increases that are realized subsequent to significant food cost savings. Selecting an AGP for any later period of time as a reference point allows very limited AGP protection because increases in participation would already have placed major downward pressure and a State's AGP. Therefore, this option was rejected.

AGP derives from the administrative funding formula and equals the quotient of the State agency's administrative grant, including any discretionary funding received under § 246.16(c)(3)(iii), divided by the FNS projection of the State agency's participation for the fiscal year under § 246.16(c)(3)(ii)(B). The same process will be repeated for each succeeding year after the State agency's grant is determined. Pub. L. 100–356 enables State agencies through this additional conversion authority to limit decreases in their formulaic AGP to 2 percent per year. The AGP level to be protected through conversions (i.e., protected AGP) is established by multiplying the formulaic AGP for the year in which the approved cost containment initiative was implemented or significantly changed (i.e., base AGP) by .98 for each fiscal year after this base fiscal year, ending with the fiscal year to which the conversion authority is being applied. The product of each such calculation is the *adjusted* base AGP for the following calculation. A 2-percent reduction in the base AGP is allowed *per year* prior to implementing the 2-percent authority for two reasons. First, as indicated above, Pub. L. 100–356 allows for this level of decline each year. Secondly, to measure the 2-percent protection without considering

intervening years would unduly protect States implementing any of the specified food-cost-cutting initiatives (i.e., competitive bidding, rebates, home delivery, and direct distribution) as compared with States operating other cost containment systems which also permit expanded participation.

The formula for computing the annual maximum that can be converted under this new authority during a fiscal year can be represented as follows:

(1) Formulaic AGP for the fiscal year in which the system was implemented or significantly changed *times* .98, repeating this calculation for each fiscal year thereafter, up to and including the fiscal year to which the new conversion authority is being applied;

(2) Product of step 1 *minus* formulaic AGP for the fiscal year to which conversion authority is being applied; and

(3) If remainder from Step 2 is positive, remainder from Step 2 *times* FNS average monthly participation projection per § 246.16(c)(3)(ii)(B) for the State for the year to which the conversion authority is being applied *times* 12 months *equals* maximum amount to be converted for the fiscal year.

Consider, for example, a State agency which implemented its infant formula rebate system in Fiscal Year 1987, when its formulaic AGP was $8.49. It completed its conversions based on added participants in Fiscal Year 1988 and becomes eligible for the new 2-percent conversion authority in Fiscal Year 1989, for which its formulaic AGP is $7.85. For Fiscal Year 1989, FNS projects an average monthly participation level of 60,000 for the State.

(1) To establish the protected AGP, first multiply the formulaic AGP for the base fiscal year, 1987, by .98, yielding an adjusted base AGP ($8.49×.98=$8.3202). Then repeat this calculation, using the adjusted Fiscal Year 1988 base AGP ($8.3202×.98=$8.1538). This yields the protected AGP for Fiscal Year 1989. The calculation is done twice because the fiscal year in which the new conversion authority is being applied follows the base fiscal year by two fiscal years.

(2) The protected AGP exceeds the AGP for the fiscal year in which conversion authority is being applied ($8.1538−$7.85=$.3038).

(3) Therefore, for Fiscal Year 1989, the State agency will be able to convert under Section 246.16(h) a maximum of $218,736 (i.e., .3038×60,000×12=$218,736).

Assuming for the second year of implementation of this new conversion authority a formulaic AGP of $7.35 and a participation projection of 63,000, the maximum conversion for the year would be calculated as follows:

(1) $8.49×.98=$8.3202×.98=$8.1538×.98=$7.991

(2)$7.991−$7.35=$.6407

(3)$.6407×63,000×12=$484,369.

Formulaic AGP for the current fiscal year will be recalculated and the 2-percent limit adjusted accordingly once during the fiscal year in response to reallocations which take place before the end of the third quarter, except that this adjustment will not be made when it would result in a reduction of the State's 2-percent conversion limit. FNS will notify the State agency of any such adjustment not later than July 31.

If a State agency has converted funds under § 246.16(h)(1)–(2) in a previous fiscal year, it must, within 30 days of being informed regarding its conversion limit, tell FNS whether it intends to exercise this conversion authority during the fiscal year. FNS will incorporate this information into its system for tracking States' program funds utilization.

3. Limit on Funds Conversion (Section 246.16(i))

Section 8(a) of Pub. L. 100–237 provided that State agencies can convert part of the savings resulting from specified food-cost-cutting systems to administrative funding "for the cost of the State and local agencies associated with increases in the number of persons served." Thus States can convert funds under this authority only to the extent that they have allowable administrative and program services costs in excess of their administrative grants and any administrative funding they may have carried forward from the preceding fiscal year. Pub. L. 100–356 provided for additional conversion authority to augment that authorized by Pub. L. 100–237. It follows that this authority should be exercised only to the extent that allowable administrative costs would not otherwise be covered. Whether the two conversion authorities are exercised sequentially pursuant to a single food-cost-cutting initiative or concurrently based on different initiatives, funds can be converted only to cover costs which remain unpaid after the State agency's administrative grant and any administrative carryover funds have been exhausted.

4. Conforming Amendments.

Section 246.16(g)(7) of the previous final rules addressed reconciliation of funds converted and maximum conversion authority. Section 246.16(g)(8) established that the funds conversion process would not affect food and administrative stability grants for the following fiscal year. These provisions were restricted to conversion authority based on participation increases. With the addition of 2-percent conversion authority in this interim rule, it has become necessary to make these provisions applicable to both types of conversion. In order to reflect established FNS procedures, the latter provision is also now applied to conversions under § 246.14(e). To effect these changes, §§ 246.16(g) (7) and (8) have been amended and moved to become Sections 246.16 (j) and (k).

List of Subjects in 7 CFR Part 246

Food assistance programs, Food donations, Grant programs—Social programs, Infants and children, Maternal and child health, Nutrition education, Public assistance programs, WIC, Women.

For reasons set forth in the preamble, 7 CFR Part 246 is amended as follows:

PART 246—SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS AND CHILDREN

1. The authority citation is revised to read as follows:

Authority: Sec. 212 and 501, Pub. L. 100–435, 102 Stat. 1645 (42 U.S.C. 1786); sec. 3, Pub. L. 100–356, 102 Stat. 669 (42 U.S.C. 1786); sec. 8–12, Pub. L. 100–237, 101 Stat. 1733 (42 U.S.C. 1786); sec. 341–353, Pub. L. 99–500 and 99–591, 101 Stat. 1783 and 3341 (42 U.S.C. 1786); sec. 3, Pub. L. 95–627, 92 Stat. 3611 (42 U.S.C. 1786); sec. 203, Pub. L. 96–499, 94 Stat. 2599 (42 U.S.C. 1786); sec. 815, Pub. L. 97–35, 95 Stat. 521 (42 U.S.C. 1786).

2. In § 246.14, paragraph (a)(2) is revised to read as follows:

§ 246.14 Program costs.

(a) * * *

(2) Except as provided in paragraph (e) of this section and §§ 246.16(g) and 246.16(h) of this part, funds allocated by FNS for food purchases may not be used to pay administrative and program services costs. However, administrative and program services funds may be used to pay for food costs.

* * * * *

2. In § 246.16:

a. Paragraph (b)(2) is amended by removing all text after the first sentence.

b. Paragraph (b)(3) is redesignated as paragraph (b)(4);

c. A new paragraph (b)(3) is added;

d. The title of paragraph (g) is revised;

e. Paragraphs (g)(7) and (g)(8) are removed; and

f. New paragraphs (h), (i), (j), and (k) are added.

VOL
54
ISS
80
AP
27

The revisions and addition read as follows:

§ 246.16 Distribution of funds.

* * * * *

(b) * * *

(3) A State agency may transfer funds allocated to it for one fiscal year to another fiscal year under the following conditions:

(i) Not more than 1 percent of the funds allocated to a State agency for food costs incurred in any fiscal year may be expended by the State agency for food costs incurred in the preceding fiscal year;

(ii) Not more than 1 percent of the total funds allocated to a State agency for food costs and for administrative and program services costs in any fiscal year may be carried forward and expended by the State agency for such costs incurred in the subsequent fiscal year, except that State agencies which converted food funds to administrative and program services funds under paragraphs (g) or (h) of this section during a fiscal year shall not carry administrative and program services funds forward into the following fiscal year.

(iii) The total amount of funds transferred from any fiscal year under paragraphs (b)(3)(i) and (b)(3)(ii) of this section shall not exceed 1 percent of the funds allocated to a State agency for the fiscal year.

(iv) A State agency which has implemented any of the food-cost-cutting systems specified in introductory paragraph (g) of this section may carry forward into the fiscal year following the fiscal year of implementation a maximum of 5 percent of the funds allocated to the State agency for food costs for the fiscal year of implementation of such system, less any food funds backspent under paragraph (b)(3)(i) of this section and any food and administrative and program services funds carried forward from the fiscal year under paragraph (b)(3)(ii) of this section.

(v) Upon request from a State agency entering the second fiscal year following the fiscal year of implementation of any food-cost-cutting system listed in introductory paragraph (g) of this section, FNS may, at its discretion, permit such State agency to carry forward from the first fiscal year following implementation up to 5 percent of the funds allocated to such State agency for food costs for such fiscal year. The maximum amount of food funds allowed to be carried forward shall be net of any food funds backspent under paragraph (b)(3)(i) of this section and any food and administrative and program services funds which such State agency has elected to carry forward from such fiscal year under authority of paragraph (b)(3)(ii) of this section. The State agency shall provide such justification for its request to carry forward funds under this paragraph as FNS may require. In determining how much, if any, funding the State agency may carry forward, FNS shall consider the following factors:

(A) The number of months the State agency operated and approved food-cost-cutting system prior to the fiscal year for which the request for carry-over authority under paragraph (b)(3)(v) of this section is being made;

(B) The combined level of penetration of WIC and CSFP during the fiscal year preceding the fiscal year for which the request is made into the population that FNS estimates is eligible for WIC in the State;

(C) The cost reduction achieved by the State agency through its approved system, less any funds converted under paragraphs (g) and (h) of this section, during the fiscal year preceding the fiscal year for which the request is made; and

(D) The combined net increase in the participation of women, infants and children in WIC and CSFP achieved by the State agency during the fiscal year preceding the fiscal year for which the request is made.

(iv) The State agency shall specify in writing to FNS the amount of funds it intends to backspend under paragraph (b)(3)(i) of this section and to carry forward under paragraphs (b)(3)(ii) and (b)(3)(iv) of this section not later than March 1 of the fiscal year following the fiscal year from which funds are to be transferred. The State agency shall specify in writing to FNS the amount of funds it requests permission to carry forward under paragraph (b)(3)(iv) of this section by January 15 of the fiscal year into which the funds are requested to be transferred. FNS will notify the State agency of its decision regarding a request filed under paragraph (b)(3)(iv) of this section within 30 days of receipt of such request.

(vii) Food funds transferred by the State agency from one fiscal year to another shall be used by the State agency only for food costs in the subsequent fiscal year and, in accordance with Section 246.14(a)(2) of this part, shall not be used to cover administrative and program services costs. Any funds carried forward by the State agency for expenditure in the subsequent fiscal year shall not affect the amount of funds allocated to such State agency for the subsequent fiscal year. FNS shall presume that any funds carried forward are the first funds expended by such State agency for costs incurred in the subsequent fiscal year.

* * * * *

(g) *Conversion of food funds needed to manage increased participation.* * * *

(h) *Conversion of food funds needed to limit decreases in administrative grant per participant.* In addition to conversion authority established under paragraph (g) of this section, a State agency which has implemented or significantly changed an approved food-cost-cutting system listed in paragraph (g) of this section may convert from food funds to administrative and program services funds whatever amount FNS specifies is necessary to limit to 2 percent any reduction in the State agency's formulaic administrative grant per participant from one fiscal year to the next resulting from increased participation made possible by the State agency's approved system.

(1) The State agency may convert funds under this paragraph beginning with the fiscal year immediately following the fiscal year in which it last converted funds under authority of paragraph (g) of this section.

(2) FNS will determine the maximum amount the State agency can convert during a fiscal year through the following procedure, based on a comparison of the State agency's formulaic administrative grant per participant for the fiscal year in which it implemented or significantly changed its approved food-cost-cutting initiative, (that is, the quotient of the State agency's administrative and program services grant under paragraphs (c)(3)(i)–(iii) of this section, divided by FNS' projection of the State agency's average monthly participation under paragraph (c)(3)(ii)(B) of this section) with its administrative grant per participant for the current fiscal year.

(i) Formulaic administrative grant per participant for the fiscal year in which the State agency implemented or significantly changed its approved food-cost-cutting system times .98, repeating this calculation for each fiscal year thereafter, up to and including the current fiscal year. The product of each such multiplication shall be used in the succeeding multiplication;

(ii) Final product of paragraph (h)(2)(i) of this section minus formulaic administrative grant per participant for the current fiscal year;

(iii) Remainder from paragraph (h)(2)(ii) of this section times FNS' projection of average monthly participation for the current fiscal year per paragraph (c)(3)(ii)(B) of this section times 12 equals the maximum amount the State agency may convert under this paragraph during such fiscal year.

(3) The following timeframes shall apply to the conversion process under this paragraph:

(i) FNS will notify the State agency of the maximum amount it can convert under paragraphs (h)(1)–(2) of this section within 30 days of announcing the State agency's administrative grant, including any discretionary administrative funding provided under paragraph (c)(3)(iii) of this section;

(ii) If a State agency has converted funds under paragraphs (h)(1)–(2) of this section in a previous fiscal year, it shall, within 30 days of the notification in paragraph (h)(3)(i) of this section, notify FNS if it intends to exercise such authority in the current fiscal year;

(iii) FNS will make one annual adjustment of the State agency's conversion limit under paragraphs (h)(1)–(2) of this section to reflect any reallocations under paragraphs (f) of this section which take place before the end of the third quarter, except that FNS will not reduce a State agency's limit in response to reallocations. FNS will notify the State agency of any increase in its conversion limit not later than July 31.

(4) If a State agency is eligible to convert funds under both paragraphs (h)(1)–(2) and (g) of this section during the same fiscal year based on different food-cost-cutting systems or significant changes to such systems, FNS will consider the maximum allowable amount to have been converted under this paragraph before attributing any funds conversion to the authority established by paragraph (g) of this section.

(5) If a State agency has not exercised conversion authority under paragraphs (h)(1)–(2) of this section in a previous fiscal year, the State agency's maximum conversion authority for the current fiscal year shall be the greater of:

(i) The amount of conversion authority generated through participation increases under paragraph (g) of this section; and

(ii) The amount of conversion authority available under paragraphs (h)(1)–(2) of this section.

(6) If a State agency is eligible in the same fiscal year to convert funds under paragraphs (h)(1)–(2) of this section based on food-cost-cutting systems implemented or significantly changed in different fiscal years, FNS will use in the comparison of administrative grants per participant the base fiscal year which yields the greater conversion authority for the State agency.

(i) The State agency may convert food funds to administrative and program services funds under paragraphs (g) and (h) of this section only to the extent necessary to cover allowable administrative and program services costs which exceed the State agency's administrative and program services grant for the fiscal year and any administrative and program services funds which the State agency has carried forward into the fiscal year.

(j) After the end of the fiscal year, FNS will determine the amount of food funds which the State agency is entitled to convert to administrative and program services funds under paragraphs (g) and (h) of this section. In the event that the State agency has converted more than the permitted amount of funds, FNS will recover from the State agency the amount of excess conversion.

(k) For purposes of establishing a State agency's stability food grant and stability administrative and program services grant under paragraphs (c)(2)(i) and (c)(3)(i) of this section, respectively, amounts converted from food funds to administrative and program services funds under paragraphs (g) and (h) of this section and § 246.14(e) of this part during the preceding fiscal year shall be treated as though no conversion had taken place.

G. Scott Dunn,

Acting Administrator.

Dated: April 20, 1989.

BILLING CODE 3410-30-M

Agricultural Marketing Service

7 CFR Part 906

[Docket No. FV-89-017]

Oranges and Grapefruit Grown in the Lower Rio Grande Valley in Texas; Relaxation of the Requirements Governing the Shipment of Oranges and Grapefruit to Approved Citrus Processors

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule allows handlers to ship Texas oranges and grapefruit not meeting minimum grade and size requirements to approved processors for manufacturing into fresh sections and fresh juice without preservative treatment. This rule also adds new safeguards, which firms must meet to become approved processors under the order, so that lower quality fruit could be safely shipped for these purposes without being diverted to fresh markets. These changes are designed to expand markets for Texas oranges and grapefruit by permitting fruit to be shipped for use in fresh sections and fresh juice products.

EFFECTIVE DATE: April 27, 1989.

FOR FURTHER INFORMATION CONTACT: Gary D. Rasmussen, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525-S, Washington, DC 20090-6456; telephone: (202) 475-3918.

SUPPLEMENTARY INFORMATION: This final rule is issued under the Marketing Agreement and Marketing Order No. 906, as amended (7 CFR Part 906), regulating the handling of oranges and grapefruit grown in the Lower Rio Grande Valley in Texas. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 78 handlers of Texas oranges and grapefruit subject to regulation under the Texas citrus marketing order, and approximately 2,500 orange and grapefruit producers in Texas. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of these handlers and producers may be classified as small entities.

The Texas Valley Citrus Committee (committee), which administers the

VOL. 54 ISS 80 AP 27 1989 UMI

order locally, unanimously recommended that §§ 906.120 and 906.123 of the rules and regulations be amended to relax the marketing order requirements for Texas oranges and grapefruit shipped to approved processors for manufacturing into fresh citrus sections and fresh juice. A proposed rule regarding this recommendation was issued March 2, 1989, and published in the **Federal Register** (54 FR 9455, March 7, 1989). The proposed rule provided that interested persons could file public comments through March 22, 1989. No comments were received.

Currently, Texas oranges and grapefruit shipped to approved processors for manufacturing into fresh citrus sections and fresh juice are exempt from handling requirements and assessment obligations under the order if such fruit is preserved by a recognized commercial process. This rule removes the required preservative treatment as a condition for exemption. This will enable handlers to ship fruit not meeting minimum grade and size requirements, such as packinghouse eliminations, to approved processors for conversion into sectioned fruit or fresh juice without preservative treatment. Unless exempted, fresh fruit shipped out of the production area must meet minimum grade, size, and container and pack requirements, and be inspected and certified as meeting the minimum grade and size requirements. In addition, handlers must pay assessments to the committee on such shipments.

This rule also includes safeguards, in addition to those currently specified, to help prevent such fruit from being diverted to fresh market outlets. These new safeguards require the processor, as a condition of approval, to agree to random facility inspections and to certify that the firm has no facilities, equipment, or outlet to repack or sell the fruit in fresh form. These safeguards will enable the committee to monitor approved processors and their facilities to help make sure that exempted fruit was not diverted to the fresh market. The new safeguards also require approved processors, when buying Texas oranges and grapefruit for processing, to hold a license issued under the Perishable Agricultural Commodities Act (PACA), 1930 (7 U.S.C. 499r), and regulations (other than rules of practice) issued under the PACA (7 CFR Part 46). The foregoing statute references have been modified from those in the proposal for clarification and accuracy. This requirement is designed to help make sure that the processor will comply with the requirements which must be met by approved processors under the order. The PACA requires that merchants, dealers and brokers involved in buying, selling, negotiating sales, purchasing or handling consignments of fruits and vegetables in interstate or foreign commerce must be licensed in accordance with the provisions of the PACA. Most of the firms which will apply to the committee to become approved processors under the marketing order will already have a PACA license because they will be performing activities covered under the PACA.

The committee believes that the removal of the current processing limitations for sections and juice will provide additional outlets for fruit not meeting minimum grade and size requirements and promote utilization of the crops. This action should also allow additional firms without pasteurizers and other capital intensive equipment to become approved processors. The committee also believes that with the additional safeguards, exempted fruit can be shipped for these purposes without being diverted to the fresh market.

The industry is gradually recovering from the devastating freezes of the early 1980's. The objective of this action is to expand markets for Texas oranges and grapefruit by permitting fruit not meeting marketing order grade and size requirements to be shipped to processors for the manufacture of fresh juice and sections without preservative treatment.

Section 906.120 of the regulations issued under the order defines the term "processing" and provides for exempting fruit for processing from the provisions of §§ 906.34 and 906.40 of the order, if the fruit is handled in accordance with the provisions of § 906.123. This action will redefine the term "processing" to include in that definition fruit converted into fresh sections and fresh juice. Section 906.123 of the regulations issued under the order defines the term "approved processor" and establishes safeguards which persons must meet to be recognized as approved processors by the committee. This action redefines the term "approved processor" and establishes the additional safeguards which processors must meet to be approved by the committee in order to handle exempted fruit.

Sections 906.120 and 906.123 were issued on a continuing basis subject to modification, suspension, or termination by the Secretary. The committee meets from time to time to consider recommendations for modification, suspension, or termination of the rules and regulatory requirements for Texas oranges and grapefruit. Committee meetings are open to the public and interested persons may express their views at these meetings. The Agricultural Marketing Service reviews recommendations and other information submitted by the committee as well as other available information, and determines whether modification, suspension, or termination of the regulatory requirements will tend to effectuate the declared policy of the Act.

Texas orange and grapefruit shipments to markets in the United States, Canada, and Mexico are regulated under this marketing order. Certain shipments are exempt from the handling requirements effective under the marketing order. Handlers may ship oranges and grapefruit within the production area (the counties of Cameron, Hidalgo, and Willacy) exempt from all marketing order requirements. Grapefruit shipped in gift packages of not more than 500 pounds which are individually addressed and not for resale are exempt from handling requirements. Also, oranges and grapefruit shipped under the minimum quantity exemption provisions, and for relief, charity, and home use are exempt under certain conditions. In addition, oranges and grapefruit shipped to approved processors for conversion into canned or frozen products are not subject to the handling requirements.

Therefore, the Department's view is that the impact of this action will be beneficial to producers and handlers because it will enable handlers to expand the markets for Texas oranges and grapefruit by shipping additional supplies of fruit to approved processors for conversion into fresh sections and fresh juice without preservatives.

Based on the above, the Administrator of AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

There would be no change in the reporting or recordkeeping requirements as the result of this action that will require submission of such requirements to the Office of Management and Budget (OMB) for approval. The information collection requirements contained in the regulations which are being amended have been approved previously by OMB under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB Control Number 0581–0068.

Pursuant to 5 U.S.C. 553, it is found that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because: (1) Handlers of Texas oranges and grapefruit are aware of this action, which is based on a unanimous recommendation of the committee made at a public meeting, and they are prepared to operate in accordance with the requirements; (2) shipment of the 1988–89 season Texas orange and grapefruit crops is currently underway; (3) this action needs to become effective promptly so that it will apply to as much of the 1988–89 season crop as possible; (4) this rule relaxes current requirements by allowing handlers to ship Texas oranges and grapefruit not meeting minimum grade and size requirements to approved processors for manufacturing into fresh sections and fresh juice without preservative treatment; and (5) the proposed rule provided a 30-day comment period, and no comments were received.

List of Subjects in 7 CFR Part 906

Marketing agreements and orders, Texas, Grapefruit, Oranges.

For the reasons set forth in the preamble, 7 CFR Part 906 is amended as follows:

PART 906—ORANGES AND GRAPEFRUIT GROWN IN THE LOWER RIO GRANDE VALLEY IN TEXAS

1. The authority citation for 7 CFR Part 906 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 906.120 is amended by revising paragraph (b) to read as follows:

§ 906.120 Fruit exempt from regulations.

* * * * *

(b) *Processing.* The term "processing" as used in § 906.42(b) means the manufacture of any orange or grapefruit product which has been converted into sectioned fruit or into fresh juice, or preserved by any commercial process, including canning, freezing, dehydrating, drying, and the addition of chemical substances, or by fermentation. Fruit so processed, if handled in accordance with § 906.123, shall be exempt from the provisions of §§ 906.34 and 906.40.

* * * * *

3. Section 906.123 is amended by revising paragraph (b) to read as follows:

§ 906.123 Fruit for processing.

* * * * *

(b) *Approved processor.* Any person who desires to acquire, as an approved processor, fruit for processing, as set forth in § 906.120(b), shall, prior thereto, file an application with the committee on a form approved by it, which shall contain, but not be limited to, the following information:

(1) Name and address of applicant;

(2) Location of plant or plants where manufacturing is to take place;

(3) Approximate quantity of fruit used each month;

(4) A statement that the fruit obtained exempt from fresh fruit regulations will not be resold or transferred for resale, directly or indirectly, but will be used only for processing;

(5) A statement agreeing to hold a license issued under the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 499r), and regulations issued thereunder (7 CFR Part 46) when buying Texas oranges and grapefruit for processing;

(6) A statement agreeing to undergo random inspection by the committee;

(7) A statement that the requesting processor has no facilities, equipment, or outlet to repack or sell fruit in fresh form;

(8) A statement agreeing to submit such reports as are required by the committee.

Such application shall be investigated by the committee staff. After such investigation, the staff shall report its findings to the committee at its next meeting or to its delegated subcommittee. Based upon the staff's report and other reliable information, the committee or delegated subcommittee shall approve or disapprove the application and notify the applicant accordingly. If the application is approved, the applicant's name shall be placed upon the list of approved processors.

BILLING CODE 3410–02–M

7 CFR Part 916

[Docket No. FV–89–043]

Nectarines Grown in California; Modification of Size Requirements for Nectarines for the 1989 Season

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim final rule with request for comments.

SUMMARY: This interim final rule relaxes variety-specific size requirements established for May Glo nectarines shipped through May 5, 1989, to the smallest size permitted under variety-specific size requirements. Shipments after May 5, 1989, will be subject to more restrictive requirements currently in effect.

The industry believes that larger sized nectarines provide greater consumer satisfaction than smaller sizes, and that larger sizes are more marketable. However, current information and a field examination of May Glo nectarines grown under desert conditions in the Coachella Valley indicate that such fruit will not develop to the normal size levels expected of that variety in other areas of the State. It was also evident that size development characteristics for desert-grown May Glo nectarines are virtually identical to those of other varieties produced in the valley, subject to less restrictive size requirements.

DATES: This interim final rule becomes effective April 25, 1989, and specifies less restrictive minimum size requirements for May Glo nectarines shipped through May 5, 1989. Comments which are received by May 30, 1989, will be considered prior to issuance of a final rule.

ADDRESS: Interested persons are invited to submit written comments concerning this interim final rule. Comments should be sent to: Docket Clerk, U.S. Department of Agriculture, Agricultural Marketing Service, Fruit and Vegetable Division, P.O. Box 96456, Room 2025–S, Washington, DC 20090–6456. Three copies of all material should be submitted and will be available for public inspection in the office of the Docket Clerk during regular business hours. The comments should reference the docket number and the date and page number of this issue of the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: George J. Kelhart, Marketing Order Administration Branch, F&V, AMS, Room 2525–S, P.O. Box 96456, Washington, DC 20090–6456; telephone (202) 475–3919.

SUPPLEMENTARY INFORMATION: This interim final rule is issued under Marketing Agreement and Marketing Order No. 916 (7 CFR Part 916) regulating the handling of nectarines grown in California. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This interim final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-

VOL
54
ISS
80
AP
27
1989
UMI

major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marekting orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 245 handlers of nectarines subject to regulation under the nectarine marketing order (7 CFR Part 916), and there are approximately 740 producers of nectarines in the regulated area. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having gross annual revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of California nectarines may be classified as small entities.

Shipments of California nectarines are regulated by grade, maturity, and size under Nectarine Regulation 14 (7 CFR 916.356) as amended and published in the **Federal Register** on March 27, 1989 (54 FR 12423). Because these regulations do not change substantially from season to season, they have been issued on a continuing basis subject to amendment, modification, or suspension as may be recommended by the Nectarine Administrative Committee (committee) and approved by the Secretary. Inspected shipments, in packages, of California nectarines for the 1988 season totaled 17,584,100, and were marketed primarily in the fresh market. In 1988, the production value of California nectarines was about $78,861,000. This interim final rule is based upon a unanimous recommendation of the committee and other available information.

Currently, as specified in paragraph (a)(3) of § 916.356, no handler is permitted to ship any package or container of May Glo variety nectarines unless the nectarines, when packed in molded forms (tray packs) in a No. 22D standard lug box, are of a size that will pack, in accordance with the requirements of a standard pack, not more than 96 nectarines in the lug box, and such nectarines, when packed in any container, are of a size that a 16-pound sample, representative of the nectarines in the package or container, contains not more than 67 nectarines. For the purposes of this document, these requirements are referred to aa "96" size. Pursuant to paragraph (a)(2), for other specified varieties, no handler is permitted to ship any package or container of such nectarines unless the nectarines, when packed in molded forms (tray packs) in a No. 22D standard lug box, are of a size that will pack, in accordance with the requirements of a standard pack, not more than 108 nectarines in the lug box, and such nectarines, when packed in any container, are of a size that a 16-pound sample, representative of the nectarines in the package or container, contains not more than 92 nectarines. For the purposes of this document, these requirements are referred to as "108" size.

This interim final rule permits the shipment of "108" size and large May Glo nectarines through May 5, 1989. After May 5 the minimum size requirement for that variety will revert to "96" size as specified in the regulation first issued on May 27, 1988 (53 FR 19232).

In recognition that larger-sized nectarines provide greater consumer satisfaction than smaller sizes, the committee has recommended, and the Secretary has approved, minimum size limits for this fruit. However, reflecting both seasonal and varietal influences which affect average fruit sizes by variety, different minimum size regulations have been issued for different varieties. Because of these influences, smaller minimum sizes generally have been issued for earlier maturing varieties, while later maturing varieties, which tend to attain a larger size at maturity, have been required to meet larger minimum sizes.

The desert area of the Coachella Valley is the earliest growing area in California. The extreme heat in the desert results in a shorter growing season, and thus smaller fruit, than grown in the rest of the State. Nectarines have been grown commercially in the Coachella Valley for about three years.

The May Glo harvest in the Coachella Valley is expected to begin about May 1, 1989. The packing and shipping of May Glo nectarines from the valley is expected to be completed within a few days. May Glo nectarines from other parts of the State will continue to be shipped for another two to three weeks. May Glo nectarines from the Coachella Valley normally have a limited impact on the market conditions of other growing areas in the State.

During the 1988 season, nearly 24 percent of May Glo nectarines shipped from the Coachella Valley were "108" size and 14 percent were "96" size. This compares with industry-wide shipments of May Glo nectarines in 1988 of about 7 percent size "108's" and 19 percent size "96's." The remainder of the May Glo variety shipments were larger sizes. During the 1988 season, May Glo nectarines from the Coachella Valley were permitted to be packed and shipped at the minimum "108" size because the larger "96" size requirement was not effective until May 27, 1988. The action on "96" size was initially issued as an interim final rule on May 27, 1988, and finalized on March 27, 1989 (54 FR 12419).

Committee fieldmen recently visited May Glo and Maybelle nectarine orchards in the Coachella Valley and found that the May Glo orchards have been pruned and thinned more than usual in an attempt to reach the current minimum size for 1989. In addition, many trees were girdled, a practice of removing a layer of bark around the trunk of the tree to keep nutrients in the part of the tree where the fruit grows.

In the rule promulgated in May 1988, the committee recommended, and the Department approved, season long minimum size regulations for May Glo nectarines of "96" size. This determination was based on information available at that time. However, as a result of subsequent information and the field examination, it was determined that the 1989 Coachella Valley May Glo crop will not develop to normal size levels expected of the variety in other areas of the State. In fact, under the conditions observed, the May Glos were developing in a manner virtually identical to Maybelle variety nectarines being produced in the same area. Maybelle nectarines currently are subject to "108" size requirements.

Therefore, the committee unanimously recommended that for the 1989 season, shipments of nectarines through May 5 be subject to the less restrictive variety-specific size requirements specified in paragraph (a)(2) of § 916.356. Shipments after May 5 would be subject to variety-specific size requirements specified in paragraphs (a)(3) through (a)(5) of § 916.356, as applicable. Relaxation of the size requirements for shipments after May 5 would not be necessary because fruit shipped from the later growing areas is expected to reach the size levels contemplated earlier.

The committee recommended relaxation of the variety-specific (named-variety) size requirements for all varieties of nectarines shipped through May 5, 1989. However, this rule revises the size requirements only for the May Glo variety because the May Glo variety is the only variety not regulated at the smallest 108 size requirement that is expected to be shipped from the Coachella Valley on or before May 5, 1989.

The committee indicated that the modification, as authorized in § 916.52 of the order, should assure fairness in the application of the variety-specific size requirements and should not be detrimental to the industry's goal of marketing better quality, larger-sized fruit. Last season, only 7 percent of May Glo nectarines were marketed as size "108." The committee will study the effects of the relaxation this season. Determination on whether to recommend continuation of the relaxation will be decided at next Fall's committee meeting.

It is the Department's view that this relaxation in size requirements for 1989, will provide additional marketing opportunities in the Coachella Valley by recognizing its unique growing conditions.

Based on available information, the Administrator of the AMS has determined that this interim final rule will not have a significant impact on a substantial number of small entities.

After consideration of all relevant information presented, including the committee's recommendation, and other information, it is found that the modification of the size requirements, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined that, upon good cause, it is impracticable, unnecessary, and contrary to the public interest to give notice prior to putting this rule into effect, and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because: (1) Shipments of 1989 crop May Glo nectarines in the Coachella Valley are expected to start around May 1; (2) this action relaxes size requirements by allowing shipment of size "108" nectarines through May 5, 1980; and (3) no useful purpose would be served by delaying the effective date of the relaxed requirements.

The committee's recommendation, other information, and all written comments timely received in response to this publication will be considered prior to any finalization of this interim final rule.

List of Subjects in 7 CFR Part 916

Marketing agreements and orders, Nectarines, California

For the reasons set forth in the preamble, 7 CFR Part 916 is amended as follows:

PART 916—NECTARINES GROWN IN CALIFORNIA

1. The authority citation for 7 CFR Part 916 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 916.356 is amended by revising the introductory text of paragraphs (a)(2) and (a)(3) to read as follows:

Note: This action will appear in the Code of Federal Regulations.

§ 916.356 Nectarine Regulation 14.

(a) * * *

(2) Any package or container of May Glo nectarines through May 5, 1989, or Aurelio Grand, Maybelle, Mayfire, or Royal Delight variety nectarines, unless:

* * * * * *

(3) Any package or container of May Glo variety nectarines on or after May 5, 1989, or Early Diamond, or Mayfair variety nectarines, unless:

* * * * * *

Dated: April 25, 1989.

BILLING CODE 3410-02-M

Farmers Home Administration

7 CFR Part 1910

Credit Reports on Individuals

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its regulations to eliminate reference to "contracting officer" since FmHA contracts credit report service from the General Services Administration (GSA), expand the definition of applicant as it relates to rural housing and farmer program loan applicants. Also, to clarify when and what type of credit reports will be ordered by the County Supervisor, clarify that there will be a one-time fee charged for each initial individual or joint credit report ordered, and to define what a joint credit report is. These actions are necessary due to number of inquiries received from FmHA field offices and an internal review of the proposed rule concerning the ordering of credit reports. This rule is intended to provide FmHA field offices guidance and clarification when ordering credit reports.

EFFECTIVE DATE: May 30, 1989.

FOR FURTHER INFORMATION CONTACT: Reginald J. Rountree, Loan Specialist, Single Family Housing Processing Division, Farmers Home Administration, USDA, Room 5346, South Agriculture Building, Washington, DC 20250. Telephone 202–475–4209.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established in Departmental Regulation 1512–1 which implements Executive Order 12291, and has been determined "non-major." It will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic, or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Catalog of Federal Domestic Assistance programs affected by this action are:

10.404 Emergency Loans.
10.405 Farm Labor Housing Loans and Grants.
10.406 Farm Operating Loans.
10.407 Farm Ownership Loans.
10.410 Low to Moderate Income Housing Loans.
10.416 Soil and Water Loans.
10.420 Rural Self-Help Housing Technical Assistance.

For the reasons set forth in final rule related to Notice 7 CFR 3015 Subpart V ((48 FR 2 9115), June 24, 1983) and FmHA Instruction 1940–J, "Intergovernmental Review of Farmers Home Administration Programs" are excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

10.405 Farm Labor Housing Loans and Grants; 10.416 Soil and Water Loans; 10.420 Rural Self-Help Housing Technical Assistance are subject to EO 12372

This document had been reviewed in accordance with 7 CFR Part 1940, Subpart G, "Environmental Program." It is the determination of FmHA that this action does not constitute a major Federal action significantly affecting the

VOL 54 ISS 80 AP 27 1989 UMI

quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Pub. L. 91–190, an Environmental Impact Statement is not required.

The Administrator, Farmers Home Administration, USDA, has determined that this action will not have a significant economic impact on a substantial number of small entities because it contains normal business recordkeeping requirements and minimal essential reporting requirements.

Background

At the present time there is no distinct guidance to field personnel on whether to order a joint or individual credit report on married applicants when there is only one income in the household. This lack of guidance has resulted in numerous inquiries to the National Office from field personnel as to which type of report to order. These amendments establish the type of report to be ordered by field personnel on married applicants regardless of the number of incomes in the household.

On August 4, 1988, FmHA published in the **Federal Register** (53 FR 29341) a proposed rule for amending its regulations regarding ordering credit reports on married applicants. The comment period ended October 3, 1988. No comments were received. However, in reviewing what had been published as a proposed rule, it was decided that further revisions could be made to better explain the intent of the proposed changes. These revisions have been incorporated in the final rule. They do not alter the substance of what appeared in the proposed rule but merely further clarify the intent of that rule.

List of Subject in 7 CFR Part 1910

Administrative practice and procedure, Credit, Government contracts, Reporting requirements.

Accordingly, Chapter XVIII, Title 7 of the Code of Federal Regulations is amended as follows:

PART 1910—GENERAL

1. The authority citation for Part 1910 is revised to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart B—Credit Reports (Individual)

2. Section 1910.52 is amended by revising paragraph (a) to read as follows:

§ 1910.52 General.

(a) FmHA obtains credit reports from credit reporting companies (Contractors) listed in Exhibit A of this subpart (available in any FmHA office) as authorized by the National Office, FmHA. Furthermore, special reports, supplemental employment reports, commercial credit reports, and special services are not authorized.

* * * * *

3. Section 1910.53 is amended by revising paragraphs (d) and (e) as follows:

§ 1910.53 Policy.

* * * * *

(d) The County Supervisor will determine when and what type of credit report will be ordered in accordance with the provisions of this subpart, except that credit reports will always be ordered when the incomes of both applicant and co-applicant are needed to show repayment ability.

(e) A nonrefundable credit report fee of the amount shown in Exhibit A, *General*, (b) of this subpart (available in any FmHA office) will be a one time charge for each initial credit report ordered.

* * * * *

4. Section 1910.54 is amended by revising paragraph (b) as follows:

§ 1910.54 Definitions.

* * * * *

(b) "Applicant," for other than Farmer Program loans, also includes co-applicant(s), co-signer(s), each individual in an association, and general partner(s) in a partnership. For Farmer Program loans, "applicant" also includes co-signer(s), member(s) of a cooperative, stockholder(s) in a corporation, partner(s) in a partnership, and joint operators of a joint operation.

* * * * *

5. Section 1910.59 is revised to read as follows:

§ 1959.59 Type of credit report to be ordered.

Pursuant to the Equal Credit Opportunity Act (ECOA), credit reporting companies maintain credit information in three different forms on a married couple; individual accounts on each spouse, a joint account covering both spouses, and undesignated accounts (not identified by a creditor as either individual or joint). The County Supervisor will order:

(a) A joint report when the applicant and co-applicant are married, regardless of whether there is only one source of income.

(b) An individual report when the applicant is married and applies as an individual.

(c) An individual report on each the applicant and co-applicant when they are not married.

(d) If credit information is needed on other persons to complete the credit investigation, a separate "individual" report request, which will be paid by the applicant, is prepared for each person as opposed to the more costly "special services" reports.

6. Section 1910.61 is amended by revising paragraph (a)(2)(ii) to read as follows:

§ 1910.61 Collecting fees, invoicing, and payments.

(a) * * *

(2) * * *

(ii) By entering the date and amount of the credit report fee collected in column 9 of Form FmHA 1905–4, "Application and Processing Card-Individual."

* * * * *

Date: March 31, 1989.

Neal Sox Johnson,

Acting Administrator, Formers Home Administration.

BILLING CODE 3410–07–M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Parts 140 and 145

Commission Western and Southwestern Regional Offices; Change of Address

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rule amendments.

SUMMARY: The Commodity Futures Trading Commission is amending its regulations to include new addresses for its recently relocated Western and Southwestern regional offices. Both of these offices, while remaining in the same respective cities, have moved to new locations in Los Angeles, California, and Kansas City, Missouri.

EFFECTIVE DATE: April 27, 1989.

FOR FURTHER INFORMATION CONTACT: Gerry Smith, Office of the Executive Director, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581, (202) 254–6090.

SUPPLEMENTARY INFORMATION: Commission regulation § 140.2 is being amended to reflect the fact that the Western and Southwestern Regional Offices of the Commission have been moved. The Western Regional Office of the Commission has moved from 10850 Wilshire Boulevard, Suite 510, Los Angeles, California 90024 to 10880 Wilshire Boulevard, Suite 1005, Los Angeles, California 90024. The telephone number for general information is (213) 209–6783. The Southwestern Regional Office of the Commission has been moved from 4901 Main Street, Suite 400, Kansas City, Missouri 64112 to 4900 Main Street, Suite 721, Kansas City, Missouri 64112. The telephone number for general information is (816) 374–6602.

Certain other provisions of the Commission's regulations contain references to or addresses of the Commission's Western and Southwestern Regional offices. The appropriate changes have been made to reflect the new addresses in each of these provisions.

List of Subjects

17 CFR Part 140

Organization and functions (Government agencies).

17 CFR Part 145

Freedom of information.

Based upon the foregoing, pursuant to its authority contained in section 2(a)(11) of the Commodity Exchange Act, 7 U.S.C. 4a(j) (1976), the Commission hereby amends Parts 140 and 145 of the Code of Federal Regulations as follows:

PART 140—[AMENDED]

1. An authority citation for Part 140 is added, and the authority citations following individual sections are removed.

Authority: 17 U.S.C. 12a.

2. Section 140.2 is amended by revising paragraphs (c) and (d) to read as follows:

§ 140.2 Region Offices—Regional Directors.

* * * * *

(c) The Western Regional office is located at 10880 Wilshire Boulevard, Suite 1005, Los Angeles, California 90024 and is responsible for enforcement of the act and administration of programs of the Commission in the States of Alaska, Arizona, California, Hawaii, Idaho, Montana, Nevada, Oregon, Utah, Washington, and Wyoming.

(d) The Southwestern Regional office is located at 4900 Main Street, Suite 721, Kansas City, Missouri 64112, with a sub-office at Room 510, Grain Exchange Building, Fourth Street and Fourth Avenue, South, Minneapolis, Minnesota 55415, and is responsible for enforcement of the Act and administration of the programs of the Commission in the States of Arkansas, Colorado, Iowa, Kansas, Louisiana, Minnesota, Missouri, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, and Texas.

PART 145—[AMENDED]

3. The authority citation for Part 145 continues to read as follows:

Authority: Pub. L. 89–554, 80 Stat. 383, Pub. L. 90–23, 81 Stat. 54, Pub. L. 93–502, 88 Stat. 1561–1564 (5 U.S.C. 552); sec. 101(a), Pub. L. 93–463, 88 Stat. 1389 (5 U.S.C. 4a(j)); Pub. L. 99–570.

4. Section 145.6(a) is revised to read as follows:

§ 145.6 Commission offices to contact for assistance; registration records available.

(a) Whenever this part directs that a request be directed to the FOI, Privacy and Sunshine Acts compliance staff at the principal office of the Commission in Washington, DC, the request shall be made in writing and shall be addressed or otherwise directed to the Assistant Secretary for FOI, Privacy and Sunshine Acts Compliance, Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. The telephone number of the compliance staff is (202) 254–3382. Requests for public records directed to a regional office of the Commission pursuant to §§ 145.0(c) and 145.2 should be sent to: Division of Economic Analysis, Commodity Futures Trading Commission, One World Trade Center, Suite 4747, New York, New York 10048, Telephone: (212) 466–2061. Division of Trading and Markets, Commodity Futures Trading Commission, Sears Tower, Suite 4600, 233 South Wacker Drive, Chicago, Illinois 60606, Telephone: (312) 353–5990. Division of Trading and Markets, Commodity Futures Trading Commission, 510 Grain Exchange Building, Minneapolis, Minnesota 55415, Telephone: (612) 725–2025. Division of Trading and Markets, Commodity Futures Trading Commission, 4900 Main Street, Suite 721, Kansas City, Missouri 64112, Telephone: (816) 374–6602. Division of Enforcement, Commodity Futures Trading Commission, 10880 Wilshire Blvd., Suite 1005, Los Angeles, California 90024, Telephone: (213) 209–6783.

* * * * *

The foregoing rules shall be effective immediately. The Commission finds that the amendments relate solely to agency organization, practice and procedure and that the public procedures and publication prior to the effective date of the amendments, in accordance with the Administrative Procedure Act, as codified, 5 U.S.C. 553, are not required.

Issued in Washington, DC, on April 21, 1989, by the Commission.

Jean A. Webb,

Secretary to the Commission.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 200

[Rel. No. 33–6833; 34–26747; 35–24868; 39–2213; IC–16931; IA–1163]

Rules Delegating Functions

AGENCY: Securities and Exchange Commission.

ACTION: Final rules.

SUMMARY: The Securities and Exchange Commission is revising Subpart A, Part 200 of Title 17 with respect to the descriptions of and delegations of authority to the Commission's Director of the Office of Opinions and Review, General Counsel, and Executive Assistant to the Chairman. This action will effect the consolidation of the Office of Opinions and Review and the Office of the General Counsel, and will delegate to the General Counsel and, in certain cases, the Executive Assistant to the Chairman, the authority previously delegated to the Director of the Office of Opinions and Review. The purpose of consolidating the functions of the Office of Opinions and Review into the Office of the General Counsel is to increase the efficiency of the adjudicatory process and make available to that process the resources of the Office of the General Counsel.

EFFECTIVE DATE: April 27, 1989.

FOR FURTHER INFORMATION CONTACT: David C. Mahaffey, Assistant General Counsel, or Thomas M. Selman, Special Counsel, Office of the General Counsel, (202) 272–2428.

SUPPLEMENTARY INFORMATION: On February 9, 1989, Chairman Ruder announced the consolidation of the Commission's Office of Opinions and Review into the Office of the General Counsel, with the establishment of an Adjudication Group in OGC. The Chairman further announced that the preparation of opinions and orders in contested Rule 2(e) cases will be assigned to the Executive Assistant to the Chairman, and that drafting responsibilities in other cases may, as appropriate, be transferred from the General Counsel to the Chairman's staff.

BEST COPY AVAILABLE

VOL 54 ISS 80 AP 27 1989 UMI

The Commission finds that this action relates solely to rules of agency organization, procedure or practice, and therefore that prior publication under 5 U.S.C. 553 is not necessary and that the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, does not apply. Further, the Commission finds good cause under 5 U.S.C. 553(d)(3) for the action to become effective immediately upon publication in the **Federal Register**, since implementing the rule changes will increase the efficiency of the Commission's adjudicatory process and make available to that process the resources of the Office of the General Counsel. Accordingly, the foregoing action becomes effective immediately upon publication in the **Federal Register**.

Text of Amendments

Title 17, Chapter II of the Code of Federal Regulations is hereby amended as follows:

PART 200—ORGANIZATION; CONDUCT AND ETHICS; AND INFORMATION AND REQUESTS

1. The authority citation for Part 200 appearing at the end of the table of contents is removed.

2. The authority citation for Part 200, Subpart A is revised to read as follows:

Authority: Secs. 19, 23, 48 Stat. 85, 901, as amended; sec. 20, 49 Stat. 833; sec. 319, 53 Stat. 1173; secs. 38, 211, 54 Stat. 841, 855; sec. 308, 101 Stat. 1254 (15 U.S.C. 77s, 78d–1, 78d–2, 78w, 79t, 77sss, 80a–37, 80b–11), unless otherwise noted.

§ 200.15 [Removed]

3. By removing § 200.15.

4. By revising § 200.16 to read as follows:

§ 200.16 Executive Assistant to the Chairman.

The Executive Assistant to the Chairman assists the Chairman in consideration of legal, financial, and economic problems encountered in the administration of the Commission's statutes. He or she arranges for and conducts conferences with officials of the Commission, members of the staff, and/or representatives of the public on matters arising with regard to general programs or specific matters. Acting for the Chairman, he or she furnishes the initiative, executive direction, and authority for staff studies and reports bearing on the Commission's administration of the laws and its relations with the public, industry, and the Congress. The Executive Assistant is also responsible for assisting members of the Commission in the preparation of the opinions of the Commission, and to the Commission for the preparation of opinions and decisions on motions and certifications of questions and rulings by administrative law judges in the course of administrative proceedings under Rule 2(e) of the Commission's Rules of Practice (§ 201.2(e) of this Chapter), and in other cases in which the Chairman or the General Counsel has determined that separation of functions requirements or other circumstances would make inappropriate the exercise of such functions by the General Counsel. In cases where, pursuant to a waiver by the parties of separation of function requirements, another Division or Office of the Commission's staff undertakes to prepare an opinion or decision, such Division or Office rather than the Executive Assistant will prepare such opinion or decision, although the Executive Assistant may assist in such preparation. The Executive Assistant is further responsible for the exercise of such review functions with respect to adjudicatory matters as are delegated to him or her by the Commission pursuant to 101 Stat. 1254 (15 U.S.C. 78d–1, 78d–2) or as may be otherwise delegated or assigned to him or her.

5. By amending § 200.21 by redesignating paragraph (b) as (c), revising paragraph (a), and adding new paragraph (b) as follows:

§ 200.21 The General Counsel.

(a) The General Counsel is the chief legal officer of the Commission. He or she is responsible for the representation of the Commission in judicial proceedings in which it is involved as a party or as amicus curiae, for directing and supervising all civil litigation involving the Commission in the United States District Courts, for directing and supervising the Commission's responsibilities under the Bankruptcy Code and all related litigation, and for representing the Commission in all cases in appellate courts. The General Counsel is responsible for the review of cases which the Division of Enforcement recommends be referred to the Department of Justice with a recommendation for criminal prosecution. Together with the Director of the Division of Enforcement, the General Counsel is responsible for granting of access, by delegated authority, to materials contained in Commission files concerning non-public investigatory proceedings in which formal orders of investigation have been entered at the request of domestic and foreign governmental authorities, self-regulatory organizations, receivers, special counsels, and other similar persons appointed in Commission litigation, the Securities Investor Protection Corporation, and trustees and counsel for trustees "appointed" pursuant to section 5(b) of the Securities Investor Protection Act. In addition, he or she is responsible for advising the Commission at its request or at the request of any division director or officer head, or on his or her own motion, with respect to interpretations involving questions of law; for the conduct of administrative proceedings relating to the disqualification of professional persons from practice before the Commission; for the preparation of the Commission comments to the Congress on pending legislation; and for the drafting, in conjunction with appropriate divisions and offices, of legislative proposals to be sponsored by the Commission. The General Counsel is also responsible for the review and clearance of the form and content of articles, treatises, and prepared speeches and addresses by members of the staff relating to the Commission or to the statutes and rules administered by the Commission and is responsible for investigating any claims of staff improprieties. He or she is responsible (with the Director of Personnel) for administering and interpreting the Commission's Conduct Regulation. He or she serves as Counselor to the Commission and its staff with regard to ethical and conflicts of interest questions and acts as the Commission's liaison on such matters with the Office of Personnel Management and the Department of Justice. The General Counsel also is responsible for coordinating and reviewing the interpretive positions of the various divisions and offices. In addition, he or she is responsible for appropriate disposition of all Freedom of Information Act and Privacy Act appeals pursuant to the authority delegated in § 200.30–14 of this Chapter, and is the Commission's advisor with respect to legal problems arising under the Freedom of Information Act, the Privacy Act, the Federal Reports Act, the Federal Advisory Committee Act, the Civil Service laws and regulations, the statutes and rules applicable to the Commission's procurement, contracting, fiscal and related administrative activities, and other statutes and regulations of a similar nature applicable to a number of Government agencies.

(b) The General Counsel is also responsible for assisting members of the Commission in the preparation of the opinions of the Commission, and to the Commission for the preparation of opinions and decisions on motions and certifications of questions and rulings by administrative law judges in the course of administrative law proceedings, except (1) in cases where, pursuant to a waiver by the parties of separation of function requirements, another Division or Office of the Commission's staff undertakes to prepare an opinion or decision, in which cases the General Counsel may assist in such preparation, and (2) with respect to administrative proceedings under Rule 2(e) of the Commission's Rules of Practice (§ 201.2(e) of this Chapter) or other cases in which the Chairman or the General Counsel has determined that separation of function requirements or other circumstances would make inappropriate the exercise of such functions by the General Counsel. In the cases described in clause (2), the Executive Assistant to the Chairman exercises such functions. The General Counsel deals with general problems arising under the Administrative Procedure Act, including the revision or adoption of rules of practice. The General Counsel is also responsible for the exercise of such review functions with respect to adjudicatory matters as are delegated to him or her by the Commission pursuant to 101 Stat. 1254 (15 U.S.C. 78d–1, 78d–2) or as may be otherwise delegated or assigned to him or her.

* * * * *

§ 200.30–8 [Removed]

6. By removing § 200.30–8.

7. By revising the introductory paragraph and adding paragraphs (g), (h), and (i) to § 200.30–14 to read as follows:

§ 200.30–14 Delegation of Authority to the General Counsel.

Pursuant to the provisions of Pub. L. 101–181, 101 Stat. 1254, 101 Stat. 1255, 15 U.S.C. 78d–1, 15 U.S.C. 78d–2, and 5 U.S.C. 552a(d)(2)(B)(ii), the Securities and Exchange Commission hereby delegates, until the Commission orders otherwise, the following functions to the General Counsel of the Commission, to be performed by him or her or under his or her direction by such person or persons as may be designated from time to time by the Chairman of the Commission:

* * * * *

(g)(1) With respect to proceedings conducted pursuant to the Securities Act of 1933 (15 U.S.C. 77a, *et seq.*), the Securities Exchange Act of 1934 (15 U.S.C. 78a, *et seq.*), the Public Utility Holding Company Act of 1935 (15 U.S.C. 79a, *et seq.*), the Trust Indenture Act of 1939 (15 U.S.C. 77aaa, *et seq.*), the Investment Company Act of 1940 (15 U.S.C. 80a–1, *et seq.*), the Investment Advisers Act of 1940 (15 U.S.C. 80b–1, *et seq.*), and the Securities Investor Protection Act of 1970 (15 U.S.C. 78aaa, *et seq.*);

(i) To consider an application for review of an interlocutory ruling which an administrative law judge has refused to certify, and to deny such application upon determining that the administrative law judge did not err in refusing to certify the matter.

(ii) To consider an interlocutory ruling which an administrative judge has certified, and to affirm such ruling upon determining that such action is appropriate.

(iii) To issue any order pursuant to an initial decision as to any person who has not filed a petition for review within the time provided, or has withdrawn his appeal, where the Commission has not on its own motion ordered that the initial decision be reviewed.

(iv) Except where the Commission otherwise directs, to issue findings and orders pursuant to offers of settlement which the Commission has determined should be accepted.

(v) To grant petitions for review of initial decisions by a hearing officer.

(vi) To grant motions of staff counsel to discontinue administrative proceedings as to a particular respondent who has died or cannot be found, or because of a mistake in the identity of a respondent named in the order for proceedings.

(vii) To grant requests for the submission of late or additional briefs, or the acceptance of affidavits or other material for inclusion in the record or in support of motions or petitions addressed to the Commission.

(viii) To issue an order dismissing an application for review upon the request of the applicant that the application be withdrawn.

(ix) To issue an order dismissing an exemptive application upon the request of the applicant that the application be withdrawn.

(2) With respect to proceedings conducted pursuant to the Securities Act of 1933 (15 U.S.C. 77a, *et seq.*), the Securities Exchange Act of 1934 (15 U.S.C. 78a, *et seq.*), the Investment Company Act of 1940 (15 U.S.C. 80a–1, *et seq.*), the Investment Advisers Act of 1940 (15 U.S.C. 80b–1, *et seq.*), and the Securities Investor Protection Act of 1970 (15 U.S.C. 78aaa *et seq.*), to issue findings and orders taking the remedial action described in the order for proceedings where the respondents expressly consent to such action, fail to appear or default in the filing of answers required to be filed; or to grant a request, based upon a showing of good cause, to vacate an order of default, so as to permit presentation of a defense.

(3) With respect to proceedings conducted pursuant to the Securities Exchange Act of 1934 (15 U.S.C. 78a, *et seq.*), to issue an order dismissing an application for review of a denial by a self-regulatory organization of an application by a person subject to statutory disqualification to become associated with a member firm upon receipt of notice from the self-regulatory organization that the firm is no longer a member of the self-regulatory organization.

(4) With respect to proceedings under Sections 19 (d), (e) and (f) of the Securities Exchange Act of 1934 (15 U.S.C. 78s (d), (e) and (f)), to determine that an application for review under those sections has been abandoned under the provision of § 240.19d–3(c) of this Chapter or otherwise, and to issue an order dismissing the application in such event.

(5) With respect to proceedings conducted or reviewed pursuant to the provisions of the Securities Exchange Act of 1934 (15 U.S.C. 78(a), *et seq.*), the Investment Company Act of 1940 (15 U.S.C. 80a–1, *et seq.*), and the Investment Advisers Act of 1940 (15 U.S.C. 80b–1, *et seq.*) to determine applications to stay Commission orders pending appeal of those orders to the federal courts.

(6) With respect to review proceedings pursuant to Sections 19 (d), (e) and (f) of the Securities Exchange Act of 1934 (15 U.S.C. 78s (d), (e) and (f)), to determine applications for a stay of action taken by a self-regulatory organization pending Commission review of that action.

(7) In connection with Commission review of actions taken by self-regulatory organizations, pursuant to Sections 19 (d), (e) and (f) of the Securities Exchange Act of 1934 (15 U.S.C. 78s (d), (e) and (f)), to grant or deny requests for oral argument in accordance with the provisions of § 240.19d–3(f) of this Chapter.

(h) Notwithstanding anything in paragraph (g) of this section, the functions described in paragraph (g) of this section are not delegated to the General Counsel with respect to administrative proceedings under Rule 2(e) of the Commission's Rules of Practice (§ 201.2(e) of this Chapter), or with respect to other proceedings in which the Chairman or the General

VOL. 54 ISS. 80 APR 27 1989 UMI

Counsel determines that separation of functions requirements or other circumstances would make inappropriate the General Counsel's exercise of such delegated functions. With respect to such Rule 2(e) and other proceedings, such functions are delegated to the Executive Assistant to the Chairman pursuant to § 200.30–16 of this Chapter.

(i) Notwithstanding anything in paragraph (g) of this section, in any case described in paragraph (g) of this section in which the General Counsel believes it appropriate, he or she may submit the matter to the Commission.

8. By adding § 200.30–16 to read as follows:

§ 200.30–16 Delegation of Authority to Executive Assistant to the Chairman.

Pursuant to the provisions of Pub. L. 101–181, 101 Stat. 1254, 101 Stat. 1255, 15 U.S.C. 78d–1, and 15 U.S.C. 78d–2, the Securities and Exchange Commission hereby delegates, until the Commission orders otherwise, the following functions to the Executive Assistant to the Chairman (or to such other person or persons designated pursuant to paragraph (d) of this section), to be performed by such Executive Assistant or under the Executive Assistant's direction by such person or persons as may be designated from time to time by the Chairman of the Commission (or by such other person or persons designated pursuant to paragraph (d) of this section):

(a) The functions otherwise delegated to the General Counsel under § 200.30–14(g) of this Chapter, with respect to any proceeding in which the Chairman or the General Counsel has determined, pursuant to § 200.30–14(h) of this Chapter, that separation of functions requirements or other circumstances would make inappropriate the General Counsel's exercise of such delegated functions.

(b) With respect to proceedings conducted pursuant to the provisions of Rule 2(e) of the Commission's Rules of Practice (§ 201.2(e) of this Chapter):

(1) To consider an application for review of an interlocutory ruling which an administrative law judge has refused to certify, and to deny such application upon determining that the administrative law judge did not err in refusing to certify the matter.

(2) To consider an interlocutory ruling which an administrative judge has certified, and to affirm such ruling upon determining that such action is appropriate.

(3) To issue any order pursuant to an initial decision as to any person who has not filed a petition for review within the time provided, where the Commission has not on its own motion ordered that the initial decision be reviewed.

(4) Except where the Commission otherwise directs, to issue findings and orders pursuant to offers of settlement which the Commission has determined should be accepted.

(5) To grant petitions for full review of initial decisions by a hearing officer.

(6) To grant motions of staff counsel to discontinue administrative proceedings as to a particular respondent who has died or cannot be found, or because of a mistake in the identity of a respondent named in the order for proceedings.

(7) To grant requests for the submission of late or additional briefs, or the acceptance of affidavits or other material for inclusion in the record or in support of motions or petitions addressed to the Commission.

(8) To issue findings and orders taking the remedial action described in the order for proceedings where the respondents expressly consent to such action, fail to appear or default in the filing of answers required to be filed; or to grant a request, based upon a showing of good cause, to vacate an order of default, so as to permit presentation of a defense.

(9) To determine applications to stay Commission orders imposing, affirming, or modifying sanctions pending appeal of those orders to the Federal courts.

(c) Notwithstanding anything in the foregoing, in any case described in paragraphs (a) and (b) of this section in which the Executive Assistant believes it appropriate, he or she may submit the matter to the Commission.

(d) Notwithstanding anything in the foregoing, the functions otherwise delegated to the Executive Assistant are hereby delegated to such person or persons, not under the Executive Assistant's supervision, designated by the Chairman, with respect to any proceeding in which the Chairman or the Executive Assistant determines that the Executive Assistant's exercise of such delegated functions would be inappropriate.

By the Commission.

April 20, 1989.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 176

[Docket No. 86F–0158]

Indirect Food Additives; Paper and Paperboard Components

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of 2-bromo-2-nitropropane-1,3-diol as a slimicide in the manufacture of paper and paperboard for food-contact use. This action responds to a petition filed by Betz Laboratories, Inc.

DATES: Effective April 27, 1989; written objections and requests for a hearing by May 30, 1989.

ADDRESS: Written objections may be sent to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Marvin D. Mack, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of May 7, 1986 (51 FR 16896), FDA announced that a petition (FAP 6B3915) had been filed by Betz Laboratories, Inc., Somerton Rd., Trevose, PA 19047, proposing that § 176.300 *Slimicides* of the food additive regulations (21 CFR 176.300) be amended to provide for the safe use of 2-bromo-2-nitropropane-1,3-diol as a slimicide in the manufacture of paper and paperboard for food-contact use.

FDA has evaluated data in the petition and other relevant material. The agency concludes that these data and material establish safety of the level of use of the additive in the manufacture of paper and paperboard, and that the regulations should be amended in § 176.300(c) as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

Any person who will be adversely affected by this regulation may at any time on or before May 30, 1989 file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 176

Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director, Center for Food Safety and Applied Nutrition, Part 176 is amended as follows:

PART 176—INDIRECT FOOD ADDITIVES: PAPER AND PAPERBOARD COMPONENTS

1. The authority citation for 21 CFR Part 176 continues to read as follows:

Authority: Secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348); 21 CFR 5.10 and 5.61.

2. Section 176.300 is amended by revising the table in paragraph (c) by alphabetically adding a new entry to the headings "List of substances" and "Limitations" to read as follows:

§ 176.300 Slimicides.

* * * * *

(c) * * *

List of substances	Limitations
* * *	* * *
2-Bromo-2-nitropropane-1,3-diol (CAS Reg. No. 52–51–7).	At a maximum level of 0.6 pound per ton of dry weight fiber.
* * *	* * *

* * * * *

Dated: April 19, 1989.

Richard J. Ronk,

Acting Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160–01–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[KY–058; FRL–3557–9]

Approval and Promulgation of Implementation Plans; Kentucky: Revisions to the Jefferson County Portion of the SIP

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA today approves amendments to the Jefferson County portion of Kentucky's State Implementation Plan. These amendments include the deletion of the volatile organic compound (VOC) definition from the following regulations: 6.12 (Standard of Performance for Existing Asphalt Paving Operations), 6.19 (Standard of Performance for Existing Metal Furniture Surface Coating Operations), 6.22 (Standard of Performance for Existing Volatile Organic Materials Loading Facilities), 6.29 (Standard of Performance for Existing Graphic Arts Facilities Using Rotogravure and Flexography), 6.30 (Standard of Performance for Existing Factory Surface Coating Operations of Flatwood Paneling), 6.31 (Standard of Performance for Existing Miscellaneous Metal Parts and Products Surface Coating Operations), 6.32 (Standard of Performance for Leaks from Existing Petroleum Refinery Equipment), 6.33 (Standard of Performance for Existing Synthesized Pharmaceutical Product Manufacturing Operations), 6.34 (Standard of Performance for Existing Pneumatic Rubber Tire Manufacturing Plants) and, 6.35 (Standard of Performance for Existing Fabric, Vinyl and Paper Surface Coating Operations). The Jefferson County Air Pollution Control District revised Chapter 1—General Provisions, to include a Volatile Organic Compound (VOC) definition that is consistent with the EPA-approved VOC definition. Therefore, this revised EPA-approved definition will be applicable to all the aforementioned regulations. Thus, all the VOC definitions contained in these regulations could be deleted. Regulation 5.01—General Provisions, Section 2, is being revised to require that if any equivalent test method is necessary for emissions testing and monitoring, the District must obtain prior EPA approval of this method. Regulation 5.01 additionally is revised to include Section 4—Definitions.

DATES: This action will become effective on June 26, 1989, unless notice is received within 30 days that someone wishes to submit adverse or critical comments. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Witten comments should be addressed to Diane Altsman of EPA Region IV's Air Programs Branch. (See Region IV address below.) Copies of the materials submitted by Kentucky may be examined during normal business hours at the following locations:

Environmental Protection Agency, Region IV, Air Programs Branch, 345 Courtland Street, NE, Atlanta, Georgia 30365.

Kentucky Natural Resources and Environmental, Protection Cabinet, Division for Air Quality, Frankfort Office Park, 18 Reilly Road, Frankfort, Kentucky 40601.

Jefferson County Air Pollution, Control District, 914 East Broadway, Louisville, Kentucky 40204.

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Diane Altsman, Air Programs Branch, EPA Region IV, at the above address and telephone number (404) 347–2864 or FTS 257–2864.

SUPPLEMENTARY INFORMATION: The Air Pollution Control District of Jefferson

VOL. 54 ISS 80 AP 27 1989 UMI

County submitted revisions to the Jefferson County portion of Kentucky's State Implementation Plan (SIP). The regulations were approved by the Commonwealth of Kentucky's Natural Resources and Environmental Protection Cabinet and became effective on April 20, 1988. On January 19, 1989, the State of Kentucky's Division for Air Quality submitted to EPA the revisions to the Jefferson County portion of Kentucky's State Implementation Plan (SIP).

The revisions include the deletion of the volatile organic compound (VOC) definition from the following regulations: 6.12, 6.19, 6.22, 6.29, 6.30, 6.31, 6.32, 6.33, 6.34, and 6.35. The Jefferson County Air Pollution Control District revised Chapter 1, General Provisions, to reflect the VOC definition that is consistent with EPA's approved definition.

The Commonwealth of Kentucky, also submitted for EPA approval a revision to Regulation 5—Standards for Hazardous Air Pollutants. Regulation 5.01—General Provisions, section 2, is revised to require that if any equivalent test method is necessary for emissions testing and monitoring, the District must obtain prior EPA approval of this method. Regulation 5.01 was additionally revised to include Section 4—Definitions.

Due to the simplicity of these changes, no Technical Support Document has been prepared.

Final Action

EPA approves changes made in Regulation 5.01, 6.12, 6.19, 6.22, 6.29, 6.30, 6.31, 6.32, 6.33, 6.34 and 6.35 of the Jefferson County portion of Kentucky's State Implementation Plan (SIP). This action is being taken without prior proposal because the changes are noncontroversial and EPA anticipates no significant comments on them. The public should be advised that this action will be effective 60 days from date of this **Federal Register** notice. However, if notice is received within 30 days that someone wishes to submit adverse or critical comments, this action will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period.

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by June 26, 1989. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

List of Subjects in 40 CFR Part 52

Air pollution control, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Ozone.

Note: Incorportion by reference of the State Implementation Plan for the Commonwealth of Kentucky was approved by the Director of the Federal Register on July 1, 1982.

Date: April 10, 1989.

Lee A. DeHihns, III,

Acting Regional Administrator.

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

PART 52—[AMENDED]

Subpart S—Kentucky

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642

2. Section 52.920 is amended by adding paragraph (c)(61) to read as follows:

§ 52.920 Identification of plan.

* * * * *

(c) * * *

(61) Revisions in Regulations 5.01, 6.12, 6.19, 6.22, 6.29, 6.30, 6.31, 6.32, 6.33, 6.34, and 6.35 of the Jefferson County portion of Kentucky's SIP were submitted on January 19, 1989, by Kentucky's Natural Resources Division and Environmental Protection Cabinet.

(i) Incorporation by reference.

(A) Amendments to the Jefferson County Regulations 5.01, 6.12, 6.19, 6.22, 6.29, 6.30, 6.31, 6.32, 6.33, 6.34, and 6.35 adopted on April 20, 1988.

(B) Letter of January 19, 1989, from Kentucky's Natural Resources and Environmental Protection Cabinet.

(ii) Other materials-none.

BILLING CODE 6560-50-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 6829]

Suspension of Community Eligibility, Maryland, et al.

AGENCY: Federal Emergency Management Agency, FEMA.

ACTION: Final rule.

SUMMARY: This rule lists communities, where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP), that are suspended on the effective date shown in this rule because of noncompliance with the revised floodplain management criteria of the NFIP. If FEMA receives documentation that the community has adopted the required revisions prior to the effective suspension date given in this rule, the community will not be suspended and the suspension will be withdrawn by publication in the **Federal Register**.

EFFECTIVE DATE: As shown in fifth column.

FOR FURTHER INFORMATION CONTACT: Frank H. Thomas, Assistant Administrator, Office of Loss Reduction, Federal Insurance Administration, Federal Center Plaza, 500 C Street SW., Room 416, Washington, DC 20472, (202) 646-2717.

SUPPLEMENTARY INFORMATION: The NFIP enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local floodplain management measures aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022), prohibits flood insurance coverage as authorized under the NFIP (42 U.S.C. 4001–4128) unless an appropriate public body shall have adopted adequate floodplain management measures with effective enforcement measures:

On August 25, 1986, FEMA published a final rule in the **Federal Register** that revised the NFIP floodplain management criteria. The rule became effective on October 1, 1986. As a condition for continued eligibility in the NFIP, the criteria at 44 CFR 60.7 require communities to revise their floodplain management regulations to make them consistent with any revised NFIP regulation within 6 months of the effective date of that revision or be subject to suspension from participation in the NFIP.

The communities listed in this notice have not amended or adopted floodplain management regulations that incorporate the rule revision. Accordingly, the communities are not compliant with NFIP criteria and will be suspended on the effective date shown in this final rule. However, some of these communities may adopt and submit the required documentation of legally enforceable revised floodplain management regulations after this rule is published but prior to the actual suspension date. These communities will not be suspended and will continue their eligibility for the sale of insurance. A notice withdrawing the suspension of the communities will be published in the **Federal Register**. In the interim, if you wish to determine if a particular community was suspended on the suspension date, contact the appropriate FEMA Regional Office or the NFIP servicing contractor.

The Administrator finds that notice and public procedures under 5 U.S.C. 533(b) are impracticable and unnecessary because communities listed in this final rule have been adequately notified. Each community receives a 90- and 30-day notification addressed to the Chief Executive Officer that the community will be suspended unless the required floodplain management measures are met prior to the effective suspension date. For the same reasons, this final rule may take effect within less than 30 days.

Pursuant to the provision of 5 U.S.C. 605(b), the Administrator, Federal Insurance Administration, FEMA, hereby certifies that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. As stated in section 2 of the Flood Disaster Protection Act of 1973, the establishment of local floodplain management together with the availability of flood insurance decreases the economic impact of future flood losses to both the particular community and the nation as a whole. This rule in and of itself does not have a significant economic impact. Any economic impact results from the community's decision not to adopt adequate floodplain management measures, thus placing itself in noncompliance with the Federal standards required for community participation.

List of Subjects in 44 CFR Part 64

Flood insurance, Floodplains.

Harold T. Duryee,

Administrator, Federal Insurance Administration.

[FR Doc. 89-10130 Filed 4-26-89; 8:45 am]

BILLING CODE 6718-21-M

44 CFR Part 64

[Docket No. FEMA 6830]

Suspension of Community Eligibility; Minnesota, et al.

AGENCY: Federal Emergency Management Agency, FEMA.

ACTION: Final rule.

SUMMARY: This rule lists communities, where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP), that are suspended on the effective dates listed within this rule because of noncompliance with the floodplain management requirements of the program. If FEMA receives documentation that the community has adopted the required floodplain management measures prior to the effective suspension date given in this rule, the suspension will be withdrawn by publication in the **Federal Register.**

EFFECTIVE DATES: The third date ("Susp.") listed in the fourth column.

FOR FURTHER INFORMATION CONTACT: Frank H. Thomas, Assistant Administrator, Office of Loss Reduction, Federal Insurance Administration, (202) 646-2717, Federal Center Plaza, 500 C Street SW., Room 416, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local floodplain management measures aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022), prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C. 4001-4128) unless an appropriate public body shall have adopted adequate floodplain management measures with effective enforcement measures. The communities listed in this notice no longer meet that statutory requirement for compliance with program regulations (44 CFR Part 59 et seq.). Accordingly, the communities will be suspended on the effective date in the fourth column. As of that date, flood insurance will no longer be available in the community. However, some of these communities may adopt and submit the required documentation of legally enforceable floodplain management measures after this rule is published but prior to the actual suspension date. These communities will not be suspended and will continue their eligibility for the sale of insurance. A notice withdrawing the suspension of the communities will be published in the **Federal Register.** In the interim, if you wish to determine if a particular community was suspended on the suspension date, contact the appropriate FEMA Regional Office or the NFIP servicing contractor.

In addition, the Federal Emergency Management Agency has identified the special flood hazard areas in these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the fifth column of the table. No direct Federal financial assistance (except assistance pursuant to the Disaster Relief Act of 1974 not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP and identified for more than a year, on the Federal Emergency Management Agency's initial flood insurance map of the community as having flood-prone areas. (Section 202(a) of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), as amended). This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column.

The Administrator finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary because communities listed in this final rule have been adequately notified. Each community receives a 6-month, 90-day, and 30-day notification addressed to the Chief Executive Officer that the community will be suspended unless the required floodplain management measures are met prior to the effective suspension date. For the same reasons, this final rule may take effect within less than 30 days.

Pursuant to the provision of 5 U.S.C. 605(b), the Administrator, Federal Insurance Administration, FEMA, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. As stated in section 2 of the Flood Disaster Protection Act of 1973, the establishment of local floodplain management together with the availability of flood insurance decreases the economic impact of future flood losses to both the particular community and the nation as a whole. This rule in and of itself does not have a significant economic impact. Any economic impact results from the community's decision not to (adopt) (enforce) adequate floodplain management, thus placing itself in noncompliance of the Federal standards required for community participation. In each entry, a complete chronology of effective dates appears for each listed community.

LEGAL SERVICES CORPORATION

45 CFR Part 1626

Restrictions on Legal Assistance to Aliens

AGENCY: Legal Services Corporation.

ACTION: Final rule.

SUMMARY: Revisions to 45 CFR Part 1626 of the Legal Services Corporation's ("LSC" or "Corporation") regulations are intended to conform the rule to changes required by the Immigration Reform and Control Act of 1986 (IRCA), Pub. L. 99-603, 100 Stat. 3359 (1986), to LSC's appropriations act for fiscal year 1989, Pub. L. 100-459, 102 Stat. 2223 (1988).

EFFECTIVE DATE: May 30, 1989.

FOR FURTHER INFORMATION CONTACT: Timothy B. Shea, General Counsel, 400 Virginia Avenue SW., Washington, DC 20024-2751, (202) 863-1839.

SUPPLEMENTARY INFORMATION: Notice of proposed revisions to 45 CFR Part 1626 and request for comments was published in the **Federal Register** on October 19, 1988, 53 FR 40914. The revisions were proposed principally to conform the rule to changes required by IRCA and to LSC's appropriations act for fiscal year 1989. Approximately 100 comments from bar associations, LSC recipients, attorneys in private practice, and other interested parties were received and considered by the Corporation.

On November 18, 1988, the LSC Board of Director's Operations and Regulations Committee met to consider the proposed revisions and to hear public comment. After the Committee voted to recommend the proposed rule, with some amendments, to the Board, the LSC Board voted on January 27, 1989, to adopt as final, with one amendment, the Committee's recommendations. Notice of the Board action was furnished to the Appropriations Committees of the House and Senate by letter of February 8, 1989.

Background

Part 1626 was originally promulgated to implement the restrictions on the provision of legal assistance to certain aliens delineated in Pub. L. 97-377, the appropriations act for fiscal year 1983 funds. 48 FR 19750 (May 2, 1983). After comments were received and considered, the final regulation was promulgated on June 20, 1983, 48 FR 28089, and has been in effect since July 20, 1983.

Revisions To Conform to IRCA

A. *Five-Year Restriction.* In November 1986, IRCA was passed, amending the Immigration and Nationality Act (INA), 8 U.S.C. 1101 *et seq.*, for the purpose of "effectively control[ling] unauthorized immigration to the United States." H. Conf. Rep. 1000, 99th Cong., 2d Sess. 85 (1986). Section 201 of IRCA (Section 245A of INA) provides for the legalization of certain aliens who had been residing illegally in the United States prior to January 1, 1982. However, IRCA also provides in section 201(h) (Section 245A(h) of INA) that such aliens, commonly referred to as "amnesty" aliens, will be ineligible for a period of five years for "any program of financial assistance furnished under Federal law (whether through grant, loan, guarantee, or otherwise) on the basis of financial need, as such programs are identified by the Attorney General." On August 24, 1987, the Department of Justice's Immigration and Naturalization Service (INS) published a proposed rule listing LSC among those programs of financial assistance for which amnesty aliens would be ineligible. 52 FR 31784-31786 (Aug. 24, 1987). The rule, based on IRCA, disqualifies amnesty aliens who become permanent residents from being eligible for legal assistance for a period of five years from the date of grant of temporary resident alien status, unless the alien can qualify independently under another available exception.

Comments to LSC's proposed rule urged that LSC should not be considered a program of financial assistance furnished under Federal law, because LSC recipients do not provide financial assistance to eligible clients; instead, they provide free legal services.

The dispute centers on whether the phrase "program of financial assistance furnished under Federal law (whether through grant, loan, guarantee, or otherwise) on the basis of financial need" within the meaning of IRCA includes legal services. IRCA, by its terms, appears to answer the inquiry. LSC is not included in IRCA's list of federally funded programs that are excluded from the definition of programs of financial assistance. *See* section 201(h)(4) of IRCA (Section 245A(h)(4) of INA). In addition, section 301(d)(6) of IRCA (Section 210A(d)(6) of INA) specifically exempts LSC from being considered a program of financial assistance for the purposes of Replenishment Agricultural Workers (RAW), so that RAWs are made eligible for legal services. Thus, IRCA clearly indicates that LSC is considered to be a program of financial assistance under the general restriction in section 201(h) of IRCA; otherwise, the exception language for LSC would be wholly unnecessary and reduced to mere surplusage.

Though not an agency, instrumentality, or department of the Federal Government, 42 U.S.C. 2996d, LSC can be described as a program of financial assistance furnished under Federal law. Federal law gives LSC its authority to "provide financial assistance to qualified programs," 42 U.S.C. 2996e(a)(1)(A), and LSC distributes Federal funds to programs to provide services to clients based on financial need. *See* 42 U.S.C. 2996a(3) and 2996f(a)(2).

The fact that LSC recipients provide services rather than cash benefits does not mean that such programs are not programs of financial assistance. Again this construction would render unnecessary the specific exception in section 301(d)(6) making legal services available to RAWs.

Comments urged that only the Attorney General has authority to define which federally funded entities are to be considered programs of financial assistance and that, absent publication of the final rule by INS, LSC has no authority to interpret IRCA as including LSC as such a program. IRCA provides that amnesty aliens are not eligible for any program of financial assistance "as such programs are identified by the Attorney General in consultation with other appropriate heads of the various departments and agencies of Government." *See* section 201(h)(1)(A)(i) of IRCA (section 245(h)(1)(A)(i) of INA). A final INS rule will constitute a determination by the Attorney General specifying which programs are subject to the rule. However, INS has not yet published its final rule, and LSC recipients need immediate direction as to whether they may represent amnesty aliens who are now eligible to be granted permanent resident alien status. In the event that the Attorney General reaches a conclusion inconsistent with this rule, the Board will revisit the matter.

Comments also suggested that the proposed rule establishing the five-year disqualification period contravenes the spirit of IRCA, because Congress, it was asserted, must have intended to provide free legal assistance to amnesty aliens once they achieve permanent resident

VOL. 54 ISS. 80 AP 27 1989 UMI

status. Comments cited IRCA's grant to amnesty aliens of the right to participate in several Federal programs and its general aim that the Attorney General "safeguard the constitutional rights, personal safety, and human dignity of United States citizens and aliens." Pub. L. 99-603, 100 Stat. 3384 (1986) (sec. 115 of IRCA). Without legal services, the comments reasoned, amnesty aliens would be unable to enforce the rights Congress provided them in IRCA.

The disqualification rule, however, is mandated by the terms of IRCA. LSC cannot "elevate the rhetoric of purpose above the specifics of text," and, therefore, ignore the subtleties and complexities of crafting legislation. *See Common Cause* v. *Federal Election Com'n.*, 842 F.2d 436, 445 (D.C. Cir. 1988).

Finally, setting aside the characterization of LSC as a program of financial assistance, comments insisted that LSC is authorized under its appropriations act to provide legal assistance to amnesty aliens when they receive permanent resident status, regardless of the five-year restriction. Under this view, LSC's appropriations act would provide independent and superior authority for LSC recipients to represent any permanent resident alien, and this authority should not be affected or limited by the IRCA restriction.

The LSC appropriations act does not, by its terms, mandate provision of legal assistance to any class of aliens; it merely forbids legal assistance to certain aliens, principally temporary aliens. The five-year restriction is applicable whether or not amnesty aliens gain permanent status, in part, because IRCA specifically states that its restriction controls "notwithstanding any other provision of law." Section 245A(h)(1) of IRCA, 8 U.S.C. 1255a(h)(1) of INA. Moreover, the rule interprets the five-year restriction in IRCA as being applicable only to the new category of permanent resident amnesty aliens created by IRCA. As noted above, LSC recipients may continue to represent all other categories of permanent resident aliens, as they have in the past.

B. *SAWS, RAWS, and H-2 Agricultural Workers.* IRCA also created three new categories of aliens—Special Agricultural Workers (SAWS), Replenishment Agricultural Workers (RAWS), and H-2 Workers—who are eligible for services from LSC-funded programs. The final rule provides LSC recipients the authority to represent such aliens.

IRCA provides for the adjustment or admittance of special agricultural workers and replenishment agricultural workers. Pursuant to sections 302 and 303 of IRCA, SAWS and RAWS are considered to be permanent resident aliens for all purposes except immigration. *See* 8 U.S.C. 1160(a)(5) and 8 U.S.C. 1161(d)(4). As permanent resident aliens, these agricultural workers are eligible for legal assistance from LSC recipients once their status has been adjusted to that of a SAW or RAW, but not for purposes of attaining such status.

IRCA also created a new non-immigrant sub-category of H-2 workers. These workers are to be considered permanent resident aliens for purposes of receiving assistance from legal services programs with regard to housing, wages, transportation and other conditions of employment under their H-2 contract, but for no other purposes. A new § 1626.11 is included in the revisions to Part 1626 to implement the H-2 worker provisions of IRCA.

Revisions Implementing LSC's Appropriations Act

LSC has adopted a revision to the definition of "on behalf of" in § 1626.3(c) to prevent representation not authorized by LSC's appropriations act. The change will reinforce the prohibition on representation of an ineligible client under the pretense of representing an eligible client. The comments confirmed that there was little disagreement about what the statutory language and the regulation intended; rather, the disagreement focused on the concern that the revision as published in the proposed rule would have added more uncertainty to the rule. Accordingly, the definition was revised to satisfy these concerns by providing that:

> To provide legal assistance "on behalf of" an ineligible alien is to render legal assistance to an eligible client which benefits an ineligible alien and does not affect a specific legal right or interest of the eligible client.

This definition focuses on the identity of the client rather than on whether a benefit flows to either an ineligible or eligible client. Legal assistance that benefits an ineligible alien will be allowed only when an eligible person is in fact the client whose legal interests or rights are advanced by the representation.

Miscellaneous Revisions

A. *Section 1626.4.* The language of § 1626.4(a) has been changed to conform to the language of the appropriations act, which requires an alien to be present in the United States in order to be eligible for legal assistance. Pub. L. 100-459, 102 Stat. 2225 (1988).

The listing of categories of ineligible aliens in § 1626.4(b) has been deleted as unnecessary. An alien who does not fit into one of the categories defined in § 1626.4(a) is not eligible for legal services that are financed by funds appropriated under the relevant appropriations act.

B. *Section 1626.5.* Section 1626.5 has been changed to delete as unnecessary the listing of documents which do not provide evidence of eligible alien status. To be eligible for legal services, an alien must present one of the documents stated in § 1626.5(b).

The new paragraph (c) of § 1626.5 states that a Special Agricultural Worker who presents an INS Form I-688 is eligible for legal services.

Section 1626.5(f), which permits brief advice by telephone, has been revised to clarify that "brief advice" is limited to advice provided by telephone and does not include continuous representation of a client.

C. *Section 1626.10(a).* Paragraph (a) has been revised because the term "Micronesia" is a geographic rather than a political term. This change makes the language of § 1626.10(a) more precise and, in addition, restates congressional intent that residents of these political entities are eligible to be clients of a legal services program.

Technical Corrections

The authority section of Part 1626 has been revised to include LSC's current appropriations act. In addition, all references in Part 1626 to Pub. L. 93-355 have been changed to LSC's fiscal year 1989 appropriations act, Pub. L. 100-459, and "any succeeding act which contains the same restrictions." This revision is necessary to eliminate the necessity of amending the regulation annually.

Reprogramming

Pursuant to Pub. L. 100-459, 102 Stat. 2226 (1988), the Corporation is required to give 15 days notice to the appropriations committees of both Houses of Congress prior to publishing as final revisions to its regulations. Reprogramming letters were duly sent to the appropriate committees, and responses were received from both the House and Senate Subcommittees of the Departments of Commerce, Justice, and State, the Judiciary and related agencies. The Senate committee expressed disagreement with the LSC Board's interpretation of IRCA, and stated that it preferred to withhold consideration of approval until the Attorney General makes a final decision as to whether LSC is a program of financial assistance for the purposes of IRCA. The House committee, also concerned about the statutory authority of the Attorney General to issue a rule on the issue, stated that it could not, at this time, approve the regulations.

After careful analysis, as set out above, the Corporation believes that its recipients need immediate direction as to whether they may represent amnesty aliens who are now eligible to be granted permanent resident alien status. An expression of committee disapproval, while respectfully considered, does not affect the authority of LSC to publish its revisions as final, as only notice, and not approval, is statutorily required. Pub. L. 100-459, 102 Stat. 2226 (1988); 130 CONG. REC. S8588-8589 (daily ed. June 28, 1984); and *Principles of Federal Appropriations Law* 2-29 (GAO ed. 1982).

List of Subjects in 45 CFR Part 1626

Aliens, Legal services, Privacy, Reporting and recordkeeping requirements.

For the reasons set out above, 45 CFR Part 1626 is amended as follows:

PART 1626—RESTRICTIONS ON LEGAL ASSISTANCE TO ALIENS

1. The authority citation for Part 1626 is revised to read as follows:

Authority: Sec. 1006(e); Pub. L. 93-355, 88 Stat. 378 (42 U.S.C. 2996g(e)); Pub. L. 99-603, 100 Stat. 3417; Pub. L. 100-459, 102 Stat. 2186.

2. Section 1626.1 is revised to read as follows:

§1626.1 Purpose.

This part is designed to assist recipients in determing the eligibility and immigration status of persons who seek legal assistance, to provide guidelines for referral of ineligible persons, and to protect the confidentiality of information obtained from clients and prospective clients. This part does not apply to any case or matter in which assistance is not being provided with funds appropriated under Pub. L. 100-459 or any succeeding act which contains the same restrictions.

3. Section 1626.2 paragraph (b) is revised to read as follows:

§ 1626.2 Definitions.

* * * * *

(b) "Ineligible alien" means an alien who does not meet the requirements of §1626.4(a) and who is consequently determined not to be eligible to receive legal assistance under Pub. L. 100-459 or any succeeding act which contains the same restrictions.

* * * * *

4. Section 1626.3 is revised to read as follows:

§1626.3 Prohibition of legal assistance "for or on behalf of" an ineligible alien.

(a) *General.* No funds made available to a recipient by the Corporation under the authority of Pub. L. 100-459 or any succeeding act which contains the same restrictions shall be used to provide legal services for or on behalf of any person unless that person is a citizen of the United States or an eligible alien.

(b) *Prohibited Legal Assistance "for" an Ineligible Alien.* (1) To provide legal assistance "for" an ineligible alien is equivalent to furnishing legal assistance to a client and it shall be deemed to be coextensive with accepting an ineligible alien as a client. Consequently, all recipients are prohibited from using Corporation funds to pay any costs connected with furnishing legal assistance to clients who are ineligible aliens.

(2) Normal intake procedures and referral of ineligible alien clients by the same procedures used to refer other classes of ineligible clients are excepted from this prohibition. If a referral is not possible, an ineligible alien client may not be represented with Corporation funds that contain the same restrictions on such representation. If such an ineligible alien client is referred, a recipient may not participate further in the case using Corporation funds.

(3) The provisions of section 1010(c) of the Legal Services Corporation Act, 42 U.S.C. 2996i(c), do not apply to the expenditure of funds to represent ineligible aliens. Such aliens may be represented if all costs of such representation, including staff time, are funded from non-Corporation sources.

(c) *Prohibited legal assistance "on behalf of" an ineligible alien.* To provide legal assistance "on behalf of" an ineligible alien is to render legal assistance to an eligible client which benefits an ineligible alien and does not affect a specific legal right or interest of the eligible client.

5. Section 1626.4 paragraphs (a) introductory text, (a)(1), and (b) are revised to read as follows:

§1626.4 Alien status and eligibility.

(a) Subject to all other eligibility requirements of the Act, an alien who is present in the United States and who is within one of the following categories shall be eligible for legal services:

(1) An alien lawfully admitted for permanent residence as an immigrant as defined by section 1101(a)(20) of the Immigration and Nationality Act (INA) (8 U.S.C. 1101 (a)(20)) except that an alien who has adjusted his status to that of temporary resident alien under the provisions of section 245A of INA (section 201 of IRCA, 100 Stat. 3394, 8 U.S.C. 1255a) shall not be eligible for legal assistance pursuant to the provisions of section 245A(h) of INA (8 U.S.C. 1255a(h)) for a period of five years, which commences on the date the alien is granted temporary resident alien status as determined by INS, whether or not such alien acquires the status of permanent resident alien during the five-year period, unless the alien can qualify independently under another exception to the general restrictions as stated in § 1626.4(a)(2), (3), or (4).

* * * * *

(b) An alien who is not within one of the eligibility categories defined in § 1626.4(a) shall not be eligible for legal services.

6. Section 1626.5 paragraphs (a)(5), (b)(1), (c) and (f) are revised, paragraph (b)(5) is added, and paragraph (a)(6) is removed to read as follows:

§ 1626.5 Verification of citizenship and eligible alien status.

(a) * * *

(5) Baptismal certificate showing place of birth within the United States and date of baptism within two months after birth.

(b) * * *

(1) An alien in the category specified in § 1626.4(a)(1) shall present an Alien Registration Receipt Card (INS Forms I-151 or I-551), a Temporary Evidence of Lawful Admission for Permanent Residence form (INS Form I-181B), or a valid passport and immigration visa.

* * * * *

(5) A recipient may also accept any other authoritative document issued by INS that provides evidence of alien status for the categories of aliens listed in paragraph (b) of this section.

(c) A Temporary Resident Card (INS Form I-688) shall be considered evidence of eligible alien status in the case of a Special Agricultural Worker. *See* § 1626.10(c). This form shall not be considered evidence of eligible alien status in the case of an alien who has obtained an adjustment in status under the General Amnesty provisions of Immigration Reform and Control Act (IRCA), 8 U.S.C. 1255a, unless the alien can qualify independently under another exception to the general restriction as stated in § 1626.4(a) (2), (3), or (4).

* * * * *

(f) No written verification is required when the only service provided for an eligible alien or citizen is brief advice and consultation by telephone. The term "brief advice" is limited to advice provided by telephone and does not include a continuous representation of a client.

VOL. 54 ISS 80 AP 27 1989 UMI

7. Section 1626.6 paragraphs (a) introductory text, (a)(3), and (b)(1) are revised to read as follows:

§ 1626.6 Disposition of cases involving ongoing representation of ineligible aliens.

(a) A recipient may not use funds available to it under the authority of Pub. L. 100–459 or any succeeding act which contains the same restrictions to provide legal assistance to ineligible aliens; other alternatives must be used to dispose of pending cases in which the client is an ineligible alien. Generally three alternatives are available:

* * * * *

(3) Continuance of representation supported by funds available to the recipient either from non-Corporation sources or from unexpended carryover balances of pre-1983 Corporation funds. As such other funds will normally be limited, referral or discontinuance of representation should be chosen wherever not inconsistent with an attorney's professional responsibilities.

(b)(1) Where referral or discontinuance of representation is not possible and no other funds are available, the recipient may permit a staff attorney to complete the case (or bring it to a stage where referral or discontinuance is possible) on an uncompensated basis. In such instances, the attorney may use the necessary minimum of recipient overhead support, but direct expenditures of funds appropriated by Pub. L. 100–459 or any succeeding act which contains the same restrictions will not be permitted.

* * * * *

8. Section 1626.7 paragraphs (a) introductory text and (b) are revised to read as follows:

§ 1626.7 Change in circumstances.

(a) A recipient shall not use funds made available to it under the authority of Pub. L. 100–459 or any succeeding act which contains the same restrictions to provide legal assistance for or on behalf of an alien if:

* * * * *

(b) A recipient shall discontinue representation supported by Corporation funds under the circumstances described in § 1626.7(a), provided discontinuance is not inconsistent with the attorney's professional responsibilities. In discontinuing representation, a recipient shall follow the procedures set out in § 1626.6. In the event of discovery of false information relating to eligibility as set forth in § 1626.7(a)(3), steps to discontinue representation shall be taken immediately.

9. Section 1626.10 paragraph (a) is revised and paragraph (c) is added to read as follows:

§ 1626.10 Special eligibility questions.

(a) *Micronesia.* The alien restriction stated in the appropriations acts is not applicable to the legal services program in the following Pacific Island entitites:

(1) Commonwealth of the Northern Marianas;

(2) Republic of Palau;

(3) Federated States of Micronesia;

(4) Republic of the Marshall Islands.

All citizens of these entities are eligible to receive legal assistance, provided they are otherwise eligible under the Act.

* * * * *

(c) *Special agricultural workers.* An alien who qualified as a special agricultural worker and whose status is adjusted to that of temporary resident alien under the provisions of IRCA is considered a permanent resident alien for all purposes except immigration under the provisions of section 302 of Pub. L. 99–603, 100 Stat. 3422, 8 U.S.C. 1160(g). Since the status of these aliens is that of permanent resident allen under section 1101(a)(20) of Title 8, these workers are eligible for legal assistance. These workers are ineligible for legal assistance in order to obtain the adjustment of status of temporary resident under IRCA, but are eligible for legal assistance after the application for adjustment of status to that of temporary resident has been filed, as long as such application has not been rejected and the applicant is eligible for services under § 1626.4(a)(2).

10. Section 1616.11 is added to read as follows:

§ 1626.11 H–2 Agricultural workers.

(a) Nonimmigrant agricultural workers admitted under the provisions of 8 U.S.C. 1101(a)(15)(H)(ii), commonly called H–2 workers, are considered to be aliens described in 8 U.S.C. 1101(a)(20) and, as such, are eligible for legal assistance regarding the matters specified in section 305 of the Immigration Reform and Control Act of 1986. Pub. L. 99–603, 100 Stat. 3434, 8 U.S.C. 1101 note.

(b) The following matters which arise under the provisions of the worker's specific employment contract may be the subject of legal assistance by an LSC-funded program:

(1) Wages;

(2) Housing;

(3) Transportation; and

(4) Other employment rights as provided in the worker's specific contract under which the nonimmigrant worker was admitted.

11. Section 1626.12 is added to read as follows:

§ 1626.12 Replenishment agricultural workers.

Aliens who acquire the status of aliens lawfully admitted for temporary residence as replenishment agricultural workers under section 210A(c) of the Immigration and Nationality Act, such status not having changed, are considered to be aliens described in 8 U.S.C. 1101(a)(20) and, as such, are eligible for legal assistance.

Timothy B. Shea,

General Counsel.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Parts 1825 and 1852

Interim Changes to the NASA FAR Supplement on Domestic Preference

AGENCY: Office of Procurement, Procurement Policy Division, National Aeronautics and Space Administration (NASA).

ACTION: Interim rule with request for comments.

SUMMARY: This notice establishes interim amendments to the NASA Federal Acquisition Regulation Supplement, Chapter 18 of the Federal Acquisition Regulations System and invites written comments on these interim amendments. The rule implements section 209 of Pub. L. 100–685, the FY 89 NASA Authorization Act which contains a special domestic preference ("Buy American") provision.

EFFECTIVE DATE: April 30, 1989.

ADDRESS: Comments should be addressed to W.A. Greene, Chief, Regulations Development Branch, Office of Procurement, Procurement Policy Division, NASA Headquarters, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: W.A. Greene, Telephone: (202) 453–8923.

SUPPLEMENTARY INFORMATION:

Background

NASA is issuing interim changes to the NASA FAR Supplement to implement section 209 of Pub. L. 100–685, the FY 89 NASA Authorization Act. For the second time in two years, Congress has placed a domestic preference ("Buy American") provision in the NASA Authorization Act. The provision differs from the Buy American Act in several aspects. The NASA provision applies only to manufactured supplies, while the Buy American Act applies to manufactured and unmanufactured supplies. The NASA provision provides a preference for domestic firms offering domestic products, unlike the Buy American Act which applies only to domestic products. Offers from foreign firms must be evaluated by adding a six percent differential in accordance with this new provision, whereas the Buy American Act also prescribes a twelve percent differential to be applied to the foreign offer when offers from small business or labor surplus area concerns are received.

The NASA domestic preference is to be applied after application of other international acquisition laws. It requires that award be made to a domestic firm if, after the use of competitive procedures, award to a foreign firm is indicated but the following three criteria are met: (1) the final manufactured end product of the domestic firm will be completely assembled in the United States; (2) not less than 50 percent of the final product will be domestically produced; and (3) the domestic offer does not exceed the foreign offer by more than 6 percent.

There are three exceptions. The law need not be applied when (1) application would not be in the public interest; (2) compelling national security considerations require otherwise; or (3) the United States Trade Representative determines that an award would be in violation of the General Agreement on Tariffs and Trade or an international agreement to which the United States is a party. With respect to the third exception, NASA has obtained from the United States Trade Representative a blanket determination that the NASA domestic preference is not to be applied when competitive procedures result in an apparent award to a foreign firm for an end product from a country that has signed the Agreement on Government Procurement ("Code country") or from certain other countries.

Crafting appropriate regulatory implementation of the law has been a lengthy process. NASA considers avoidance of any further delay in complying with the statute to constitute urgent and compelling circumstances. Therefore, the changes are being issued as an interim rule without public comment prior to their effectivity.

Impact

E.O. 12291. The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted certain agency procurement regulations from Executive Order 12291. This regulation falls within the exemption.

Regulatory Flexibility Act. These revisions will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Moreover, the proposed coverage merely implements a section of Pub. L. 100–685 which is expected to apply to very few, if any, potential contractors during any particular year. Therefore, the Regulatory Flexibility Act does not apply.

Paperwork Reduction Act. This interim rule does not impose any reporting or recordkeeping requirements subject to the Paperwork Reduction Act of 1980.

List of Subjects in 48 CFR Parts 1825 and 1852

Government procurement.

L.E. Hopkins,

Deputy Assistant Administrator for Procurement.

1. The authority citation for 48 CFR Parts 1825 and 1852 continues to read as follows:

Authority: 42 U.S.C. 2473(c)(1).

PART 1825—FOREIGN ACQUISITION

2. Part 1825 is amended by adding Subpart 1825.71 to read as follows:

Subpart 1825.71—NASA Domestic Preference

1825.7100 Scope of subpart.
1825.7101 Definitions.
1825.7102 Policy.
1825.7103 Procedures.
1825.7104 Determination by United States Trade Representative.
1825.7105 Solicitation provision and contract clause.

Subpart 1825.71—NASA Domestic Preference

1825.7100 Scope of subpart.

This subpart implements section 209 of Pub. L. 100–685, the National Aeronautics and Space Administration Authorization Act of 1989.

1825.7101 Definitions.

"Code country," as used in this subpart, means a country that is a signatory to the Agreement on Government Procurement (the "Procurement Code"). The Code countries are Austria, Belgium, Canada, Denmark, Federal Republic of Germany, Finland, France, Hong Kong, Ireland, Israel, Italy, Japan, Luxenbourg, Netherlands, Norway, Singapore, Sweden, Switzerland, and United Kingdom.

"Code country end product," as used in this subpart, means an article that (a) is wholly the growth, product, or manufacture of the Code country, or (b) in the case of an article which consists in whole or in part of materials from another country or instrumentality, has been substantially transformed into a new and different article of commerce with a name, character, or use distinct from that of the article or articles from which it was so transformed. The term includes services (except transportation services) incidental to its supply; provided, that the value of those incidental services does not exceed that of the product itself. It does not include service contracts as such (see FAR 25.401).

"Components," as used in this subpart, means those articles, materials, and supplies incorporated directly into the end products.

"Domestic firm," as used in this subpart, means a business entity that is organized under the laws of the United States and that conducts business operations in the United States.

"Domestic product," as used in this subpart, means the final manufactured end product of a domestic firm that will be completely assembled in the United States and of which, when completely assembled, not less than 50 percent of the cost of all the components will be domestically incurred.

"Foreign firm," as used in this subpart, means a business entity other than a domestic firm.

"Procurement code," as used in this subpart, means the Agreement on Government Procurement (see FAR 25.400).

1825.7102 Policy.

(a) When the use of competitive procedures to buy an end product (see FAR 6.1 and 6.2) results in an apparent award of a contract to a foreign firm, the contracting officer shall award the contract to a domestic firm offering a domestic product if the domestic offer does not exceed the foreign offer by more than six percent.

(b) Paragraph (a), above, does not apply if—

(1) Such applicability would not be in the public interest;

(2) Compelling national security considerations require otherwise; or

(3) The United States Trade Representative determines that such an award would be in violation of the General Agreement on Tariffs and Trade or an international agreement to which the United States is a party. Examples of such international agreements are the Procurement Code,

VOL. 54 ISS 80 APR 27 1989 UMI

the U.S.-Canada Free Trade Agreement, and the U.S.-Israel Free Trade Agreement.

1825.7103 Procedures.

(a) The NASA domestic preference procedure is to be applied when the use of competitive procedures, including any other domestic preference program or exception thereto, indicates award is to be made to a foreign firm.

(b) The contracting officer shall award the contract to that domestic firm offering a domestic product whose price does not exceed the price of the low foreign firm by more than six percent, unless the contracting officer has documented the file to indicate that one or more of the conditions at 1825.7102(b) applies.

1825.7104 Determination by United States Trade Representative.

The United States Trade Representative has determined that when NASA is procuring supply-type products, application of the domestic preference established by section 209 of the National Aeronautics and Space Administration Authorization Act of 1989 would violate the General Agreement on Tariffs and Trade, and certain international agreements to which the United States is a party, when the following conditions exist:

(a) NASA is using competitive procurement procedures; and

(b) NASA receives one or more offers from foreign firms to supply—

(1) A Code country end product at a price above the Trade Agreement Act threshold;

(2) A Canadian end product (see FAR 25.401) at a price above $35,000 and below the Trade Agreements Act threshold; or

(3) An Israeli end product at a price above $35,000.

1825.7105 Solicitation provisions and contract clause.

The contracting officer shall insert the provision at 1852.225–74, NASA Domestic Preference Certificate, and the clause at 1852.225–75, NASA Domestic Preference, in all competitive solicitations and contracts for supplies for which amounts are made available under the NASA Authorization Act, Fiscal Year 1989.

PART 1852—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

3. Part 1852 is amended by adding 1852.225–74 and 1852.225–75 to read as follows:

1852.225–74 NASA Domestic Preference Certificate

As prescribed in 1825.7105, insert the following provision:

NASA Domestic Preference Certificate (April 1989)

(a) For purposes of this provision, the following definitions apply:

"Code country," as used in this subpart, means a country that is a signatory to the Agreement on Government Procurement (the "Procurement Code"). The Code countries are Austria, Belgium, Canada, Denmark, Federal Republic of Germany, Finland, France, Hong Kong, Ireland, Israel, Italy, Japan, Luxenbourg, Netherlands, Norway, Singapore, Sweden, Switzerland, and United Kingdom.

"Code country end product," as used in this subpart, means an article that (a) is wholly the growth, product, or manufacture of the Code country, or (b) in the case of an article which consists in whole or in part of materials from another country or instrumentality, has been substantially transformed into a new and different article of commerce with a name, character, or use distinct from that to the article or articles from which it was so transformed. The term includes services (except transportation services) incidental to its supply; provided, that the value of those incidental services does not exceed that of the product itself. If does not include service contracts as such (see FAR 25.401).

"Components," as used in this provision, means those articles, materials, and supplies incorporated directly into the end products.

"Domestic firm," as used in this provision, means a business entity that is organized under the laws of the United States and that conducts business operations in the United States.

"Domestic product" means the final product of a domestic firm that will be completely assembled in the United States and of which, when completely assembled, not less than 50 percent of the cost of all the components will be domestically incurred.

"Foreign firm," as used in this provision, means a business entity other than a domestic firm.

"Foreign product," as used in this provision, means a product other than a domestic product.

(b) The offeror certifies that it is [ ] is not [ ] a domestic firm.

(c) The offeror certifies that (1) each final product, except those listed below, will be completely assembled in the United States and (2) when completely assembled, not less than 50 percent of the cost of all the components of the final product will be domestically incurred.

Foreign products (also specify if a product is a Code-country, Canadian, or Israeli end product): (End of provision)

1852.225–75 NASA domestic preference.

As prescribed in 1825.7105, insert the following clause:

NASA Domestic Preference (April 1989)

(a) The NASA domestic preference (Pub. L. 100–147, 101 Stat. 866) provides that NASA give preference to domestically produced and assembled final products of domestic firms.

"Components," as used in this clause, means those articles, materials, and supplies incorporated directly into the end products.

"Domestic firm" means a business entity that is organized under the laws of the United States and that conducts business operations in the United States.

"Foreign firm" means a business entity that is not a domestic firm.

(b) The contractor, if certified as a domestic firm, shall deliver only the final product of a domestic firm that will be completely assembled in the United States and of which, when completely assembled, not less than 50 percent of the cost of all the components will be domestically incurred. (End of clause)

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 655

[Docket No. 81020–9009]

Atlantic Mackerel, Squid, and Butterfish Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Specification increase; correction.

SUMMARY: NOAA issues this notice to correct omissions in the previous notices of Atlantic mackerel specification increases which were published on February 23, 1989 (54 FR 7777) and on March 14, 1989 (54 FR 10549). The regulations contained at § 655.21(b)(1)(iv) provide for incidental catch levels of *Loligo* squid and butterfish in relation to the TALFF for Atlantic mackerel. Therefore, IOYs for *Loligo* squid and butterfish are adjusted consistent with § 655.21(b)(1)(v) and the increase in the IOY of Atlantic mackerel. These increases support TALFF fisheries which are conducted in association with joint ventures involving U.S. mackerel fishermen, and are made to produce maximum net benefits to the United States. The following table lists the corrected specifications including the appropriate bycatch amounts for *Loligo* squid and butterfish, which were omitted in the previous notices and reflects the Atlantic mackerel specification increases accomplished pursuant to the previous notices identified above. Specification increases are made for the initial optimum yield (IOY) and total allowable level of foreign fishing (TALFF) for mackerel, *Loligo* squid and butterfish, and the domestic annual harvest (DAH) and joint venture processing (JVP) for mackerel.

EFFECTIVE DATE: April 21, 1989.

FOR FURTHER INFORMATION CONTACT: Paul H. Jones, (508) 281–9273.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 21, 1989.

Richard H. Schaefer,

Director of Office of Fisheries Conservation and Management, National Marine Fisheries Service.

TABLE.—SPECIFICATIONS FOR ATLANTIC MACKEREL, SQUID, AND BUTTERFISH FOR THE FISHING YEAR JANUARY 1 THROUGH DECEMBER 31, 1989

	Loligo squid		Atlantic mackerel		Butterfish	
	Specification	Increase to	Specification	Increase to	Specification	Increase to
Max OY [a]	44,000		[b] N/A		16,000	
ABC [c]	37,000		330,000		16,000	
IOY [d]	22,012	[d] 22,020	74,000	101,000	10,024	[d] 10,041

Proposed Rules

Federal Register
Vol. 54, No. 80
Thursday, April 27, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

7 CFR Part 1930

Stewart B. McKinney Homeless Assistance Amendment of 1988; Removal of Rent Increase Condition

AGENCY: Farmers Home Administration, USDA.

ACTION: Proposed Rule.

SUMMARY: The Farmers Home Administration (FmHA) proposes to amend its Multiple Family Housing Management and Supervision regulations to comply with recent legislation enacted by Congress which removes the requirement of incurring operating cost before qualifying for a rent increase. The intended effect is to make it easier and more feasible for the borrower to request a needed rent charge.

DATE: Comments must be received on or before June 26, 1989.

ADDRESSES: Submit written comments in duplicate to the Office of the Chief, Directives and Management Branch, FmHA, Room 6348, South Agriculture Building, Washington, DC 20250. All written comments made pursuant to this notice will be available for public inspection during regular work hours at the above address.

FOR FURTHER INFORMATION CONTACT: Carolyn B. Cooksie, Loan Specialist, Multiple Family Housing Servicing and Property Management Division, Room 5321–S, Farmers Home Administration, USDA, 14th and Independence Avenue, SW., Washington, DC 20250, Telephone (202) 382–1599.

SUPPLEMENTARY INFORMATION:

Classification

This action has been reviewed under USDA procedures established in Departmental Regulation 1512–1, which implements Executive Order 12291, and has been determined "nonmajor." It will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State or Local government agencies, or geographic regions or significant adverse effects on competition, employment, investment, productivity, innovations, or on the ability of United States based enterprises to compete with foreign based enterprises in domestic or export markets.

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR Part 1940, Subpart G, "Environmental Program." It is the determination of FmHA that this action does not constitute a major Federal action significantly affecting the quality of the human environment and in accordance with the National Environmental Policy Act of 1969, Pub. L. 92–90, an Environmental Impact Statement is not required.

Intergovernmental Review

The programs listed in the Catalog of Federal Domestic Assistance under number 10.405 Farm Labor Housing Loans, 10.415 Rural Rental Housing Loans, and 10.427 Rural Rental Assistance Payments are subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials (7 CFR Part 3015, Subpart V, 48 FR 29112, June 24, 1983.)

General Information

Background and Statutory Authority

The Stewart B. McKinney Homeless Assistance Amendments of 1988 rescinded paragraph (h) of (42 U.S.C. 1485) section 515 of the Housing Act of 1949. This removes the requirement that loans approved after November 30, 1983, must incur operating cost before qualifying for a rent increase.

Exhibit C, paragraph III A, and paragraph VI C provides that FmHA 515 Multi-Family Housing borrowers who have loans approved after November 30, 1983, must incur operating cost before qualifying for a rent increase. This revision removes that requirement.

The undersigned has determined that this action will not have a significant economic impact on a substantial number of small entities such as governmental units or special districts with a population of less than 50,000.

List of Subjects in 7 CFR Part 1930

Accounting, Administrative practice and procedure, Grant programs—Housing and community development, Loan program—Housing and community development, Low and moderate-income housing—Rental, Reporting and recordkeeping requirements.

Accordingly FmHA proposes to amend Part 1930, Subpart C, Title 7, Code of Federal Regulations as follows:

PART 1930—GENERAL

1. The authority citation for Part 1930 continues to read as follows:

Authority: 42 USC 1480; 7 CFR 2.33; 7 CFR 2.70.

Subpart C—Management and Supervision of Multiple Family Housing Borrowers and Grant Recipients

2. Exhibit C is amended by removing paragraph VI C and redesignating paragraph VI D as paragraph VI C and by revising paragraphs III A and IV A 1 to read as follows:

Exhibit C—Rent Changes

* * * * *

III * * *

A. All RRH and LH applicants will be informed at the application stage of the agency's rent change procedure. All borrowers will be advised that all proposed rent changes must comply with this Exhibit. This Exhibit will also apply to rent changes resulting from Housing and Urban Development's (HUD) Automatic Annual Adjustment Factors for units receiving section 8, assistance. Requests for a rental change will be based on a realistic projected budget for the interim year or the ensuing full year.

IV * * *

A * * *

1. Facts demonstrating the need and justification for a rent change in accordance with paragraph III A of this Exhibit.

* * * * *

Dated: March 27, 1989.

Neal Sox Johnson,

Acting Administrator, Farmers Home Administration.

[IA–111–86]

Taxable Years Beginning After December 31, 1986; Changes With Respect to Prizes and Awards and Employee Achievement Awards; Public Hearing on Proposed Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed regulations relating to prizes and awards and employee achievement awards. These amendments are proposed to conform the regulations to section 122 of the Tax Reform Act of 1986 (Pub. L. 99–514).

DATES: The public hearing will be held on Friday, June 2, 1989, beginning at 10:00 a.m. Request to speak and outlines of oral comments must be delivered on or mailed by Friday, May 19, 1989.

ADDRESS: The public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, NW. Washington, DC. The requests to speak and outlines of oral comments should be submitted to the Commissioner of Internal Revenue, P.O. Box 7604, Ben Franklin Station, Attention: CC:CORP:T:R (IA–111–86), Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Carol Savage, telephone (202) 343–0232 (not a toll-free call).

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations appearing in the Federal Register for Monday, January 9, 1989, (54 FR 627).

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on proposed regulations should submit, not later than Friday, May 19, 1989, an outline of the oral comments to be presented at the hearing and the time they wish to devote to each subject.

Each speaker will be limited 10 minutes for an oral presentation exclusive of the time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers.

Copies of the agenda will be available free of charge at the hearing.

By direction of the Commissioner of Internal Revenue.

Dale D. Goode,

Chief, Regulations Unit, Assistant Chief Counsel (Corporate).

BILLING CODE 4830–01–M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 172

[DoD Instruction 7310.1]

Disposition of Proceeds From Sales of DoD Excess and Surplus Personal Property

AGENCY: Office of the Secretary, DoD.

ACTION: Proposed Rule.

SUMMARY: The part proposes revised and expanded instructions on the collection and disposition of payments received in connection with DoD sales of excess and surplus property made under authority of the Federal Property and Administrative Service Act of 1949. The issuances include new guidance on term bids, use of credit cards and expedited return of negotiable instruments to losing bidders. It also contains expanded guidance on the form of payment required in support of bids and final settlement.

DATES: Comments should be received by May 30, 1989.

ADDRESSES: Office of the Comptroller, DoD, Rm. 3A882, Pentagon, Washington, DC 20301–1100.

FOR FURTHER INFORMATION CONTACT: Mr. Melburn, Telephone (202) 697–6837

SUPPLEMENTARY INFORMATION:

List of Subjects 32 CFR Part 172

Defense contracts, Government property management.

Accordingly, Title 32, Subchapter E, is proposed to be amended to add Part 172 to read as follows:

PART 172—DISPOSITION OF PROCEEDS FROM SALES OF DOD EXCESS AND SURPLUS PERSONAL PROPERTY

Sec.
172.1 Purpose.
172.2 Applicability and scope.
172.3 Policy.
172.4 Procedures.
Appendix A—Effort Associated with the Disposal of Recyclable Material
Appendix B—Disposition of Amounts Collected From Successful Bidders.

Authority: 40 U.S.C. 484 and 485, 10 U.S.C. 2577.

§ 172.1 Purpose.

This part provides revised and expanded instructions on the collection and disposition of cash and cash equivalents received by the DoD Components in connection with the sale of DoD excess and surplus personal property.

§ 172.2 Applicability and scope.

(a) This part applies to the Office of the Secretary of Defense, the Military Departments, the Organization of the Joint Chiefs of Staff, and the Defense Agencies (hereafter referred to as "DoD Components").

(b) This part is applicable to the proceeds resulting from sales made under authority of the Federal Property and Administrative Services Act of 1949. It applies to the following:

(1) Personal property governed by the Defense Disposal Manual, DoD 4160.21–M.[1]

(2) Surplus Government-owned personal property in the possession of contractors as described in 48 CFR Subpart 45.6 of the Federal Acquisition Regulation.

(3) Recyclable material governed by 10 U.S.C. 2577. Such materials would otherwise be sold as scrap or discarded as waste but are capable of being reused after undergoing some type of physical or chemical processing. The recycling of hazardous materials shall be accomplished with due recognition of the types of materials being processed and any applicable regulation governing the handling and disposal of such materials. Qualified recyclable materials do not include the following:

(i) Precious metal-bearing scrap and those items that may be used again for their original purposes or functions without any special processing, for example, used vehicles, vehicle or machine parts, bottles (not scrap glass),

[1] Defense Logistics Agency, Attn. DLA—XPD Alexandria, VA 22304.

VOL 54 ISS 80 AP 27 1989 UMI

electrical components, and unopened containers of oil or solvents.

(ii) Ships, planes, or weapons that must undergo demilitarization or mutilation prior to sale.

(iii) Scrap generated from DoD industrial fund operations that has been routinely sold with the proceeds being used to offset customer costs.

(iv) Bones, fats and meat trimmings generated by a commissary store or exchange.

§172.3 Policy.

(a) Cash or cash equivalents in the prescribed amounts shall accompany bid deposits for a bid to be considered responsive. Similarly cash or cash equivalents for the total sales price shall be received by the DoD Components or, in authorized cases, by contractors prior to the transfer of physical possession to the successful bidder.

(b) Amounts collected by the DoD Components in connection with the sale of excess and surplus property shall be deposited promptly to the U.S. Treasury accounts prescribed in this Instruction. The use of suspense accounts shall be held to a minimum. If the account ultimately to be credited with the proceeds of a sale can be determined reasonably at the time funds are collected, the deposit shall be made immediately to that account.

(c) The Secretary of each Military Department shall establish qualified recycling programs. The effort associated with the collection, processing and sale of recyclable material is set forth in Appendix A to this part.

(1) Proceeds from the sale of recyclable material shall be used to reimburse installation level costs incurred in operation of the recyclable program.

(2) After reimbursement of the cost incurred by the installation to operate the recycling program, Installation Commanders may use up to 50 percent of remaining sale proceeds for pollution abatement, energy conservation, and occupational safety and health activities. A project may not be carried out for an amount greater than 50 percent of the amount established by law as the maximum amount for a minor construction project.

(3) Any sale proceeds remaining after paragraph (c) (1) and (2) of this section, may be transferred to installation morale of welfare activities. If a nonappropriated funded activity can operate a recycling program for certain material without support from DoD funded activities, an installation commander may transfer applicable material to that activity to dispose of. Applicable collections shall be retained by the nonappropriated fund activity for distribution to morale and welfare activities.

§ 172.4 Procedures.

(a) *Required bid deposits.* When a sale conducted by a DoD Component provides for bid deposit with subsequent removal, the following procedures shall apply:

(1) *Term bid.* This type of bid deposit is applicable when the sale involves the purchase of scrap or disposable material that will be generated over time with periodic removal by the successful bidder. The amount of the bid deposit required to accompany such bids is the average estimated quantity of such material to be generated during a three-month period multiplied by 20 percent of the bid price. The calculation is illustrated as follows:

Estimated quantity of material to be generated each quarter.	3,000	pounds.
Bid price—$1.00 per pound.	× $1.00	
Subtotal	$3,000	
20 percent of bid price	20	percent.
Amount to accompany bid.	$600	

(2) *Other than term bid.* With the exception of term bids, payment in the amount of 20 percent of the bid shall accompany the bid.

(b) *Payment terms.* When a sale conducted by a DoD Component provides for immediate pickup the entire amount of the sales price shall be collected from the buyer at the conclusion of the sale. If the sale provides for a bid deposit, the balance of the bid price shall be paid prior to the delivery of the purchased material to the purchaser:

(c) *Form of payment*—(1) *Cash and certified checks.* When a sale is conducted by a DoD Component cash or its equivalent shall be collected for bid deposits and for remaining amounts due. Guaranteed negotiable instruments, such as cashiers checks, certified checks, travelers checks, bond drafts, postal money orders are acceptable as a cash equivalent.

(2) *Personal checks.* Personal checks may be accepted by a DoD Component only when a bond or a bank letter of credit is on hand that will cover the amount due. If the check is dishonored, amounts due shall be collected from the issuer of the bond or letter of credit.

(i) If a bidder intends to use a bond or letter of credit without an accompanying personal check, the claim against the bond or letter of credit shall be made for any amounts due.

(ii) If personal checks are used, the bond or letter of credit shall be returned intact after the applicable personal checks are honored unless other instructions have been received from the bidder.

(3) *Credit cards.* Approved credit cards may be accepted by a DoD Component for payment.

(i) Prior to intiating any credit card transactions, the selling DoD Component shall enter into an agreement with a network commercial bank. Currently, the Treasury has approved the use of "Master Card" and "Visa" charge cards. Changes or additions to approved credit cards will be announced in DoD Comptroller memoranda or in changes to the Treasury Financial Manual. Except for equipment and communication costs, the Treasury pays any fees normally charged to sellers. If the Treasury policy of paying such charges is changed, any charges for the processing of approved credit card transactions shall be assessed to the buyer.

(ii) If a credit card is used for the bid deposit and authorization is declined, the bid shall be rejected as nonresponsive and other bidders considered.

(iii) Approval for charges against credit cards shall be processed as follows:

(A) The credit card presented shall be passed through the DoD installation's credit card swiper. The swiper is connected electronically with the network commercial bank selected by the DoD Component, and keys are provided to enter the proposed charge amount. If the charge is approved, the swiper will provide an approval number that shall be recorded on the charge slip.

Note: A swiper is an electronic device that is used to capture the magnetic information contained on a credit card and transmit it to the network commercial bank for validation and authorization of a sale. The information captured normally includes the account number, issuing bank, date of expiration of the card, and any credit restrictions that may apply.

(B) The bidder shall sign a standard credit card charge form. The installation shall return a copy of the signed form to the card holder. A copy of the charge slip shall be retained by the selling DoD activity as a record of the sale. On the following business day, the installation Finance and Accounting Officer or the activity providing accounting support shall submit the signed credit card forms with a supporting cover sheet showing the total charges to the network commercial bank. Accounting control must be maintained over such in-transit deposits.

(C) Upon receipt of the credit card charge forms, the network commercial bank will charge the bidder's credit card account and deposit the funds to the Treasury general account. The network commercial bank also is required to forward a copy of the deposit slip to the DoD installation making the sale within one business day. Upon receipt of the deposit slip the in-transit account will be cleared and appropriate accounts credited following the procedures set forth in paragraph (d) of this section.

(iv) If a contractor's bid is provided by message, mail or telephone to the U.S. Government using a credit card in lieu of other forms of payment, the following information is required: account number, bidders name as it appears on the credit card, date of expiration of the card, issuing bank, and the type of card. Any additional cost incurred by the Department of Defense in connection with the use of the charge card, such as telephone calls to obtain approval from the network bank, shall be billed to the purchaser as an additive charge.

(d) *Disposition of proceeds.* (1) Proceeds from the sale of disposable excess and surplus personal property shall be deposited by the collecting DoD Component promptly to the U.S. Treasury accounts prescribed in Appendix B of this part. The use of suspense accounts shall be held to a minimum. If the account ultimately to be credited with the proceeds of a sale can be determined reasonably at the time the funds are collected, the deposit shall be made immediately to that account.

(2) See paragraph (f) of this section for special instructions on the processing of proceeds resulting from the sale of recyclable material.

(e) *Return of bid deposits to unsuccessful bidders.* (1) Cash collected from unsuccessful bidders by a DoD Component shall be deposited to account X6875, "Suspense," and a check shall be drawn on that account to reimburse unsuccessful bidders.

(2) Normally, noncash bid deposits shall be returned to unsuccessful bidders by DoD Components through the mail. However, when a bidder has requested expedited return and has provided the name of a carrier and a charge account number, the designated carrier shall be called to pick up the deposit with applicable delivery costs to bill to the bidder.

(f) *Sales of recyclable material.* The effort associated with collection and processing of Recyclable Material are reflected in Appendix A to this part. When the recycling program is operated by a DoD Component the following Transactions For Others (TFO) procedures apply:

(1) Proceeds from the sale of recyclable material shall be deposited in F3875, "Budget Clearing Account (Suspense)." The deposit to F3875 shall identify the fiscal station and the name of the installation (in clear) that is to receive the proceeds. Deposits that do not provide the necessary information shall be returned formally to the property disposal cashier for provision of the required information.

(2) The Military Department's finance and accounting office receiving the sales proceeds shall mail a copy of the cash collection voucher to the fiscal station shown on the collection voucher. This advance copy shall be used by the fiscal station to record the collection of proceeds to its account and shall be used for follow up purposes as necessary. The copy received through the financial network shall be used to clear the undistributed collection. These vouchers will be mailed in the weekly TFO cycle.

(3) The Military Department's finance and accounting office shall:

(i) Report weekly transactions to the responsible fiscal station cited on the collection voucher, and

(ii) Report the collections within the same month in the Statement of Transactions to the Treasury.

(g) *Contractor retained proceeds.* (1) 48 CFR 245.610 of the DoD FAR Supplement (DFARS) states that a contracting officer may allow a contractor to sell Government Furnished Property and retain the proceeds from the sale. The following procedures shall be used to assure proper accounting for such retained proceeds.

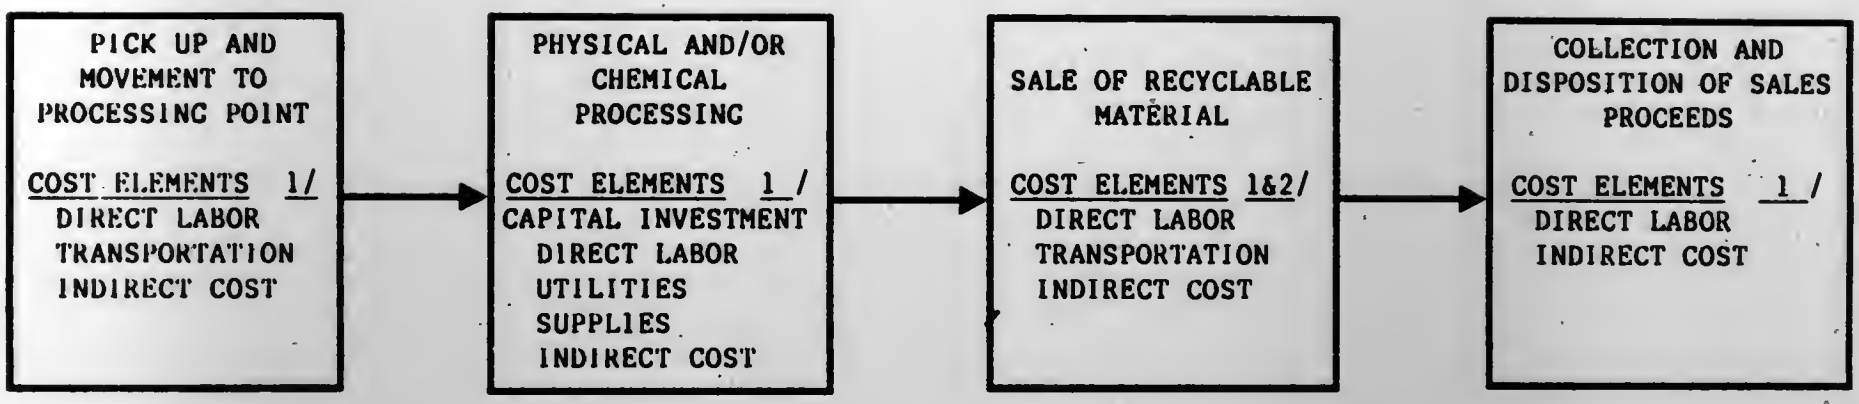
(2) The contractor making the sale may follow normal company policy with respect to bid deposits and form of payment. However, any loss associated with dishonored payment shall be the contractor's responsibility.

(3) The Administrative Contracting Officer (ACO) is responsible for notifying the appropriate accounting office of the amounts collected by the contractor. The ACO also shall notify the accounting office whether such collection shall:

(i) Represent an increase in the dollar value of the applicable contract(s); or

(ii) Be made in lieu of disbursements on the applicable contract(s).

(4) The accounting office for the contract is idenified in the accounting classification code. See chapter 17 of the DoD Accounting Manual, DoD 7220.9-M,[2] for additional information.



(5) The accounting office shall prepare the source documents necessary to account for the transaction properly. In both alternatives (see paragraphs (g)(2)(i) or (ii) of this section), an accounting entry shall be made to reflect the creation of reimbursable obligational authority and the use of such authority. In addition, the value of GFM or GFE general ledger asset accounts shall be reduced.

APPENDIX A-EFFORT ASSOCIATED WITH THE DISPOSAL OF RECYCLABLE MATERIAL

FOOTNOTE:

1/ The proceeds of sales of DoD purchased materials, labor and assets shall be recouped on the basis of a sale to "Another Federal Agency" as prescribed in chapter 26, DoD Accounting Manual, DoD 7220.9-M (reference (h)). This procedure excludes capital investment costs. However, such costs may be paid from recyclable material sales proceeds in their entirety and, therefore, amortization of capital items is not applicable.
2/ When Defense Logistics Agency (DLA) acts as the disposal agent, the cost of coordinating sales incurred by DLA are not charged to the recycling program.

APPENDIX B-DISPOSITION OF AMOUNTS COLLECTED FROM SUCCESSFUL BIDDERS

POSTAL SERVICE

39 CFR Part 927

Rules of Procedure Relating to Fines, Deductions and Damages

AGENCY: Postal Service.

ACTION: Withdrawal of proposed rule.

SUMMARY: In light of comments received, which are summarized in the Supplementary Information, the Postal Service is withdrawing the proposed rule to increase the civil fines for mail handling irregularities on air routes extending beyond the borders of the United States.

FOR FURTHER INFORMATION CONTACT: H. L. Buckley (202) 268-4361.

SUPPLEMENTARY INFORMATION: On September 27, 1988, the Postal Service published a proposed rule, which would have increased the civil fines levied against air carriers for mail handling irregularities on air routes extending beyond the borders of the United States.

Four comments were received in response to the proposed rule. The commenters stated, among other things, that they felt the increases were not justified since they were far in excess of the current rates of inflation. Others said that the proposal assumed that airlines were capable of performing at one hundred percent of proficiency, which is impossible. They also said that the increases could drive mail business to foreign flag carriers, and possibly upset the current economics for the transportation of certain lower rated military mail.

In view of these comments, the Postal Service has decided to withdraw the proposed rule. The Postal Service will, however, convene a group composed of industry and postal representatives, to continue to study the current procedures pertaining to fines, deductions, and damages in order to determine whether any other adjustments may be appropriate.

Fred Eggleston,
Assistant General Counsel, Legislative Division.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Ch. I

[General Docket No. 89-78; FCC 89-104]

Inquiry Into the Need for a Universal Encryption Standard for Satellite Cable Programming

AGENCY: Federal Communications Commission.

ACTION: Notice of Inquiry.

SUMMARY: The Federal Communications Commission is initiating this inquiry pursuant to Congressional instructions in the Satellite Home Viewer Act of 1988. The Act directs the Commission to initiate an inquiry concerning "the need for a universal encryption standard that permits decryption of satellite cable programming intended for private viewing." The Act provides that, if the Commission finds that such a standard is necessary and in the public interest, then "it shall initiate a rulemaking to establish such a standard."

DATES: Comments must be submitted on or before June 5, 1989, comments on or before June 20, 1989.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Jonathan D. Levy, Office of Plans and Policy, (202) 653-5940.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Notice of Inquiry* in General Docket No. 89-78, FCC 89-104, Adopted March 30, 1989 and released April 14, 1989.

The full text of this Commission document is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC 20554. The complete text may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Summary of Notice of Inquiry

The Satellite Home Viewer Act of 1988 directs the Federal Communications Commission to initiate an inquiry concerning "the need for a universal encryption standard that permits decryption of satellite cable programming intended for private viewing." The Act provides that, if the Commission finds that such a standard is necessary and in the public interest, then "it shall initiate a rulemaking to

VOL

1989
UMI

establish such a standard. *See* Pub. L. No. 100-667, 102 Stat. 3949, 3958-59 (1988).

Congress directed the Commission to take six factors into account in its standards inquiry. They are—

(1) Consumer costs and benefits of any such standard, including consumer investment in equipment in operation;

(2) Incorporation of technological enhancements, including advanced television formats;

(3) Whether any such standard would effectively prevent present and future unauthorized decryption of satellite cable programming;

(4) The costs and benefits of any such standard on other authorized users of encrypted satellite cable programming, including cable television systems and satellite master antenna television systems;

(5) The effect of any such standard on competition in the manufacture of decryption equipment; and

(6) The impact of the time delay associated with the Commission procedures necessary for establishment of such standards.

Although the Commission concluded in an earlier proceeding that imposition of a government-mandated encryption standard would not serve the public interest, in this inquiry it will undertake a thorough re-examination of the issue of encryption standards. As part of the inquiry, the Commission invites comment on and critique of its earlier analysis. Commenters in this proceeding are also requested to provide any additional information relevant to a public interest determination regarding encryption standards for satellite cable programming.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

April 21, 1989.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who wil be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Pub. L. 96-511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, Room 404-W Admin. Bldg. Washington, DC 20250, (202) 447-2118.

Forest Service

Suitability Studies on the Upper Portions of the White Salmon and Klickitat Rivers, Washington

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Forest Service will prepare an environmental impact statement (EIS) for recommending to Congress the suitability or non-suitability of the upper White Salmon and Klickitat Rivers for inclusion into the National Wild and Scenic Rivers System. Both rivers flow into the Columbia River and are located in the State of Washington. The Forest Service invites written comments and suggestions on management of these rivers and the scope of this analysis. The agency gives notice of the full environmental analysis and decision-making process that will occur on these studies so that interested and affected people are aware of how they may participate and contribute to the final recommendation to Congress.

DATE: Comments concerning the management of these rivers should be received by May 15, 1989.

VOL
54
ISS

1989
UMI

ADDRESS: Submit written comments and suggestions concerning the management of these rivers to Arthur W. DuFault, Manager, Columbia River Gorge National Scenic Area, 902 Wasco Avenue, Hood River, Oregon 97031.

FOR FURTHER INFORMATION CONTACT: Please direct questions about the proposed action and EIS to Stephen Mellor, Columbia River Gorge National Scenic Area, 902 Wasco Ave., Hood River, Oregon 97031, telephone (503) 386–2333.

SUPPLEMENTARY INFORMATION: The Columbia River Gorge National Scenic Area Act (Pub. L. 99–663), November 17, 1986, instantly designated the lower portions of the Klickitat and White Salmon Rivers into the National Wild and Scenic River System as well as requiring suitablity studies on upper segments of both these rivers. Based on comments on the Draft Gifford Pinchot National Forest Plan, the Forest Service will now be considering the suitability of the White Salmon River to its headwaters, including lands both within and outside the forest boundary. The studies will consider, at a minimum, lands within ¼ mile from each stream bank.

The Secretary of Agriculture is the Responsible Official.

Public participation will be especially important at several points during the management plan process. The first point is the scoping process (40 CFR 1501.7). The Forest Service is seeking information, comments, and assistance from Federal, State and local agencies, the Yakima Indian Nation, individuals and organizations who may be interested in or affected by the proposed action. This input will be used in the preparation of the draft EIS.

Public meetings will be held during April 1989, to inform the public of the planning process and to provide for public participation and involvement. Federal, State, and local agencies as well as the Yakima Indian Nation, user groups, and other organizations who may be interested in the plan will be invited to participate in scoping the issues that should be considered. In addition, a 20-person Task Force representing these interests has been formed to help develop recommendations for future management of these rivers.

The draft EIS is expected to be filed with the Environmental Protection Agency (EPA), and available for public review by April 1990. At that time the EPA will publish a notice of availability of the draft EIS in the **Federal Register**.

The comment period on the draft EIS will be 90 days from the date the EPA's notice of availability appears in the **Federal Register**. It is very important that those interested in the management of these rivers participate at that time. To be the most helpful, comments on the draft EIS should be as specific as possible and may address the adequacy of the statement or the merits of the alternatives discussed (see The Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act of 40 CFR 1503.3). In addition, Federal court decisions have established that reviewers of draft EIS must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewers' position and contentions, *Vermont Yankee Nuclear Power Corp. v. NRDC, 435 U.S. 519, 553 (1978)*, and that environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final EIS. *Wisconsin Heritages, Inc. v. Harris, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980)*. The reason for this is to ensure that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final.

After the comment period ends on the draft EIS, comments will be analyzed and considered by the Forest Service in preparing the final EIS. In the final, the Forest Service is required to respond to comments received (40 CFR 1503.4). The final EIS is scheduled to be completed by the end of October 1990. The Secretary will consider the comments, responses, and consequences discussed in the EIS, applicable laws, regulations, and policies in making a recommendation to the President regarding the suitability of these rivers for inclusion into the National Wild and Scenic Rivers System. The final decision on inclusion of a river in the National Wild and Scenic Rivers System rests with the United States Congress.

Date: April 14, 1989

David E. Ketcham,

Acting Deputy Chief, Programs and Legislation.

Nez Perce National Historic Trail Advisory Council; Public Meeting

AGENCY: Forest Service, USDA.

ACTION: Notice of public meeting.

SUMMARY: The Nez Perce National Historic Trail Advisory Council will host a 3-day meeting. The purpose of the meeting is to discuss matters relating to the Nez Perce National Historic Trail. Agenda items are; review and identification of the historic route, discussion of state/federal/private landowner coordination needs, preparation of a Comprehensive Plan, and historic intepretation. The council was established in accordance with the provisions of the National Trails Systems Act. The public is invited to attend.

DATE: The meeting will be held on May 9, through May 11, 1989, from 9:00 a.m. to 4:00 p.m.

ADDRESS: The meeting will he held at the Village Red Lion Inn, 100 Madison, Missoula, Montana 59801.

FOR FURTHER INFORMATION CONTACT: Jim Dolan, Project Coordinator, by telephone (406) 329–3582 or by mail USDA, Forest Service, Northern Region, P.O. Box 7669, Missoula, MT 59807.

Date: April 21, 1989.

Christopher Risbrudt,

Deputy Regional Forester.

BILLING CODE 3410–11–M

Soil Conservation Service

Waimea-Paauilo Watershed, Hawaii

AGENCY: Soil Conservation Service.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the U.S. Department of Agriculture, Soil Conservation Service, gives notice that an environmental impact statement is not being prepared for the Waimea-Paauilo Watershed, Hawaii County, Hawaii.

FOR FURTHER INFORMATION CONTACT: Warren M. Lee, State Conservationist, Soil Conservation Service, 300 Ala Moana Boulevard, Room 4316, Honolulu, Hawaii, 96850, telephone (808) 541–2600.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Warren M. Lee, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project concerns a plan for agricultural water management (irrigation and livestock water). The planned works of improvement include the installation of 8,000 feet of collection system by-pass pipelines; 3,100 feet of reservoir supply pipeline; a 133 million gallon storage reservoir; 21,800 feet of irrigation pipeline, and 184,400 feet of livestock water pipelines with pumping stations.

The Notice of a Finding of No Signification Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Warren M. Lee.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register**.

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.904—Watershed Protection and Flood Prevention—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials)

Date: April 17, 1989.

Warren M. Lee,

State Conservationist.

COMMISSION ON CIVIL RIGHTS

Utah Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that the Utah Advisory Committee to the Commission will convene at 9:00 a.m. and adjourn at 4:45 p.m., on May 18, 1989, at the State Office Building Auditorium, State Capitol, Salt Lake City, Utah 84114. The meeting, which will involve a community forum, is intended to gather information on the impact in Utah of implementation of the Immigration Reform and Control Act of 1986.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson Robert E. Riggs or Philip Montez, Director of the Western Regional Division (213) 894–3437, (TDD 213/894–0508). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Regional Division office at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, April 21, 1989.

Melvin L. Jenkins,

Acting Staff Director.

DEPARTMENT OF COMMERCE

Agency Form Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of the Census
Title: Survey of Plant Capacity Utilization
Form Number: MQ–C1
Agency Approval Number: 0607–0175
Type of Request: New
Burden: 13,500 hours
Number of Respondents: 9,000
Avg Hours Per Response: 1.5 hours
Needs and Uses: This survey provides information on use of industrial capacity by Standard Industrial Classification (SIC) for manufactured products and is the only statistical series that provides 4-digit SIC data for use in other Government economic series. Government agencies, business firms, trade associations, and research organizations use this data to measure inflationary pressures, capital flows, understand productivity determinants, and analyze and forecast economic and industrial trends.
Affected Public: Business or other for-profit organizations
Frequency: Annual
Respondent's Obligation: Mandatory
OMB Desk Officer: Don Arbuckle, 395–7340

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377–3271, Department of Commerce, Room H6622, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Don Arbuckle, OMB Desk Officer, Room 3208, New Executive Officer Building, Washington, DC 20503.

Dated: April 21, 1989.

Edward Michals,

Departmental Clearance Officer, Office of Mangagement and Organization.

International Trade Administration

[A–570–506]

Porcelain-on-Steel Cooking Ware From the People's Republic of China; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative review.

SUMMARY: In response to a request by two importers, the Department of Commerce has conducted an administrative review of the antidumping duty order on porcelain-on-steel cooking ware from the People's Republic of China. The review covers one manufacturer and one third-country reseller in Hong Kong of this merchandise to the United States and the period May 20, 1986 through November 30, 1987. The review indicates the existence of dumping margins during the period.

We determined that we were unable to verify adequately the manufacturer's total sales to the United States; and we were unable to verify records of payment for the merchandise exported to the United States by Amerport H.K., the third-country reseller. As a result, we used the best information available for cash deposit and appraisement purposes.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: April 27, 1989.

FOR FURTHER INFORMATION CONTACT: Linda L. Pasden or Robert J. Marenick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–5255.

SUPPLEMENTARY INFORMATION:

Background

On December 2, 1986, the Department of Commerce ("the Department") published in the **Federal Register** (51 FR 43414) an antidumping duty order on porcelain-on-steel cooking ware ("POS cooking ware") from the People's

VOL
54
ISS
80
AP
27
1989
UMI

Republic of China ("PRC"). Two importers requested in accordance with § 353.53a(a) of the Commerce Regulations that we conduct an administrative review. We published a notice of initiation of the antidumping duty administrative review on January 27, 1988 (53 FR 2262). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the United States fully converted to the Harmonized Tariff Schedule ("HTS"), as provided for in section 1201 et seq. of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS item number(s).

Imports covered by the review are shipments of POS cooking ware including tea kettles, which do not have self-contained electric heating elements. All of the foregoing are constructed of steel and are enameled or glazed with vitreous glasses. During the review period, such merchandise was classifiable under item 654.0615, 654.0624, and 654.0627 of the Tariff Schedules of the United States Annotated. The merchandise is currently classifiable under HTS item 7323.94.00. HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers the shipments of one manufacturer in the PRC, China National Light Import and Export Corporation, Shanghai Branch ("CSLI"), and one third-country reseller in Hong Kong, Amerport H.K., who exported the POS cooking ware to the United States and the period May 20, 1986 through November 30, 1987. Verification was conducted at Amerport H.K. from September 28 through September 30, 1988, at CSLI from October 5 through October 9, 1988, and at Amerport U.S. from February 23 through 24, 1989.

CSLI does not maintain journals or ledgers that are product specific. However, to verify total sales to the United States, CSLI provided copies of certain handwritten accounting statements that purportedly represented the total sales of enamelware products, which included POS cooking ware. Upon testing the accuracy of these accounting statements, we found that they did not contain a complete listing of U.S. sales. Based on our findings, we determined that we could not verify CSLI's total sales to the United States.

During the verification in Hong Kong, the Department attempted to verify the records of payment for the POS cooking ware exported by Amerport H.K. to the United States. Amerport H.K. claimed that these documents were maintained by Amerport U.S. and not by Amerport H.K. As a result, the Department conducted a verification at Amerport U.S. At this verification Amerport U.S. claimed that there was a misunderstanding because the records of payment were located at Amerport H.K. Prior to verification in Hong Kong and the United States, we sent verification outlines to both firms. These outlines stated that they were required to provide documentation such as records of payment, accounts receivable ledgers, cash receipts journals, etc. Because Amerport did not provide the data, we were unable to verify the records of payment for sales and we were unable to complete the document traces normally employed for verifying these payments.

As a result, the Department used the best information available for both CSLI and Amerport H.K., which was the rate published in the antidumping duty order (51 FR 43414, December 2, 1986).

Preliminary Results of the Review

As a result of our review, we preliminarily determine that the following margins exist for the period May 20, 1986 through November 30, 1987:

Manufacturer/Third-Country Reseller	Margin (Percent)
China National Light Import and Export Corp., Shanghai Branch	66.65
China National Light Import and Export Corp., Shanghai Branch/Amerport H.K.	66.65

Interested parties may request disclosure and/or an administrative protective order within 5 days of the date of publication of this notice and may request a hearing within 8 days of publication. Any hearing, if requested, will be held 35 days after the date of publication, or the first workday thereafter. Prehearing briefs and/or written comments from interested parties may be submitted not later than 25 days after the date of publication. Rebuttal briefs and rebuttals to written comments, limited to issues raised in those comments, may be filed not later than 32 days after the date of publication. The Department will publish the final results of the administrative review, including the results of its analysis of any such comments or hearing.

The Department has indications that there may be an agreement of reimbursement of antidumping duties between certain parties. Any reimbursement of duties to the importer is to result in an equivalent decrease in United States price pursuant to 353.55 of the Commerce Regulations, and a consequent increase in dumping duties. The Department, in its assessment instructions, will advise the U.S. Customs Service to investigate the *bona fides* of any certificate of non-reimbursement of duming duties which may be filed by the importer. Id no such certificate is filed prior to the liquidation of each customs entry where dumping duties are finally assessed, Customs will be instructed to double the amount of dumping duties on each such entry, to account for reimbursement. The Department will issue appraisement instruction directly to the Customs Services.

Further, as provided by section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties based on the above margins shall be required. For any further entries of this merchandise from a new exporter, not covered in this administrative review, whose first shipments occurred after November 30, 1987, and who is unrelated to any reviewed firm, a cash deposit of 66.65 percent shall be required.

These deposit requirements are effective for all shipments of porcelain-on-steel cookware from the People's Republic of China entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and §353.53a(a) of the Commerce Regulations (19 CFR 353.53a).

Date: April 19, 1989.

Timothy N. Bergan,

Acting Assistant Secretary for Import Administration.

[FR Doc. 89-10024 Filed 4-26-89; 8:45 am]

BILLING CODE 3510-DS-M

[C-307-802]

Initiation of Countervailing Duty Investigation; Aluminum Sulfate From Venezuela

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: On the basis of a petition filed in proper form with the U.S. Department of Commerce, we are initiating a countervailing duty investigation to determine whether manufacturers, producers, or exporters in Venezuela of aluminum sulfate, as described in the "Scope of Investigation" section of this notice, receive benefits which constitute subsidies within the meaning of the countervailing duty law. We are notifying the U.S. International Trade Commission (ITC) of this action, so that it may determine whether imports of aluminum sulfate from Venezuela materially injure, or threaten material injury to, a U.S. industry. If this investigation proceeds normally, we will make our preliminary determination on or before June 22, 1989.

EFFECTIVE DATE: April 27, 1989.

FOR FURTHER INFORMATION CONTACT: Roy A. Malmrose, Office of Countervailing Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 377-5414.

SUPPLEMENTARY INFORMATION:

The Petition

On March 29, 1989, we received a petition in proper form from General Chemical de Puerto Rico, Inc., filed on behalf of a U.S. industry producing aluminum sulfate. In compliance with the filing requirements of § 355.12 of the Commerce Regulations (19 CFR 355.12), petitioner alleges that manufacturers, producers and exporters of aluminum sulfate in Venezuela receive subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act).

Since Venezuela is a "country under the Agreement" within the meaning of section 701(b) of the Act, Title VII of the Act applies to this investigation, and the ITC is required to determine whether imports of the subject merchandise from Venezuela materially injure, or threaten material injury to, a U.S. industry.

Petitioner has alleged it has standing to file the petition. Specifically, petitioner has alleged that it is an interested party as defined under section 771(9)(C) of the Act and that it has filed the petition on behalf of a U.S. industry producing the product that is subject to this investigation. If any interested party as described under paragraphs (C), (D), (E), (F) or (G) of section 771(d) of the Act wishes to register support of or opposition to this petition, please file written notification with the Commerce official cited in the "FOR FURTHER INFORMATION CONTACT" section of this notice.

Initiation of Investigation

Under section 702(c) of the Act, we must make the determination on whether to initiate a countervailing duty proceeding within 20 days after a petition is filed. Section 702(b) of the Act requires the Department to initiate a countervailing duty proceeding whenever an interested party files a petition, on behalf of an industry, that (1) alleges the elements necessary for the imposition of a duty under section 701(a), and (2) is accompanied by information reasonably available to the petitioner supporting the allegations. We have examined the petition on aluminum sulfate from Venezuela and have found that most of the programs alleged in the petition meet these requirements. Therefore, we are initiating a countervailing duty investigation to determine whether Venezuelan manufacturers, producers, or exporters of aluminum sulfate, as described in the "Scope of Investigation" section of this notice, receive subsidies. However, we are not initiating an investigation on certain programs because they were determined not countervailable in *Final Affirmative Countervailing Duty Determination: Certain Electrical Conductor Aluminum Redraw Rod from Venezuela* (53 FR 24763, June 30, 1988) (*Redraw Rod*) and new facts or information on changed circumstances has not been provided. If our investigation proceeds normally, we will make our preliminary determination on or before June 22, 1989.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules were fully converted to the Harmonized Tariff Schedule (HTS), as provided for in section 1201 et seq. of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse for consumption on or after this date will be classified solely according to the appropriate HTS item number(s).

The product covered by this investigation is aluminum sulfate from Venezuela, which is used in water purification, in waste water treatment, and for other industrial applications. Prior to January 1, 1989, such merchandise was classifiable under item 417.1600 of the *Tariff Schedules of the United States Annotated (TSUSA)*. This merchandise is currently classifiable under HTS item 2833.22.00. The HTS item number is provided for convenience and Customs purposes. The written description remains dispositive.

Allegations of Subsidies

Petitioner lists a number of practices by the Government of Venezuela which allegedly confer subsidies on manufacturers, producers, or exporters of aluminum sulfate in Venezuela. We are initiating an investigation of the following programs:

1. Export Bond Program
2. Short-Term FINEXPO Financing
3. Other FINEXPO Programs
4. Preferential Tax Incentives
5. Financing Company of Venezuela Loans
6. Sales Tax Exemptions
7. Other Government Loans and Loan Guarantees
8. Preferential Pricing of Inputs

We are not initiating an investigation of the programs listed below. Section 702(b) of the Act requires the Department to initiate a countervailing duty proceeding whenever an interested party files a petition on behalf of an industry that (1) alleges the elements necessary for the imposition of a duty under sections 701(a) and (2) is accompanied by information reasonably available to the petitioner supporting the allegations. For the programs listed below, the requirements of section 702(b) of the Act were not met.

1. Exchange of Export Earnings Under Multiple Exchange Rate System

Petitioner alleges that in allocating foreign exchange at preferential rates, the Venezuelan government favors companies that produce for export, produce to displace imports, or are otherwise engaged in activities assigned a priority status. Additionally, petitioner alleges that there is no assurance that the government requires SULFORCA to convert all of its foreign exchange earnings at a 14.50 Bolivares to the dollar exchange rate. This program was found not countervailable in *Redraw Rod*. We are not initiating on this program because petitioner has not alleged new facts or provided information on changed circumstances.

2. The Industrial Credit Fund (FONCREI)

Petitioner alleges that FONCREI provides long-term loans to industrial companies through commercial banks and financial societies. These loans are based on a

VOL 54 ISS 80 AP 27 1989 UMI

company's projected rate of return. This program was found not countervailable in *Redraw Rod*. We are not initiating on this program because petitioner has not alleged new facts or provided information on changed circumstances.

Notification of ITC

Section 702(d) of the Act requires us to notify the ITC of this action, and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonproprietary information. We will also allow the ITC access to all privileged and business proprietary information in our files, provided it confirms that it will not disclose such information, either publicly or under administrative protective order, without the written consent of the Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by May 15, 1989, whether there is a reasonable indication that imports of aluminum sulfate from Venezuela materially injure, or threaten material injury to, a U.S. industry. If its determination is negative, this investigation will be terminated; otherwise, this investigation will continue according to the statutory procedures.

This notice is published pursuant to section 702(c)(2) of the Act.

Timothy N. Bergan,

Acting Assistant Secretary for Import Administration.

April 18, 1989.

BILLING CODE 3510-DS-M

Short-Supply Review on Certain Steel Plate; Request for Comments

AGENCY: Import Administration/ International Trade Administration, Commerce.

ACTION: Notice and request for comments.

SUMMARY: The Department of Commerce hereby announces its review of a request for a short-supply determination under Paragraph 8 of the U.S.-Japan steel arrangement, Article 8 of the U.S.-Austria, U.S.-Brazil, U.S.-EC, U.S.-Korea, and U.S.-Spain steel arrangements, and Article 8 of the U.S.-Finland steel understanding, with respect to certain steel plate used to manufacture large diameter pipe.

DATE: Comments must be submitted on or before May 8, 1989.

ADDRESS: Send all comments to Nicholas C. Tolerico, Director, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Richard O. Weible, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue, NW., Washington, DC 20230, (202) 377-0159.

SUPPLEMENTARY INFORMATION: Paragraph 8 of the U.S.-Japan Arrangement Concerning Trade in Certain Steel Products, Article 8 of the U.S.-Austria Arrangement Concerning Trade in Certain Steel Products, the U.S.-Brazil Arrangement Concerning Trade in Certain Steel Products, the U.S.-EC Arrangement Concerning Trade in Certain Steel Products, the U.S.-Korea Arrangement Concerning Trade in Certain Steel Products, the U.S.-Spain Arrangement Concerning Trade in Certain Steel Products, and the U.S.-Finland Understanding Concerning Trade in Certain Steel Products, provide that if the U.S. determines that, because of abnormal supply or demand factors, the U.S. steel industry will be unable to meet demand in the USA for a particular product (including substantial objective evidence such as allocation, extended delivery periods, or other relevant factors), an additional tonnage shall be allowed for such product or products.

We have received a short-supply request for various structural and API 5LX line pipe grades of steel plate, 0.25 to 1.50 inches in thickness, and 72 to 226 inches in width, for use in producing large diameter pipe.

Any party interested in commenting on this request should send written comments as soon as possible, and no later than May 8, 1989. Comments should focus on the economic factors involved in granting or denying this request.

Commerce will maintain this request and all comments in a public file. Anyone submitting business proprietary information should clearly so label the business proprietary portion of the submission and also provide a non-proprietary submission which can be placed in the public file. The public file will be maintained in the Central Records Unit, Room B-099, Import Administration, U.S. Department of Commerce, at the above address.

Dated: April 21, 1989.

Joseph A. Spetrini,

Deputy Assistant Secretary for Compliance.

BILLING CODE 3510-DS-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Negotiated Limit, Guaranteed Access Levels, and Amended Restraint Period for Certain Man-Made Fiber Textile Products Produced or Manufactured in the Dominican Republic

April 22, 1989.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs amending a limit and restraint period.

EFFECTIVE: May 1, 1989.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of this limit, refer to the Quota Status Reports posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION:

Authority. Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); President's February 20, 1986 announcement of a Special Access Program; Memorandum of Understanding dated March 22, 1989.

During recent negotiations between the Governments of the United States and the Dominican Republic, agreement was reached to establish specific limits for man-made fiber textile products in Category 633, produced or manufactured in the Dominican Republic and exported during the four consecutive agreement periods beginning on June 1, 1988 and extending through May 31, 1992. A formal exchange of notes will follow.

Under the terms of the Memorandum of Understanding dated March 22, 1989 between the Governments of the United States and the Dominican Republic, the United States Government is establishing a limit for Category 633 for the twelve-month period which began on June 1, 1988 and extends through May 31, 1989.

The agreement also establishes Guaranteed Access Levels for Category 633 for three consecutive years beginning on June 1, 1989 and extending through May 31, 1992.

Beginning on May 1, 1989 for goods to be exported from the Dominican Republic on and after June 1, 1989, U.S. Customs will start signing the first section of the form ITA/370P for

shipments of U.S. formed and cut parts in Category 633 that are destined for the Dominican Republic and subject to the Guaranteed Access Level established for Category 633. These products, which are assembled in the Dominican Republic from parts cut in the United States, are governed by Harmonized Tariff item number 9802.00.8010 and Chapter 62 Statistical Note 3 of the Harmonized Tariff Schedule.

Interested parties should be aware that shipments of cut parts in Category 633 must be accompanied by a form ITA-370P, signed by a U.S. Customs officer, prior to export from the United States for assembly in the Dominican Republic in order to qualify for entry under the Guaranteed Access Level.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 53 FR 44937, published on November 7, 1988). Also see 53 FR 50070, published on December 13, 1988.

Requirements for participation in the Special Access Program are available in **Federal Register** notices 51 FR 21208, published on June 11, 1986; 52 FR 6595, published on March 4, 1987; and 52 FR 26057, published on July 10, 1987.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the Memorandum of Understanding, but are desinged to assist only in the implementation of certain of its provisions.

Donald R. Foote,

Acting Chairman, Committee for the Implementation of Textile Agreements.

April 21, 1989.

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on December 8, 1988, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports into the United States of man-made fiber textile products in Category 633, produced or manufactured in the Dominican Republic and exported during the twelve-month period which began on June 30, 1988 and extends through June 29, 1989.

Under the terms of the Memorandum of Understanding dated March 22, 1989, you are directed, effective on May 1, 1989, to amend the level for Category 633 to 84,000 dozen [1] for the new restraint period beginning on June 1, 1988 and extending through May 31, 1989.

You are directed to deduct 1,814 dozen from the changes already made to Category 633. Import charges for textile products in Category 633 which were exported during the period June 1, 1988 through June 29, 1988 have been taken into account.

Beginning on May 1, 1989, U.S. Customs is directed to start signing the first section of the form ITA-370P for shipments of U.S. formed and cut parts in Category 633 that are destined for the Dominican Republic and re-exported to the United States on and after June 1, 1989.

Teh Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Donald R. Foote,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

[1] The limit has not been adjusted to account for any imports exported after May 31, 1988.

Announcement of Import Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in Peru

April 24, 1989.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing import limits for the new agreement period.

EFFECTIVE DATE: May 1, 1989.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

During negotiations held between the Governments of the United States and Peru, agreement was reached, effected by a Memorandum of Understanding (MOU) dated March 3, 1989, to amend and extend the current bilateral textile agreement. A formal exchange of diplomatic notes will follow.

The MOU establishes limits for certain cotton, wool and man-made fiber textile products for three consecutive agreement periods—May 1, 1989 through December 31, 1989; January 1, 1990 through December 31, 1990; January 1, 1991 through December 31, 1991. The levels for the first period are effective May 1, 1989, based on the agreement reached in the MOU.

A description of the textile and apparel categories in terms of HTS numbers is available in the *Correlation:* Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 53 FR 44937, published on November 7, 1988).

The letter to the Commissioner of Customs and the actions taken pursuant to it are designed to implement only the levels of the first agreement period of the Memorandum of Understanding dated March 3, 1989.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

April 24, 1989.

Commissioner of Customs, Department of the Treasury, Washington, DC.

Dear Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1986; pursuant to the Memorandum of Understanding dated March 3, 1989 between the Governments of the United States and Peru; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on May 1, 1989, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool and man-made fiber textile products in the following categories, produced or manufactured in Peru and exported during the eight-month period beginning on May 1, 1989 and extending through December 31, 1989, in excess of the following restraint limits:

Category	Eight-Month Restraint Limit
Limits Not in a Group	
219	9,533,419 square meters.
220	5,910,945 square meters.
226/313	11,146,747 square meters of which not more than 2,102,362 square meters shall be Category 226.
300/607-K [1]	1,209,580 kilograms.
301	755,987 kilograms.
315	2,787,091 square meters.
317/326	11,761,525 square meters of which not more than 4,738,055 square meters shall be in Category 326.
338/339	440,260 dozen of which not more than 314,465 dozen shall be in Categories 338-S/339-S. [2]
410	891,869 square meters.

VOL 54 ISS 80 AP 27 1989 UMI

Category	Eight-Month Restraint Limit
Cotton Apparel Group 237, 239, 330–336 and 340–359, as a group.	9,754,819 square meters equivalent.
Wool Group 400 and 414–469, as a group.	2,508,362 square meters equivalent.

[1] Category 300 and, in Category 607-K, all HTS numbers except 5509.52.000, 5509.61.0000, 5509.91.0000 and 5510.20.0000.

[2] In Categories 336–S/339–S, only HTS numbers 6103.22.0050, 6105.10.0010, 6105.10.0030, 6105.90.3010, 6109.10.0035, 6110.20.1025, 6110.20.2040, 6110.20.2065, 6110.90.0068, 6112.11.0030 and 6114.20.0005 in Category 336–S; and 6104.22.0060, 6104.29.2046, 6106.10.0010, 6106.10.0030, 6106.90.2010, 6106.90.3010, 6109.10.0070, 6110.20.1030, 6110.20.2045, 6110.20.2075, 6110.90.0070, 6112.11.0040, 6114.20.0010 and 6117.90.0022 in Category 339–S.

Imports charged to these category limits, except Categories 237, 239, 439 and 607–K, for the period May 1, 1988 through April 30, 1989 shall be charged against those levels of restraint to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–M

Negotiated Settlement on an Import Limit for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Turkey

April 21, 1989.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commission of Customs establishing a limit.

EFFECTIVE DATE: May 1, 1989.

FOR FURTHER INFORMATION CONTACT: Janet Heinzen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of this limit, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 343–6582. For information on embargoes and quota re-openings, call (202) 377–3715. For information on categories on which consultations have been requested, call (202) 377–3740.

SUPPLEMENTARY INFORMATION:

Authority. Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Memorandum of Understanding dated March 21, 1989.

During consultations held between the Governments of the United States and the Republic of Turkey, agreement was reached, effected by a Memorandum of Understanding dated March 21, 1989, to amend the current bilateral textile agreement. A formal exchange of diplomatic notes will follow.

Under the terms of the Memorandum of Understanding, specific limits were established for Categories 336/636 for three consecutive agreement periods beginning September 30, 1988 and extending through June 30, 1991. The United States Government has decided to control imports in Categories 336/636 for the first agreement period which began on September 30, 1988 and extends through June 30, 1989. The remaining agreement periods will begin on July 1, 1989 and July 1, 1990.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (See **Federal Register** notice 53 FR 44937, published on November 7, 1988). Also see 53 FR 43468, published on October 27, 1988.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the Memorandum of Understanding dated March 21, 1989, but are designed to assist only in the implementation of certain of its provisions.

Donald R. Foote,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

April 21, 1989.

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229.

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further amended on July 31, 1986; pursuant to the Memorandum of Understanding dated March 21, 1989, between the Governments of the United States and the Republic of Turkey; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on May 1, 1989, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton and man-made fiber textile products in Categories 336/636, produced or manufactured in Turkey and exported during the period which began on September 30, 1988, and extends through June 30, 1989, in excess of 153,000 dozen.[1]

Textile products in Categories 336/636 which have been exported to the United States prior to September 30, 1988, shall not be subject to this directive.

Textile products in Categories 336/636 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

You are directed to charge 39,659 dozen to Category 336 and 2,733 dozen to Category 636 to the limit established in this directive. These charges are for goods imported during the period September 30, 1988, through February 28, 1989. Further charges will be submitted as data become available.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Donald R. Foote,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Office of the Secretary

Education Benefits Board of Actuary; Meeting

AGENCY: Department of Defense.

ACTION: Notice of meeting.

SUMMARY: A meeting of the Board has been scheduled to execute the provisions of Chapter 101, title 10, United States Code (10 U.S.C. 2006(e) et. seq.) The Board shall review DoD actuarial methods and assumptions to be used in the valuation of the GI Bill and determine per capita normal costs to be implemented by DoD and amortization of unfunded liability. Persons desiring to attend the DoD Education Benefits Board of Actuaries meeting must notify Ms. Dorothy Hemby at 696–6336 by May 22, 1989. Notice of this meeting is required under the Federal Advisory Committee Act.

DATE: May 25, 1989, 9:00 a.m. to 1:00 p.m.

ADDRESS: Room 1E801 #7, the Pentagon.

FOR FURTHER INFORMATION CONTACT: Benjamin Gottlieb, Acting Executive Secretary, DoD Office of the Actuary, 4th Floor, 1600 Wilson Boulevard, Arlington, Virginia 22209–2593, (202) 696–5869.

L.M. Bynum,

BILLING CODE 3910–01–M

Defense Logistics Agency

Privacy Act of 1974; Notice of a New Continuing Computer Matching Program Between the Department of Defense and the Department of the Interior

AGENCY: Defense Manpower Data Center (DMDC), Defense Logistics Agency (DLA), Department of Defense (DoD).

ACTION: Notice for any public comment on a proposed new ongoing computer matching program between the Department of Defense (DoD) and the Department of the Interior (DoI) for debt collection purposes under the Debt Collection Act of 1982 (Pub. L. 97–365). The purpose of the match is to locate individuals affiliated with the DoD who are indebted to the U.S. Government under various programs administered by the DoI.

SUMMARY: On October 7, 1987 at 52 FR 37492, the Department of Defense provided public notice of a plan under an interagency agreement to assist Federal creditor agencies in locating delinquent debtors affiliated with the U.S. Government in their debt collection efforts to collect outstanding debts owed by individuals receiving salary or similar compensation from the Federal government. The DMDC (DLA), has assisted a number of Federal agencies in locating individual delinquent debtors via computer matching and now proposes to assist the DoI in its collection effort under a written agreement.

EFFECTIVE DATE: This proposed action is effective on April 27, 1989 and the computer matching will proceed accordingly without further notice, unless comments are received which would result in a contrary determination.

ADDRESS: Any interested party may submit written comments to Mr. Robert J. Brandewie, Deputy Director, Defense Manpower Data Center, Suite 155A, 99 Pacific Street, Monterey, CA 93940–2453. Telephone: (408) 655–4000; Autovon: 878–2951.

FOR FURTHER INFORMATION CONTACT: Mr. Aurelio Nepa, Jr., Staff Director, Defense Privacy Office, Room 205, 400 Army Navy Drive, Arlington, VA 22202–2803. Telephone: (202) 694–3027; Autovon: 224–3027.

SUPPLEMENTARY INFORMATION: This proposed computer matching program is being conducted by the Defense Manpower Data Center in order to locate by address those individuals, Federally employed or retired, that are indebted and delinquent in their repayment to the U.S. Government under certain programs administered by the Department of Interior.

The Office of Management and Budget (OMB) designated the Financial Management Service of the Department of Treasury, as the Lead Agency to coordinate and monitor the implementation of the U.S. Government's Federal Salary Offset Program. An interagency agreement, restricted exclusively to the implementation of the Debt Collection Act of 1982 (Pub. L. 97–365), established an Interagency Working Group to facilitate computer matching and subsequent salary offset procedures throughout the Federal government under the auspices and oversight of the OMB. This Interagency Working Group consists of the Department of the Treasury, Office of Personnel Management and the Department of Defense. An Interagency Agreement for implementing the Federal Salary Offset Initiative and assigning specific roles and agency responsibilities was signed and published in the **Federal Register** at 52 FR 37492 on October 7, 1987. As a result, a centralized computer data base for computer matching was established from extracted Department of Defense and Office of Personnel Management records for debt collection purposes in order to have a data bank record of active and retired military members, including the Reserve and Guard, and further including OPM government-wide active and retired civilian personnel that are receiving Federal salaries or other Federal benefit payments. The data bank is located in Monterey, CA and maintained by the Defense Manpower Data Center of the Department of Defense. It is available for matching purposes by any Federal creditor agency to locate individual debtors in enforcing the Debt Collection Act of 1982 to collect outstanding debts provided the creditor agency follows the published Interagency Agreement guidelines.

Set forth below is the information required by paragraph 5.f.(1) of the "Revised Supplemental Guidance for Conducting Computerized Matching Programs," issued by the Office of Management and Budget on May 11, 1982 (47 FR 21656, May 19, 1982). An advanced copy of this **Federal Register** notice has been provided to the U.S. House Committee on Government Operations, the U.S. Senate Committee on Governmental Affairs, and to the Administrator, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB) on April 18, 1989, pursuant to the above cited OMB Matching Guidelines; paragraph 4b of Appendix I to OMB Circular No. A–130, dated December 12, 1985 (50 FR 52738, December 24, 1985); and subsection (r) of the Privacy Act of 1974 (5 U.S.C. 552a) as amended.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

April 21, 1989.

Report of a New Continuing Computer Matching Program Between the Department of Defense (DoD) and the Department of Interior (DoI)

a. *Authority:* The legal authority under which this computer matching will be conducted is 5 U.S.C. 522a (b)(3), the "routine use" provision under the

VOL. 54 ISS 80 AP 27 1989 UMI

Privacy Act of 1974; 5 U.S.C. 5514, installment deduction of indebtedness; 10 U.S.C. 136, Assistant Secretaries of Defense, appointment, powers and duties; Federal Claims Collection Act of 1966 (Pub. L. 89–508) 31 U.S.C. 952(d); the Debt Collection Act of 1982 (Pub. L. 97–365) 5 U.S.C. 5514, 31 U.S.C. 3711 and 3716–4718; Section 206 of Executive Order 11222; 4 CFR Chapter II, Federal Claims Collection Standards (General Accounting Office—Department of Justice); 5 CFR 550.1101–550.1108, Collection by Offset from Indebted Government Employees—(OPM); Office of Management and Budget, "Revised Supplemental Guidance for Conducting Matching Programs," dated May 11, 1982 (47 FR 21656, May 19, 1982) and "Guidelines on Relationship Between the Privacy Act of 1974 and the Debt Collection Act of 1982," March 30, 1983 (48 FR 15556, April 11, 1983); the interagency Agreement for Federal Salary Offset Initiative (Office of Management and Budget, Department of the Treasury, Office of Personnel Management and the Department of Defense) signed April 1987 (52 FR 37492, October 7, 1987).

b. *Program Description:* The purpose of this computer matching program is to identify and locate those individuals who are indebted and delinquent in their repayment of debts to the U.S. Government under certain programs administered by the Department of Interior in order that the Department can collect the debts by voluntary repayment or, in the alternative, by administrative or salary offset procedures under the provisions of the Debt Collection Act of 1982. An Interagency Memorandum of Understanding (MOU) has been accomplished and signed between the Department of the Interior and the Department of Defense as to the applicable procedures. Interior will furnish approximately 1,000 indebtedness/accounts receivable records and these records will be matched against 3 million benefit records and 7 million personnel/employment records of the data base.

The Department of Interior, as the source agency, will provide the Defense Manpower Data Center (DMDC) of the DoD, the matching agency, at Monterey, CA, a computer tape containing the names, social security numbers, and amount owed of all the individual delinquent debtors. Upon receipt of the file of debtor accounts, the DMDC will perform a computer match using all nine digits of social security numbers of delinquents against a DMDC computer data base. The DMDC computer data base, established under the interagency agreement, consists of records of active duty and retired military members, including the Reserve, and all the OPM Government-wide employed civilian and retired civilian records.

Note.—The "Reserve" refers collectively to the Army National Guard, Army Reserve, Naval Reserve, Marine Corps Reserve, Air National Guard and Air Force Reserve.

Matching records, based on "hits" of the social security number, will be furnished to the DoI consisting of the member's name, service or agency, category of employee, salary or benefit amounts, and current work or home address from DMDC's data base records. The "hits" or matching information from DMDC will be referred to the DoI for action to contact the debtors so as to recover the outstanding debt(s) by salary or administrative offset when other collection action, such as voluntary repayment, has been pursued with unsatisfactory results.

The DoI will be responsible for reviewing the "hit" data to assure that each individual is positively identified in the match as the debtor; to assure that the debtor is afforded proper due process under GAO regulation (4 CFR Chapter II) "Federal Claims Collection Standards" and that a proper accounting of any further disclosures outside the DoI shall be maintained in accordance with 5 U.S.C. 552a (c) of the Privacy Act. The DoI is responsible for insuring that the debt is valid and the information is accurate, complete, timely and relevant. Hard copy match records will be used by the DoI to determine any further continued contact or inquiry concerning the debtors. The notification to the debtor shall include information concerning the amount to be collected, and may include the amount of the proposed monthly deductions if offset procedures are contemplated. The debtor shall be given an opportunity to enter into voluntary agreement to repay the debt before any administrative or salary offset measures are initiated. The debtor shall further be given an opportunity to inspect and copy records related to the debt and for review of the decision related to the debt. If no collection action is needed, the DoD record provided by DMDC will not be used by the DoI for any other purpose.

c. *Records to be Matched:* The following systems of records, subject to the Privacy Act of 1974 (5 U.S.C. 552a), containing an appropriate routine use permitting records to be used for computer matching, are as follows:

Department of Interior (Source Agency)

(1) *Interior component:* Office of the Secretary
System identification: Interior/OS–85
System name: Payroll, Attendance, Retirement and Leave Records—Interior, Office of the Secretary–85
Federal Register citation: 51 FR 39918, November 3, 1986
Amended: 53 FR 51324, December 21, 1988

Department of Defense (Matching Agency)

(1) *DoD component:* Defense Logistics Agency (DLA)
System identification: S322.10 DLA–LZ
System name: Defense Manpower Data Center Data Base
Federal Register citation: 53 FR 44937, November 7, 1988
(2) *DoD Component:* Defense Logistics Agency (DLA)
System identification: S322.11 DLA–LZ
System name: Federal Creditor Agency Debt Collection Data Base
Federal Register citation: 52 FR 37495, October 7, 1987
(3) *Agency:* Office of Personnel Management (OPM)
System identification: OPM/GOVT–1
System name: General Personnel Records
Federal Register citation: 49 FR 36954, September 20, 1984
(4) *Agency:* Office of Personnel Management (OPM)
System identification: OPM/CENTRAL–1
System name: Civil Service Retirement and Insurance Records
Federal Register citation: 49 FR 36950, September 20, 1984

d. *Period of the Match:* The initial match will begin as soon as possible after this public notice is published in the **Federal Register** and then conducted no more often than semiannually thereafter.

e. *Security Safeguards:* Automated records at DMDC are stored in limited access computer facilities and accessible only by password. Access to the computer center is by key or picture identification. Hard copy records are maintained in Federal office buildings in lockable file cabinets and accessed only by authorized Federal employees on a need-to-know basis.

f. *Retention and Disposition of Records:* Under a written Memorandum of Understanding (MOU) agreement between the DoD/DMDC and the DoI, it is agreed that any diskette/tapes provided by the DoI for matches shall be destroyed or returned to the DoI upon successful completion of each match and shall be used only for debt collection purposes. Non-hit records will not be used for any purposes. Hard copy matched records (hits) will be used by the DoI to conduct individual reviews and may be used to contact the debtor for payment pursuant to the Debt Collection Act of 1982. Records relating to "hits" will be retained by the DoI until completion of any necessary collection efforts and then be disposed of in accordance with approved records control schedules and/or approved disposition authority. The DoI will maintain a disclosure accounting record, as required by 5 U.S.C. 552a (c) of the Privacy Act, as a result of the match information received from DMDC when contacting other agencies pursuing individual debtors. If no collection action is needed, no DoD record will be used for any other purpose. The DoI tape file will be used and accessed only for the match agreed to. It will not be used to extract information concerning "non-hit" data for any purpose and will not be duplicated or disseminated within or outside the DoD.

DEPARTMENT OF EDUCATION

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of Proposed Information Collection Requests.

SUMMARY: The Director, Office of Information Resources Management, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATES: Interested persons are invited to submit comments on or before May 30, 1989.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Jim Houser, Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place, NW., Room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Margaret B. Webster, Department of Education, 400 Maryland Avenue, SW., Room 5624, Regional Office Building 3, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Margaret B. Webster (202) 732–3915.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations.

The Director, Office of Information Resources Management, publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following:

(1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Frequency of collection; (4) The affected public; (5) Reporting burden; and/or (6) Recordkeeping burden; and (7) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Margaret Webster at the address specified above.

Dated: April 21, 1989.

Carlos U. Rice,

Director, for Office of Information Resources Management.

Office of Educational Research and Improvement

Type of Review: New Collection.
Title: Field Test of Dropout Statistics Collection and Reporting Procedures.
Frequency: Non-recurring.
Affected Public: States and local governments.
Reporting Burden:
Responses: 264.
Burden Hours: 1,320.
Recordkeeping Burden:
Recordkeepers: 31.
Burden Hours: 1.5.
Abstract: A field test will be conducted to determine which data collection procedures are the least burdensome and most efficient and technically accurate procedures for collecting national dropout statistics. The Department will make decisions impacting the final data collection methodology and survey instruments based on the result of this field test.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Final Consent Order With Howell Corp.

AGENCY: Economic Regulatory Administration, Department of Energy.
ACTION: Final Action on Proposed Consent Order.

SUMMARY: The Department of Energy (DOE) hereby gives the notice required by 10 CFR 205.199J that it has adopted as final the Consent Order with Howell Corporation (Howell), executed on February 23, 1989, and published for comment in 54 FR 11036 (March 16, 1989).

As required by 10 CFR 205.199J, DOE provided a period of thirty days following publication of the Notice of Proposed Consent Order for the submission of comments. The Economic Regulatory Administration (ERA) received no comments in response to this notice. Accordingly, ERA has determined that the Consent Order should be made final without modification. The Consent Order becomes effective as a Final Order of the DOE on the date of publication of this notice.

FOR FURTHER INFORMATION CONTACT: Dorothy Hamid, Office of Enforcement Litigation, Economic Regulatory Administration, U.S. Department of Energy, Room 3H-017, RG-32, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-1699.

Copies of the Consent Order may be obtained free of charge by written request to "Howell Consent Order Request" at the above address or by calling Dorothy Hamid at the above telephone number. Copies may also be obtained in person at the same address or at the Freedom of Information Reading Room, Room 1E-190, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585.

SUPPLEMENTARY INFORMATION: On March 16, 1989, DOE published notice in the **Federal Register**, Vol. 54 at Page 11036, announcing the execution of a Proposed Consent Order between Howell and DOE. That Notice summarized the proposed Consent Order and the Relevant facts, as well as contained the proposed Consent Order in its entirety.

As a result of an audit of Howell's compliance with the Federal petroleum price and allocation regulations, the Economic Regulatory Administration (ERA) raised certain issues with respect to Howell's application of the Federal petroleum price and allocation regulations. A Proposed Remedial Order was issued on June 24, 1988, to Howell, Howell Hydrocarbons, Inc. (which operated a refinery in San Antonio, Texas) Howell Industries, Inc., and the Quintana-Howell Joint Venture (hereinafter Joint Venture), a Texas joint venture composed of Quintana Refinery Company and Howell Corporation, which operated a refinery in Corpus Christi, Texas. As consideration for resolution of the Proposed Remedial Order, Howell shall pay a total principal amount of $19,375,000, plus interest. Within thirty (30) days after the effective date of this Consent Order, Howell will pay an initial principal amount of $2,000,000, and the remaining principal sum of $17,375,000, plus interest at the rate of 9.38 percent per annum compounded on the unpaid balance of each scheduled payment interval, will be paid to DOE in eight installments of principal and interest. ERA will petition DOE's Office of Hearings and Appeals to implement Special Refund Procedures pursuant to 10 CFR Part 205, Subpart V, to distribute all amounts paid by Howell pursuant to the Consent Order.

As noted, no comments were received in response to the Notice of Proposed Consent Order. Accordingly, ERA has determined to adopt the Proposed Consent Order, without modification, as a final Order of the DOE, pursuant to 10 CFR 205.199J. The Consent Order becomes effective upon publication of this Notice.

Issued in Washington, DC, on April 18, 1989.

Milton C. Lorenz,
Chief Counsel for Enforcement Litigation, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. ER89-352-000 et al.]

Portland General Electric Co. et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

April 21, 1989.

Take notice that the following filings have been made with the Commission:

1. Portland General Electric Company

[Docket No. ER89-352-000]

Take notice that Portland General Electric Company (PGE) on April 17, 1987 tendered for filing an Agreement for a transmission capability exchange with the Bonneville Power Administration (BPA), which provides for the use by PGE of 100 MW of transmission capability on BPA's DC Intertie rated transfer capability in return for the use by BPA of 100 MW of transmission capability on PGE's AC Intertie rated transfer capability plus an additional payment by PGE of $250,000, from July 1, 1987 to July 29, 2013.

PGE states the reason for the proposed exchange is to allow a mutually beneficial transaction between the parties.

PGE requests an effective date of July 1, 1987 and therefore requests waiver of the Commission's notice requirements.

Copies of the filing have been served upon the Bonneville Power Administration and the Oregon Public Utility Commission.

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

2. Portland General Electric Company

[Docket No. ER89-351-000]

Take notice that Portland General Electric Company (PGE) tendered for filing on April 17, 1989 an Agreement for a Seasonal Power-for-power Exchange with the Bonneville Power Administration which provides for the delivery by BPA of 20 MW of power to PGE from July 2, 1987 to September 30, 1987, with return by PGE from October 1, 1987 to December 31, 1987 and the delivery by BPA of 40 MW of power to PGE from June 1, 1988 to September 15, 1988 and the return by PGE from October 15, 1988 to January 15, 1988.

PGE states that the reason for the proposed seasonal exchange is to allow a mutually beneficial transaction between the parties.

PGE requests an effective date of July 2, 1987 and therefore requests waiver of the Commission's notice requirements.

Copies of the filing have been served upon the Bonneville Power Administration and the Oregon Public Utility Commission.

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

3. New York Electric & Gas Corporation

[Docket No. ER89-344-000]

Take notice that New York State Electric & Gas Corporation (NYSEG) on April 13, 1989, tendered for filing pursuant to Section 35.12 of the regulations under the Federal Power Act, as a rate schedule, an agreement with Long Island Lighting Company (LILCO). The agreement provides that NYSEG shall sell excess energy to LILCO. Service under this agreement commenced on March 6, 1989 and shall continue until terminated by either party.

NYSEG requests that the 60-day filing requirement be waived and that March 6, 1989 be allowed as the effective date of the filing.

NYSEG has filed a copy of this filing with Long Island Lighting Company and with the Public Service Commission of the State of New York.

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

4. Pacific Gas and Electric Company

[Docket No. ER89-342-000]

Take notice that on April 12, 1989, Pacific Gas and Electric Company (PG&E) tendered for filing changes to Rate Schedule FERC No. 79, between PG&E and the Western Area Power Administration (Western).

The rate schedule change proposes estimated rates for withdrawals of energy previously banked into Energy Account No. 2 (EA2) with PG&E by Western pursuant to Contract No. 14-06-200-2948A. When recorded costs become available the rates will be recalculated and the sales will be adjusted to reflect the recorded cost based rates.

PG&E requests waiver of the Commission's notice requirements to permit an effective date of December 1, 1988, when unbanking from EA2 commenced.

Copies of this filing have been served upon Western and the California Public Utilities Commission. In addition, copies of this filing are available at PG&E's General Office in San Francisco and at PG&E's Sacramento Valley Regional Office in Sacramento.

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

5. Wisconsin Public Service Corporation

[Docket No. ER89-350-000]

Take notice that Public Service Corporation (WPSC) on April 17, 1989, tendered for filing a New, executed Service Agreement for partial requirements service to the Manitowoc Public Utilities (MPU), City of Manitowoc, Manitowoc County, Wisconsin. The new Service Agreement revises the initial term of service, and provides for a change of delivery points. The delivery point change results from the company's leasing certain electric facilities from MPU. The company, with the support of MPU, has requested an effective date of March 1, 1989, for the new Service Agreement.

The filing also includes an executed Limited Term Capacity Agreement for the period June 1, 1990, through May 31, 1991, with an option to extend service through May 31, 1992. The company requests that this agreement become effective on June 1, 1990.

WPSC states that copies of the executed Service Agreement and Limited Term Capacity Agreement were sent to MPU, the two other purchases of service under the same or similar tariff as MPU and to the Public Service Commission of Wisconsin.

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

6. Wisconsin Power & Light Company

[Docket No. ER89-349-000]

Take notice that on April 14, 1989, Wisconsin Power & Light Company (WPL) tendered for filing a Wholesale Power Contract dated June 28, 1986 and Amendment No. 1 dated March 22, 1989, both between the City of Elkhorn and WPL. Elkhorn is currently taking service from Wisconsin Electric Power Company (WEP).

The purpose of the Contract and Amendment is to define the terms and condition of service. Service under this Contract will be in accordance with WPL's standard W-3 rate schedule. WPL requests an effective date of June 16, 1989, concurrent with the termination date of Elkhorn's wholesale power agreement with WEP.

WPL states that copies of the agreement and filing have been provided to Elkhorn, WEP and the Wisconsin Public Service Commission.

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

7. New York State Electric & Gas Corporation

[Docket No. ER89-348-000]

Take notice that New York State Electric & Gas Corporation (NYSEG) on April 14, 1989, tendered for filing pursuant to § 35.13 of the regulations under the Federal Power Act, as a rate schedule, an agreement with New England Power Company (NEP). The short term agreement provides that NYSEG shall sell surplus capability and associated energy to NEP. Service under this agreement will commence on May 1, 1989 and shall terminate on October 31,

1989 unless extended in writing by mutual agreement.

NYSEG requests that the 60-day filing requirement be waived and that May 1, 1989 be allowed as the effective date of the filing.

NYSEG filed a copy of this filing with New England Power Company, with the Massachusetts Department of Public Utilities, and with the Public Service Commission of the State of New York.

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

8. New York State Electric & Gas Corporation

[Docket No. ER89-347-000]

Take notice that New York Electric & Gas Corporation (NYSEG) on April 14, 1989, tendered for filing pursuant to § 35.12 of the regulations under the Federal Power Act, as a rate schedule, an agreement with Boston Edison (BECo.). The short term agreement provides that NYSEG shall sell surplus capability and associated energy to BECo. Service under this agreement will commence on May 1, 1989 and shall terminate on October 31, 1989 unless extended in writing by mutual agreement.

NYSEG requests that the 60-day filing requirement be waived and that May 1, 1989 be allowed as the effective date of the filing.

NYSEG has filed a copy of this filing with BECo, with the Massachusetts Department of Public Utilities, and with the Public Service Commission of the State of New York.

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

9. New York State Electric & Gas Corporation

[Docket No. ER89-346-000]

Take notice that on April 14, 1989, New York Electric & Gas Corporation (NYSEG) tendered for filing pursuant to § 35.13 of the regulations under the Federal Power Act, as a rate schedule, an agreement with Long Island Lighting Company (LILCO). The agreement provides that NYSEG shall sell to LILCO firm capacity and energy in the amounts of 125 megawatts, 100 megawatts, and an additional 100 megawatts. Service under this agreement shall begin and terminate as follows: 125 megawatts, April 30, 1989 to October 30, 1989; 100 megawatts, March 27, 1989 to April 29, 1989; the additional 100 megawatts, June 1, 1989 to August 31, 1989. These durations may be extended in writing by both parties.

NYSEG requests that the 60-day filing requirement be waived and that March 27, 1989 be allowed as the effective date of the filing.

NYSEG has filed a copy of this filing with Long Island Lighting Company and the Public Service Commission of the State of New York.

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

10. New York State Electric & Gas Corporation

[Docket No. ER89-345-000]

Take notice that New York State Electric & Gas Corporation (NYSEG) on April 14, 1989, tendered for filing pursuant to § 35.12 of the regulations under the Federal Power Act, an agreement with Rochester Gas and Electric Corporation (RG&E). The short term agreement provides that NYSEG shall sell surplus capability and associated energy to RG&E. Service under this agreement commenced on March 20, 1989 and shall terminate on April 2, 1989 unless extended in writing by mutual agreement.

NYSEG requests that the 60-day filing requirement be waived and that March 20, 1989 be allowed as the effective date of the filing.

NYSEG has filed a copy of this filing with RG&E and with the Public Service Commission of the State of New York.

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

11. Nantahala Power and Light Company

[Docket No. ER89-335-000]

Take notice that on April 3, 1989, Nantahala Power and Light Company (Nantahala) tendered for filing the 1988 revised "PL" (COSAC) rate tariff. Included in the filing is a report showing the development of these charges, the capitalization data, and the appropriate data for the year ended December 31, 1988.

Nantahala states that these rates are effective on and after April 1, 1989.

Comment date: May 8, 1989, in accordance with Standard Paragraph E at the end of this notice.

12. Arizona Public Service Company

[Docket No. ER89-281-000]

Take notice that on April 3, 1989 Arizona Public Service Company (Arizona) tendered for filing a Notice of Termination applicable to the Firm Transmission Service Agreement (Agreement) between Arizona and Tucson Electric Power Company (APS FERC Rate Schedule No. 91). Service will terminate on May 31, 1989 as provided pursuant to the terms of the Agreement.

Comment date: May 8, 1989, in accordance with Stardard Paragraph E at the end of this notice.

13. Louisiana Power & Light Company

[Docket No. EL89-24-000]

Take notice that on March 15, 1989 Louisiana Power & Light Company (LP&L) filed a Petition for an Order Relating to Disposition of Proceeds of Judgment Against Gas supplier. LP&L states that it has recovered $193,669,000 on a judgement against a fuel supplier and that the Louisiana Public Service Commission has issued an order addressing the disposition of the proceeds of said judgement with respect to its retail customers. LP&L further requests an order addressing the appropriate treatment of the proceeds. LP&L further states that notice thereof was given to the Louisian Public Service Commission, the Council of the City of New Orleans, and those entities that are, from time to time, wholesale customers of LP&L, including Cajun Electric Power Cooperative, and the Towns of Winnfield, Vidalia, Jonesville, and Minden, Louisiana.

Comment date: May 22, 1989, in accordance with Stardard Paragraph E at the end of this notice.

14. Southern California Edison Company v. Arizona Public Service Company

[Docket No. EL89-26-000]

Take notice that on March 30, 1989 Southern California Edison Company (SCE) tendered for filing a complaint against Arizona Public Service Company (APS). SCE submits that APS has improperly charged SCE under the Arizona-Edison Cholla No. 4 Layoff Agreement since December, 1984 and that such improper charges should be refunded with interest. SCE also requests prospective relief under section 206 of the Act as amended by the Regulatory Fairness Act.

Comment date: May 22, 1989, in accordance with Stardard Paragraph E at the end of this notice.

15. City of Watertown, New York v. Niagara Mohawk Power Corp.

[Docket No. EL89-27-000]

Take notice that on April 4, 1989 the City of Watertown, New York (Watertown) filed a request for an order, pursuant to sections 206, 306 and 309 of the Federal Power Act, directing Niagara Mohawk Power Corporation (Niagara Mohawk) to transmit to Watertown its 880 kW allocation of electricity from the New York Power Authority's (NYPA) Niagara Project, as required by the Niagara Mohawk tariff on file, Rate Schedule Nos. 18 and 19, and by Niagara Mohawk's 1961 contract with NYPA. Watertown also requests Niagara Mohawk to make it whole for injury caused to Watertown by Niagara Mohawk's refusal to transmit, which is a plain violation of Niagara Mohawk's contract under the "filed rate" doctrine.

Comment date: May 22, 1989, in accordance with Stardard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 89-10096 Filed 4-26-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP87-432-008 et al.]

K N Energy, Inc. and Northern Gas Co., et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. K N Energy, Inc. and Northern Gas Company

[Docket No. CP87-432-008]

April 20, 1989.

Take notice that on February 27, 1989, K N Energy, Inc. (K N) and Northern Gas Company (NGC),[1] successor-in-interest to Northern Utilities, Inc., P.O. Box 15265, Lakewood, Colorado 80215, filed a petition in Docket No. CP87-432-008, pursuant to section 7(c) of the Natural Gas Act, to further amend the order issued October 30, 1987, in Docket No. CP87-432-000, so as to amend the terms of its existing authorization to provide an additional exchange delivery point, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

K N and NGC state that the order issued October 30, 1987, authorizes them to engage in the exchange of natural gas between two gas supply areas in the State of Wyoming, Beaver Creek and Sand Draw. It is further stated that the order issued October 5, 1988, amended the original certificates to provide for a term of unlimited duration.

K N and NGC state that they are requesting that their existing certificates be amended to authorize an additional exchange delivery point from K N to NGC at an existing point of interconnection between K N and NGC's facilities near Casper, Wyoming. Petitioners are proposing herein to exchange gas at the outlet of K N's Casper Plant in Natorna County, Wyoming. The petitioners state the proposed alternative point would permit NGC to receive gas from K N at a location where NGC can best utilize the exchange gas to meet its customers' requirements in Wyoming in the most efficient and cost effective manner.

Comment date: May 11, 1989, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

2. Kentucky West Virginia Gas Company

[Docket No. CP89-1179-000]

April 21, 1989.

Take notice that on April 10, 1989, Kentucky West Virginia Gas Company, (Kentucky West),[2] 340 Seventeenth Street, Ashland, Kentucky 41101, filed in Docket No. CP89-1179-000 an application pursuant to Sections 7(b) and 7(c) of the Natural Gas Act for: (1) Blanket certificate authority with pregranted abandonment authority for the interruptible sale for resale of natural gas supplies, which are in excess of the current and projected needs of Kentucky West's on-system customers, to off-system and on-system purchasers, including interstate and Hinshaw pipelines, local distribution customers, natural gas marketers and direct sale customers pursuant to a proposed new rate schedule, Interruptible Sales Service (ISS), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Kentucky West states that it proposes to charge a negotiated rate for sales under the proposed Rate Schedule ISS ranging between a maximum rate equal to Kentucky West's 100 percent load factor rate found in its Rate Schedule PLS-1 rate and the minimum rate equal to Kentucky West's actual weighted average cost of gas for the month in which the gas is delivered together with a representative amount of out-of-period adjustments, plus all variable costs incurred to provide the service, as well as GRI and Annual Charge Adjustments (ACA) as applicable. Kentucky West states that sales would be made through existing facilities.

Comment date: May 12, 1989, in accordance with Standard Paragraph F at the end of this notice.

3. Tennessee Gas Pipeline Company

[Docket No. CP89-1204-000]

April 21, 1989.

Take notice that on April 13, 1989, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed an application pursuant to section 7(b) of the Natural Gas Act, for authorization to abandon service to Berkshire Gas Company (Berkshire), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

By Commission order issued December 15, 1978, in Docket No. CP78-499 (5 FERC ¶ 61,234), Tennessee was authorized, inter alia, to transport natural gas for Berkshire. Tennessee was authorized to transport and deliver up to 21,190 Mcf of gas per day to Berkshire at Tennessee's North Adams sales meter station, Berkshire County, Massachusetts.

The authorized transportation service enabled Berkshire to receive volumes of natural gas equivalent to liquefied natural gas (LNG) purchased by Berkshire from Distrigas of Massachusetts Corporation (DOMAC). In order to effect receipt by Berkshire of equivalent volumes of natural gas, Boston Gas Company (Boston Gas), a customer of Tennessee, receives daily volumes of LNG from DOMAC and releases equivalent volumes of natural gas to Tennessee for Berkshire's account at Tennessee's Arlington sales meter station delivery point to Boston Gas in Middlesex County, Massachusetts. Volumes so made available by Boston Gas to Tennessee at the receipt point are volumes designated by Boston Gas from its contracted demand purchases from Tennessee under Tennessee's Rate Schedule CD-6.

The authorized transportation service is presently rendered under the terms of an Interruptible Transportation Contract (the Contract) made as of December 15, 1978 by and among Tennessee, Boston

[1] NGC is a Hinshaw pipeline, regulated by the Wyoming Public Service Commission.

[2] This notice was previously issued March 13, 1989, but inadvertently was not published in the Federal Register.

VOL 54 ISS 80 AP 27 1989 UMI

Gas and Berkshire. The Contract has been filed by Tennessee as its FERC Rate Schedule T–80, a copy of which is submitted herewith as part of Exhibit U.

Article XI of Tennessee's Rate Schedule T–80 provides that the Contract shall extend for a primary term ending November 1, 1993 and year to year thereafter unless terminated by any party upon twelve months prior written notice to the other parties.

By this application Tennessee seeks authorization to abandon the transportation service for Berkshire authorized by the Commission's order issued on December 15, 1978, in Docket No. CP78–499. By letter of February 23, 1989, Berkshire and Tennessee have agreed to such termination effective February 1, 1989. Tennessee requests that the authorization to abandon such service be made effective February 1, 1989.

Tennessee has a rate case before the Commission at Docket No. RP88–228–000. It will be Tennessee's position that the abandonment of the transportation service as proposed herein should be considered by the Commission and reflected in the decision of RP88–228–000.

Comment date: May 12, 1989, in accordance with Standard Paragraph F at the end of this notice.

4. Columbia Gas Transmission Corporation

[Docket No. CP89–1205–000]

April 21, 1989.

Take notice that on April 13, 1989, Columbia Gas Transmission Corporation (Columbia), 1700 MacCorkle Avenue, SE., Charleston, West Virginia 25314, filed in Docket No. CP89–1205–000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to partially abandon service and for pre-granted abandonment authority to Baltimore Gas and Electric Company (BG&E), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Columbia requests permission and approval to abandon: (i) 34,358 dekatherms per day (Dt/d) of contract demand effective November, 1988 [1]; (ii) 20,000 Dt/d of contract demand effective January 1, 1988; and (iii) 45,642 Dt/d of contract demand effective November 1, 1989 under Columbia's CDS Rate Schedule for BG&E [2], together with the abandonment of related Seasonal Entitlements. Additionally, Columbia requests permission and approval for pre-granted abandonment authority for the further abandonment of: (i) Contract demand under Columbia's Rate Schedule CDS by BG&E from time to time but not below 140,000 Dt/d at any time during the first five contract years commencing November 1, 1988, or not below 120,000 Dt/d at any time during the last ten (10) year period the service agreement dated March 10, 1989, between BG&E and Columbia, and (ii) seasonal entitlement of 5 percent per contract year, commencing November 1, 1990 at BG&E's use of reduction and/or conversion rights pursuant to the provisions of section 6 and Appendix A of the March 10, 1989, service agreement.

The abandonment authorization requested would result in the following levels of sales service for BG&E:

Entitlements, effective date	Contract demand (Dt/d) summer season	Seasonal (Dt/year) winter season
Nov. 1, 1988, 39,518,000	263,642	11,206,000
Jan. 1, 1989, 35,760,000	263,642	7,664,000
Apr. 1, 1989, 35,760,000	239,467	7,774,000
Nov. 1, 1989, 30,150,000	[3]193,825	2,380,000
Nov. 1, 1990, 30,150,000 [4] and thereafter	[4]193,825	[4]2,380,000

[3] Under the Service Agreement, BG&E will reduce its contract demand to 215,000 Dt/d or 193,825 Dt/d as of November 1, 1989. BG&E must advise Columbia of the quantity it desires as its contract demand by June 3, 1989.

[4] Subject to Buyer's further reduction or conversion rights reflected in Section 6 of the March 10, 1989, service agreement.

Further, Columbia requests pre-granted authorization to implement the reductions and conversion rights of BG&E as set forth in Section 6 and Appendix of said Service Agreement.

Comment date: May 12, 1989, in accordance with Standard Paragraph F at the end of this notice.

5. Tennessee Gas Pipeline Company

[Docket No. CP89–1210–000]

April 21, 1989.

Take notice that on April 14, 1989, Tennessee Gas Pipeline Company (Tennessee), Post Office Box 2511, Houston, Texas 77252, filed in Docket No. CP89–1210–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Capitol District Energy Center Cogeneration Associates (Capitol District), an end-user, under its blanket authorization issued in Docket No. CP87–115–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Tennessee would perform the proposed interruptible transportation service for Capitol District, pursuant to an interruptible transportation service agreement dated December 19, 1988. The transportation agreement is effective for a term of two years and thereafter until firm transportation is made available to Capitol District pursuant to its Precedent Agreement filed with Tennessee and dated December 17, 1987; however, that either party may terminate the agreement at any time upon at least 30 days written notice to the other party. Tennessee proposes to transport 13,900 dekatherms (dth) of natural gas on a peak and average day; and on an annual basis 5,073,500 dth of natural gas for Capitol District. Tennessee proposes to receive the subject gas at various existing points of receipt located offshore Louisiana and in the states of Louisiana, Mississippi and Pennsylvania. The points of delivery and ultimate points of delivery are located in the state of Connecticut. Tennessee avers that no new facilities are required to provide the proposed service.

It is explained that the proposed service is currently being performed pursuant to the 120-day self implementing provision of § 284.223(a)(1) of the Commission's Regulations. Tennessee commenced such self-implementing service on April 1, 1989, as reported in Docket No. ST89–3011–000.

Comment date: June 5, 1989, in accordance with Standard Paragraph G at the end of this notice.

6. Southern Natural Gas Company

[Docket No. CP89–1221–000]

April 21, 1989.

Take notice that on April 17, 1989, Southern Natural Gas Company (Southern), Post Office Box 2563, Birmingham, Alabama 35202–2563, filed in Docket No. CP89–1221–000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to transport natural gas on behalf of Texarkoma Transportation Company (Texarkoma), a marketer of natural gas, under Southern's blanket certificate issued in Docket No. CP88–316–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Southern proposes to transport, on an interruptible basis, up to 2,500 MMBtu equivalent of natural gas on a peak day, 2,000 MMBtu equivalent on an average day, and 730,000 MMBtu equivalent on an annual basis for Texarkoma. It is stated that Southern would receive the gas at existing points on Southern's system in Louisiana, offshore Louisiana, Texas, offshore Texas, Mississippi, and Alabama. It is stated that Southern would deliver equivalent volumes at existing points on Southern's system in Georgia. It is asserted that Southern would utilize existing facilities and that no construction of additional facilities would be required. It is explained that the transportation service commenced March 2, 1989, under the automatic authorization provisions of Section 284.223 of the Commission's Regulations, as reported in Docket No. ST89–2694.

Comment date: June 5, 1989, in accordance with Standard Paragraph G at the end of this notice.

7. Panhandle Eastern Pipe Line Company

[Docket No. CP89–1166–000]

April 21, 1989.

Take notice that on April 7, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77251–1642, filed in Docket No. CP89–1166–000 a request pursuant to §§ 157.205 and 284.223(2)(b) of the Commission's Regulations under the Natural Gas Act for authorization to provide transportation for Amgas, Inc. (Amgas), a shipper and marketer of natural gas, under Panhandle's blanket certificate issued in Docket No. CP86–585–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Panhandle specifically requests authorization to transport up to 1,000 dt equivalent of natural gas per day on an interruptible basis on behalf of Amgas pursuant to a transportation agreement dated January 12, 1989, between Panhandle and Amgas. It is stated that the agreement provides for Panhandle to receive gas from various existing points of receipt on its system in Texas, Oklahoma, Kansas, Colorado, Wyoming, and Illinois. Panhandle would then transport and redeliver subject gas, less fuel used and unaccounted for line loss to Central Illinois Light Company in Tazewell County, Illinois, it is stated. Panhandle states that the estimated daily and annual quantities would be 500 dt and 182,500 dt, respectively. It is further stated that service under § 284.223(a) commenced on March 1, 1989, as reported in Docket No. ST89–2836–000.

Comment date: June 5, 1989, in accordance with Standard Paragraph G at the end of this notice.

8. Northern Natural Gas Company, Division of Enron Corp.

[Docket No. CP89–1134–000]

April 21, 1989.

Take notice that on April 3, 1989, Northern Natural Gas Company, Division of Enron Corp. (Northern), 1400 Smith Street, Houston, Texas 77002, filed in Docket No. CP89–1134–000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Northern to increase the currently authorized firm entitlement it provides to three of its utility customers, and to realign the currently authorized firm entitlement sold to one of the three utility customers, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Northern is proposing to increase firm sales entitlements to St. Croix Valley Natural Gas Company, Inc. (St. Croix) and Municipal Utilities Department, Watertown, South Dakota (Watertown) and to increase and realign firm sales entitlements to Wisconsin Gas Company (Wisconsin Gas). It is stated that the total increase in firm entitlement sought by Northern is 5,032 Mcf per day (Mcfd); 3,213 Mcfd is to be served under Rate Schedule SS–1 and 1,819 Mcfd under Rate Schedule WPS–1, of its FERC Gas Tariff, Third Revised Volume No. 1. Northern states that the proposed changes are to be effective for the 1989–1990 winter heating season. Northern requests that the SS–1 firm sales service for St. Croix, Watertown and Wisconsin Gas become effective on November 1, 1989, and the WPS–1 firm sales service for Watertown and Wisconsin Gas become effective on December 15, 1989, pursuant to their executed service agreements.

Each utility has requested Northern to increase their firm entitlement in the manner and amount set forth below.

[Volumes in Mcfd]

	Existing authority	Proposed authority	Proposed increase
SS–1 Service:			
St. Croix	1,398	2,188	790
Watertown	1,230	1,920	690
Wisconsin Gas	12,496	14,229	1,733
WPS–1 Service:			
Watertown	240	550	310
Wisconsin Gas	2,291	3,800	1,509
Total	17,655	22,687	5,032

Wisconsin Gas is currently realigning the volumes it serves to twenty-one communities, in the manner set forth below.

Wisconsin Gas/ Community	Volumes in Mcfd		
	Existing authority	Proposed authority SS–1	Proposed increase (decrease), SS–1
Almena	90	115	25
Amery	450	420	(30)
Balsam Lake	120	150	30
Barron	370	380	10
Bloomer	345	330	(15)
Cameron	180	250	70
Chetek	240	280	40
Clayton	70	75	5
Clear Lake	230	200	(30)
Frederic	210	200	(10)
Ladysmith	660	750	90
Luck	190	200	10
Milltown	80	110	30
New Auburn	60	55	(5)
Osceola	240	230	(10)
Rice Lake	546	1,842	1,296
St. Croix Falls	250	255	5
Star Prairie	20	30	10
Tomah	747	989	242
Turtle Lake	170	150	(20)
Weyerhauser	75	65	(10)
Total	5,343	7,076	1,733

Northern states that such realignment and/or increase in firm entitlement will more effectively serve the natural gas needs of Northern's utility customers and of their individual customers, and is clearly in the public convenience and necessity. It is further stated that Northern's Form 15, filed with the Commission on April 1, 1988, reflects that Northern has gas supply in excess of its current market requirements to enable it to serve the increased loads proposed herein.

According to Northern, no additional facilities are required to be constructed to accommodate the realigned and increased deliveries of natural gas to the utility customers as proposed herein.

Finally, Northern states that it will utilize its currently effective WPS–1 and SS–1 Rate Schedules for the increased

[1] The abandonment of the 34,358 Dt/d of contract demand results from BG&E's conversion from service under Rate Schedule CDS to Rate Schedule FTS under Order No. 436 and, as a result, BG&E's contract demand effective November 1, 1988 would be reduced from 318,000 Dt/d to 283,642 Dt/d.

[2] The Commission's "Order Approving Abandonment" in Docket No. CP89–514–000 issued March 21, 1989, authorized Columbia to abandon 24,175 Dt/d of Contract Demand under Columbia's Rate Schedule CDS with BG&E, which reduced BG&E's contract demand from 318,000 Dt/d to 293,825 Dt/d effective April 1, 1989.

VOL 54 ISS 80 AP 27 1989 UMI

level of service proposed, and upon receipt of the authorizations requested herein, Northern will file with the Commission the necessary revised Tariff Sheets reflecting the proposed volume increases.

Comment date: May 12, 1989, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if not motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Project No. 6481-001 Oregon]

Roy M. Beyer; Surrender of Exemption

April 21, 1989.

Take notice that Roy M. Beyer, exemptee for the proposed Beyer Hydropower Project, has requested that his exemption from licensing be surrendered. The exemption was issued on August 3, 1982. The project would have had an installed capacity of 24 kilowatts and would have been located on Beaver Creek, at Beyer Pond Dam, in Clackamas County, Oregon. No construction or ground disturbing activities have been initiated at the proposed project location.

The exemptee filed the request on May 8, 1984, and the exemption for Project No. 6481 shall remain in effect through the thirtieth day after issuance of this notice unless that day is Saturday, Sunday, or holiday as described in 18 CFR 385.2007, in which case the exemption shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

Lois D. Cashell,

Secretary.

[FR Doc. 89-10023 Filed 4-26-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP89-86-001]

Chandeleur Pipe Line Co.; Filing

April 21, 1989.

Take notice that on April 17, 1989, Chandeleur Pipe Line Company (Chandeleur) filed Substitute Original Sheet Nos. 18, 23, 26, 110, and 111, and Original Sheet No. 110-A to its FERC Gas Tariff, First Revised Volume No. 1, to be effective April 1, 1989.

Chandeleur states that these tariff sheets are filed in compliance with the Commission's order of March 31, 1989. Chandeleur states that Substitute Original Sheet No. 18 deletes the language that outlines conditions under which a firm transportation request will be held invalid. Chandeleur states that Substitute Original Sheet No. 23 corrects some typographical errors. Chandeleur states that Substitute Original Sheet No. 26 now states that it will allow any gas to be delivered to satisfy the delivery requirement, that it will apply the extension period in a non-discriminatory manner, and that Chandeleur will excuse gas that is not delivered due to delays in construction or force majeure from the delivery requirements. Chandeleur states it has added language in Substitute Original Sheet Nos. 110 and 110-A which describe the method of scheduling firm transportation when it is unable to accommodate all requested firm transportation service. Substitute Original Sheet No. 111 states that firm transportation will be curtailed on a pro rata basis.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214. 385.211 (1988)). All such motions or protests should be filed on or before April 28, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 89-10097 Filed 4-26-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. RP85-122-020 and RP87-30-025]

Colorado Interstate Gas Co.; Compliance Filing

April 21, 1989.

Take note that on April 14, 1989, Colorado Interstate Gas Company ("CIG") submitted a revised compliance filing in Docket Nos. RP85-122 and RP87-30.

CIG states this filing reflects compliance with ordering paragraph C of the Commission's March 15, 1989 order which accepted CIG's February 13, 1989 filing in the above dockets subject to refund and conditions. The tariff sheets listed below reflect the following: (1) Deletion of D-2 overrun charge

reference in Rate Schedule SG-1; (2) Reclassification of the return on equity and related taxes related to preferred stock from demand to the commodity component of CIG's rates; and (3) Revision to Substitute Third Revised Sheet No. 10 of CIG's Volume No. 1 Tariff to reflect the elimination of the inconsistency related to CIG's standby service as pointed out in the Commission's March 15, 1989 order. CIG continued to reflect the elimination of the PR-1 Rate Schedule on Second Substitute Third Revised Sheet No. 10 effective November 1, 1988, but eliminated the reference to the standby service on this sheet. The standby service reference has been reflected on Third Substitute Third Revised Sheet No. 10 effective July 14, 1987 which is the effective date of CIG's standby service.

CIG included workpapers supporting base rates effective March 1, 1989, and base rates to be effective May 1, 1989. The March 1, 1989 base rates are based on CIG's February 13, 1989 filing and reflect the above changes before the reclassification of costs related to "certificated" facilities as required by the Commission's February 13, 1987 and February 27, 1989 orders.

The May 1, 1989 base rates reflects the reclassification of "certificated" gathering costs to commodity pursuant to the Commission's February 13, 1987 and February 27, 1989 orders as reflected in CIG's March 23, 1989 compliance filing as revised by the adjustments stated above.

In addition, because other aspects of Opinion Nos. 290 and 290-A are pending judicial review, CIG states that it reserves the right to modify the instant filing based upon the ultimate outcome of such pending judicial review or final Commission action.

Copies of this filing are being served on all jurisdiction customers and interest state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with § § 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before Apr. 28, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

[FR Doc. 89-10098 Filed 4-26-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP89-86-002]

Colorado Interstate Gas Co.; Compliance Filing

April 21, 1989.

Take Notice that Colorado Interstate Gas Company ("CIG"), on April 17, 1989, tendered for filing the following tariff sheets to revise its FERC Gas Tariff, Original Volume No. 1:

Substitute Original Sheet No. 61G5
Substitute Original Sheet No. 61G6
Substitute First Revised Sheet No. 61G7
Original Sheet No. 61G7-A
Substitute First Revised Sheet No. 61G8
Substitute Original Sheet No. 61G9
Substitute Original Sheet No. 61G11

CIG states that the above-referenced tariff sheets are being filed in compliance with the Commission's Order issued March 31, 1989 in this docket. CIG also submitted a description of the interest calculations contained in CIG's March 2, 1982 filing as well as support for the Base and Deficiency Periods utilized in that filing.

CIG states that copies of the filing were served upon all of the parties to this proceeding and affected state commissions as well as all of CIG's firm sales customers.

Copies of this filing are being served on all jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with § § 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before April 28, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

[FR Doc. 89-10099 Filed 4-26-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TQ89-2-32-001]

Colorado Interstate Gas Co.; Compliance Filing

April 21, 1989.

Take notice that on April 14, 1989, Colorado Interstate Gas Company (CIG) filed certain tariff sheets to its FERC Gas Tariff, Original Volume No. 1, to be effective March 1, 1989. CIG states that this filing is made pursuant to the Commission's March 31, 1989 letter order in Docket Nos. TQ89-2-32-000 and the directive of the Commission in its order of March 15, 1989 in Docket Nos. RP85-122-018 and RP87-30-022.

CIG states that these tariff sheets reflects, for the appropriate subsections of its PGA clause, modified language that clarifies how the current adjustments for the D-1 and D-2 demand charges are computed consistent with the implementation of the Modified Fixed Variable method of rate design.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1988)). All such motions or protests should be filed on or before April 28, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

Take notice that El Paso Natural Gas Company ("El Paso"), on April 18, 1989, tendered for filing pursuant to Part 154

VOL 54 ISS 80 AP 27 1989 UMI

of the Federal Energy Regulatory Commission's ("Commission") Regulations Under the Natural Gas Act, and in compliance with the Commission's letter order dated March 31, 1989, at Docket No. RP89-92-000, Substitute Third Revised Sheet No. 232 and Original Sheet No. 232-A to its FERC Gas Tariff, Original Volume No. 1-A.

El Paso states that on March 3, 1989 at Docket No. RP89-92-000, El Paso tendered for filing and acceptance certain tariff sheets in compliance with Order No. 500, *et seq.*, setting forth the method by which firm transportation capacity will be reallocated under § 284.304(c) of the Commission's Regulations in the evident that two or more shippers seek to obtain the firm capacity that one or more shippers offer to relinquish on or across the Outer Continental Shelf.

El Paso states that by letter order of March 31, 1989 in Docket No. RP89-92-000, the Commission accepted and suspended those tariff sheets, subject to refund, effective April 1, 1989, and subject to modification. El Paso was directed to refile its tariff sheets within thirty (30) days of the date of said order so as to include langauge in its tariff which specifically addresses § 284.304(c) of the Commission's Regulations.

El Paso states this filing tenders Substitute Third Revised Sheet No. 232 and Original Sheet No. 232-A contained in El Paso's FERC Gas Tariff, Original Volume No. 1-A to specifically set forth language incorporating El Paso's compliance with the voluntary reallocation of firm capacity, as defined by § 284.304(c) of the Commission's Regulations.

El Paso requested, pursuant to § 154.51 of the Commission's Regulations, that waiver of the notice requirements of § 154.22 of the Commission's Regulations be granted so as to permit the tendered sheets to become effective April 1, 1989.

Copies of the filing were served upon all shippers utilizing the El Paso system and all interested state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 351.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before April 28, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP89-94-020]

Natural Gas Pipeline Company of America; Tariff Filing

April 21, 1989.

Take notice that on April 14, 1989, Natural Gas Pipeline Company of America (Natural) filed Substitute Fourth Revised Sheet Nos. 169 and 170 in its FERC Gas Tariff, Third Revised Volume No. 1, to be effective May 1, 1989, in lieu of the tariff sheets filed on March 31, 1989.

Natural states that this proceeding involves its filing to recover transition costs. On March 23, 1989, the Commission issued an order in which it directed Natural to revise its comparison period used in its transition cost recovery scheme by adopting one of two methods recommended by the Commission. One method involved the use of full calendar years only and the other involved making a separate deficiency calculation for the partial year.

Natural states that it made a filing on March 31, 1989, in which, *inter alia*, it adopted the method involving full calendar years in the calculation of the deficiency as recommended by the Commission. Natural states that since making the March 31 filing, it has been contacted by some of its customers complaining about the adverse effects of its revision to the comparison period. Natural states that in order to apportion its transition costs among its customers most fairly, it should split the difference between the two allocation methods recommended by the Commission, and the tariff sheets it has tendered reflects averages of the results of both methods.

Natural requests that the Commission grant it such waivers as are necessary to implement the tariff sheets in accordance with the March 31 filing.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1988)). All such motions or protests should be filed on or before April 28, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TA89-1-37-001]

Northwest Pipeline Corp.; Change in FERC Gas Tariff

April 21, 1989.

Take notice that on April 17, 1989, Northwest Pipeline Corporation ("Northwest"), in compliance with the Federal Energy Regulation Commission's ("Commission") order issued March 31, 1989 in the above-captioned docket, submitted the following tariff sheet to be a part of its FERC Gas Tariff:

First Revised Volume No. 1

First Amended Forty-Ninth Revised Sheet No. 10

Northwest states First Amended Forty-Ninth Revised Sheet No. 10 was filed to adjust the "Estimated average cost of gas in last scheduled PGA-Commodity" as found on the bottom of Rate Sheet No. 10. The subject tariff sheet amends Forty-Ninth Revised Sheet No. 10, which has been accepted by the Commission for filing and suspended to become effective April 1, 1989, subject to refund. First Amended Forty-Ninth Revised Sheet No. 10 was also filed to be effective April 1, 1989. Northwest also filed additional information in support of its annual PGA filing as required by the Commission's March 31, 1989 order.

A copy of this filing has been served on Northwest's jurisdictional sales customers and affected state commissions.

Any person desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulation Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with § § 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before April 28, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717-01-M

[Docket No. RP89-66-001]

Pacific Interstate Offshore Co.; Compliance Filing of Proposed Change in FERC Gas Tariff Rate

April 21, 1989

Take notice that Pacific Interstate Offshore Company ("PIOC") on April 14, 1989, tendered for filing the following proposed change to its FERC Gas Tariff, Original Volume No. 1, to be effective April 22, 1989:

Ninth Revised Sheet No. 4

PIOC states that the tariff sheet has been filed in compliance with Ordering Paragraph Two (2) of the Commission's Letter Order dated March 23, 1989 in Docket No. RP88-66-000. PIOC is filing for a reduction in its rate charged to its sole customer, Southern California Gas Company, under Rate Schedule G-10.

Copy of this filing were served on PIOC's suppliers, customers, and the interested State Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before April 28, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

Office of Hearing and Appeals

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Department of Energy.

ACTION: Implementation of Special Refund Procedures.

SUMMARY: The Office of Hearings and Appeals (OHA) of the Department of Energy (DOE) announces the procedures for disbursement of $8.5 million, plus accrued interest, in alleged crude oil violation amounts obtained from Hood Goldsberry d/b/a Goldsberry Operating Company (Case No. KEF-0118), Meeker and Company (Case No. KEF-0122), Calumet Industries, Inc. (Case No. KEF-0122) and Christmann and Welborn (Case No. KEF-0123). The OHA has determined that the funds will be distributed in accordance with the DOE's Modified Statement of Restitutionary Policy Concerning Crude Oil Overcharges, 51 FR 27899 (August 4, 1986).

DATE AND ADDRESS: Applications for refund must be filed by October 31, 1989, and should be addressed to: Subpart V Crude Oil Overcharge Refunds, Office of Hearings and Appeals, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT: Thomas O. Mann, Deputy Director; Roger Klurfeld, Assistant Director; Office of Hearings and Appeals, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-2094 (Mann); 586-2383 (Klurfeld).

SUPPLEMENTARY INFORMATION: In accordance with 10 CFR 205.282(c), notice is hereby given of the issuance of the Decision and Order set out below. The Decision sets forth the final procedures that the DOE has formulated to distribute crude oil overcharge funds obtained from the four firms listed above. The funds are being held in an interest-bearing escrow account pending distribution by the DOE.

The OHA has decided to distribute these funds in accordance with the DOE's Modified Statement of Restitutionary Policy Concerning Crude Oil Overcharges, 51 FR 27899 (August 4, 1986) (the MSRP). Under the MSRP, crude oil overcharge monies are divided among the states, the federal government, and injured purchasers of refined products. Refunds to the states will be distributed in proportion to each state's consumption of petroleum products during the period of price controls. Refunds to eligible purchasers will be based on the number of gallons of petroleum products which they purchased and the extent to which they can demonstrate injury.

Applications for refund must be filed by October 31, 1989, and should be sent to the address set forth at the beginning of this notice. The information which claimants should include in their applications is explained in the Decision, which immediately follows. Any claimant that has already filed a crude oil refund application need not file again.

Dated: April 19, 1989.

George B. Breznay,

Director, Office of Hearings and Appeals.

April 19, 1989.

DECISION AND ORDER

Implementation of Special Refund Procedures

Names of Firms:
Hood Goldsberry
Meeker and Company
Calumet Industries, Inc.
Christmann and Welborn

Dates of Filing:
September 19, 1988
October 25, 1988
October 31, 1988
January 18, 1989

Case Numbers:
KEF-0118
KEF-0121
KEF-0122
KEF-0123

Under the procedural regulations of the Department of Energy (DOE), the Economic Regulatory Administration (ERA) may request that the Office of Hearings and Appeals (OHA) formulate and implement special refund procedures. 10 CFR 205.281. These procedures are used to refund monies to those injured by actual or alleged violations of the DOE price regulations.

The ERA has filed four Petitions for the Implementation of Special Refund Procedures for crude oil overcharge funds obtained from Hood Goldsberry d/b/a Goldsberry Operating Company, Inc. (Goldsberry), Meeker and Company (Meeker), Calumet Industries, Inc. (Calumet) and Christmann and Welborn (Christmann). These four firms remitted a total of $8.5 million to the DOE.[1] An additional $1.8 million in interest has accrued on that amount as of March 31, 1989. This Decision and Order establishes procedures for distributing these funds.

The general guidelines which the OHA may use to formulate and implement a plan to distribute refunds are set forth in 10 CFR Part 205, Subpart V. The Subpart V process may

---

[1] Goldsberry remitted $433,562.61 to the DOE pursuant to Consent Order 641C00428. Meeker paid $305,928.41 in accordance with Consent Order 6A0C00070, and Calumet paid $859,289.68 in accordance with Consent Order N00S90139. Christmann remitted a total of $6,944,288.49 to the DOE pursuant to (1) a July 10, 1985 Judgement of the United States District Court for the Northern District of Texas, Lubbock Division, *Christmann & Welborn v. DOE*, No. CA-5-79-7; and (2) a Settlement Agreement between Christmann and the DOE in that same litigation, DOE Case Number 676C00102.

VOL. 54 ISS 80 AP 27 1989 UMI

be used in situations where the DOE cannot readily identify the persons who may have been injured as a result of actual or alleged violations of the regulations or ascertain the amount of the refund each person should receive. For a more detailed discussion of Subpart V and the authority of the OHA to fashion procedures to distribute refunds, see *Office of Enforcement*, 9 DOE ¶ 82,508 (1981), and *Office of Enforcement*, 8 DOE ¶ 82,597 (1981). We have considered the ERA's requests to implement Subpart V procedures with respect to the monies received from the four firms listed above, and have determined that such procedures are appropriate.

I. Background

On July 28, 1986, the DOE issued a Modified Statement of Restitutionary Policy Concerning Crude Oil Overcharges, 51 Fed. Reg. 27899 (August 4, 1986) ("the MSRP"). The MSRP, issued as a result of a court-approved Settlement Agreement in *In Re: The Department of Energy Stripper Well Exemption Litigation*, M.D.L. No. 378 (D. Kan.), provides that crude oil overcharge funds will be divided among the states, the federal government, and injured purchasers of refined petroleum products. Under the MSRP, up to 20 percent of these crude oil overcharge funds will be reserved initially to satisfy valid claims by injured purchasers of petroleum products. Eighty percent of the funds, and any monies remaining after all valid claims are paid, are to be disbursed equally to the states and federal government for indirect restitution.

Shortly after the issuance of the MSRP, the OHA announced its intention to apply the Modified Policy in all Subpart V proceedings involving alleged crude oil violations. *See* Order Implementing the MSRP, 51 Fed. Reg. 29689 (August 20, 1986). In that Order, the OHA solicited comments concerning the appropriate procedures to follow in processing refund applications in crude oil refund proceedings.

On April 10, 1987, the OHA issued a Notice analyzing the numerous comments it received in response to the August 1986 Order. 52 Fed. Reg. 11737. The Notice set forth generalized procedures and provided guidance to assist claimants that wish to file refund applications for crude oil monies under the Subpart V regulations. In that Notice, the OHA stated that all applicants for crude oil refunds would be required to document their purchase volumes of petroleum products during the period of price controls and prove that they were injured by the alleged overcharges. The Notice indicated that end-users of petroleum products whose businesses are unrelated to the petroleum industry will be presumed to have absorbed the crude oil overcharges, and need not submit any further proof of injury to receive a refund. Finally, the OHA stated that refunds would be calculated on the basis of a per gallon refund amount derived by dividing crude oil violation amounts by the total consumption of petroleum products in the United States during the period of price controls. The numerator would include the crude oil overcharge monies that were in the DOE's escrow account at the tie of the settlement and a portion of the funds in the M.D.L. 378 escrow at the time of the settlement.

These procedures, which the OHA has applied in numerous cases since the April 1987 Notice, *see, e.g., New York Petroleum, Inc.*, 18 DOE ¶ 85,435 (1988); *Shell Oil Co.*, 17 DOE ¶ 85,204 (1988); *Ernest A. Allerkamp*, 17 DOE ¶ 85,079 (1988), have been approved by the United States District Court for the District of Kansas as well as the Temporary Emergency Court of Appeals. Various states had filed a Motion with the Kansas District Court, claiming that the OHA violated the Settlement Agreement by employing presumptions of injury for end-users and by improperly calculating the refund amount to be used in those proceedings. On August 17, 1987, Judge Theis issued an Opinion and Order denying the states' Motion in its entirety. The court concluded that the Settlement Agreement "does not bar OHA from permitting claimants to employ reasonable presumptions in affirmatively demonstrating injury entitling them to a refund." *In Re: The Department of Energy Stripper Well Exemption Litigation*, 671 F. Supp. 1318 at 1323 (D. Kan. 1987). The court also ruled that, as specified in the April 1987 Notice, the OHA could calculate refunds based on a portion of the M.D.L. 378 overcharges. *Id.* at 1323–24. The states appealed the latter ruling, and the Temporary Emergency Court of Appeals affirmed Judge Theis' decision. *In Re: The Department of Energy Stripper Well Exemption Litigation*, 857 F.2d 1461 (Temp. Emer. Ct. App. 1988).

II. The Proposed Decision and Order

On February 16, 1989, the OHA issued a Proposed Decision and Order (PD&O) establishing tentative procedures to distribute the alleged crude oil violation amounts obtained from Goldsberry, Meeker, Calumet and Christmann. The OHA tentatively concluded that the funds in those cases should be distributed in accordance with the MSRP and the April 10, 1987 Notice. Pursuant to the MSRP, the OHA proposed to reserve initially 20 percent of the crude oil violation amounts for direct restitution to applicants who claim that they were injured by the alleged crude oil violations. The remaining 80 percent of the funds would be distributed to the states and the federal government for indirect restitution. After all valid claims are paid, any remaining funds in the claims reserve also would be divided between the states and the federal government. The federal government's share ultimately would be deposited into the general fund of the Treasury of the United States.

In the PD&O, the OHA proposed to require applicants for refund to document their purchase volumes of petroleum products during the period of price controls and to prove that they were injured by crude oil overcharges. The PD&O stated that end-users of petroleum products whose businesses are unrelated to the petroleum industry could use a presumption that they absorbed the crude oil overcharges, and need not submit any further proof of injury to receive a refund. The OHA also proposed to calculate refunds on the basis of a volumetric refund amount, as described in the April 10, 1987 Notice. Comments were solicited regarding the tentative distribution process set forth in the PD&O.

In response to the PD&O, the OHA received comments from Philip P. Kalodner as counsel for six electric utilities, 14 foreign-flag shipping companies, and four pulp and paper manufacturers. Kalodner's clients are all potential recipients of crude oil refunds. In his comments, Kalodner advances once again his contention that the 20 percent reserve for claimants will be insufficient to satisfy all of the legitimate claims that have been or will be filed in these proceedings. Kalodner maintains that the OHA should not distribute any of the crude oil violation amounts covered by this Decision to the states and federal government. Instead, Kalodner asks the OHA to retain all of the funds for claimants in order to rectify the alleged deficiency.

The OHA has addressed various incarnations of Kalodner's comments on numerous previous occasions, and has rejected them at each juncture. As we have prepeatedly indicated, the Stripper Well Settlement Agreement permits the OHA to reserve no more than 20 percent of alleged crude oil violation amounts for direct refunds to injured claimants. *See, e.g., Wickett Refining Co.*, 18 DOE ¶ 85,659 at 88,079–80 (1989); *New York Petroleum*, 18 DOE at 88,701; *A. Tarricone, Inc.*, 15 DOE ¶ 85,495 at 88,893 (1987). Moreover, we have noted that "there is absolutely no evidence to support Kalodner's assertion that the 20 percent reserve will be insufficient to pay claimants." *Amorient Petroleum Co.*, 16 DOE ¶ 85,595 at 88,977 (1988). In the current permutation of his comments, Kalodner has presented no new facts or arguments to justify a reconsideration of those issues in this determination. Accordingly, we will adopt the refund procedures as proposed.

III. The Refund Procedures

A. Refund Claims

After considering the comments received, we have concluded that the $8.5 million in alleged crude oil violation amounts covered by this Decision, plus the $1.8 million in interest which has accrued on that amount as of March 31, 1989, should be distributed in accordance with the crude oil refund procedures previously discussed. As noted above, we will reserve initially the full 20 percent of the alleged crude oil violation amounts, or $2.06 million including interest, for direct refunds to claimants. The amount of the reserve may be adjusted downward later if circumstances warrant such action.

The process which the OHA will use to evaluate claims based on alleged crude oil violations will be modeled after the process the OHA has used in Subpart V proceedings to evaluate claims based upon alleged overcharges involving refined products. *MAPCO, Inc.*, DOE ¶ 85,097 (1986); *Mountain Fuel Supply Co.*, 14 DOE ¶ 85,475 (1986). As in non-crude oil cases, applicants will be required to document their purchase volumes and to prove that they were injured as a result of the alleged violations. Following Subpart V precedent, reasonable estimates of purchase volumes may be submitted. *Greater Richmond Transit Co.*, 15 DOE ¶ 85,028 at 88,050 (1986). Generally, it is not necessary for applicants to identify their suppliers of petroleum products in order to receive a refund.

Applicants who were end-users or ultimate consumers of petroleum products, whose businesses are unrelated to the petroleum industry, and who were not subject to the DOE price regulations are presumed to have been injured by any alleged crude oil overcharges. In order to receive a refund, end-users need not submit any further evidence of injury beyond volumes of product purchased during the period of price controls. *See Tarricone*, 15 DOE at 88,893–96. The end-user presumption of injury is rebuttable, however, *Berry Holding Co.*, 16 DOE ¶ 85,405 at 88,797 (1987). If an interested party submits evidence which is of sufficient weight to cast serious doubt on the end-user presumption, the applicant will be required to produce further evidence of injury. *See New York Petroleum*, 18 DOE at 88,701–03.

Reseller and retailer claimants must submit detailed evidence of injury, and may not rely on the presumptions of injury utilized in refund cases involving refined petroleum products. They can, however, use econometric evidence of the type employed in the OHA Report to the district court in the Stripper Well Litigation, 6 Fed. Energy Guidelines ¶ 90,507 (June 19, 1985). Applicants who executed and submitted a valid waiver pursuant to one of the escrows established in the Stripper Well Agreement have waived their rights to apply for crude oil refunds under Subpart V. *Boise Cascade Corp.*, 16 DOE ¶ 85,214 at 88,411. *reconsideration denied*, 16 DOE ¶ 85,495, *aff'd sub nom. In Re: The Department of Energy Stripper Well Exemption Litigation*, 3 Fed. Energy Guidelines ¶ 26,613 (D. Kan. 1987).

Refunds to eligible claimants who purchased refined petroleum products will be calculated on the basis of a volumetric refund amount derived by dividing the alleged crude oil violation amounts involved in this determination ($8.5 million) by the total consumption of petroleum products in the United States during the period of price controls (2,020,997,335,000 gallons). *Mountain Fuel*, 14 DOE at 88,868 n.4. This yields a volumetric refund amount of $0.000004227 per gallon.[2]

Refund applications submitted pursuant to this Decision must be postmarked no later than October 31, 1989, the deadline established in *World Oil Co.*, 17 DOE ¶ 85,568 (1988). As we stated in previous Decisions, a crude oil refund applicant will be required to submit only one application for crude oil overcharge funds. *See Allerkamp*, 17 DOE at 88,176. Any party that has previously submitted a refund application in crude oil refund proceedings need not file another application; that application will be deemed to be filed in all crude oil proceedings finalized to date.

To apply for a crude oil refund, a claimant should submit an application for refund. That application should contain all of the following information:

(1) Identifying information including the applicant's name, address, and social security number or employer identification number, an indication whether the applicant is a corporation, the name and telephone number of a person to contact for any additional information, and the name and address of the person who should receive the refund check;

(2) A short description of the applicant's business and how it used petroleum products. If the applicant did business under more than one name, or a different name during the period of price controls, the applicant should list these names;

(3) If the applicant's firm is owned by another company, or owns other companies, a list of those other companies' names and their relationships to the applicant's firm;

(4) A statement identifying the petroleum products which the applicant purchased during the period August 19, 1973 through January 27, 1981, the number of gallons of each product purchased, and the total number of gallons for all products purchased on which the applicant bases its claim;

(5) An explanation of how the applicant obtained the volume figures above, and an explanation of its method of estimation if the applicant used estimates to determine its purchase volumes;

(6) A statement that neither the applicant, its parent firm, affiliates, subsidiaries, successors nor assigns has waived any right it may have to receive a refund in these cases (i.e. by having executed and submitted a valid waiver pursuant to any one of the escrow accounts established pursuant to the Stripper Well Agreement);

(7) If the applicant is not an end-user whose business is unrelated to the petroleum industry, a showing that the applicant was injured by the alleged overcharges (i.e. that the applicant did not pass through the overcharges to its own customers); and

(8) If the applicant is a regulated utility, a certification that it will notify the state utility commission of any refunds received, and that it will pass on the entirety of its refunds to its customers.

All applications should be typed or printed and clearly labelled "Application for Crude Oil Refund." Each applicant must submit an original and one copy of the application, which should be mailed to the following address:

Subpart V Crude Oil Overcharge Refunds, Office of Hearings and Appeals, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

Although an applicant need not use any special application form to apply for a crude oil refund, a suggested form has been prepared by the OHA and may be obtained by sending a written request to the address listed above.

[2] Based on the crude oil violations monies previously received by the DOE, the OHA recently announced that it was increasing the refund rate at which meritorious applicants in these proceedings are paid to $0.0008 per gallon. *Crude Oil Supplemental Refund Distribution*, 18 DOE ¶ 2, No. RA272–2 (April 11, 1989). This refund rate will be increased, when administratively expedient, to reflect any additional crude oil violation amounts received by the DOE. The total volumetric refund amount approved to date is $0.0009835287.

B. Payments to the States and Federal Government

Under the terms of the MSRP, the remaining 80 percent of the $8.5 million in principal, plus $1.8 million in interest, in alleged crude oil violation amounts subject to this Decision, or $8.24 million, should be disbursed in equal shares to the states and federal government for indirect restitution. Accordingly, we will direct the DOE's Office of the Controller to segregate $8.24 million and transfer one-half of that amount, or $4.12 million, into an interest-bearing subaccount for the states, and one-half into an interest-bearing subaccount for the federal government. In accordance with previous practice, when the amount available for distribution to the States reaches $10 million, we will issue a Decision and Order directing the DOE's Office of the Controller to make the appropriate disbursements to the individual states from their respective subaccount. This future Order is necessary to improve our ability to track the various disbursements to the states. Refunds to the states will be in proportion to the consumption of petroleum products in each state during the period of price controls. The share or ratio of the funds which each state will receive is contained in Exhibit H of the Stripper Well Agreement. When disbursed, these funds will be subject to the same limitations and reporting requirements as all other crude oil monies received by the states under the Stripper Well Agreement.

It Is Therefore Ordered That:

(1) Applications for Refund from the alleged crude oil overcharge funds remitted by Hood Goldsberry d/b/a Goldsberry Operating Company, Inc., Meeker and Company, Calumet Industries, Inc. and Christmann and Welborn may now be filed.

(2) All applications submitted pursuant to paragraph (1) above must be filed no later than October 31, 1989.

(3) The Director of Special Accounts and Payroll, Office of Departmental Accounting and Financial Systems Development, Office of the Controller, Department of Energy, shall take all steps necessary to transfer, pursuant to Paragraphs (4), (5) and (6) below, all of the funds from the following subaccounts:

Hood Goldsberry, Account No. 641C00428Z
Meeker and Company, Account No. 6A0C00070Z
Calumet Industries, Inc., Account No. N00S90139Z
Christmann and Welborn, Account No. 67C00102Z

(4) The Director of Special Accounts and Payroll shall transfer $4,124,142.39 of the funds obtained pursuant to paragraph (3) above, plus interest which accrues on that amount from March 31, 1989 to the date of the transfer, into the subaccount denominated "Crude Tracking-States," Number 999DOE003W.

(5) The Director of Special Accounts and Payroll shall transfer the same amount of funds as that indicated in paragraph (4) above into the subaccount denominated "Crude Tracking-Federal," Number 999DOE002W.

(6) The Director of Special Accounts and Payroll shall transfer $2,062,071.20 of the

VOL 54 ISS 80 AP 27 1989 UMI

funds obtained pursuant to paragraph (3) above, plus interest which accrues on that amount from March 31, 1989 to the date of transfer, into the subaccount denominated "Crude Tracking-Claimants 2," Number 999DOE006Z.

Dated: April 19, 1989.

George B. Breznay,

Director, Office of Hearings and Appeals.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 3562-7]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202 382-2740).

DATE: Comments must be submitted on or before May 30, 1989.

SUPPLEMENTARY INFORMATION:

Office of Water

Title: National User Charge Rate Survey (EPA ICR #1499). This is a new collection.

Abstract: Municipalities with wastewater treatment facilities that have received Construction Grant Program support will be asked to complete a short questionnaire to assess the adequacy of user fees to meet costs and ensure permit compliance and the burden these fees impose on residential users. Response is voluntary.

Burden Statement: The estimated public reporting burden for this collection of information is 1 hour and 20 minutes per respondent, per year. This estimate includes the time for completing the questionnaire.

Respondents: Municipalities.

Estimated No. of Respondents: 600.

Estimated Total Annual Burden on Respondents: 800 hours.

Frequency of Collection: One-time only.

Send comments regarding the burden estimate, or any other aspect of these information collections, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM-223), 401 M Street SW., Washington, DC 20460

and

Tim Hunt, Office of Management and Budget, Office of Information and Regulatory Affairs, 726 Jackson Place, NW., Washington, DC 20530.

OMB Responses to Agency PRA Clearance Requests

EPA ICR #1489; Monitoring and Recordkeeping Requirements Under the Sewage Sludge Technical Regulations; was disapproved 3/31/89.

Date: April 21, 1989.

Office of Pesticides and Toxic Substances

Title: Recordkeeping and Reporting Requirements for Pesticide Dealers and Commercial Applicators in Nebraska and Colorado (EPA ICR # 0154.03); OMB # 2070-0025. This is an extension of a currently approved collection.

Abstract: Under this ICR, EPA requires restricted-use pesticide applicators and dealers in Nebraska and Colorado to maintain records on pesticide use and disposition. In addition, dealers must report their identity to the Agency within sixty days of entering into business. The records help EPA ensure that only trained and certified persons handle restricted-use pesticides.

Burden Statement: The public reporting burden for this collection is estimated to average 1 and a half hours per response. This estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Respondents: Applicator/Dealers of Restricted-Use Pesticides.

Estimated No. of Respondents: 4,000.

Estimated Total Annual Burden on Respondents: 6,400 hours.

Send comments regarding the burden estimate, or any other aspect of these information collections, including suggestions for reducing the burden to both of the following addresses:

Science Advisory Board, Environmental Health Committee, Halogenated Organics Subcommittee; Open Meeting

Under Pub. L. 92-463, notice is hereby given that a two-day meeting of the Halogenated Organics Subcommittee, of the Environmental Health Committee, of the Science Advisory Board will be held on May 17th-18th, 1989, at the Howard Johnson's Crystal City Hotel, 2650 Jefferson Davis Highway, Arlington, Virginia. The meeting will be held from 9:00 a.m. to 5:00 p.m. on May 17th and from 9:00 a.m. to 12:00 p.m. on May 18th.

The purpose of this meeting is to review criteria documents for Hexachlorocychlopentadiene and 1,1,2-Trichloroethane.

The meeting will be open to the public. Any member of the public wishing to make a presentation at the meeting should forward a written statement to Dr. C. Richard Cothern, Executive Secretary, Science Advisory Board (A-101F), U.S. Environmental Protection Agency, Washington, DC 20460, or contact him on (202) 382-2552 by May 4, 1989. The Science Advisory Board expects that the public statements presented at its meetings will not be repetitive of previously submitted written statements. In general, each individual or group making an oral presentation will be limited to a total time of ten minutes.

Dated: April 20, 1989.

Donald G. Barnes,

Director, Science Advisory Board.

Receipt of Notification of Intent To Conduct Small-Scale Field Testing; Genetically Engineered Microbial Pesticide; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This document corrects a notice published in the Federal Register of February 22, 1989.

FOR FURTHER INFORMATION CONTACT: By mail: Phillip Hutton, Product Manager (PM) 17, Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 207, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-2690).

SUPPLEMENTARY INFORMATION: In the Federal Register of February 22, 1989 (54 FR 7594), EPA issued a receipt of notification of intent to conduct small-scale field testing of a genetically engineered microbial pesticide. This document corrects a sentence in the preamble that was incorrectly stated. On page 7594, column two, the third sentence of the "**SUPPLEMENTARY INFORMATION**" is corrected to read as follows: "A grant proposal supporting this research has been submitted to the EPA Office of Research and Development Terrestrial Biotechnology and Microbial Ecology Program; approval is pending."

Dated: April 21, 1989.

Anne E. Lindsay,

Director, Registration Division, Office of Pesticides Programs.

BILLING CODE 6560-50-M

[OPP-30296; FRL-3563-1]

Ecogen, Inc.; Applications To Register Pesticide Products

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces receipt of applications to register pesticide products containing active ingredients not included in any previously registered products pursuant to the provisions of section 3(c)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

DATE: Comment by May 30, 1989.

ADDRESS: By mail submit comments identified by the document control number [OPP-30296] and the registration/file numbers to: Phil Hutton, Product Manager (PM 17), Public Docket and Freedom of Information Section, Field Operations Programs (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, bring comments to: Environmental Protection Agency, Rm. 246, CM#2, Attn: PM 17, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for public inspection in Rm. 246 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: Phil Hutton, PM 17, Rm. 207, CM#2, (703-557-2690).

SUPPLEMENTARY INFORMATION: EPA received applications as follows to register pesticide products containing active ingredients not included in any previously registered products pursuant to the provisions of section 3(c)(4) of FIFRA. Notice of receipt of these applications does not imply a decision by the Agency on the applications.

I. Products Containing Active Ingredients Not Included in Any Previously Registered Product

1. *File Symbol:* 55638-I. *Applicant:* Ecogen, Inc., 2005 Cabot Blvd West, Langhorne, PA 19047-1610. *Product name:* Cutlass ™ WP. Insecticide. *Active ingredient: Bacillus thuringiensis* var. *kurstaki* strain 2371 protein toxic 10.0% *Proposed classification/Use:* General. For the control of lepidopteran pests on a variety of crops. (PM 17)

2. *File Symbol:* 55638-O. *Applicant:* Ecogen, Inc. *Product name:* Cutlass ™ OF. Insecticide. *Active ingredient: Bacillus thuringiensis* var. *kurstaki* strain 2371 protein toxic 7.5%. *Proposed classification/Use:* General. For the control of lepidopteran pests on a variety of crops. (PM 17)

3. *File Symbol:* 55638-RN. *Applicant:* Ecogen, Inc. *Product name:* Foil ™ OF. Insecticide. *Active ingredient: Bacillus thuringiensis* var. *kurstaki* strain EG2424 protein toxin 7.5%. *Proposed classification/Use:* General. For use against coleopteran and lepidopteran insects on potatoes. (PM 17)

4. *File Symbol:* 55638-T. *Applicant:* Ecogen, Inc. *Product name:* Condor ™ OF. Insecticide. *Active ingredient: Bacillus thuringiensis* var. *kurstaki* protein toxin 7.5%. *Proposed classification/Use:* General. To control the Gypsy moth and Spruce budworm on forests, shade trees, and shrubs. (PM 17)

Notice of approval or denial of an application to register a pesticide product will be announced in the Federal Register. The procedure for requesting data will be given in the Federal Register if an application is approved.

Comments received within the specified time period will be considered before a final decision is made; comments received after the time specified will be considered only to the extent possible without delaying processing of the application.

Written comments filed pursuant to this notice, will be available in the Program Management and Support Division (PMSD) office at the address provided from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays. It is suggested that persons interested in reviewing the application file, telephone the PMSD office (703-557-3262), to ensure that the file is available on the date of intended visit.

Authority: 7 U.S.C. 136.

Dated: April 21, 1989.

Anne L. Lindsay,

Director, Registration Division, Office of Pesticide Programs.

VOL 54 ISS 80 AP 27 1989 UMI

[OPTS-68208A; FRL-3662-4]

Certain Chemicals; Approval of a Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of an application for test marketing exemption (TME) under section 5(h)(1) of the Toxic Substances Control Act (TSCA) and 40 CFR 720.38. EPA has designated this application as TME-89-7. The test marketing conditions are described below.

EFFECTIVE DATE: April 18, 1989.

FOR FURTHER INFORMATION CONTACT: Heidi A. Siegelbaum, Premanufacture Notice Management Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Room E-613, 401 M Street SW., Washington, DC 20460, (202) 475-8262.

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use, and disposal of the substances for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present any unreasonable risk of injury.

EPA hereby approves TME-89-7. EPA has determined that test marketing of the new chemical substance described below, under the conditions set out in the TME application, and for the time period and restrictions specified below, will not present any unreasonable risk of injury to health or the environment. Production volume, use, and the number of customers must not exceed that specified in the application. All other conditions and restrictions described in the application and in this notice must be met.

The following additional restrictions apply to TME-89-7:

A bill of lading accompanying each shipment must state that the use of the substance is restricted to that approved in the TME. In addition, the applicant shall maintain the following records until 5 years after the date they are created, and shall make them available for inspection or copying in accordance with section 11 of TSCA:

1. Records of the quantity of the TME substance produced and the date of manufacture.

2. Records of dates of the shipments to each customer and the quantities supplied in each shipment.

3. Copies of the bill of lading that accompanies each shipment of the TME substance.

TME-89-7

Date of Receipt: January 19, 1989.

Notice of Receipt: February 15, 1989 (54 FR 6958).

Applicant: Synthetic Products Company.

Chemical: Melamine amyl phosphate.

Use: Flame retardant.

Production Volume: 1,000 kg.

Number of Customers: 10.

Test Marketing Period: 180 days, commencing on first day of manufacture.

Risk Assessment: A determination could not be made by EPA concerning any adverse human health effects which would arise in conjunction with use of the TME substance. In addition, EPA does not believe there will be any significant human exposure to the TME substance because it will be manufactured and processed in a closed system, and individuals who come into contact with the TME substance will be required to use protective equipment to mitigate any associated risk. EPA identified no significant environmental concerns for the test market substance. Based on the foregoing, the test market substance will not present any unreasonable risk of injury to health or the environment.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information come to its attention which casts significant doubt on its finding that the test marketing activities will not present any unreasonable risk of injury to health or the environment.

Dated: April 18, 1989.

John W. Melone,

Director, Chemical Control Divison, Office of Toxic Substances.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Board of Visitors for the Emergency Management Institute; Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following committee meeting:

Name: Board of Visitors (BOV) for the Emergency Management Institute (EMI).

Dates of Meeting: May 1-4, 1989.

Place: Federal Emergency Management Agency, National Emergency Training Center, Emergency Management Institute, Conference Room, Building N, Emmitsburg, Maryland 21727.

Time: May 1—7:00 p.m. to 9:00 p.m.; May 2—2:00 p.m. to 4:00 p.m.; May 3—7:00 p.m. to 9:00 p.m.; May 4—8:30 a.m. to 12:00 noon.

Proposed Agenda: Participation in the Region/State T&E Program Managers Conference being held at EMI May 2-5 which will provide the BOV with an opportunity to interact with, and obtain input from, Region and State training staff. BOV meeting sessions will be held in addition to their above stated participation which will include status reports from the BOV task forces on Core Curriculum and Evaluation System Procedures, Response to BOV 1988 Annual Report, and Working Sessions.

The meeting will be open to the public with approximately ten seats available on a first-come, first serve basis. Members of the general public who plan to attend the meeting should contact the Office of the Superintendent, Emergency Management Institute, Office of Training, 16825 South Seton Avenue, Emmitsburg, Maryland 21727 (telephone number, 301-447-1251) on or before April 26, 1989. Minutes of the meeting will be prepared by the Board and will be available for public viewing in the Director's Office, Office of Training, Federal Emergency Management Agency, Building N, National Emergency Training Center, Emmitsburg, Maryland 21727. Copies of the minutes will be available upon request 30 days after the meeting.

Dated: April 14, 1989.

Dave McLoughlin,

Director, Office of Training.

FEDERAL RESERVE SYSTEM

Barclays PLC et al.; Applications To Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughtout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competiton, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 10, 1989.

A. Federal Reserve Bank of New York (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Barclays PLC*, London, England, Barclays Bank PLC, London, England, and Barclays USA Inc., New York, New York; to engage *de novo* through their subsidiary, Barclays De Zoete Wedd Government Securities, Inc. in securities brokerage activities pursuant to § 225.25(b)(15) of the Board's Regulation Y.

B. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198.

1. *Chickasha Bancshares, Inc.*, Chickasha, Oklahoma; to engage *de novo* in credit insurance activities pursuant to § 225.25(b)(8)(i) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, April 21, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Fifth Third Bancorp et al.; Formation of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing

VOL 54 ISS 80 AP 27 1989 UMI

must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than May 17, 1989.

A. Federal Reserve Bank of Cleveland (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *Fifth Third Bancorp*, Cincinnati, Ohio; to merge with C.S. Bancshares, Inc., Connersville, Indiana, and thereby indirectly acquire Central State Bank, Connersville, Indiana.

B. Federal Reserve Bank of Richmond (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *Romney Bankshares, Inc.*, Romney, West Virginia; to become a bank holding company by acquiring 100 percent of the voting shares of The Bank of Romney, Romney, West Virginia.

C. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Easton Bancshares, Inc.*, Easton, Illinois; to become a bank holding company by acquiring 80 percent of the voting shares of Community Bank of Easton, Easton, Illinois.

D. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Orono Financial Inc.*, Navarre, Minnesota; to acquire 100 percent of the voting shares of Wayzata Bank of the Lakes, N.A., Wayzata, Minnesota, a *de novo* bank.

E. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Chalybeate Springs Corporation*, Hughes Springs, Texas; to become a bank holding company by acquiring 80 percent of the voting shares of The 1st National Bank of Hughes Springs, Texas.

2. *Harvey Bancorporation, Inc.*, Dallas, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of Preston Forum National Bank of Dallas, Dallas, Texas.

F. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *Moore Financial Group Incorporated*, Boise, Idaho; to acquire 100 percent of the voting shares of First Security Bancorp, Tacoma, Washington, and thereby indirectly acquire First Security Bank, Tacoma, Washington.

Board of Governors of the Federal Reserve System, April 21, 1989.

BILLING CODE 6210-01-M

National Westminster Bank PLC et al.; Formations of, Acquisitions by, and Mergers of Bank Holding Companies, and Acquisitions of Nonbanking Companies

The companies listed in this notice have applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed companies have also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The applications are available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 12, 1989.

A. Federal Reserve Bank of New York (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. *National Westminster Bank PLC*, London, England; NatWest Holdings, Inc., Wilmington, Delaware; National Westminster Bancorp, New York, New York; and National Westminster Bancorp NJ, Jersey City, New Jersey; to merge with Ultra Bancorporation, Bridgewater Township, New Jersey, and thereby indirectly acquire First National Bank of Central Jersey, Bridgewater Township, New Jersey.

In connection with this application, Applicants also propose to acquire one-third of the interest of Bancorps' International Trading Corporation, Bridgewater Township, New Jersey, and thereby engage in export trading company activities pursuant to § 211.34 of the Board's Regulation K.

B. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Stearns Financial Services, Inc.*, Albany, Minnesota; to become a bank holding company by acquiring 80 percent of the voting shares of Stearns Agency, Inc., Albany, Minnesota, and thereby indirectly acquire 86.87 percent of Stearns County National Bank of Albany, Albany, Minnesota; 100 percent of the voting shares of Financial Services of Evansville, Inc., Evansville, Minnesota, and thereby indirectly acquire 94.67 percent of Farmers State Bank of Evansville, Evansville, Minnesota; 84.13 percent of Security State Bank of Holdingford, Holdingford, Minnesota; and 94.56 percent of Farmers State Bank of Upsala, Upsala, Minnesota.

In connection with this application, Applicant also proposes to engage through these companies in general insurance sales pursuant to § 225.25(b)(8) (iii)(A) and (vi) of the Board's Regulation Y. These activities will be conducted in the communities of Albany, Evansville, and Holdingford, Minnesota.

Board of Governors of the Federal Reserve System, April 21, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Alvin J. Siteman; Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than May 10, 1989.

A. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Alvin J. Siteman*, St. Louis, Missouri, to acquire an additional 5.5 percent of the common voting shares of Mark Twain Bancshares, Inc., St. Louis, Missouri, for a total of 18.0 percent, and an additional 17.9 percent of the preferred voting shares for a total of 32.0 percent.

B. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *John F. Kane*, Bartlesville, Oklahoma; to acquire up to an additional 84.03 percent of the voting shares of CSB Bancorp, Inc., Coffeyville, Kansas, for a total of 84.33 percent, and thereby indirectly acquire Coffeyville State Bank, Coffeyville, Kansas. Comments on this application must be received by May 4, 1989.

2. *J.C. Robinson Seed Co.*, Waterloo, Nebraska; to acquire an additional 11.10 percent, and Edward T. Robinson, Jr., Waterloo, Nebraska, to acquire an additional 11.19 percent of the voting shares of First Kansas Bancorp, Kansas City, Missouri, and thereby indirectly acquire First National Bank and Trust Co., Leavenworth, Kansas.

C. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *David A. Hartman*, El Paso, Texas; to acquire an additional 0.44 percent of the voting shares of Valley Bancorp, Inc., El Paso, Texas, for a total of 11.96 percent and thereby indirectly acquire Montwood National Bank, El Paso, Texas, and The Valley Bank of El Paso, El Paso, Texas.

2. *Lowell M. Irby*, Artesia, New Mexico; to acquire an additional 4.74 percent of the voting shares of Western Bankshares of New Mexico, Inc., Artesia, New Mexico, for a total of 15.05 percent and thereby indirectly acquire Western Bank, Artesia, New Mexico.

Board of Governors of the Federal Reserve System, April 21, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

GENERAL SERVICES ADMINISTRATION

Material Safety Data Sheets

AGENCY: Federal Supply Service, GSA.

ACTION: Requirement for including Material Safety Data Sheets (MSDS) in each shipment.

SUMMARY: The Occupational Safety and Health Administration (OSHA) Hazard Communication Rule 29 CFR 1910.1200 requires that certain information be provided on the Material Safety Data Sheets (MSDS) and that distributors of hazardous material provide their customers with an MSDS for each item. In order to assure that the Federal Supply Service, as a provider of

VOL. 54 ISS 80 AP 27 1989 UMI

hazardous material, complies with that rule. I–FSS–22, Material Safety Data Sheets (MSDS) is being revised to: (1) Require the contractor to include one copy of the MSDS for each unit of issue in the shipment in or on the shipping container and, (2) to provide a contact point for Material Safety Data Sheets. The following clause will be included in all new solicitations. In addition, solicitations issued but not yet awarded will be amended, and existing contracts will be modified to incorporate the following clause:

I–FSS–22, Material Safety Data Sheets (MSDS)

(a) The contractor must prepare an MSDS for each hazardous item as prescribed in Federal Standard No. 313, the edition in effect on the date of solicitation, or for which an MSDS is required by the contract. The contractor must ensure that the contract number, part number/trade name, National Stock Number (NSN), or Local Stock Number (LSN)/Temporary Stock Number (TSN)/Activity Control Number (ACN), and complete specification reference including Type, Grade, and Class are included on the MSDS. This MSDS shall be distributed as specified in Federal Standard No. 313.

(b) For each shipment containing items which are classified as hazardous under the OSHA Hazard Communication Rules—29 CFR 1910.1200, and which are shipped to GSA Distribution Facilities and/or to GSA Customer Supply Centers, the contractor must provide, either in or on each shipping container, one copy of the MSDS for each unit of issue in that shipping container. When affixed to the outside of a shipping container, the MSDS must be placed in a weather resistant envelope.

(c) For items which are classified as hazardous under the Hazard Communication Rule—29 CFR 1910.1200 and which are shipped direct to another Government agency, the contractor must provide one copy of the MSDS in or on each shipping container. When affixed to the outside of a shipping container, the MSDS must be placed in a weather resistant envelope.

(d) For paragraphs B and C above, the contractor may use the MSDS prepared in accordance with Federal Standard No. 313 in paragraph A above, or a copy of the contractor's MSDS prepared in accordance with the Hazard Communication Rule—29 CFR 1910.1200 with the National Stock Number and GSA Contract Number clearly and legibly marked on the MSDS.

(e) For the purpose of this clause, a shipping container is defined as any container or package upon which paragraph 85.2.2.3 of Federal Standard No. 123 requires the name and address of the consignee to be marked.

(f) Offerors are required to designate a person to be their MSDS contact point.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Advisory Council; Meeting

Alcohol, Drug Abuse, and Mental Health Administration

Agency: Alcohol, Drug Abuse, and Mental Health Administration.

Action: Notice of meeting.

Summary: This notice sets forth the schedule and proposed agenda of the forthcoming meeting of a national advisory council in the month of May 1989. The council will be performing review of applications for Federal assistance. Therefore, portions of the meeting will be closed to the public as determined by the Administrator, ADAMHA, in accordance with 5 U.S.C. 552(b) (6) and 5 U.S.C. app. 2 10(d). Notice of this meeting is required under the Federal Advisory Committee Act, Pub. L. 92–463.

Committee Name: National Advisory Council on Alcohol Abuse and Alcoholism.

Date and Time: May 25–26: 10:15 a.m.

Place: National Institutes of Health, Building #1, 3rd Floor, Wilson Hall, 9000 Rockville Pike, Bethesda, MD 20892.

Status of Meeting:

Open—May 25: 10:15 a.m.–5:00 p.m.
May 26: 9:00–9:45 a.m.
Closed—Otherwise

Contact: James Vaughan, Room 16C–20, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857, (301) 443–4375.

Purpose: The Council advises the Secretary, Department of Health and Human Services regarding policy direction and program issues of national significance in the area of alcohol abuse and alcoholism. Reviews all grant applications submitted, evaluates these applications in terms of scientific merit and adherence to Department policies, and makes recommendations to the Secretary with respect to approval and amount of award.

* * * * *

Substantive program information may be obtained from the contact person listed above. The NIAAA Committee Management Officer will furnish upon request summaries of the meeting and a roster of Committee members. Contact Ms. Diana Widner, Committee Management Officer, NIAAA, Room 16C–20, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857.

Date: April 21, 1989.

Peggy W. Cockrill,
Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

Food and Drug Administration

Availability of Grants for Clinical Studies of Safety and Effectiveness of Orphan Products; Amendment of Request for Applications

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is amending the notice that announced the anticipated availability of funds for fiscal year 1989 for awarding grants to support clinical trials of safety and effectiveness of orphan products (November 7, 1988; 53 FR 44951). The notice is being amended to notify applicants that the awards will be made as either grants or cooperative agreements and to allow additional time for submission of applications.

FOR FURTHER INFORMATION CONTACT: Carol A. Wetmore, Office of Orphan Products Development (HF–35), Food and Drug Administration, 5600 Fishers Lane, Rm. 15–61, Rockville, MD 20857, 301–443–4903.

SUPPLEMENTARY INFORMATION: FDA is amending FR Doc. 88–25663, appearing on page 44951 in the Federal Register of Monday, November 7, 1988, as follows:

1. On page 44951, in the first column, under "Summary" and continuing into the second column, the first sentence is revised to read, "The Food and Drug Administration (FDA) is announcing the availability of funds for fiscal year 1989 for awarding grants and cooperative agreements to support clinical trials on the safety and effectiveness of orphan products. * * *"

2. On page 44951, in the second column, under "Dates," the first sentence is removed, and the second sentence is revised to read, "Applications must be received by May 15, 1989. * * *"

3. On page 44953, in the first column, under "V. Mechanism of Support A. *Award Instrument*", the first sentence is revised to read, "Support will be in the form of grant or cooperative agreement awards, which will be subject to all policies and requirements that govern the research grant programs of the Public Health Service, including the provisions of 42 CFR Part 52 and 45 CFR Parts 74 and 92. * * *"

4. On page 44954, in the first column, after the paragraph under the heading "C. *Legend*", the following new section is added:

IX. Delineation of Substantive Involvement

Inherent in the cooperative agreement award is substantive involvement by the awarding agency. Accordingly, FDA will have a substantive involvement in the programmatic activities of all projects funded as cooperative agreements udner this request for application. FDA's involvement may be modified to fit the unique characteristics of each application. The agency's substantive involvement will include, but is not limited to, the following:

1. FDA will appoint a project officer, who will actively monitor the FDA-supported program under each award and assist the principal investigator in communicating with the appropriate FDA reviewing division.

2. In some cases, FDA scientists will collaborate with grantees in determining the methodological approaches to be used in order for the study to comply with requirements for investigations and marketing approval under the act and the Public Health Service Act. As a condition of FDA's funding, FDA may require that changes be made in the study protocol.

Dated: April 20, 1989

John M. Taylor,
Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160–01–M

[Docket No. 82N–0058; DESI 11300]

Withdrawal of Approval of Chlorzoxazone in Combination With Acetaminophen; Announcement of Marketing Conditions for Chlorzoxazone 500 Milligrams

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing approval of portions of the new drug application (NDA) that provides for Parafon Forte Tablets containing chlorzoxazone and acetaminophen because the combination product lacks substantial evidence of effectiveness. FDA also announces the conditions for marketing the reformulated product, containing chlorzoxazone 500 milligrams (mg) and no other active ingredient, which has been found to be effective.

EFFECTIVE DATE: May 30, 1989.

ADDRESS: Requests for an opinion of the applicability of this notice to a specific product should be identified with DESI number 11300 and directed to the Division of Drug Labeling Compliance (HFD–310), Center for Drug Evaluation and Research, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

Original abbreviated new drug applications and supplements thereto (identify as such): Division of Generic Drugs (HFD–230), Center for Drug Evaluation and Research, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Herbert Gerstenzang, Center for Drug Evaluation and Research (HFD–366), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–295–8041.

SUPPLEMENTARY INFORMATION:

A. Withdrawal of Old Formulation

As part of the agency's drug efficacy program, in the Federal Register of October 15, 1984 (49 FR 40212, amended December 3, 1984 (49 FR 47336)), the Commission of Food and Drugs granted an evidentiary hearing before an administrative law judge on the proposal to withdraw approval of McNeil Pharmaceutical's new drug application (NDA 11–529) containing chlorzoxazone 250 mg and acetaminophen 300 mg. Notices of participation were filed by the following companies:

1. NcNeil Pharmaceutical, Spring House, PA 19477.

2. Lemmon Co., 850 Cathill Rd., Sellersville, PA 18960.

3. Cord Laboratories, Inc., 2555 West Midway Blvd., Broomfield, CO 80020.

Subsequently, FDA entered into agreements with the three aforementioned companies and with two other firms (Ferndale Laboratories and Barr Laboratories) marketing generic versions of Parafon Forte to terminate the hearing and resolve the issue of the drug's effectiveness by other means. Pursuant to those agreements, the hearing requests were withdrawn and applications for a reformulation of the drugs to chlorzoxazone 500 mg were submitted to the agency. The applications have now been approved.

Accordingly, as all hearing participants have withdrawn their requests for a hearing, FDA is announcing the termination of the administrative hearing and withdrawn approval of portions of NDA 11–539 that provide for Parafon Forte Tablets containing chlorzoxazone and acetaminophen.

Any drug product that is identical, related, or similar to this product and is not the subject of an approved new drug application is covered by NDA 11–529 and is subject to this notice (21 CFR 310.6). Any person who wishes to determine whether a specific product is covered by this notice should write to the Division of Drug Labeling Compliance at the address given above.

The Director of the Center for Drug Evaluation and Research, under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–1053 as amended (21 U.S.C. 355)) and under the authority delegated to him (21 CFR 5.82, finds that, on the basis of new information before him with respect to the product, evaluated together with the evidence available to him when the application was approved, there is a lack of substantial evidence that the product will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in its labeling.

Therefore, pursuant to the foregoing finding, approval of those parts of NDA 11–529 pertaining to the original formulation of Parafon Forte described above and all the amendments and supplements that provide for that product is withdrawn effective May 30, 1989. Shipment in interstate commerce of the product above or any identical, related, or similar product that is not the

VOL
54
ISS
80
AP
27
1989
UMI

subject of an approved new drug application will then be unlawful.

B. Conditions for Approval and Marketing of New Formulation

FDA has reviewed all available evidence and concludes that chlorzoxazone 500 mg tablets is effective for the indication in the labeling conditions below.

This drug product is regarded as a new drug (21 U.S.C. 321(p)). An approved abbreviated new drug application (21 CFR 314.55) is a requirement for marketing the drug product. The conditions of approval are as follows:

1. *Form of drug.* This drug product is in tablet form suitable for oral administration.

2. *Labeling conditions.* (a) The label bears the statement, "Caution: Federal law prohibits dispensing without prescription."

(b) The drug is labeled to comply with all requirements of the act and regulations and the labeling bears adequate information for safe and effective use of the drug. The indication is as follows:

As an adjunct to rest, physical therapy, and other measures for the relief of discomfort associated with acute, painful musculoskeletal conditions. The mode of action of this drug has not been clearly identified, but may be related to its sedative properties. Chlorzoxazone does not directly relax tense skeletal muscles in man.

3. *Dissolution test.* The product shall conform to a dissolution test that demonstrates that not less then 75 percent of the drug is dissolved in sixty (60) minutes, employing a medium of 1,000 milliliters (mL) pH 8 Phosphate Buffer at 37 °C and USP apparatus 2 (Paddle) at 75 RPM.

Marketing the drug product before approval of a new drug application will subject those products, and those persons who caused the products to be marketed, to regulatory action.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050–1053 as amended (21 U.S.C. 352, 355)) and under the authority delegated to the Director of the Center for Drug Evaluation and Research (21 CFR 5.70).

Dated: April 17, 1989.

Carl C. Peck,

Director, Center for Drug Evaluatioin and Research.

[FR Doc. 89-10082 Filed 4-26-89; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 86E-0278]

Determination of Regulatory Review Period for Purposes of Patent Extension; Marinol®

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has determined the regulatory review period for Marinol® (dronabinol) and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Commissioner of Patents and Trademarks, Department of Commerce, for the extension of a patent which claims that human drug product.

ADDRESS: Written comments and petitions should be directed to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Nancy E. Pirt, Office of Health Affairs (HFY–20), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–1382.

SUPPLEMENTARY INFORMATION: The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100–670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: a testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human drug product and continues until FDA grants permission to market the drug product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Commissioner of Patents and Trademarks may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA has approved for marketing the human drug product Marinol®. Marinol® is indicated for the treatment of the nausea and vomiting associated with cancer chemotherapy in patients who have failed to respond adequately to conventional antiemetic treatments. However, as of the date of the new drug application (NDA) approval letter, Marinol® was classified as a Schedule I drug by the Drug Enforcement Agency (DEA), a classification which prohibits commercial marketing. FDA's approval letter, therefore, indicated that the drug could not be marketed until it had been rescheduled by DEA. DEA later rescheduled Marinol® as a Schedule II drug, which allowed Marinol® to be marketed. Subsequent to this rescheduling, the Patent and Trademark Office (PTO) received a patent term restoration application for Marinol® (U.S. Patent No. 3,668,224) from Theodor Petrzilka, and PTO requested FDA's assistance in determining the eligibility of this patent for patent term restoration. FDA, in a letter dated August 22, 1988, advised the Patent and Trademark Office that this human drug product had undergone a regulatory review period. The PTO issued a decision denying the application on the ground that the application was not timely. The applicant filed an action in the United States District Court for the District of Columbia challenging the PTO's decision. The District Court ruled that the application had been timely filed. Shortly thereafter, the PTO requested that FDA determine the product's regulatory review period. This is the first permitted commercial marketing or use of the active ingredient, dronabinol.

FDA Has determined that the applicable regulatory review period for Marinol® is 2,417 days. Of this time, 980 days occurred during the testing phase of the regulatory review period, while 1,437 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act became effective:* October 20, 1978. The applicant claims October 20, 1973, as the date of first exemption granted under 21 U.S.C. 355(i) with respect to the subject product. However, a search of FDA records failed to uncover an investigational new drug (IND) application submitted by the applicant prior to the NDA receipt date. Since the IND number was not included in the application, FDA telephoned the applicant regarding this matter and the applicant advised FDA that the supporting IND was IND No. 14,754. FDA records indicate that IND No. 14,754 was submitted by the National Cancer Institute on September 20, 1978, and became effective 30 days later on October 20, 1978.

2. *The date the application was initially submitted with respect to the human drug product under section 505(b) of the Federal Food, Drug, and Cosmetic Act:* June 25, 1981. The applicant claims September 23, 1982, as the date that the NDA (NDA 18–651) was initially submitted. However, FDA records indicate that the NDA was received on June 25, 1981. The date given by the applicant, September 23, 1982, is the date of resubmission of NDA 18–651, following the applicant's withdrawal of the NDA after its initial submission.

3. *The date the application was approved:* May 31, 1985. The applicant claims May 13, 1986, as the NDA approval date. However, FDA records indicate that NDA 18–651 was approved on May 31, 1985. The date given by the applicant, May 13, 1986, is the date that DEA rescheduled Marinol® (dronabinol) from Schedule I to Schedule II. In identifying the date of approval of the application, FDA looked to the language of the Drug Price Competition and Patent Term Restoration Act of 1984 (hereinafter referred to as "the statute"), which defines "approval phase" of a regulatory review period for a human drug product as "the period beginning on the date an application was initially submitted for the approved human drug product under section 351, subsection (b) of section 505, or section 507 and ending on the date such application was approved under such section." (35 U.S.C. 156(g)(1)(B)(ii).) Moreover, in the preamble to the final rule on patent term restoration regulations (53 FR 7298; March 7, 1988), FDA specifically addressed the question of whether drugs which are regulated by DEA as controlled substances should be considered to be approved when the NDA is approved or when these drugs are scheduled domestically under the Controlled Substances Act. In responding to comments on this very question, FDA concluded that the NDA approval date is the relevant date. The reason for FDA's conclusion was that the statute referred only to section 351 of the Public Health Service Act and to sections 505(b) and 507 of the Federal Food, Drug, and Cosmetic Act in the statute's definition of regulatory review period. The statute made no such reference to the Controlled Substances Act. The Court of Appeals for the District of Columbia Circuit has upheld FDA's interpretation of when a drug is deemed approved under this statute. *Mead Johnson Pharmaceutical Group* v. *Bowen, 838 F.2d 1332, 1333 (D.C. Cir. 1988).*

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the U.S. Patent and Trademark Office applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, the applicant requests 1,826 days of patent term extension.

Anyone with knowledge that any of the dates as published is incorrect may, on or before June 26, 1989, submit to the Dockets Management Branch (address above) written comments and ask for a redetermination. Furthermore, any interested person may petition FDA, on or before October 24, 1989, for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, Part 1, 98th Cong., 2d Sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Comments and petitions should be submitted to the Dockets Management Branch (address above) in three copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. Comments and petitions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: April 19, 1989.

Stuart L. Nightingale,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

Health Resources and Services Administration

Advisory Council; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following National Advisory body scheduled to meet during the month of June 1989:

Name: Maternal and Child Health Research Grants Review Committee.

Date and Time: June 21–23, 1989, 9:00 a.m.

Place: Maryland Room, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

Open on June 21, 1989, 9:00 a.m.–10:00 a.m.; Closed for remainder of meeting.

Purpose: To review research grant applications in the program area of maternal and child health administered by the Bureau of Health Care Delivery and Assistance.

Agenda: The open portion of the meeting will cover opening remarks by the Director, Division of Maternal and Child Health Program Coordination and Systems Development, who will report on program issues, congressional activities and other topics of interest to the field of maternal and child health. The meeting will be closed to the public on June 21, at 10:00 a.m. for the remainder of the meeting for the review of grant applications. The closing is in accordance with the provisions set forth in section 552b(c)(6), Title 5 U.S.C. Code, and the Determination by the Administrator, Health Resources and Services Administration, pursuant to Pub.L. 92–463.

Anyone requiring information regarding the subject Council should contact Gontran Lamberty, Dr. Ph.H., Executive Secretary, Maternal and Child Health Research Grants Review Committee, Room 9A–08, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443–2190.

Agenda Items are subject to change as priorities dictate.

Date: April 21, 1989.

Jackie E. Baum,

Advisory Committee Manogement Officer, HRSA.

BILLING CODE 4160-15-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[CA-060-09; CACA 13781]

California; Realty Action; Partial Termination of Classification for Recreation and Public Purposes

AGENCY: Bureau of Land Management, Interior.

SUMMARY: This action partially terminates a Notice which classified 2,172.75 acres of public domain lands as suitable for recreation and public purposes. Due to comments from the public, the City of San Diego and the BLM determined 80 acres of the land is

BEST COPY AVAILABLE

VOL 54 ISS 80 AP 27 1989 UMI

unsuitable for recreation and public purposes.

FOR FURTHER INFORMATION CONTACT: Mike Selman, Palm Springs—South Coast Area Office, Bureau of Land Management, 1900 Tahquitz—McCallum Way, Suite B–1, Palm Springs, CA 92262.

1. The Notice of Realty Action, published May 7, 1984, in FR Vol 49 No. 89, pages 19418–19419, which classified certain public domain lands as suitable for recreation and public purposes is hereby terminated as to the following lands:

San Bernardino Meridian

T. 12 S., R. 1 W.,
Sec. 24, E½¼NW¼.

The area contains 80 acres in San Diego County.

2. At 10:00 a.m. on May 12, 1989, the lands described in paragraph 1 will be opened to operation of the public land laws subject to valid existing rights and the provisions of applicable law.

Ed Hastey,
State Director.

[OR–060–09–6332–02: GP9–144]

Temporary Closure of Public Lands

AGENCY: Bureau of Land Management, Interior.

ACTION: Temporary closure of public lands in Lane County, Oregon.

SUMMARY: Notice is hereby given that certain public lands in Lane County, Oregon are temporarily closed to all public use, including recreation camping, shooting, hiking and sightseeing, from May 15, 1989 through October 31, 1989. The closure is made under the authority of 43 CFR 8364.1.

The public lands affected by this emergency closure are specifically identified as follows:

Willamette Meridian, Oregon

T. 16 S., R. 7 W.
Sec. 19: SE¼SE¼, excluding the right-of-way of Oregon State Highway 36
Containing approximately 36 acres.

The following persons, operating within the scope of their official duties, are exempt from the provisions of this closure order: Bureau employees; state, local and federal law enforcement and fire protection personnel; the holders of BLM road use permits that include roads within the closure area; the contractor authorized to construct the Lake Creek Falls Fish Ladder project and their subcontractors. Access by additional parties may be allowed, but must be approved in advance in writing by the Authorized Officer.

Any person who fails to comply with the provisions of this closure order may be subject to the penalties provided in 43 CFR 8360.0–7, which include a fine not to exceed $1,000 and/or imprisonment not to exceed 12 months.

The public lands temporarily closed to public use under this order will be posted with signs at points of public access.

The purpose of this temporary closure is to provide for public safety and the protection of property and equipment during the mobilization, construction and de-mobilization phase of the Lake Creek Falls Fish Ladder project.

EFFECTIVE DATES: May 15, 1989 through October 31, 1989.

ADDRESSES: Copies of the closure order and maps showing the location of the closed lands are available from the Eugene District Office, P.O. Box 10226 (1255 Pearl Street), Eugene, Oregon 97440, or the Coast Range Resource Area Office, 1144 Gateway Loop, Springfield, Oregon 97477.

FOR FURTHER INFORMATION CONTACT: Wayne E. Elliott, Coast Range Area Manage, Eugene District Office, at (503) 683–6999.

Date: April 14, 1989.

Wayne E. Elliott,
Area Manager.

Roswell District Grazing Advisory Board Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Roswell District Grazing Advisory Board Meeting.

SUMMARY: This notice sets forth the schedule and agenda of a forthcoming meeting of the Roswell District Grazing Advisory Board.

DATE: Wednesday, May 31, 1989, beginning at 10 a.m. A public comment period will be held following conclusion of the agenda.

Location: BLM Roswell District Office, 1717 West Second St., Roswell, NM 88201.

FOR FURTHER INFORMATION CONTACT: David L. Mari, Associate District Manager, or Terry Keim, Public Affairs Specialist, Bureau of Land Management, P.O. Box 1397, Roswell, NM 88201, (505) 622–9042.

SUPPLEMENTARY INFORMATION: Agenda items include Monitoring Systems, Polycorders, Prescribed Burning, Ft. Stanton, Carlsbad/Roswell RMP, 8100 Funding, and updates on the Productivity Pilot and the Brush Control EIS/EA. The meeting is open to the public. Interested persons may make oral statements to the Board during the public comment period or may file written statements. Anyone wishing to make an oral statement should notify the Associate District Manager by May 24, 1989. Summary minutes will be maintained in the District Office and will be available for public inspection during regular business hours within 30 days following the meeting. Copies will be available for the cost of duplication.

Vale District Grazing Advisory Board; Meeting

AGENCY: Vale District, Bureau of Land Management, Interior.

ACTION: Notice of meeting.

SUMMARY: Notice is given in accordance with Pub. L. 92–463 that a meeting of the Vale District Grazing Advisory Board will be held May 25, 1989.

The agenda for the meeting will include: election of officers, White Horse Butte Allotment Management Plan—alternatives, Riparian management initiatives—Trout Creek area, District road maintenance programs—report and recommendations, District noxious weed control program, Report on new billing and collection procedures, Report on litigation affecting livestock grazing on public lands, Holistic Range Management program, the Governor's Watershed Enhancement Board proposal, and Resource area reports on rangeland management activities.

The meeting is open to the public. Interested persons may make oral statements to the Board or may file written statements for the Board's consideration. Anyone wishing to make oral statements may do so at 1:30 p.m. the day of the meeting.

Summary minutes of the Board's meeting will be maintained in the district office and will be available during regular business hours for public inspection, or personal copies may be purchased for the cost of duplication, within 30 days following the meeting.

DATES: The meeting will begin at 10:00 a.m. May 25, 1989.

ADDRESSES: The meeting will be held in the conference room of the District Office, 100 Oregon Street, Vale, OR 97918.

FOR FURTHER INFORMATION CONTACT: Gerard Hubbard, Bureau of Land Management, Vale District, P.O. Box 700, Vale, OR 97918. (Telephone 503 473–3144)

[CO–920–89–4111–15; COC30493]

Colorado; Proposed Reinstatement

April 17, 1989.

Notice is hereby given that a petition for reinstatement of oil and gas lease COC30493 for lands in Mesa County, Colorado, was timely filed and was accompanied by all the required rentals and royalties accruing from September 1, 1988, the date of termination.

The lessee has agreed to new lease terms for rentals and royalties at rates of $5.00 and 16⅔ percent, respectively.

The lessee had paid the required $500 administrative fee for the lease and has reimbursed the Bureau of Land Management for the estimated cost of this Federal Register notice.

Having met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral lands Leasing Act of 1920, as amended, (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate the lease effective September 1, 1988, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Questions concerning this notice may be directed to Joan Gilbert of the Colorado State Office at (303) 236–1772.

Linda L. Huff,
Acting Chief, Fluid Minerals Adjudication Section.

[AZ–920–09–4212–12; A–22435]

Arizona; Opening Order; Correction

April 20, 1989.

AGENCY: Bureau of Land Management, Interior.

ACTION: Correction notice.

SUMMARY: This notice provides a correction regarding an opening order of reconveyed land to the United States for the State of Arizona. A portion of the land opened was previously found suitable for disposal through exchange under section 206 of the Federal Land Policy and Management Act of 1976.

FOR FURTHER INFORMATION CONTACT: Lisa Schaalman, Arizona State Office, P.O. Box 16563, Phoenix, Arizona 85011, (602) 241–5534.

SUPPLEMENTARY INFORMATION: In Federal Register document 89–8289 on pages 14169 and 14170 in the issue of Friday, April 7, 1989, the following reconveyed land was erroneously opened to entry:

Gila and Salt River Meridian

T. 14 S., R. 27 E.,
Sec. 16, SE¼NE¼.
T. 14 S., R. 31 E.,
Sec. 2, lots 3 and 4, S½NW¼, SW¼.
T. 14 S., R. 32 E.,
Sec. 19, N½NE¼;
Sec. 20, N½.

The areas described comprise 760.20 acres in Cochise County.

The land is currently under an exchange application, serial number A–23606, and shall remain closed to the operation of all other public land laws, including the mining laws, in accordance with the realty action notice published in the Federal Register on Thursday, November 10, 1988, on pages 45599 and 45600.

Marsha L. Luke,
Acting Chief, Branch of Lands Operations.

BILLING CODE 4310–40–M

[CA–060–09–4212–14; CA–17912]

California Desert District, Realty Action, Noncompetitive Sale of Public Lands, San Bernardino County, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Noncompetitive (Direct) Sale of Public Lands, CA–17912.

SUMMARY: The public land described below has been examined and found suitable for disposal under sections 203 and 209 of the Federal Land Policy and Management Act of October 21, 1976, 43 U.S.C. 1713 and 1719:

San Bernardino Meridian, California

T. 10 N., R. 1 W.,
Sec. 8; NE ¼;
Containing 160.00 acres.

The parcel will be offered by direct sale to the Atchison Topeka and Santa Fe Railway Company. Santa Fe has operated and maintained an authorized waste oil disposal site on the parcel since 1964.

The sale will be made on or about July 1, 1989. The appraised fair market value of the parcel is $48,000.00. All mineral interests will be conveyed with the surface estate. The United States mineral interests offered for conveyance have no known value. At the time of the sale, Santa Fe will be required to deposit a $50.00 nonrefundable application fee for conveyance of the mineral estate.

The parcel is difficult and uneconomic to manage as part of the public lands,

VOL. 54 ISS. 80 AP 27 1989 UMI

and is not suitable for transfer to another Federal, State or local agency.

Existing development and current use of the parcel are an integral part of the overall Santa Fe operation in Barstow, California. Speculative bidding could jeopardize future economic viability and control of the waste oil disposal operation. There is a need to recognize the established use which would be threatened if the parcel were purchased by other than the existing authorized user.

Sale of the parcel is consistent with land use planning decisions and current policy. There is no conflict with local plans and zoning. The public interest would be served by completing the sale.

The public land to be conveyed will be subject to the following terms and conditions:

A. Reservation to the United States of a right-of-way thereon for ditches or canals constructed by the authority of the United States, Act of August 30, 1890, 43 U.S.C. 945.

B. *Third Party Rights.* Public land conveyed will be subject to all valid existing rights including the following:

1. Those rights granted to the County of San Bernardino for Irwin Road, a public highway established under Revised Statute 2477, formerly 43 U.S.C. 932.

2. Those rights for a 33kC electric distribution line granted to Southern California Edison Company by Right-of-Way LA-054906 under the Act of March 4, 1911, as amended, 43 U.S.C. 961.

3. Those rights for a 220kV electric transmission line and a 115kV electric transmission line granted by Rights-of-Way LA-0150685 and R-4879 under the Act of March 4, 1911, as amended.

As provided in 43 CFR 2711.1-2, the publication of this notice in the **Federal Register** shall segregate, subject to valid existing rights, the public land described herein from all other forms of appropriation under the public land laws, including the mining laws and the mineral leasing laws. The segregative effect will terminate upon issuance of patent, upon publication in the **Federal Register** of a termination of the segregation, or 270 days from the date of this publication, whichever occurs first.

Additional information about this sale is available at the Barstow Resource Area Office, 150 Coolwater Lane, Barstow, CA 92311 (619-256-3591) and the California Desert District Office, 1695 Spruce Street, Riverside, CA 92507.

For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the District Manager at the above address. In the absence of any objections, this realty action will become the final determination of the Department of the Interior, and the required payments requested from the Atchison Topeka and Santa Fe Railway Company. Payment of the purchase price in full shall be in accordance with 43 CFR 1822.1-2 and 2711.3-3(b).

The land will not be offered for sale for at least 60 days after the date of this notice.

Date: April 18, 1989.

James L. Williams,

Acting, District Manager.

[FR Doc. 89-10110 Filed 4-26-89; 8:45 am]

BILLING CODE 4310-40-M

[CA-940-09-4212-13; CACA 22587]

California Realty Action; Exchange of Public and Private Lands in Riverside County and Order Providing for Opening of Public Land

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of issuance of land exchange conveyance document and opening order.

ADDRESS: Inquiries concerning the land should be addressed to: Chief, Branch of Adjudication and Records, Bureau of Land Management, California State Office, 2800 Cottage Way (Room E-2841), Sacramento, California 95825.

SUMMARY: The purpose of this exchange was to acquire the non-Federal lands located within the Coachella Valley Preserve, a habitat of the Coachella Valley Fringe-Toed Lizard. The exchange will enhance the management capabilities for the Preserve. The lizard is federally listed as threatened and State listed as endangered. The lands acquired do not constitute habitat for the lizard, but provide a sand source required for the continuing production of active sand dune areas that are critical habitat for the lizard.

FOR FURTHER INFORMATION CONTACT: Mike Selman, Palm Springs—South Coast, Resource Area, Bureau of Land Management, 1900 Tahquiz-McCallum Way, Suite B-1, Palm Springs, CA 92262, Telephone (619) 323-4421.

1. The United States issued land exchange conveyance documents to The Nature Conservancy on September 9, 1988, September 30, 1988, March 27, 1989 and March 29, 1989 pursuant to the authority of Sec. 206 of the Act of October 21, 1976 (43 U.S.C. 1716) for the following described lands:

San Bernardino Meridian

T. 5 N., R. 2 W.,
Sec. 20, SW¼NW¼, NW¼SW¼.
T. 4 S., R. 6 E.,
Sec. 30, lot 11, S½NE¼NE¼SW¼, SW¼SE¼NE¼, N½SE¼SE¼NE¼.
T. 8 S., R. 8 E.,
Sec. 14, lots 1, 2, 3, 4.
T. 5 N., R. 13 W.,
Sec. 7, lots 1, 2, 5, 8, 9.
T. 5 N., R. 14 W.,
Sec. 20, NE¼SE¼;
Sec. 21, S½NE¼, SW¼NW¼, NW¼SW¼;
Sec. 22, SW¼NW¼.

The areas described contain 526.75 acres in Los Angeles and Riverside Counties. Additional lands will also be conveyed and published at a later date.

2. In exchange for the lands described in paragraph 1, on January 17, 1989, the United States accepted title to the following described private lands from The Nature Conservancy.

San Bernardino Meridian, California

T. 4 S., R. 6 e.,
Sec. 1 lot 2 of the NE¼ and lot 2 of the NW¼.
Sec. 13, NE¼, W½, and SE¼.
Sec. 14, NW¼, SW¼, SE¼, SW¼NE¼, W½NW¼NE¼, and SE¼NE¼NE¼.
T. 4 S., R. 7 E.,
Sec. 6, lot 2 of the NE¼, E½ of lot 2 of the NW¼, S½ of lot 2 of the SW¼, E½NE¼SE¼, SW¼NE¼SE¼, W½NE¼NW¼SE¼, NW¼NW¼ SE¼, E½SW¼NW¼SE¼, SE¼ NW¼SE¼, and SW¼SE¼.
Sec. 7, E½SE¼SE¼.
Sec. 8, E½, NW¼, and N½SW¼.
Sec. 9, SE¼, W¼NW¼NW¼, SE¼ NW¼NW¼, SW¼NE¼NW¼, and S½NW¼.
Sec. 15, All.
Sec. 16, E½, NW¼.
Sec. 17, NW¼NW¼NE¼, SW¼ NW¼NE¼, SE¼NW¼NE¼, and W½NE¼NW¼NE¼.

3. The above land descriptions contain exceptions too numerous to list here. A precise description of the exceptions is available in the case file CACA 22587 in the California State Office.

4. The non-Federal land is greater in value than the public land, and the excess non-Federal lands are donated to the United States.

5. At 10 a.m. on May 20, 1989, the lands acquired in the exchange shall be open to location under the United States mining laws and to the provisions of the mineral leasing laws, subject to valid existing rights and applicable law. All mineral locators assume the responsibility for assuring that the minerals being located were actually acquired by the United States.

Robert C. Nauert,

Chief, Branch of Adjudication and Records.

[FR Doc. 89-10117 Filed 4-26-89; 8:45 am]

BILLING CODE 4310-40-M

[CA-060-09-4212-13; CA-23937]

California Desert District Realty Action; Exchange of Public and Private Lands in San Bernardino and Inyo Counties, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action CA-23937, exchange of public and private lands.

SUMMARY: The following described public lands in San Bernardino County have been determined to be suitable for disposal by exchange under section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716:

San Bernardino Meridian, California

T. 3N., R. 4W.,
Sec. 16: NE¼NE¼, S½NE¼, N½SE¼, SW¼SE¼;
Sec. 19: lot 3, NE¼NE¼, S½NE¼, S½ lot 1 of NW¼, lots 1 and 2 of SW¼, N½SE¼;
Sec. 20: S½NE¼, NW¼, NE¼SW¼;
Sec. 21: S½NW¼;
Sec. 30: SE¼NE¼, lot 1 of NW¼, E½W½NW¼, E½NE¼SW¼, E½W½NE¼SW¼, NW¼SE¼;
T. 3N., R. 5W.,
Sec. 24: SE¼NE¼, NE¼SE¼, S½SE¼;
Sec. 25: E½NE¼, NW¼NE¼SE¼, N½SW¼NE¼SE¼, E½NE¼NW¼SE¼, NE¼SE¼NW¼SE¼;

Containing 1529.60 acres, more or less.

In exchange for these lands, the ARC-Las Flores Limited Partnership has offered the following non-Federal lands in San Bernardino and Inyo Counties:

San Bernardino Meridian, California

T. 3N., R. 2W.,
Sec. 5: S½NE¼;
T. 3N., R. 3W.,
Sec. 2: lots 5, 6, 11 and 12;
Sec. 3: lots 7, 8, 9 and 10;
Sec. 11: NE¼SE¼;
T. 5N., R. 3E.,
Sec. 16: N½, SE¼;
T. 5N., R. 4E.,
Sec. 13: San Bernardino County Assessors Parcel No. 527-201-05;
Sec. 16: lots 1 through 4, E½W½, E½;
Sec. 36: All;
T. 11N., R. 5E.,
Sec. 1: San Bernardino County Parcel Map 11970, Parcel No. 1;
Sec. 36: All;
T. 20N., R. 7E.,
Sec. 4: lot 4, W½SW¼;
Sec. 5: lots 1 and 2, S½NE¼, SE¼;
Sec. 6: NE¼NE¼;
Sec. 9: N½NE¼, N½S½NE¼, N½N½SE¼SE¼NE¼ (Inyo County Parcel Map 269, Parcel No. 1);
Sec. 10: NW¼NW¼, N½SW¼NW¼, N½N½S½SW¼NW¼ (Inyo County Parcel Map 269, Parcel No. 1);
T. 21N., R. 7E.,
Sec. 32: SE¼SE¼;
Sec. 33: SE¼SW¼;

Containing 4,212.90 acres, more or less.

The purpose of this exchange is to acquire significant natural resources and recreation lands, and to create more manageable public land units in the following areas of the California Desert District: Afton Canyon Natural Area, Grimshaw Lake Natural Area, Johnson Valley Off-Highway Vehicle Area, Juniper Flats Cultural Area.

Disposal of the fragmented and isolated public lands selected by the ARC-Las Flores Limited Partnership is consistent with the land tenure adjustment objectives of the California Desert Plan. The exchange would benefit the general public and the private sector. The public interest would be well served by completing the exchange.

The public land to be conveyed will be subject to the following terms and conditions:

A. Reservations to the United States

1. A right-of-way thereon for ditches or canals constructed by the authority of the United States, Act of August 30, 1890, 43 U.S.C. 945.

If Powersite Classification 100 (May 9, 1925) which currently affects the lands described below is not revoked by the time this exchange is completed, the following additional reservation to the United States will apply:

2. The right to itself, its permittees or licensees to enter upon, occupy and use any part or all of the E½NE¼ and NE¼SE¼, section 19 and the SW¼NE¼, Section 20, T. 3N., R. 4W., SBM lying within 50 feet of the centerline of the transmission line right-of-way of the Southern California Edison Company, Serial No. CA-21596, for the purposes set forth in and subject to the conditions and limitations of Section 24 of the Federal Power Act of June 10, 1920, as amended (16 U.S.C. 818).

B. Third Party Rights—Public Lands Conveyed Will Be Subject to the Following

1. Those rights for water pipelines and ditch granted to Mojave Water Agency, Desert Water Agency and Coachella Valley County Water District by Right-of-Way No. R-618 under the Act of February 15, 1901, as amended, formerly 43 U.S.C. 959.

2. Those rights for a 12kV electric distribution line granted to Southern California Edison Company by Right-of-Way No. R-4646 under the Act of March 4, 1911, as amended, 43 U.S.C. 961.

3. Those rights for a 115kV electric transmission line granted to Southern California Edison Company by Right-of-Way No. R-01725 under the Act of December 21, 1928, 43 U.S.C. 617d.

4. Those rights for an aqueduct, access roads, pumps and drainage areas granted to the State of California by Right-of-Way No. CA-3050 under the Act of October 21, 1976, 43 U.S.C. 1761.

5. Those rights for a double-circuit 115kV electric transmission line granted to Southern California Edison Company by Right-of-Way No. CA-21596 under the Act of October 21, 1976.

Lands to be conveyed to the United States will be subject to the following:

1. All mineral rights were previously reserved by the State of California on:

T. 3N., R. 2W., SBM,
Sec. 5: S½NE¼.
T. 5N., R. 3E., SBM,
Sec. 16: N½, SE¼.
T. 5N., R. 4E., SBM,
Sec. 16: lots 1 through 4, E½W½, E½;
Sec. 36: All.
T. 11N., R. 5E., SBM,
Sec. 36: All.

2. A one-sixteenth mineral interest was previously reserved by the State of California on:

T. 20N., R. 7E., SBM,
Sec. 4: lot 4, W½SW¼;
Sec. 5: lots 1 and 2, S½NE¼, SE¼;
Sec. 6: NE¼NE¼.

3. All mineral rights were previously reserved by a private third party on:

T. 11N., R. 5E., SBM,
Sec. 1: San Bernardino County Parcel Map 11970, Parcel No. 1.

4. All geothermal resources were previously reserved by a private third party on:

T. 20N., R. 7E., SBM,
Sec. 9: N½NE¼, N½S½NE¼; N½N½SE¼NE¼;
Sec. 10: NW¼NW¼, N½SW¼NW¼, N½N½S½SW¼NW¼.
T. 21N., R. 7E., SBM,
Sec. 32: SE¼SE¼;
Sec. 33: SW¼SW¼.

5. A fifteen-sixteenths geothermal resources interest was previously reserved by a private third party on:

T. 20N., R. 7E., SBM,
Sec. 4: lot 4, W½SW¼;
Sec. 5: lots 1 and 2, S½NE¼, SE¼;
Sec. 6: NE¼NE¼.

6. Various easements and rights-of-way to third parties.

As provided in 43 CFR 2201.1(b), the publication of this notice in the **Federal Register** shall segregate, subject to existing valid rights, the public lands described herein from all other forms of appropriation under the public land laws, including the mining laws and the mineral leasing laws. The segregative effect will terminate upon issuance of a conveyance document, upon publication in the **Federal Register** of a termination of the segregation, or two years from the

VOL 54 ISS 80 AP 27 1989 UMI

date of this publication, whichever occurs first.

The values of the lands to be exchanged are in approximate balance. Equalization of values will be achieved by acreage adjustment or a payment to the United States by ARC–Las Flores Limited Partnership of funds in an amount not to exceed 25 percent of the value of the public lands to be conveyed.

Additional information about this exchange is available at the Barstow Resource Area Office, 150 Coolwater Lane, Barstow, CA 92311 (619–256–3591) and the California Desert District Office, 1695 Spruce Street, Riverside, CA 92507.

For a period of forty-five (45) days from the date of publication of this notice in the **Federal Register** interested parties may submit comments to the District Manager, California Desert District at the above address. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

Dated: April 18, 1989.

James L. Williams,

Acting District Manager.

BILLING CODE 4310–40–M

[ID–943–09–4212–13; I–25616]

Issuance of Land Exchange Conveyance Document; Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Exchange of public and private lands.

SUMMARY: The United States has issued an exchange conveyance document to Keith Meyers and Sons, LTD, Limited Partnership, Rexburg, Idaho 83440, for the following-described lands under section 206 of the Federal Land Policy and Management Act of 1976:

Boise Meridian

T. 6 N., R. 38 E.,
Sec. 14, S½SW¼NE¼, N½NW¼SE¼.
Comprising 40.00 acres of public land.

In exchange for these lands, the United States acquired the following-described lands:

Boise Meridian

T. 7 N., R. 38 E.,
Sec. 16, NE¼NW¼.
Comprising 40.00 acres of private land.

The purpose of the exchange was to acquire the non-federal lands which have high public value for elk winter range. The public interest was well served through completion of this exchange.

The values of the federal public land and the non-federal land in the exchange were both appraised at $4,000.

Dated: April 20, 1989.

John Davis,

Deputy State Director for Operations.

Realty Action; Competitive, Direct, and Modified Competitive Sales of Public Lands in Nebraska

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action, sale of public lands in Grant, Hooker, and Thomas Counties.

SUMMARY: The Bureau of Land Management (BLM) has determined that the lands described below are suitable for public sale. Section 203 of the Federal Land Policy and Management Act (FLPMA) of 1976 (90 Stat. 2750; 43 U.S.C. 1713) requires the BLM to receive fair market value for the land sold and any bid for less than fair market value will be rejected. The BLM may accept or reject any and all offers, or withdraw any land or interest on the land for sale if the sale would not be consistent with FLPMA or other applicable law.

The fair market values, planning document, environmental assessment/land report, and memorandums and letters of Federal, state, and local contacts concerning the sale are available for review at the Bureau of Land Management, Newcastle Resource Area Office. All bids and requests for information should be sent to BLM, Newcastle Resource Area, 1501 Highway 16 Bypass, Newcastle, Wyoming 82701, (phone (307) 746–4453).

NEW86268	T. 22 N., R. 30 W., Sec. 26: SW¼NW¼	40.00
NEW86269	T. 23 N., R. 29 W., Sec. 34: SE¼SW¼	40.00

The publication of this Notice of Realty Action in the **Federal Register** shall segregate the above public lands from appropriation under the public land laws, including the mining laws. Any subsequent application shall not be accepted, shall not be considered as filed and shall be returned to the applicant if the Notice segregates the land from the use applied for in the application. The segregation effect of this Notice will terminate upon issuance of a conveyance document, 270 days, or when a cancellation Notice is published, whichever occurs first.

Sale Procedures

1. The following sale will be conducted by competitive bidding: NEW86273. This parcel is provided legal access by Hooker County Road No. 2302, which crosses the parcel.

2. The following parcels will be offered by direct sale to the adjoining landowner: NEW86265, NEW86269, NEW86279. The adjoining landowner will be required to submit proof of adjoining landownership before a bid can be accepted.

3. The following parcels will be offered by modified competitive sale to the adjoining landowners: NEW86266, NEW86267, NEW86268, NEW86271, NEW86272, NEW86274, NEW86275, NEW86276, NEW86277, NEW86278, NEW86280, NEW86281, NEW86282, NEW86283, NEW86285, NEW86287. The apparent high bidder will be required to submit proof of adjoining landownership before the high bid can be accepted.

4. All bidders must be U.S. Citizens, 18 years of age or older, corporations authorized to own real estate in the state of Nebraska, a state, state instrumentality or political subdivision authorized to hold property, or an entity legally capable of conveying and holding land or interests in Nebraska.

5. Sealed bidding is the only acceptable method of bidding. All bids must be received in the Newcastle Resource Area Office by 11:00 a.m., July 26, 1989 at which time the sealed bid envelopes will be opened and the high bid announced. The high bidder will be notified in writing within 30 days whether or not the BLM can accept the bid. The sealed bid envelope must be marked in the front lower left-hand corner with the words "Public Land Sale, (identify serial number), Sale held July 26, 1989."

6. All sealed bids must be accompanied by a payment of not less than ten (10) percent of the total bid. Each bid and final payment must be accompanied by certified check, money order, bank draft, or cashier's check made payable to: Department of the Interior-BLM.

7. Failure to pay the remainder of the full bid price within 180 days of the sale will disqualify the apparent high bidder and the deposit shall be forfeited and disposed of as other receipts of the sale. If the apparent high bidder is disqualified, the next highest qualified bid will be honored or the land will be reoffered under competitive procedures. If two (2) or more envelopes containing valid bids of the same amount are received, supplemental sealed bidding will be used to determine the high bid. Additional sealed bids will be submitted to resolve all ties.

8. If any parcels fail to sell, they will be reoffered for sale under competitive procedures. For reoffered land, bids must be received in the Newcastle Resource Area Office by 11:00 a.m. on the fourth (4th) Wednesday of each month beginning August 23, 1989. Reoffered land will remain available for sale until sold or until the sale action is cancelled or terminated. Reappraisals of the parcels will be made periodically to reflect the current fair market value. If the fair market value of a parcel changes, the land will remain open for competitive bidding according to the procedures and conditions of this notice.

Patent Terms and Conditions

Any patents issued will be subject to all valid existing rights. Specific patent reservations include:

1. A right-of-way thereon for ditches or canals constructed by the authority of the United States, Act of August 30, 1890 (43 U.S.C. 945).

2. All minerals shall be reserved to the United States, together with the right to prospect for, mine, and remove the minerals. A more detailed description of this reservation, which will be incorporated into the patent document, is available for review at the BLM Newcastle Resource Area Office.

3. Parcels NEW86281, NEW86282: If Benjamin and Bernadette French do not purchase parcel NEW86281 or NEW86282, the conveyance will be subject to the existing grazing use of Benjamin and Bernadette French, holders of grazing authorization No. GR–8104. The rights of Benjamin and Bernadette French to graze domestic livestock on the real estate according to the conditions and terms of grazing authorization No. GR–8104 shall cease on February 28, 1990. The successful bidder is entitled to receive annual grazing fees from Benjamin and Bernadette French in an amount not to exceed that which would be authorized under the Federal grazing fee published in the **Federal Register.**

Compensation for Loss of Range Improvement

Parcels NEW86281, NEW86282: Benjamin and Bernadette French are the grazing lessees (GR–8104) and owners (100 percent interest) of the following authorized permanent range improvements: Project No. 667, a fence. If any persons other than Benjamin or Bernadette French are the successful bidders on the land being offered for sale, those persons shall be required to reimburse Benjamin and Bernadette French for the adjusted value of the range improvement and furnish proof to the Authorized Officer, Bureau of Land Management, Newcastle Resource Area, before conveyance can be made. If the bidder and grazing lessee are unable to agree on compensation for the range improvement, the authorized officer shall determine the adjusted value.

For a period of 45 days from the date of this notice published in the **Federal Register,** interested parties may submit comments to the District Manager, Casper District Office, 1701 East E, Casper Wyoming 82601. Any adverse comments will be evaluated by the State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become final.

Dated: April 18, 1989.

Mike Karbs,

District Manager (Acting).

Land Resource Management

AGENCY: Bureau of Land Management, Montana State Office.

ACTION: Notice of filing of plats of survey.

SUMMARY: Plats of survey for the following described land accepted March 28 and March 29, 1989, respectively, will be officially filed in the Montana State Office, Billings, Montana, effective 45 days after publication.

Principal Meridian, Montana

T. 15 N., R. 55 E.

VOL 54 ISS 80 AP 27 1989 UMI

The plat (in 3 sheets) representing the dependent resurvey of portions of the east and north boundaries, the subdivisional lines, and the adjusted original right and left bank meanders of a channel of the Yellowstone River in section 22, and the survey of the subdivision of sections 2, 10, 22, 26, and 27, the survey of a portion of the present right and left bank meanders of a channel of the Yellowstone River in section 22, and the survey of certain division of reliction lines in section 22, Township 15 North, Range 55 East, Principal Meridian Montana.

Principal Meridian, Montana

T. 11 N., R. 10 W.

The plat representing the dependent survey of portions of the west and north boundaries, and subdivisional lines and the survey of the subdivision of sections 6, 7, 8, and 18, Township 11 North, Range 10 West, Principal Meridian, Montana.

The triplicate original of the above described plats will be immediately placed in the open files and will be available to the public as a matter of information.

If protest(s) against any of these surveys are received prior to the date of official filing, the filing will be stayed pending consideration of the protest(s). These particular plats will not be officially filed until the day after all protests have been accepted or dismissed and become final or appeals from the dismissal affirmed.

These surveys were executed at the request of the Miles City and Butte Districts, respectively.

EFFECTIVE DATE: April 18, 1989.

FOR FURTHER INFORMATION CONTACT: Bureau of Land Management, 222 North 32nd Street, P.O. Box 36800, Billings, Montana 59107.

Dated: April 20, 1989.

Notice of Termination of Proposed Withdrawal and Reservation of Lands; Alaska

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This notice terminates the segregative effect of a proposed withdrawal and reservation of lands requested by the U.S. Army Corps of Engineers for use as a radio relay site.

EFFECTIVE DATE: April 27, 1989.

FOR FURTHER INFORMATION CONTACT: Sandra C. Thomas, BLM Alaska State Office, 222 W. 7th Avenue, No. 13, Anchorage, Alaska 99513-7599, 907-271-3342.

SUPPLEMENTARY INFORMATION: Notice of a proposed withdrawal and reservation of lands for the U.S. Army Corps of Engineers, was published in the **Federal Register** on July 7, 1977 (42 FR 34935). The purpose of the application, serial number AA-12812, was for use as a radio relay site. The Corps of Engineers has cancelled its application involving the following described lands:

Copper River Meridian

A tract of land in protracted T. 7 N., R. 2 E., more specifically described as follows:

Commencing at a point identical with latitude 62°24'17"N., longitude 145°07'45"W.; thence east 165 feet to the true point of beginning for this description; thence south 165 feet; thence west 330 feet; thence north 330 feet; thence east 330 feet; thence south 165 feet to the point of beginning.

The area described contains approximately 2.50 acres.

At 8:00 a.m. Alaska Daylight Time, on the date of this publication, such lands will be relieved of the segregative effect of the proposed withdrawal.

Sue A. Wolf,

Chief, Branch of Land Resources.

BILLING CODE 4310-JA-M

Minerals Management Service

Development Operations Coordination Document; Stone Petroleum Corp.; Receipt of Outer Continental Shelf

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed development operations coordination document (DOCD).

SUMMARY: Notice is hereby given that The Stone Petroleum Corporation has submitted a DOCD describing the activities it proposes to conduct on Lease OCS-G 5218, Block 17, Vermilion Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an existing onshore base located at Intracoastal City, Louisiana.

DATE: The subject DOCD was deemed submitted on April 14, 1989. Comments must be received within 15 days of the publication date of this Notice or 15 days after the Coastal Management Section receives a copy of the plan from the Minerals Management Service.

ADDRESSES: A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m, Monday through Friday). A copy of the DOCD and the accompanying Consistency Certification are also available for public review at the Coastal Management Section Office located on the 10th Floor of the State Lands and Natural Resources Building, 625 North 4th Street, Baton Rouge, Louisiana (Office Hours: 8 a.m. to 4:30 p.m, Monday through Friday). The public may submit comments to the Coastal Management Section, Attention OCS Plans, Post Office Box 44487, Baton Rouge, Louisiana 70805.

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736-2867.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to Sec. 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to Section 930.61 of Title 15 of the CFR, that the Coastal Management Section/Louisiana Department of Natural Resources is reviewing the DOCD for consistency with the Louisiana Coastal Resources Program.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective May 31, 1988 (53 FR 10595).

Those practices and procedures are set out in revised Section 250.34 of Title 30 of the CFR.

Dated: April 17, 1989.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

BILLING CODE 4310-MR-M

National Park Service

National Capital Memorial Commission; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the National Capital Memorial Commission will be held on Tuesday, May 2, at 1:30 p.m., in the Executive Conference Room at the National Capital Planning Commission, 1325 G Street, NW., Washington, DC.

The Commission was established by Pub. L. 99-652, for the purpose of advising the Secretary of the Interior or the Administrator of the General Services Administration, depending on which agency has jurisdiction over the lands involved in the matter, on policy and procedures for establishment of (and proposals to establish) commemorative works in the District of Columbia or its environs, as well as such other matters concerning commemorative works in the Nation's Capital as it may deem appropriate. The Commission evaluates each memorial proposal and makes recommendations to the Secretary or the Administrator with respect to appropriateness, site location and design, and serves as an information focal point for those seeking to erect memorials on Federal land in Washington, DC, or its environs.

The members of the Commission are as follows:

James Ridenour, Chairman, Director, National Park Service, Washington, DC.
George M. White, Architect of the Capital, Washington, DC.
Honorable Andrew J. Goodpaster, Chairman, American Battle Monuments Commission, Washington, DC.
J. Carter Brown, Chairman, Commission of Fine Arts, Washington, DC.
Glen Urquhart, Chairman, National Capitol Planning Commission, Washington, DC.
Honorable Marion S. Barry, Jr., Mayor of the District of Columbia, Washington, DC.
John Alderson, Administrator, General Services Administration, Washington, DC.
Honorable Frank Carlucci, Secretary of Defense, Washington, DC.

The purpose of the meeting will be to review and take action on the following:

I. Review of new memorial proposals introduced into the Congress:

S. 618—A bill to authorize a memorial to Mahatma Gandhi
S. 160—A bill to require the construction of a memorial to honor members of the Armed Forces who served in World War II
H.R. 537—Memorial and museum to honor members of the Armed Forces who served in World War II, and to commemorate that conflict
S. 619 and H.R. 937—Monument to honor Martin Luther King, Jr., by the Alpha Phi Alpha Fraternity

BILLING CODE 4310-70-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 332-275]

Competitive Position of the U.S. Gear Industry in U.S. and Global Markets

AGENCY: United States International Trade Commission.

ACTION: Institution of investigation and scheduling of public hearing.

SUMMARY: At the request of the U.S. Trade Representative (USTR), the Commission instituted investigation No. 332-275 under section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)), for the purpose of assessing the competitive position of the U.S. gear industry in U.S. and global markets. The USTR asked that the commission provide its completed report no later than 12 months from receipt of the request.

EFFECTIVE DATE: April 14, 1989.

VOL 54 ISS 80 AP 27 1989 UMI

FOR FURTHER INFORMATION CONTACT: Dennis Fravel (telephone 202–252–1404) or Sylvia McDonough (202–252–1393), Machinery and Equipment Division, Office of Industries, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–252–1810. Persons with mobility impairments who need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–252–1000.

Background and Scope of Investigation: On March 27, 1989, the Commission recieved a request from the USTR to "conduct an investigation and prepare a report on the competitive position of the U.S. gear industry in U.S. and global markets". As requested by the USTR, the Commission's report will provide, to the extent possible, the following:

—Profiles of the U.S. industry and major foreign industries;

—A descriptive assessment of the global market for gears, to the extent possible, using categories of gear products most useful to the industry;

—A comparison of U.S. and foreign producers' strengths and weaknesses in such areas as: (1) Raw material, labor, and capital availability; (2) technological capabilities; (3) extent of plant and equipment modernization; (4) end-product quality, pricing, and service support; and government involvement.

—U.S. and foreign industry and U.S. consuming industry views on market direction and potential for the U.S. industry.

Public Hearing: The Commission will hold a public hearing in connection with this investigation beginning at 9:30 a.m. on November 1, 1989, at the U.S. International Trade Commission Building, 500 E Street SW., Washington, DC. All persons will have the opportunity to appear by counsel or in person, to present information, and to be heard.

Requests to appear at the public hearing should be filed with the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC, 20436, not later than the close of business (5:15 p.m.) on October 18, 1989. To be assured of consideration by the Commission, a prehearing statement should be submitted not later than the close of business on October 25, 1989. Posthearing statements must be submitted not later than the close of business on November 15, 1989.

If the number of persons requesting an opportunity to appear by counsel or in person is large, limitation of time for presentation of oral testimony is in the public interest to ensure that all viewpoints are aired. Accordingly, in scheduling appearances at the hearing, the time to be allotted to witnesses for the presentation of oral testimony may be limited. The Commission will determine appropriate allocations of time based on the number of persons requesting an opportunity to appear. Questioning of witnesses will be limited to members of the Commission and its staff and witnesses should be prepared to provide additional information in response to such questioning.
